Subject: Comment on Examination Procedure

You don't often get email from [REDACTED]

Dear Sirs,

Registration Identification Number 20046365

I understand that comments are due on the Examination Procedure for the DCO by midnight tonight.

The matter of the impact of increased greenhouse gas emissions and the effect that these, and other emissions caused by aircraft, have on climate change is paramount. Yet there seems to be no provision for the examination of this aspect of the development.

In my view a climate hearing is essential for the proper examination of this development.

Yours sincerely

Gareth Hayton
