To the transport infrastructure planning unit,

I have strong objections to the proposed cargo hub at the disused manston airport. I have read the comprehensive report from the initial inspectorate it is very clear that there absolutely no need for a cargo hub. There was no need prior to the pandemic and this pandemic has only made it clearer to the community.

Manston doesn't offer any advantage over the existing airports and would only Impact hugely on our environment.

I love living in Ramsgate and have done for the past 7 years I feel having an aircraft flying overhead at the regular rate polluting the air will ruin all the good that is currently happening. With the property boom and new businesses popping up this would have such a detrimental effect on the area. Thanet District Council declared a climate emergency and this is one sure way, of not being able to meet our targets.

Thanet has some incredible nature reserves which locals schools and tourists flock to. The noise pollution alone from the airport would have great harm on on the well being of everyone.

The vast amount of listed buildings in Ramsgate can not be soundproofed.

The government has been urged to radically cut greenhouse gas emissions from aircraft. Research shows that BA 'alone counted for as much carbon dioxide as all the vans on UK Roads' (Times 29/3/21)

Yours sincerely,
Julia Whittle
Ramsgate resident
