

This is a new runway:

- 1) Not a development of an existing runway
- 2) It does not comply with the Governments Aviation Strategy
- 3) Will lead to an increase in aircraft noise due to some + 100,000 extra flights a year
- 4) There is a lack of affordable houses for workers & needed amenities and any that do relocate will not be easily able to walk or cycle to work
- 5) Low skilled jobs are offered with little job security due to the volatile nature of airports leisure business
- 6) Gatwick is served by the M23, which is deemed an unsafe smart road. Traffic increases for workers, passengers and freight will cause increased local congestion and air pollution
- 7) If the current emergency runway is not available should this proposal proceed, it will lead to additional air plane stacking, noise & air pollution
- 8) The train station can't be easily extended for the increased volume of passengers expected.
- 9) Extra carbon emissions will add to the climate emergency
