To whom it may concern,

My Husband and I are in our twilight years and feel we should express how we desperately need Manston Airport up and fully operational for the benefit of the whole of Thanet and Kent. The need for work/jobs is desperate. Young people are moving away to find work. Riveroak have the opportunity to make the area thrive in many ways giving hope to young people near and far. More than ever we need Cargo planes from around the world bringing goods and food to our Country. The modern planes will be so much better for the environment than hundreds of lorries travelling through the tunnel. Passenger flights to Amsterdam where you can fly to most parts of the world. Internal flights in our own Country for businesses to thrive. Manston an airport for 100 years we must build on this for the future.

Yours sincerely

Margaret Cook
