Dear Sir

After living hell with noise, pollution and fear when the airport was open ,I wish to say I am still opposed to the opening of the airport at Manston, especially now when we are so concerned about the damage being done to the planet from development of projects like the airport. How can we hold ourselves upright with other countries when we are considering doing this, going against everything we are telling other countries to? It has been proved that this is totally unnecessary, the airport isn't needed . There are too many people thinking of their own selfish interests and not the good of the world.Why do we have to have vegetables and fruit from such far away places like Peru, Kenya Australia? It's so ridiculous when we can produce so much ourselves.

Yours

Heather Perkins, [REDACTED]
