

LONDON
GATWICK

Gatwick Airport Northern Runway Project

Statement of Common Ground Between Gatwick Airport Limited and West Sussex County Council – Tracked Version

Book 10

VERSION: 3.0

DATE: AUGUST 2024

Application Document Ref: 10.1.10

PINS Reference Number: TR020005

Table of Contents

1	Introduction	3
2	Current Position	5
2.1.	Agricultural Land Use and Recreation	5
2.2.	Air Quality	6
2.3.	Capacity and Operations	22
2.4.	Climate Change	23
2.5.	Construction	29
2.6.	Cumulative Effects and Interrelationships	33
2.7.	Draft DCO and Explanatory Memorandum	34
2.8.	Ecology and Nature Conservation	62
2.9.	Forecasting and Need	89
2.10.	Geology and Ground Conditions	90
2.11.	Greenhouse Gases	93
2.12.	Health and Wellbeing	105
2.13.	Historic Environment	116
2.14.	Landscape, Townscape and Visual	124
2.15.	Major Accidents and Disasters	131
2.16.	Noise and Vibration	135
2.17.	Planning and Policy	166
2.18.	Project Elements and Approach to Mitigation	171
2.19.	Socio-Economics and Economics	180
2.20.	Traffic and Transport	202
2.21.	Waste and Materials	220
2.22.	Water Environment	229
3	Signatures	236
	Appendix 1: Record of Engagement Undertaken	237

1 Introduction

- 1.1.1 This Statement of Common Ground (SoCG) has been prepared in support of the examination phase for the proposed Gatwick Northern Runway Project (NRP). The Application was made by Gatwick Airport Limited (the Applicant) to the Secretary of State for the Department for Transport (the Secretary of State) pursuant to Section 37 of the Planning Act 2008 (PA 2008).
- 1.1.2 The Application comprises alterations to the existing northern runway which, together with the lifting of the current restrictions on its use, would enable dual runway operations. It also includes the development of a range of infrastructure and facilities which, with the alterations to the northern runway, would enable an increase in the airport's passenger throughput capacity. This includes substantial upgrade works to certain surface access routes which lead to the airport. A full description of the Proposed Development is included in **ES Chapter 5: Project Description** (Doc Ref. 5.1).
- 1.1.3 SoCGs are an established means in the planning process of allowing all parties to identify and focus on specific issues that may need to be considered during the Examination. The purpose and possible content of SoCG is detailed in the Department for Communities and Local Government's guidance entitled 'Planning Act 2008: examination of applications for development consent' (2015), stating:
- “A statement of common ground is a written statement prepared jointly by the applicant and another party or parties, setting out any matters on which they agree. As well as identifying matters which are not in real dispute, it is also useful if a statement identifies those areas where agreement has not been reached. The statement should include references to show where those matters are dealt with in the written representations or other documentary evidence.”*
- 1.1.4 The SoCGs between the Applicant and the local authorities comprises several documents, to which this document is one. The Statement of Commonality provides details of the structure and status of the SoCG between all the relevant Interested Parties, including the local authorities. Naturally, the level of detail across the suite of SoCG varies to reflect the nature and complexity of the matter, as well as the position between the parties.
- 1.1.5 This document solely relates to matters between the Applicant and West Sussex County Council. A summary of the meetings and correspondence that has taken place between the parties is detailed in **Appendix 1** of this document.
- 1.1.6 The engagement between the parties across the breadth of matters is ongoing. Therefore, the SoCG is an evolving document and the detailed wording within it is still being discussed in detail between the parties. Future iterations will be submitted at each deadline; and both parties reserve the right to supplement the matters identified as discussions progress, to ensure it is comprehensive and up to date.
- 1.1.7 This SoCG has been produced to confirm to the Examining Authority (ExA) where agreement has been reached between the parties, and where agreement has not (yet) been reached, and is presented in a tabular form. This SoCG does not seek to replicate information that is available elsewhere, either within the Application and/or Examination documents, referring out where appropriate. The terminology used within the SoCG to reflect the status between the parties is either:

- “Agreed” to indicate where a matter has been resolved to the satisfaction of the parties.
- “Not Agreed” to indicate a final position where parties cannot agree.
- “Under discussion” to indicate where matters are subject of on-going discussion with the aim to either resolve or refine the extent of disagreement between the parties.
- “No longer pursuing” where the stakeholder no longer pursues an interest in the matter.

1.1.8 It can be assumed that any matters not specifically referred to in Section 2 of this SoCG are not of material interest or relevance to West Sussex County Council; and therefore, have not been the subject of any discussions between the parties, or have been previously discussed and addressed through the DCO process. As such, those matters should be assumed to be agreed, unless otherwise raised in due course by any of the parties.

1.1.9 The versions of the SoCGs submitted at Deadline 9 reflect the discussions between parties since the previous versions submitted into the Examination at Deadline 5. This has allowed for substantive updates from both parties until 12 August 2024 (when the JLAs returned comments on their updated position). Following receipt of those comments and in view of the timescales of the examination, the Applicant has only provided updates to such matters where considered necessary/helpful in view of its previous stated response, including by reference to its closing submissions and/or where engagement has enabled matters to be further progressed (including through the Section 106 Agreement). Therefore updated commentary has not been provided for all matters.

1.1.10 Furthermore, updates to the SoCGs at Deadline 9 have been prepared in parallel with negotiations on the Section 106 Agreement. Whilst the parties have endeavoured to ensure the positions reflected in this SoCG reflect the agreement now reached, the parties prepared a joint statement to confirm the effect of the agreed s106 Agreement on resolving a number of issues which have been raised in the examination. The matters set out below by both parties should be read within the context of the joint position statement prepared by the Applicant and the JLAs submitted as part of the their respective Deadline 9 submissions and their respective closing submissions submitted at Deadline 9 where applicable to the topic in question.

2 Current Position

2.1. Agricultural Land Use and Recreation

2.1.1 **Table 2.1** sets out the position of both parties in relation to agricultural land use and recreation matters.

Table 2.1 Statement of Common Ground – Agricultural Land Use and Recreation Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
<i>There are no issues relating to Agricultural Land Use and Recreation in this Statement of Common Ground.</i>					

