

Submission ID: 30149

I do not support the building of a new runway. There must be a carbon Cap to control emissions and greenhouse gasses, scope 3 emissions must be included in the cap.

I support the 0.5 decibel reduction, every year as proposed by PINS.

There must be a ban on night flights.

The airspace is not big enough, needs modernising. This should have been included in this application.

Gatwick must do more than monitor air quality.
