Dear Sir/Madam

Further to my numerous objections I am surprised that you have not adhered to the request to have this inane application withdrawn from the planning system.

The application is utterly flawed and much of what is being said is frankly an utter misrepresentation.

If this was to be approved there would be huge upheaval and such an infrastructure could not be operated effectively.

It is abundantly clear that Gatwick Airport are simply endeavouring to drive revenue streams and future profits and I'm sure that the venture capitalist and Vinci will do their utmost to sell the proposition at a huge profit. They will just walk away with further riches in their purses and we the local residents will be faced with a nightmare scenario.

Common sense must surely prevail and I do insist that my request for the withdrawal of the application is implemented with all haste. This whole thing is wasting a lot of time and money for residents and mental health is being affected in so many.

Please be reminded that the Norther Runway received consent as an emergency runway and this should remain. The potential for major catastrophic accidents will increase significantly. Look at our motorways. They are taking away hard shoulders and the current plan has caused many accident, indeed fatalities, this cannot be compared to the impact of the emergency runway suddenly and stupidly being operated as set out.

Yours faithfully

Andrew Braddon OBE