2.2. Air Quality

2.2.1 Table 2.1 sets out the position of both parties in relation to air quality matters.

Table 2.2 Statement of Common Ground – Air Quality Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.2.1.1	Assessment Scenarios (including 2047 Full Capacity)	<p>The concern is that the scenarios assessed in the ES do not provide a realistic worst-case assessment. This is particularly the case for those scenarios where both construction and operational activities are underway at the same time, but the assessment has treated them separately. The same concerns apply to the emissions ceiling calculations as to how realistic these are, particularly when there are construction and operational activities ongoing, and the emissions ceiling calculations treat these separately. In addition, there is no operational assessment for the final full-capacity assessment year of 2047.</p> <p>Updated position (Deadline 1): A key part of this concern is around the modelled scenarios assessed. It is welcomed that GAL propose to provide further information at the next air quality TWG. This matter will remain under discussion until this TWG has been held.</p> <p>It is noted that air quality should improve beyond 2038. However, it is our understanding that the ANPS requires a full assessment of the airport at full capacity.</p> <p>Updated position (Deadline 5): Gatwick Airport Limited (GAL) sets out in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries prepared by AECOM included a wide range of technical matters. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>The Applicant has provided information on road traffic emissions in 2047, but the impact of airport emissions, which will be of increased relative importance in 2047, have not been modelled for the airport at full capacity.</u></p>	<p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and available data. The assessment concludes that the impact of the Proposed Development would not be significant.</p> <p>Conservative assumptions being applied in the assessment include background values being frozen to 2030 and no improvements in aircraft emissions being accounted for in the air quality modelling.</p> <p>Traffic modelling has been undertaken for two construction scenarios, airfield construction and surface access (highways) construction. Further detail is contained in the Transport Assessment. The construction scenarios assume the peak construction traffic flows applied to the first year of airfield (2024) and surface access (2029) construction which is a conservative assumption since emissions and background concentrations are anticipated to improve in future years.</p> <p>As set out in paragraph 13.5.53 of ES Chapter 13: Air Quality, the 2029 surface access construction scenario represents years 2029-2032, during which there will be an overlap with the operation of the Project. The 2029 surface access construction scenario is a combined scenario considering the contribution from both construction and operational traffic over this period to represent a realistic worst case assessment.</p> <p>GAL proposes to set out the model scenarios and provide that summary at TWGs to be arranged for Q1 2024.</p> <p>An assessment of 2047 has been included in the ES Chapter 13 with an emissions inventory (Table 13.10.8), including aircraft and road vehicle emissions. The air quality assessment concludes that no significant effects for air quality are anticipated</p>	<p>ES Chapter 13 Air Quality [APP-038]</p> <p>Transport Assessment [AS-079]</p> <p>Appendix D of the Supporting Air Quality Technical Notes to the SoCGs [REP1-050]</p> <p>Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions [REP5-073](Dec Ref-10-38)</p>	Under discussion Not agreed

		<p>WSSC continues to consider that an EMG framework would be beneficial to avoid any unexpected adverse air quality outcomes. In the event that an EMG approach was not possible further safeguards should be adopted in an AQAP or air quality management plan</p>	<p>for 2047. Between 2038 and 2047 a number of predicted improvements to air quality would be expected to occur as a result of national efforts to reduce emissions and also as a result of the project.</p> <p>Background concentrations are expected to reduce between 2038 and 2047 and vehicle emissions would continue to reduce. Road traffic is the main source of emissions likely to result in an impact from the project due to the proximity of road sources to sensitive receptors, compared with aircraft emissions. Therefore, despite the uncertainty of predicting emissions for a future year of 2047, it has been concluded that the 2047 future year is not at risk of resulting in a significant impact to air quality.</p> <p>Section 13.10.163 of the assessment provides further detail.</p> <p>Updated Position (April 2024): The Applicant has provided further information regarding the 2047 assessment at Section 3 of Appendix D of the Supporting Air Quality Technical Notes to the SoCGs [REP1-050]. The Applicant notes that the JLAs have provided a submission on air quality at Deadline 3. The Applicant will review this submission and respond accordingly.</p> <p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p>Updated Position (July 2024): The Applicant has submitted its position regarding the 2047 assessment at Section 3 of Appendix D of the Supporting Air Quality Technical Notes to the SoCGs [REP1-050]. This was discussed at the July TWG and the Applicant’s position is unchanged.</p> <p>Updated position (Deadline 9): The latest position drafted relates to EMG rather than the assessment scenarios. The Applicant believes matter should be agreed and considered separately to EMG which is captured elsewhere in this table.</p>		
Assessment Methodology					
2.2.2.1	Air Quality and Emissions Mitigation Guidance for Sussex	The Applicant has not clearly demonstrated regard to the Sussex Air Quality and Emissions Mitigation Guidance or the Defra air quality damage cost guidance in assessing air quality impacts and mitigation measures.	This approach taken for the ES is consistent with the principles of the Clean Air Strategy and guidance set out in the Sussex Guidance; it follows requirements for EIA and NPSs; and	Table 7.2.1 of ES Needs Case Appendix 1 – National	Not Agreed Under discussion

		<p>Updated position (Deadline 1): It is noted that an appraisal of air quality damages has been presented in Table 7.2.1 of Needs Case Appendix 1 – National Economic Impact Assessment (APP-251). It is also noted that measures to mitigate air quality have been identified. It is understood from the December TWG air quality meeting that an AQAP will be produced by GAL. Within this AQAP it is requested that GAL demonstrate how the overall monetary disbenefits identified will be redressed by the measures proposed.</p> <p>As a matter of clarification it is noted that road traffic NOX and PM2.5 Other on-site operations are predicted to improved, can GAL outline the source of this improvement?</p> <p>Updated position (Deadline 5): Gatwick Airport Limited (GAL) sets of in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries prepared by AECOM included a wide range of technical matters. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position-(12 August 2024).</u></p> <p><u>The Councils continue to consider that the provision of information in line with Sussex Guidance would be beneficial for defining mitigation measures within the AQAP.</u></p> <p><u>The SACs have already been taken into account in the assessment of air quality impacts. The air quality effects of the Project are therefore those which remain assuming all SAC are met.</u></p> <p><u>The Sussex Guidance specifies that, even where air quality standards are met, the health effects of additional pollution emissions as a result of the Project should be mitigated.</u></p> <p><u>It is the view of WSCC that since SAC have already been taken into account (embedded), additional mitigation is needed to mitigate the increased airport related pollution in line with the damage costs as per the Sussex Guidance.</u></p> <p><u>The Council will review any updated AQAP following Deadline 8. In relation to national planning policy mitigation is not only needed in relation to significant effects but to mitigate negative effects (See ANPS paragraph 5.29)</u></p>	<p>provides detailed commitments for suitable measures to be secured through the DCO.</p> <p>Table 7.2.1 of Needs Case Appendix 1 – National Economic Impact Assessment includes the TAG assessment identifying the air quality damage costs of the Project.</p> <p>Table 13.4.1 of ES Chapter 13: Air Quality considers the Sussex Guidance.</p> <p>ES Chapter 13: Air Quality has indicated that there are no significant effects as a result of the Project and the Project is not predicted to impact compliance with the air quality standards.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance.</p> <p>Updated position (Deadline 1): A technical note summarising the assessment scenarios has been provided at Deadline 1, within Appendix D of the Supporting Air Quality Technical Notes to the SoCGs (Doc Ref. 10.4).</p> <p>Updated position (April 2024): The Applicant notes that the JLAs have provided a submission on air quality at Deadline 3. The Applicant will review this submission and respond accordingly.</p> <p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p>Updated Position (July 2024): The required scope of the AQAP under the Draft DCO Section 106 Agreement [REP6-063] has been updated and the draft AQAP has also been updated in response to comments made by the JLAs. The JLAs have provided further comments on the AQAP Deadline 7 [REP7-103], the Applicant will respond on these matters at <u>Deadline 8.</u></p>	<p>Economic Impact Assessment <u>[APP-251]</u></p> <p>Table 13.4.1 and Section 13.9 of ES Chapter 13 Air Quality <u>[APP-038]</u></p> <p>Appendix D of the Supporting Air Quality Technical Notes to the SoCGs <u>[REP1-050]</u></p> <p>Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions <u>[REP5-073]</u> (Doc Ref. 10.38)</p>	
--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>The Applicant does not agree that additional mitigation beyond what is already proposed is necessary. This is consistent with national policy and EIA requirements.</p>		
<p>2.2.2.2</p>	<p>Clarification on further details</p>	<p>Clarifications on a range of technical details are required, including on rates of future air quality improvement, pollutants assessed, construction plant (i.e., asphalt plant), heating plant, and road traffic modelling. Further information is required to help understand if a realistic worst case has been assessed.</p> <p>Updated position (Deadline 1): Further details can be provided to GAL for discussion.</p> <p>Updated position (Deadline 5): Gatwick Airport Limited (GAL) sets of in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries prepared by AECOM included a wide range of technical matters. The Joint Local Authorities have also submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p>	<p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and available data. The assessment concludes that the impact of the Proposed Development would not be significant.</p> <p>GAL engaged with key stakeholders through the topic working groups and during such engagement, efforts were made to gain agreement with local authorities on key modelling points. Methodology transparency has been demonstrated and model files and results were provided to the TWG via email on 18th August 2023.</p> <p>Details on the Non Road Mobile Machinery (NRMM) (asphalt plant, concrete batching etc) and how it has been assessed can be found in Section 3.12 of the air quality assessment methodology.</p> <p>Details on the airport heating plant and road traffic modelling and how they have been assessed can be found in the air quality assessment methodology.</p> <p>GAL is happy to liaise with the Councils on further information requested.</p> <p>Updated position (Deadline 1): GAL will provide a draft Outline AQAP to the LAs by 26th March (to align with Deadline 2), with the intention of submitting the Outline AQAP into the Examination in due course taking account of any feedback received.</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Deadline 2 Submission – 10.11 Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to air quality and odour management to be undertaken by GAL which are secured under the DCO or s106 Agreement.</p>	<p>ES Chapter 13 Air Quality [APP-038]</p> <p>ES Appendix 13.4.1: Air Quality Assessment Methodology [APP-158]</p> <p>Schedule 1 and Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p> <p>Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions [REP5-073] (Doc Ref. 10.38)</p>	<p>Under discussion Agreed</p>

