This should-not be done over years the planes have moved over our house ,used to need a telescope to see any ( 1970 )

And all day with an odd plane in night are to much

The pollution is to much

Timing and route should leave us less polluted and less noise all day and sometimes in the very late night

Adding more is not acceptable

Move to the Coast at a airport and then fly off over the water so that houses etc

Are in better comfort

Dot Thorp
