

HTNC wish to raise concerns about not being consulted over the recent project changes (where the deadlines for consultation was 21st Jan).

Trafalgar Neighbourhood Council represents the residents of 2800 homes to the west of Horsham. With reference to the preliminary meeting on the 27th February, we have three waste sites neighbouring our parish so we are very concerned by the potential increase in waste from a 2-runway airport. The Gatwick proposed change of their incinerator to a waste sorting site would add lorries to our local roads if these sites are to be used by this airport.

We are not aware of any details as to the volume of waste expected from a two runway operation with 365,000 planes and eighty million passengers plus 14,000 workers. We therefore request this matter be included in the hearings.

We also request that climate change be included in the hearings.