			<p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p><u>Updated Position (July 2024): This matter can be marked as ‘agreed’ following consultation with AECOM on behalf of the local authorities on the technical queries at the July TWG.</u></p>		
2.2.3.1	Uncertainty and Controlled Growth.	<p>There is insufficient information on how sensitive future air quality predictions are to modal shift objectives being achieved.</p> <p>Updated position (Deadline 1): The response has not provided sensitivity testing in relation to air quality. Therefore uncertainty remains for air quality as to how sensitive predictions presented are to the success of mode shift. Additionally, whilst there are provisions to monitor mode shift it is unclear what actions would be taken if mode shift was not identified and what air quality triggers would be used.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>WSCC continues to consider that an EMG framework would be beneficial to avoid any unexpected adverse air quality outcomes. In the event that an EMG approach was not possible further safeguards could be adopted in an AQAP or air quality management plan to ensure the SACs are met for mode share and that air quality is not comprised by unchecked traffic growth.</u></p>	<p>The mode share commitments within the Surface Access Commitments (SACs) document represent the position GAL is confident it can achieve, based on the modelling of mode choice and transport network operation. Further details are provided in Chapter 7 of the Transport Assessment. The range of interventions to improve sustainable travel has been tested to inform the mode share commitments reported in the Application. The SAC also includes a section on GAL’s further aspirations, which includes more ambitious mode share targets which it will be working towards, but it has set the committed mode shares explicitly to ensure that the core surface access outcomes set out in Environmental Statement are delivered. The SAC contains measures to monitor and ensure that the mode commitments are met.</p> <p>Conservative assumptions have also been built into the air quality assessment to reduce uncertainty in any future scenario such as background values being frozen to 2030 and no improvements in aircraft emissions being accounted for in the air quality modelling.</p> <p>The assessment of air quality (APP-038) is measured against the relevant air quality standards. The draft Section 106 agreement includes commitment to monitoring of air quality at current and proposed monitoring sites against relevant air quality standards. Results will be reported to local authorities.</p> <p>Updated position (Deadline 1): A sensitivity test with the conservative assumption that there are no improvements in emissions beyond 2030 has been provided a Deadline 1, within Appendix F of the Supporting Air Quality Technical Notes to the SoCGs (Doc Ref. 10.4). The draft Outline AQAP will be provided to the LAs by 26th March (to align with Deadline 2), with</p>	<p>ES Chapter 7.4 Transport Assessment [AS-079]</p> <p>ES Appendix 5.4.1: Surface Access Commitments [APP-090]</p> <p>ES Chapter 13 Air Quality [APP-038]</p> <p>Appendix F of the Supporting Air Quality Technical Notes to the SoCGs [REP1-050]</p> <p>Schedule 1 and Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p>	<u>Under discussion</u> <u>Not agreed</u>

			<p>the intention of submitting the outline version into the Examination in due course taking account of any feedback received.</p> <p>Updated Position (April 2024):The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Deadline 2 Submission – 10.11 Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to air quality and odour management to be undertaken by GAL which are secured under the DCO or s106 Agreement.</p> <p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p>Updated Position (July 2024): The Applicant has responded to the JLAs’ Introduction for a proposal for Environmentally Managed Growth at Appendix B of The Applicant’s Response to Deadline 4 Submissions (Doc Ref 10.38) submitted at Deadline 5 and The Applicant’s Response to Deadline 5 Submissions - Response to JLA’s EMG Framework Paper [REP6-093] submitted at Deadline 6. Together, these submissions detail why the Applicant considers an EMG framework is neither necessary nor appropriate for the Project.</p>		
2.2.3.2	Evidence base and justification for air quality impacts	<p>Further presentation of the required evidence base and justification of the noise and air quality effects (and proposed mitigation) from both construction of the additional infrastructure and the operational phase (including the increase in overflights).</p> <p>Updated position (Deadline 5): Gatwick Airport Limited (GAL) sets of in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries prepared by AECOM included a wide range of technical matters. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p>	<p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and data. The assessment concludes that the impact of the Proposed Development would not be significant. Details on the methodology are presented in the methodology appendix.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance. Commitments include the continuation of monitoring at current sites and future proposed monitoring, to be secured under the draft Section 106 agreement entered in relation to the Project.</p> <p>Please refer to Issues Table 13 in relation to noise.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG</p>	<p>ES Chapter 13 Air Quality [APP-038]</p> <p>ES Appendix 13.4.1: Air Quality Assessment Methodology [APP-158]</p> <p>Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions [REP5-073] (Doc Ref. 10.38)</p>	<p>AgreedUnder discussion</p>

