---

Ronald Blay ( long time Ramsgate resident)

Oaps against a 24/7 freight terminal.

Good day to you I am adding my views against any reduction on expenditure of safety measures such as noise

mitigation, something that causes many types of illness and is very debilitating. This is only a part of the

problem there are now dozens of medical reports on the deep searching studies by qualified experts that clearly

and irrefutably has produced evidence of the high threat to residents health when over flown by low aircraft

that burn a gallon of kerosene a second many deaths have occurred from these tiny Particulates .There are air

filters that are advertised to scrub out these harmful particulates does RSP propose to put money up to supply

everyhome and schools with them, I think not. The HRA signed by our government clearly states if something is

a threat to life they must act to protect us, so are they going to stop this sword of Damocles' hanging over us

Or do nothing for us
