

Aircraft Noise – There should be a night ban on aircraft movements. Our sleep is often disturbed by jet engine noise. Unless a night ban is imposed the damage to health of on or near the flight path will worsen. (ISH9) Support the 0.5 decibel reduction every year in the noise envelope, as proposed by PINS (proposed at ISH9). If Gatwick disagrees, then they obviously don't believe that aircraft will get quieter as detailed in Environmental Statement Addendum Updated Central Case Aircraft Fleet Report Book 5 May 2024.

Air Quality – (ISH9) Gatwick offers nothing more than to 'monitor' air quality. This is not acceptable; air quality standards must be legally binding in the DCO. Gatwick must not be allowed to have it in the local authority agreement, known as a 106. Air quality standards are rising, so the DCO should have stringent mandatory targets that must be met by the airport with 2 runways.