			<p>item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p><u>Updated Position (July 2024): This matter can be marked as 'agreed' following consultation with AECOM on behalf of the local authorities on the technical queries at the July TWG.</u></p>		
2.2.3.3	Ultrafine particles	<p>There is no discussion on the health impacts of ultrafine particles from aviation sources within the ES, despite assurances by the Applicant that this would be provided. WSCC would like to see a qualitative assessment on the potential health impacts in the vicinity of Gatwick Airport and a commitment to ongoing open engagement with regards to monitoring.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>WSCC does not agree that the assessment of ultrafines has been undertaken appropriately. WSCC considered that further discussion on this matter was unlikely to be productive and such have focused efforts on securing monitoring provision for ultrafine particulates</u></p>	<p>An assessment of ultra-fine particulate matter (UFP) has been undertaken and is reported in the ES health and wellbeing chapter. That assessment considers the emerging scientific understanding of UFPs as a public health issue. The approach follows IEMA 2022 guidance on assessing human health effects in EIA.</p> <p>In addition to monitoring key pollutants GAL commits to participating in national aviation industry body studies of UFP emissions at airports including those reviewing how monitoring could be undertaken, as discussed in the Health and Wellbeing assessment.</p> <p>Updated Position (April 2024): The Applicant has set out provisions in relation to UFPs at Schedule 1, Deadline 2 Submission –Draft Section 106 Agreement [REP2-004].</p> <p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p><u>Updated Position (July 2024): ES Chapter 18: Health and Wellbeing [APP-043] provides an appropriate assessment of UFP, including as clarified in Action Point 17 of the Deadline 4 Submission - The Applicant’s Response to Actions ISH7: Other Environmental Matters [REP4-037]. The UKHSA, who have responsibility for environmental hazards and community safety, have confirmed in their relevant representation [RR-4687] that they are satisfied, and the proposed development should not result in any significant adverse impact on public health.</u></p>	<p>Section 18.8 of ES Chapter 18: Health and Wellbeing [APP-043] “Health and wellbeing effects from changes to air quality” paragraphs 18.8.67 to 18.8.86.</p> <p>Section 13.9 of ES Chapter 13 Air Quality [APP-038]</p> <p>Schedule 1 of the Draft Section 106 Agreement [REP2-004]</p>	Under discussion Not Agreed

2.2.4.1	Lack of specific Air Quality Action Plan (AQAP)	<p>There is no AQAP which clearly sets out the range of measures that have been considered to specifically address local air quality. This approach differs from discussions during 2 years of consultation where a draft AQAP was provided in the air quality Topic Working Group (21.10.22) and an AQAP was listed in item 19 of Schedule 2 (Requirements) of the draft DCO (28.04.23). The CAP and ASAS do not specifically or adequately address air quality mitigation measures based on health, and both lack the means to measure short-term exposure or provide monitoring to check compliance.</p> <p>Updated position (Deadline 1): This response does not align with the commitment provided by GAL in the December 2023 Air Quality TWG to provide an AQAP. Please can GAL confirm this response is out of date.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>WSSC is not aware of updates to the Draft DCO Section 106 Agreement which may have fundamentally improved the design of the draft AQAP. Any air quality action plan, or management plan, needs (as a minimum) to be forward looking in order to assess the effectiveness of mitigation measures included in the authorised development (estimated reduction in pollutants) and provide a realistic review cycle for reporting monitoring results. The current proposed 5-year retrospective reporting in the draft AQAP is not considered adequate.</u> <u>It would also be beneficial to provide a mechanism (like that proposed in the EMG) for addressing how mitigation may be increased in response to any future tightening of standards or where target measures such as mode shift are not achieved.</u></p> <p><u>The Council will review any updated AQAP following Deadline 8. In relation to national planning policy mitigation is not only needed in relation to significant effects but to mitigate negative effects (See ANPS paragraph 5.29).</u></p>	<p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and available data. The assessment concludes that the impact of the Proposed Development would not be significant. As such, taking into account embedded mitigation, no other mitigation is required as a result of the project.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance.</p> <p>Measures that will be in place through the construction of the Project including mitigation and monitoring of dust are detailed in Section 5.8 of the ES Appendix Construction Period Mitigation and are included in the Code of Construction Practice, to be secured under the requirements of the DCO.</p> <p>The ES Appendix Carbon Action Plan sets out outcomes that GAL is committing to deliver for key airport operational and construction emissions sources. Commitments on surface access emissions are set out in ES Appendix Surface Access Commitments.</p> <p>Measures and monitoring commitments will be secured via the DCO and updated draft Section 106 agreement. The commitments will provide suitable monitoring to allow for the local authorities to carry out their LAQM requirements.</p> <p>Updated position (Deadline 1): GAL will provide a draft AQAP to the LAs at Deadline 1 with the intention of submitting the outline version into the Examination in due course.</p> <p>Updated Position (April 2024):The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Deadline 2 Submission –Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to air quality and odour management to be undertaken by GAL which are secured under the DCO or s106 Agreement.</p>	<p>Section 13.9 of ES Chapter 13 Air Quality [APP-038]</p> <p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Appendix 5.4.2: Carbon Action Plan [APP-091]</p> <p>ES Appendix 13.8.1: Air Quality Construction Period Mitigation [APP-161]</p> <p>ES Appendix 5.4.1: Surface Access Commitments [APP-090]</p> <p>Schedule 1 and Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p>	<p>Not Agreed Under discussion</p>

			<p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs' review submitted at Deadline 4 [REP4-053].</p> <p>Updated Position (July 2024): The required scope of the AQAP under the Draft DCO Section 106 Agreement [REP6-063] has been updated and the draft AQAP has also been updated in response to comments made by the JLAs. The JLAs have provided further comments on the AQAP Deadline 7 [REP7-103], the Applicant will respond on these matters at Deadline 8. The Applicant does not agree that additional mitigation beyond what is already proposed is necessary. This is consistent with national policy and EIA requirements.</p>		
2.2.4.2	Lack of Dust Management Plan (DMP)	<p>There is no DMP which clearly sets out the implementation of the specific mitigation measures that will be used to ensure that any potential adverse impacts from dust arising during construction and demolition activities are avoided during all construction stages.</p> <p>Updated position (Deadline 1): It is understood that a final DMP cannot yet be provided, but an outline or draft DMP can be prepared. This is still requested by WSCC.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the GAL Dust Management Plan. Please see REP4-053 for this detailed review.</p> <p>Without a response from GAL to the DMP review (and any updated DMP committed to by GAL for Deadline 5 [REP4-033]) further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p>Updated Position (12 August 2024) WSCC is hopeful that all final matters will be addressed in an updated DMP due at Deadline 8 and will confirm following receipt of the updated DMP</p>	<p>Measures that will be in place through the construction of the Project including mitigation and monitoring of dust are detailed in Section 5.8 of the ES Appendix Construction Period Mitigation (APP-161) and are included in the Code of Construction Practice (APP-082), to be secured under the requirements of the DCO.</p> <p>Paragraph 2.2.7 of the CoCP sets out that Construction Dust Management Plans (CDMP) will be prepared in accordance with the CoCP.</p> <p>Management plans will be prepared for specific areas of the Project to reflect any site-specific conditions or measures to mitigate dust impacts (set out in para 5.8.2 of the CoCP).</p> <p>The CDMPs will be prepared for approval by the relevant local planning authority prior to construction works commencing, as confirmed in paragraph 5.8.2 of the CoCP.</p> <p>Updated position (Deadline 1): An outline CDMP will be shared with WSCC for comment by 26th March (to align with Deadline 2), with the intention of submitting the outline version into the Examination in due course taking account of any feedback received.</p> <p>Updated Position (April 2024): The Draft Construction Dust Management Plan (CDMP) has been shared with local authorities for comment on 26th March, considering the items set out by local authorities in the SoCG and Local Impact Reports. The Applicant looks forward to receiving the LAs comments in due course.</p>	<p>ES Appendix 13.8.1: Air Quality Construction Period Mitigation [APP-161]</p> <p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Appendix 5.3.2: CoCP – Annex 9: Construction Dust Management Strategy [REP5-022] (Doc Ref. 5-3)</p>	<p>Under discussion Not Agreed (but subject to D8 submissions) Agreed Agreement Pending</p>

