

Comments on ES Appendix 5.4.1 Surface Access Commitments - Version 3 (Application Document Ref: 5.3)

The updated ES SAC reduces the number of parking spaces that GAL are committed to but does not change the number of parking spaces at Car Park X or Purple Parking. GAL has provided more details on mode share commitments within the SAC, although no penalty for failing to meet these targets. AIPUT's concerns previously expressed in REP4-085 still remain.

Comments on response to Rule 17 Letter - Car Parking - Version 2 (Application Document Ref: 10.21)

The amended Rule 17 response features a small uplift in the comparison of Future Baseline and Proposed Development on airport passenger/visitor parking. AIPUT's views previously expressed relating to an insufficiently calculated baseline and other concerns in REP4-085 still remain.
