Subject: Plan objection
Date: 13 November 2021 18:31:18

Dear Sir,

I would like to lodge strongly my objections against such a plan. I do have family within this area of the scheme. I do believe it will bring some benefit to the area in a small number of jobs created!

However my main train of thought is to protect our environment. At this critical time in ALL our lives why would we want to increase further carbon omissions. The vast increase in diesel lorries coming and going.

I have read that other established airports have spare capacity to handle any increase in freight!

The plan is flawed in my judgement and based purely on outside investment making profit! Unfortunately a familiar tale! Something we are now paying for!

So please put my thoughts to a definite NO to this project!

Yours sincerely,

Mr PJ Blood
