

I oppose Gatwick expansion proposals for following reasons:

- adverse impact on environment: increased carbon emissions, more air pollution, increase of local flood risk
- noise pollution currently a significant problem would become worse with more flights
- infrastructure struggling as it is, the new road layout only helps the terminals but not the surrounding areas that would need to cope with significant extra traffic, no improvement to rail link included in plans, there is no safe local cycle paths network that would encourage communiting by bike.
