**Subject:** new run way at Gatwick

Hello,

I am writing directly as I just get rather lost in all the different options etc.

I object to the new runway as most people do who live under the flightpaths, as I do because there would be more flights, i.e. more noise, more disturbances. Also there would be even more night flights which are even more disturbing, at least let us get some sleep.

There are all the other bits re pollution, co2 emissions, more traffic on the roads and general increase in noise.

I am sure gatwick would like it to increase profits, there is no other motive for them and they really do not care about their neighbours, they have pretend committees and complaints dept etc , which pay lip service to gatwick.

So in a few words my objections are more noise, pollution, disruption to the detriment of us who live under the flight paths and get disturbed by night flights or more money for gatwick.

Regards

Mr Richard Bell
