Subject: Regular use of LGW Northern Runway

Sirs,

I am writing to reiterate the views I expressed in open meeting, namely that I am strongly in favour of allowing regular use of the Northern Runway.

I expressed the views that:

- Gatwick has been the major driver of economic growth and prosperity in Sussex, Surrey and Kent since I can recall events, in the 1960's.
- I want to ensure that such prosperity is afforded to our children, and their children, rather than have the area stagnate based on an ageing airport asset in need of investment.
- throughout my whole career as an accountant in practice in the area, I have seen the benefits of this thriving economy.
- unlike other suggestions to increase the required runway capacity in the south east, no public funds will be required.
- finally, please do not be swayed if large numbers of those who oppose make representations to you. Opposition tends to be loud, supporters do not tend to be so.

I do urge you please to take note on the above and all of my representations in open meeting.

Kind regards,
Paul Roe FCCA
