For the attention of the Manston Airport case team.

When Ramsgate is just starting to be regarded as a great tourist destination providing many local jobs, the prospect of noisy planes landing and taking off during the day is a kick in the teeth. RSP have admitted their job estimates were wildly exaggerated and there is no need for a cargo hub in the least accessible part of the south east, miles from any location which would need the cargo.

Please reject this appalling plan for the sake of all Ramsgate and Herne Bay residents.
