Hello

There have been many detailed reports where experts give reasons why a cargo hub at Manston is unnecessary.

I speak as a Ramsgate resident and local business owner who put other local businesses in contact with contracts totalling thousands of pounds this year alone.

If you proceed with the idea of a cargo hub at Manston, despite all the evidence against it, you will destroy Ramsgate.

Why? In a nutshell: polluting planes with their fumes and noise flying just above our town, our lives, and almost touching our chimney pots are quite possibly, the worst things I can imagine regarding Ramsgate's future.

If the idea of a cargo hub airport at Manston is not eventually put to bed, both my partner (a business owner whose work brings a positive experience to the local community) and I will leave the area. No doubt about it.

Asides from destroying Ramsgate, there are more significant environmental concerns. Global warming is well documented and should be at the top of all international governments lists.

Cargo can be flown into existing airports, and where possible, in the hull of planes already making the trip.

Thank you

Matt Savidge
