

Gatwick Airport directly benefits the local community with jobs and bringing in tourists to the area - It has for over 10 years had a huge benefit on my small business - currently 50% of self employed my income is solely from the Airport and it would be great if this could increase. It would not be what it is today without its continued support. I look forward to the airport growing along with the infrastructure around the area being invested in and improved. Also I believe my children will benefit from future jobs and investment in apprenticeships etc in the career fields that the airport can provide.
