Good evening,

This message is to state my total aversity to the transformation of manston airport into a commercial hub.

This is based on many aspects, pollution both on the ground and from the air.

Too close a proximity to residential housing with the associated noise.

Not acceptable to local residents , many who require peaceful sleep to enable them to go to work without the concern of noise and deprived rest.

Just a few points said. There are many other issues I could mention having read the full report including fuel spillage in to the water table.

Please save the planet Thanet from this ecologic disaster.

Regards,

John Boorman
