

**Communities Against Gatwick Noise Emissions (CAGNE)**  
**Gatwick Airport Northern Runway project DCO application**  
**PINS Reference Number: TR020005**

---

**COVER DOCUMENT ON BEHALF OF CAGNE**  
**DEADLINE 4 (15 March 2024)**

---

**INTRODUCTION**

1. This is the cover document outlining the materials submitted by CAGNE in respect of Deadline 4.

**SUBMITTED DOCUMENTS**

*Post-hearing Submissions*

2. CAGNE has provided post-hearing legal submissions following on from both ISH 6 (Climate) and ISH 7 (Other Environmental Matters). These are attached separately.

*Air Quality*

3. CAGNE's consultants APS have provided an update note on Air Quality, providing clarification on the issues raised at ISH 7 and providing further representations on other air quality issues, following a review of the additional documents submitted by Deadline 3.
4. In addition, the Applicant's ADMS-Urban model files (limited to those provided) have been reviewed to understand what appears, from the written evidence provided by the Applicant, to be a poorly performing mode.

5. APS have identified a number of issues related to the air quality assessment and find that clarification should be provided and the assessment updated where necessary. Once updated, proportional mitigation and monitoring can be defined, hence the importance of a good assessment. The monitoring requirements are expected to be greater than those currently proposed.

### Transport

6. Sterling Transport Consultancy has provided a surface access transport update on behalf of CAGNE. Sterling have reviewed the material submitted by Deadline 3 by the Applicant and other parties in order to assess whether the various surface transport issues raised by CAGNE at the Written Representations stage have been resolved. In short, the update concludes that none of the material provided by either the Applicant or other parties to date has addressed the concerns previously outlined.

### Noise

7. Finally, Suono have provided a response on behalf of CAGNE following submission by the Applicant of Deadline 3 documents dealing with noise. Suono concludes that its concerns have not been allayed; basic information remains outstanding. It is critical that the Applicant provides the requested information so that effective scrutiny can be provided.

### **ACTION POINT FOR CAGNE FROM ISH-6**

8. This is addressed in CAGNE's separate post-hearing submissions in relation to ISH 6.
