Dear Sir/ Madame,

In a world that is already suffering from the effects of climate change, indeed effects that are only going to get worse, I can not believe that you want to increase the amount of air traffic in our skies. To me you are only furthering the destruction of our natural world. We all need to think more regards our environment, both here and abroad, we cannot continuously use and abuse it without consequence. We can choose to make things better or not, which do you choose?

Yours hopefully

Angela Stone
