The reasons to oppose this proposed 'extra' runway are well documented by PINS . I agree with these points and ask 'what does an airport do in an emergency if what was built as an emergency runway (presumably for very good reasons) is no longer kept clear? Surely this goes against all airport safety requirements? Other points; noise, access by road/rail which are already heavily used, rail lines cannot be expanded, air and noise pollution will increase in a built up area and many more objections made by local town and village groups.
