**Subject:** Literally what the heck REF no. 20043917

We live on the flight path,. It is miserable  
The world is heating up- do we really need more planes- no we do not  
Stop being so damn stupid, the capacity you have at Gatwick is fine, we do not need more  
planes therefore we do not need more runways  
Shout the ridiculous inquiry down, save everyone lots of money and all you people involved  
can go and work at something productive
