Subject: Manston Airport - against
Date: 11 November 2021 20:53:31

I am writing to express my concern that the matter of an airport in Manston is still being considered.

I am a resident of Ramsgate and a business owner. As a resident I'm extremely fearful of a freight hub, of all the noise and air pollution that would bring. I have a small child and worry about the health effects to him. I have a business that relies on local trade as well as tourist trade. During the pandemic there has been a surge of staycations and I have seen the benefit in real terms in my business. This area desperately needs and relies on tourism.

I believe that the people in favour of this airport are deluded. There is no proof of a great number of jobs and this would certainly outweigh the amount of jobs lost if tourism was effected. I believe that the noise and air pollution would be extremely detrimental to the area.

If this government are truly wanting to make people outside of London feel like they are being heard then I cannot believe they would back such an outrageously unpopular decision. The local MP's might say that everyone wants the airport but they are wrong.

Locals do not want an airport.

Businesses would suffer if people stop holidaying in Thanet.

An airport is not needed locally and the position of an airport in this area is useless for links to the rest of the country.

Thanet has the most sunshine in the country, this needs to be used for farming or solar power.

Let's look forward instead of looking backwards. We need strong decisions that look to the future. Approving this airport would let down the community and plunge this area into even further deprivation.

Please listen to the people living here, not the out of touch MP's and people just in this for a quick buck.

Regards

Wednesday Lyle