			<p>Updated position (Deadline 5): The Applicant has submitted an updated version of the Construction Dust Management Strategy (Doc Ref. 5.3) into the examination at Deadline 5.</p> <p>Updated Position (July 2024): The final comments on the Outline Construction DMP were discussed at the July TWG, all matters are considered to be resolved and an updated final outline construction DMP will be provided at Deadline 8 and it is secured by DCO Requirement 27.</p> <p>Updated Position (August 2024): Further comments have been submitted by local authorities on the outline DMP. An updated version would be provided at Deadline 10 to consider all comments. On this basis, all matters are considered to be resolved.</p>		
2.2.4.3	Outline Construction Traffic Management Plan (CTMP)	<p>The OCTMP identifies risks associated with construction traffic utilising routes through the J10 M23 and Hazelwick Air Quality Management Areas in Crawley. Reference is made to a monitoring system that 'it is envisaged' will be developed in the CTMP. However, no details on this monitoring system are provided.</p> <p>Updated position (Deadline 1): The cross reference is unclear, please can GAL confirm which document is being referred to? It is also still unclear what the monitoring system refers to.</p> <p>Updated position (Deadline 5): GAL sets out in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries prepared by AECOM included a wide range of technical matters. The Joint Local Authorities have also submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p>Updated Position (12 August 2024) The concerns raised by the JLAs on the matter of model scenarios have been clarified by the Applicant and agreed. The concerns raised by Crawley Borough Council about the risks associated with construction traffic utilising routes through Crawley's AQMA from the J10 of M23 remain unresolved.</p>	<p>The impact from construction traffic due to movement of construction materials will be managed in accordance with a Construction Traffic Management Plan (CTMP). The impact of construction workforce travelling to and from the Airport will be managed in accordance with a Construction Workforce Travel Plan (CWTP), both of which will be developed by GAL and its contractors during detailed design / pre-construction stage in accordance with the Outline Construction Traffic Management Plan.</p> <p>The detailed Construction Traffic Management Plan (CTMP) and Construction Workforce Travel Plan (CWTP) will be developed during detailed design and pre-construction stage in consultation with the relevant highway authority and the National Highways.</p> <p>Updated Position (April 2024): Section 6.7 of the oCTMP [APP-085] sets out traffic management during surface access.</p> <p>The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Draft Section 106 Agreement [REP2-004]. Section 2 of the AQAP sets out measures and monitoring commitments related to the construction phase, controlled by the Code of Construction Practice (CoCP) [REP1-021] secured by Requirement 7 of the Draft DCO. The current monitoring arrangements will allow the collection of air quality concentrations in the vicinity of the airport to support the understanding of air pollution effects in the construction period. The data will be used to compare against national standards.</p> <p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local</p>	<p>ES Appendix 5.3.2 Code of Construction Practice – Annex 3: Outline Construction Traffic Management Plan [APP-085]</p> <p>ES Appendix 5.3.2 Code of Construction Practice Annex 2 – Outline Construction Workforce Travel Plan [APP-084]</p> <p>Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p> <p>ES Appendix 5.3.2: Code of Construction Practice [REP1-021]</p> <p>Appendix A: Response to West</p>	<p>Not AgreedUnder discussion</p>

			<p>Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p><u>Updated Position (July 2024): The Applicant is liaising directly with AECOM on behalf of the local authorities on the technical queries set out at Deadline 5 [REP5-073], to resolve any queries not yet agreed. Progress was made at the July TWG with final clarifications which we anticipate will close out this point being provided to the JLAs before Deadline 8. Section 6.6 of the oCTMP [REP7-026] has been updated to provide more certainty in relation to Junction 10 M23 and Hazelwick Air Quality Management Area. Further detail will be provided in the CTMP submitted to CBC for approval under DCO Requirement 12.</u></p>	<p>Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions [REP5-073] (Doc Ref. 10.38)</p>	
2.2.4.4	Operational Air Quality Monitoring	<p>There are concerns regarding the measurement accuracy of the AQ Mesh low-cost sensors which the Applicant is proposing to use to monitor operational phase impacts. AQ Mesh monitors are not approved by Defra for the monitoring of air quality and as such they are not sufficient to demonstrate compliance with air quality standards.</p> <p>Updated position (Deadline 1): Further discussions on operational monitoring and the S106 are proposed to resolve this matter.</p> <p>Updated Position (Deadline 5) The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>The JLAs have confirmed that they do not consider AQ-Mesh style monitoring is an acceptable recognised method for compliance monitoring for the reasons outlined in their response above, i.e AQ Mesh low-cost sensors are not an equivalence reference method for continuous monitoring approved by Defra. Consequently, they are not sufficient to demonstrate compliance with air quality standards (particularly with regards to short term level exceedances), which then introduces uncertainty on how air quality will be evaluated and reported to the Council.</u> <u>The Council welcomes the revised Draft Section 106 Agreement for operational monitoring but notes that the Applicant’s revised</u></p>	<p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and available data. The assessment concludes that the impact of the Proposed Development would not be significant. As such, taking into account embedded mitigation, no other mitigation is required as a result of the project.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality (APP-038) sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance.</p> <p>The draft Section 106 agreement sets out the mechanism for monitoring air quality (PM₁₀₂, PM₁₀ and PM_{2.5}) and the impacts from the Proposed Development, to identify and manage any new exceedances of the National Air Quality Standards occur as a result of airport activity.</p> <p>Gatwick has worked with Local Authorities over many years to fund air quality monitoring to understand air quality locally. As part of the Project, a commitment will be made in the draft Section 106 agreement to the continuation of current monitoring and additional monitoring at several proposed sites (APP-038 Figure 13.1.12) using mixture of monitoring types, including another DEFRA equivalent reference monitor (reference MCERTS monitor) and indicative MCERTS monitoring</p>	<p>ES Chapter 13 Air Quality [APP-038]</p> <p>Schedule 1 and Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p>	<p><u>Not Agreed – subject to D8 submission</u> Under discussion</p>

