Re: DCO consent order for the former Manston Airport, Thanet, Kent.

11<sup>th</sup> November 2021

Dear Sirs,

The latest report from "Ove Arup" confirms that once again there is no need for a cargo airport at Manston so can we now let Common Sense Prevail and let the 40,000 residents get on with their lives.

Before the Covid lockdown, tourism in this part of the world was looking very promising and now with more and more people holidaying in Ramsgate the last thing we need are noisy aircraft polluting the air in our seaside town, we also have many visitors in our "Royal Ramsgate Harbour" who will soon disappear if Cargo Planes are continuously roaring over their heads which will destroy much needed revenue for the town. There will be a substantial increase in road freight to and from airport, further adding to the environmental pollution, and will be a huge burden on our roads which are very congested at the best of times. We also have a large amount of listed, old buildings in Ramsgate and they will not withstand the vibration of many, many old cargo planes!!!!

RSP also promise many jobs – there have never been more than 70 employees when the airport was open before.

If HM Government is serious about protecting towns like Ramsgate, already under threat from rising sea levels, and with its suburbs less than 1.5 kilometers from the airport runway, then please, please listen to what the Planning Executive and many other experts have had to say against a 24/7 hub airport in this area!! Please keep politics out of this and do the right thing!!

Yours Sincerely,

Davena Green
