Representations on the Independent Assessor's Report

I am pleased to see this report finds there is no need for the proposed airport. The Secretary of State should now refuse consent without further delay. Granting consent would result in a little- used facility blocking the real local employment potential of alternative uses.

The original decision by the Secretary of State to grant consent presumably decided the need for an airport outweighed the very real environmental noise and air pollution impact. The lack of need for an airport shown in the report suggests the balance has shifted in favour of protecting the local population from significant environmental damage. This should be a contributory reason for refusing consent.

Yours sincerely,