		<p>Agreement does not commit to air quality monitoring to 2047 or when the airport is operating at full capacity.</p> <p>The Council will review any updated AQAP following Deadline 8. In relation to national planning policy mitigation is not only needed in relation to significant effects but to mitigate negative effects (See ANPS paragraph 5.29).</p>	<p>equipment to be able to monitor key pollutants of concern. Compared to current monitoring, this approach increases the spatial and temporal collection of monitoring data to allow detailed assessment of ambient air quality. The approach is considered proportionate given the cost of monitoring equipment and the results of the ES which show there are no significant effects being predicted.</p> <p>The draft Section 106 agreement includes commitment to monitoring of air quality at current and proposed monitoring sites against relevant air quality standards. Results will be reported to the local authorities.</p> <p>Long term effects have been assessed in the air quality assessment. Based on the monitored and modelled annual mean concentrations, the impact of NO₂, PM₁₀ and PM_{2.5} are not considered to be at risk of exceeding the short term standards as outlined in Section 13.10 of ES Chapter 13: Air Quality (APP-038). Therefore, an assessment of short term effects was scoped out. This is in line with the guidance outlined within Defra LAQM Technical Guidance (2022).</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Deadline 2 Submission – Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to air quality and odour management to be undertaken by GAL which are secured under the DCO or s106 Agreement.</p> <p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p>Updated Position (July 2024): The Applicant is continuing to engage with the Local Authorities on the drafting of the Section 106 Agreement.</p> <p>The Applicant has submitted a revised Draft Section 106 Agreement [REP6-063] at Deadline 6, including a revised draft air quality action plan (AQAP) at Appendix 5. Section 4 of the AQAP includes detail on indicative AQ mesh style monitoring.</p> <p>The JLAs have now confirmed that they do not consider that the AQ Mesh style monitoring is required.</p>		
2.2.4.5	Funding for Local Ambient Air Quality Monitoring.	The ES does not specifically identify which of the existing LA continuous air quality monitoring stations on and around the Airport will be funded.	The assessment in Section 13.9 of ES Chapter 13: Air Quality summarises the proposed operational phase air quality monitoring.	ES Chapter 13 Air Quality [APP-038]	Under discussion Not Agreed – on – could turn green based upon

		<p>Updated position (Deadline 1): Further discussions on operational monitoring and the S106 are proposed to resolve this matter.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p><u>Updated Position (12 August 2024)</u> <u>WSCC welcomes the revised Draft Section 106 Agreement for funding for Crawley Borough Council’s operational air quality monitoring costs. The Council expects agreement to be reached subject to the s.106 Agreement being finalised.</u></p>	<p>Monitoring commitments will be secured under the draft Section 106 agreement to be entered in relation to the Project.</p> <p>The draft Section 106 agreement commits to funding of monitoring at three existing local authority stations and the continuation of monitoring at Gatwick airport monitoring site. In addition, Gatwick will add an additional Defra reference equivalent monitor and additional indicative MCERT continuous monitors. Therefore, there is no change in the monitoring as currently carried out and additional monitoring will be added.</p> <p>ES Chapter 13: Air Quality Figure 13.1.12 outlines draft locations of the proposed monitoring stations.</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Deadline 2 Submission – Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to air quality and odour management to be undertaken by GAL which are secured under the DCO or s106 Agreement.</p> <p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p> <p><u>Updated Position (July 2024): The Applicant is continuing to engage with the Local Authorities on the drafting of the Section 106 Agreement.</u></p> <p><u>The Applicant has submitted a revised Draft Section 106 Agreement [REP6-063] at Deadline 6, including a revised draft air quality action plan (AQAP) at Appendix 5.</u></p>	<p>ES Air Quality Figures [APP-066 to APP-070]</p> <p>Schedule 1 and Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p>	<p><u>Section 106 funding? Agreed subject to s106</u></p>
2.2.4.6	Outline Construction Workforce Travel Plan	<p>There is a lack of information on the monitoring the effectiveness of the OCTMP (APP-085) and Outline Construction Workforce Travel Plan (OCWTP) (APP-084) to understand how any deviation from the OCTMP and OCWTP will be addressed to protect air quality.</p> <p>Updated position (Deadline 1): The cross reference is unclear, please can GAL confirm which document is being referred to?</p> <p>Updated position (Deadline 5): GAL sets out in paragraph 3.7.7 of their Response to Deadline 3 Submissions [REP4-031] that the air quality matters submitted by the Joint Local Authorities at Deadline 3 (Appendix A) [REP3-117] will be responded to by Deadline 5. This Appendix of air quality queries</p>	<p>The impact from construction traffic due to movement of construction materials will be managed in accordance with a Construction Traffic Management Plan (CTMP). The impact of construction workforce travelling to and from the Airport will be managed in accordance with a Construction Workforce Travel Plan (CWTP), both of which will be developed by GAL and its contractors during detailed design / pre-construction stage in accordance with the Outline Construction Traffic Management Plan.</p> <p>The detailed Construction Traffic Management Plan (CTMP) and Construction Workforce Travel Plan (CWTP) will be developed</p>	<p>ES Appendix 5.3.2 Code of Construction Practice – Annex 3: Outline Construction Traffic Management Plan [APP-085]</p> <p>ES Appendix 5.3.2 Code of Construction</p>	<p><u>Not Agreed Under discussion</u></p>

