

There are several reasons why this proposal is unacceptable. I write this as a resident of [REDACTED]

1. We have significant climate warming and climate change and the pollution from aircraft will significantly increase. 2. There is already significant noise pollution affecting our rural village caused by Gatwick. Any more would be intolerable. 3. The case for economic benefits for the local area is questionable. Most of the extra flights would be to tourist destinations flying away from the UK. This does not bring economic benefit to our local economy on Gatwick Airport and airline. 4. How can we encourage other countries to reduce their carbon emissions, when Gatwick are proposing to dramatically increase them. 5. We are directly greatly affected by noise pollution, why have Gatwick not proposed any financial restitution to our village for the loss of our peace & quiet
