Re Reopening of Manston Airport

I can't see any material change that has happened since the June 2019 that would make a difference to previous submissions

Tdc declared climate emergency. How is reopening Manston in line with this?

Ramsgate Regeneration monies awarded. We need to encourage maritime and tourism, fright planes landing over the town make the levelling up pointless

covid has changed freight, as it's not able to bring belly hold in as much, but this will change back rapidly. There is no overarching need for more freight.

BA leaving Gatwick, an already working airport with infrastructure. Capacity should be used before reopening an airport that will add more miles to deliveries

Ramsgate is trying to be a tourist attraction again dirty old planes landing over the town will squash any chance of revitalising tourism