		<p>prepared by AECOM included a wide range of technical matters. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p> <p>Updated Position (12 August 2024)</p> <p>Further information (as described above) requested by the Council to show how monitoring will be used to identify any deviation from the expected impacts has not been received.</p> <p>WSCC maintains its position that detailed monitoring requirements should be provided in the outline plans to provide assurance that the final CMTP and CWTP will be substantially in accordance with any agreed monitoring plans</p>	<p>during detailed design and pre-construction stage in consultation with the relevant highway authority and the National Highways.</p> <p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and available data. The assessment concludes that the impact of the Proposed Development would not be significant. As such, no mitigation is required as a result of the project.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance.</p> <p>Measures that will be in place through the construction of the Project including mitigation and monitoring of dust are detailed in Section 5.8 of the ES Appendix Construction Period Mitigation and are included in the Code of Construction Practice, to be secured under the requirements of the DCO.</p> <p>Updated Position (April 2024): Section 6.7 of the oCTMP [APP-085] sets out traffic management during surface access</p> <p>The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Draft Section 106 Agreement [REP2-004]. Section 2 of the AQAP sets out measures and monitoring commitments related to the construction phase, controlled by the Code of Construction Practice (CoCP) [REP1-021] secured by Requirement 7 of the Draft DCO. The current monitoring arrangements will allow the collection of air quality concentrations in the vicinity of the airport to support the understanding of air pollution effects in the construction period. The data will be used to compare against national standards.</p> <p>Updated position (Deadline 5): The Applicant has provided a response to the air quality matter submitted by the JLAs at Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions (Doc Ref. 10.38). The Applicant will respond at Deadline 6 to the JLAs’ review submitted at Deadline 4 [REP4-053].</p>	<p>Practice Annex 2 – Outline Construction Workforce Travel Plan [APP-084]</p> <p>ES Chapter 13 Air Quality [APP-038]</p> <p>ES Appendix 13.8.1: Air Quality Construction Period Mitigation [APP-161]</p> <p>Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p> <p>ES Appendix 5.3.2: Code of Construction Practice [REP1-021]</p> <p>Appendix A: Response to West Sussex Joint Local Authorities – Air Quality to The Applicant’s Response to Deadline 4 Submissions [REP5-073] (Doc Ref. 10.38)</p>	
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>Updated Position (July 2024): The Applicant is liaising directly with AECOM on behalf of the local authorities on the technical queries set out at Deadline 5 [REP5-073], to resolve any queries not yet agreed. Progress was made at the July TWG with final clarifications which we anticipate will close out this point being provided to the JLAs before Deadline 8.</p> <p>Monitoring requirements are set out in section 6.6 of the oCTMP [REP7-026] and section 10 of the oCWTP [REP7-024]. Further detail will be provided in the CTMP and CWTP submitted to local authorities for approval under DCO Requirements 12 and 13 respectively.</p>		
2.2.4.7	CARE Facility	<p>There were continuous issues with odour from the current small waste incineration plant at the CARE facility until it was 'mothballed' in 2020 due to Covid. Further clarification is therefore needed on how odour will be controlled.</p> <p>Updated position (Deadline 1): It is welcomed that the CARE facility will no longer include combustion sources (if the Project changes are accepted by the ExA). Further discussion on what best practice odour controls are proposed and how these will be documented and agreed.</p> <p>Updated position (Deadline 5): The Joint Local Authorities have submitted a detailed review of the Air Quality Action Plan [REP2 -004]. Please see REP4-053 for this detailed review. Without a response from GAL further progress cannot be made. It is anticipated that further progress can be made before the next Examination Deadline.</p>	<p>ES Chapter 13: Air Quality provided an assessment of the CARE facility based on the current outline design parameters in ES Chapter 5: Project Description.</p> <p>Odour risk would be managed following best practice waste handling procedures. Following best practice methodology to contain and reduce odour effects from the facility, no significant impacts would occur.</p> <p>Notwithstanding this, the Applicant is putting forward a change to the DCO Application to remove the boilers from the CARE facility (note the CARE facility will still exist in the DCO application but will be a waste sorting facility only).</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to odour management to be undertaken by GAL which are secured under the DCO.</p> <p>Updated position (Deadline 5): The Applicant will respond at Deadline 6 to the JLAs' review submitted at Deadline 4 [REP4-053].</p> <p>Updated position (July 2024): This matter can be marked as 'agreed' following consultation with AECOM on behalf of the local authorities on the technical queries at the July TWG.</p>	<p>ES Chapter 13 Air Quality [APP-038]</p> <p>ES Chapter 5 Project Description (REP1-016)</p> <p>Appendix 5 and Schedule 1 of the Draft Section 106 Agreement [REP2-004]</p>	<p>Under discussionAgreed</p>
2.2.5.1	Flue height	<p>It is not clear how the proposed biomass boiler flue height has been determined, and whether the Environment Agency, as the permitting body, has been specifically consulted on this matter.</p>	<p>ES Chapter 13: Air Quality provided an assessment of the CARE facility based on the current outline design parameters in ES Chapter 5: Project Description.</p>	<p>ES Chapter 13 Air Quality [APP-038]</p>	<p>Agreed</p>

		<p>Updated position (Deadline 1): It is welcomed that the CARE facility will no longer include combustion sources. Further discussion on (if the Project changes are accepted by the ExA) what best practice odour controls are proposed and how these will be documented and agreed.</p>	<p>A stack height assessment was undertaken to determine a suitable height for the proposed boiler, detailed in ES Appendix 13.9.1: Air Quality Results Tables and Figures – P3.</p> <p>Notwithstanding this, the Applicant is putting forward a change to the DCO Application to remove the boilers from the CARE facility (note the CARE facility will still exist in the DCO application but will be a waste sorting facility only).</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Draft Section 106 Agreement [REP2-004]. The document sets out measures and monitoring commitments related to odour management to be undertaken by GAL which are secured under the DCO.</p>	<p>ES Chapter 5 Project Description (REP1-016)</p> <p>ES Appendix 13.9.1: Air Quality Results Tables and Figures – Part 3 [APP-164]</p> <p>Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p>

<i>Please see the joint Statement of Common Ground prepared in relation to Capacity and Operations (Doc Ref. 10.1.18).</i>					

2.4. Climate Change

2.4.1 Table 2.4 sets out the position of both parties in relation to climate change matters.

Table 2.4 Statement of Common Ground – Climate Change Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
There are no issues relating to the baseline for this topic within this Statement of Common Ground.					
Assessment Methodology					
2.4.2.1	Given the expected lifetime of the Project assets, the time periods considered for climate change projections are not adequately far enough into the future to represent the worst-case scenario.	<p>The most distant time period chosen for assessment was 2040-2069 (2060s) (as detailed in paragraph 15.5.2), however, some asset components are assumed to be operational in perpetuity, and therefore these climate change projections are not adequately far enough into the future to represent the worst-case scenario.</p> <p>Updated position (Deadline 1): It is acknowledged that the Applicant did undertake a thorough climate data gathering exercise sufficient to inform the assessment and meet planning requirements.</p>	<p>The most distant time period chosen for the assessment was 2050-2079 (2060s), not 2040-2069. This time period was selected to represent a reasonable worst-case scenario at the highest resolution that is available. The UKCP18 12km projections used within the assessment do not go beyond 2080. This dataset also include a range of useful variables to support the assessment (e.g. the number of hot days). The probabilistic projections do not contain these variables. In addition to this, it is recommended by the Met Office that consistency is maintained between the time periods used within an assessment. The most pessimistic RCP scenario was also employed to provide an indication of potential worst-case scenario conditions. Climate projections up to 2100 are used in ES Chapter 12: Traffic and Transport and ES Chapter 11: Water Environment in accordance with DMRB guidance.</p>	<p>ES Chapter 12: Traffic and Transport [APP-037]</p> <p>ES Chapter 11: Water Environment [APP-036]</p>	Agreed
2.4.2.2	Lack of consideration of storm events, wildfires and fog	<p>Storm events are not considered sufficiently in this assessment. Wildfire is not mentioned as a possible climate hazard to impact the Airport's operation. Risks associated with fog were not included in the risk assessment.</p> <p>Updated position (Deadline 1): It is acknowledged that the Applicant will update the SoCG with the newly available wildfire data and add in additional information on fog.</p> <p>Noted and accepted regarding storm events.</p> <p>Updated Position (Deadline 5): It is noted the Applicant has prepared the 'Examination Technical Note – Climate Change 2: Wildfire and fog risks' which has been reviewed and is considered to address this issue.</p>	<p>Storm events are considered through the inclusion of extreme rainfall (increased probability of extreme weather events (Risks 2, 13-15 in ES Appendix 15.8.1 Climate Change Resilience Assessment) and high winds (risks 18-21 in ES Appendix 15.8.1 Climate Change Resilience Assessment) within the assessment. The risks associated with these hazards have been assessed as medium. Additional information on changes in wind speeds can be found in ES Chapter 15 (Paragraph 15.5.28). Reductions in wind speeds are anticipated in winter and summer. Quantitative data on changes in lightning across the UK are not provided by UKCP18 at the 12km scale. A summary of the Met Office findings for changes in lightning flash rate across the UK is provided in Chapter 15 (Paragraph 15.5.27) which suggests that Gatwick can expect lightning frequency to increase during summer and spring and decrease during autumn. Risks 22 and 23 in ES Appendix 15.8.1 Climate Change Resilience Assessment provide information on the potential impacts, existing mitigation measures and risks associated with increased lightning strikes.</p>	<p>Risks 2, 13-15, 18-23 in Appendix 15.8.1 Climate Change Resilience Assessment [APP-187]</p> <p>Paragraph 15.5.27 and 15.5.28 of ES Chapter 15 Climate Change [APP-040]</p>	Agreed

			<p>GAL will put more detail about fog in the Statement of Common Ground (SoCG) of which there will be one combined one for climate change.</p> <p>Additional data is now available for wildfire that was not available at the time of submission of the DCO application, GAL will put more detail about wildfire in the SoCG.</p> <p>Updated position (April 2024): <i>'Examination Technical Note – Climate Change 2: Wildfire and fog risks'</i> has been prepared and shared with the Local Authority as part of the Statement of Common Ground process.</p>		
2.4.2.3	Not sufficient detail on the climate change impact on critical airport equipment and infrastructure.	<p>Consideration to be given to how climate change could impact critical equipment and infrastructure e.g. power, telecommunications as well as the embedded and additional mitigations to reduce this risk.</p> <p>Updated position (Deadline 1): It is acknowledged that the Applicant has given consideration to the impact climate change could have on 'critical equipment and infrastructure', with subsequent mitigation measures being put in place, as well as consideration being given when new/upgraded products are required.</p> <p>It is acknowledged that the Applicant does not have the exact design of power and telecommunications equipment, but it's assumed that the appropriate mitigation measures identified will be applied to critical equipment.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>Electronic equipment is considered within the climate change resilience assessment (ES Appendix 15.8.1 Climate Change Resilience Assessment). Risks 6, 9 and 24 make reference to electronic equipment and the mitigation measures that are in place to ensure it remains operational. This equipment is designed to current temperature ranges based on existing standards and will be updated as part of business as usual operations. New/upgraded products would be sourced based on the latest available design standards.</p> <p>Risk 12 also highlights how HVAC equipment is designed to cope with extreme cold temperatures.</p> <p>Risk 15 highlights risks associated with flooding of electrical equipment and mechanical operating mechanisms. The FRA sets out a Flood Resilience Statement and a Surface Access Drainage Strategy to increase flood storage capacity at site and reduce flood risk for all assets including electrical equipment. Power and telecommunications is incorporated within electronic equipment. At present, the exact design of power and telecommunications equipment is unknown and therefore the equipment was grouped into 'electronic equipment'. It is assumed that the appropriate mitigation measures identified will be applied to critical equipment.</p>	ES Appendix 15.8.1 Climate Change Resilience Assessment [APP-187]	Agreed
2.4.2.4	Disagree with the assessment that 'cumulative effects are not relevant'.	<p>It is disagreed that 'An assessment of cumulative effects is not relevant'. For example, nearby projects could exacerbate the urban heat island impact of the project or increase the impact of flooding to the site or access to the site.</p> <p>Updated position (Deadline 1): It is now acknowledged that the Applicant did not assess for cumulative effects outside of the project site boundary, as the CCR only assessed those within this area.</p>	<p>The Zone of Influence considered within the cumulative effects assessment was the project site boundary for the CCR assessment. This does not include nearby projects therefore it was not relevant to assess the potential impact of additional projects on the UHI. The UHI effect was found to be low and therefore it would be unlikely that any nearby development would exacerbate this.</p>	ES Appendix 15.8.1 Climate Change Resilience Assessment [APP-187]	Agreed

2.4.2.5	Climate Change	<p>The Applicant should provide more information on the risk categories and definitions used for the CCRA and UHIA and include the relevant risk frameworks in all documents (including the appendices) in which they are referenced.</p> <p>Updated position (Deadline 1): It is now acknowledged that the Applicant provides adequate information on the risk categories and definitions used for the CCRA and UHI assessment.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>The risk ratings are a combination of likelihood and consequence which are defined within Tables 15.8.1 and 15.8.2 of Chapter 15 of the ES (Climate Change). The risk matrix used also matches that included within the 2021 ARP3 Document for Gatwick. Using the same definitions and terminology ensures that the methodology for the assessment and the approach to managing any impacts is consistent.</p>	<p>Tables 15.8.1 and 15.8.2 of ES Chapter 15 Climate Change [APP-040]</p>	Agreed
2.4.2.6	Given the expected lifetime of the Project assets, the time periods considered for climate change projections are not adequately far enough into the future to represent the worst-case scenario.	<p>The most distant time period chosen for assessment was 2040-2069 (2060s) (as detailed in paragraph 15.5.2), however, some asset components are assumed to be operational in perpetuity, and therefore these climate change projections are not adequately far enough into the future to represent the worst-case scenario.</p> <p>Updated position (Deadline 5): It is acknowledged that the Applicant did undertake a thorough climate data gathering exercise sufficient to inform the assessment and meet planning requirements.</p>	<p>The most distant time period chosen for the assessment was 2050-2079 (2060s), not 2040-2069. This time period was selected to represent a reasonable worst-case scenario at the highest resolution that is available. The UKCP18 12km projections used within the assessment do not go beyond 2080. This dataset also include a range of useful variables to support the assessment (e.g. the number of hot days). The probabilistic projections do not contain these variables. In addition to this, it is recommended by the Met Office that consistency is maintained between the time periods used within an assessment. The most pessimistic RCP scenario was also employed to provide an indication of potential worst-case scenario conditions. Climate projections up to 2100 are used in ES Chapter 12: Traffic and Transport and ES Chapter 11: Water Environment in accordance with DMRB guidance.</p> <p>Updated position (April 2024): The Local Authorities' feedback is awaited against this issue.</p>	<p>ES Chapter 12: Traffic and Transport [APP-037]</p> <p>ES Chapter 11: Water Environment [APP-036]</p>	Agreed
Assessment					
2.4.3.1	Identification of construction risks is limited	<p>The construction risks identified are limited. Construction flooding risks should be addressed in more detail.</p> <p>Updated position (Deadline 1): Whilst more detail could be added to the construction impacts identified, the Applicant's assessment of construction impacts does constitute a robust assessment that meets the planning requirements and the work undertaken is consistent with the relevant local council's policies regarding climate change.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>In addition to the information provided in Table 15.8.5 of ES Chapter 15 Climate Change, further information on the identified construction risks is provided in Table 2.1.1 of Appendix 15.8.1 Climate Change Resilience Assessment. This risk consider the impact of the increased numbers of extremely hot days and the range of risks covered by the increased probability of extreme weather events including heatwaves and flooding. However, appropriate mitigation measures are in place to mitigate these hazards and risks. These are detailed within the Code of Construction Practice which details the methods in place to ensure construction can be sustained during adverse weather events. Several design measures are included to reduce the risk associated with flooding (e.g. avoiding temporary buildings and</p>	<p>Tables 15.8.5 of ES Chapter 15 Climate Change [APP-040]</p> <p>Table 2.1.1 of Appendix 15.8.1 Climate Change Resilience Assessment [APP-187]</p>	Agreed

			operation-critical building systems being in flood risk zones. This is to ensure that the delivery of the project will comply with appropriate environmental and health and safety legislation. The Gatwick Operations Adverse Weather Plan will also support continued construction during adverse weather events.	ES Appendix 5.3.2: Code of Construction Practice (REP1-021)	
2.4.3.2	Inconsistency and lack of detail in some climate impact statements	<p>The climate impact statements are lacking in consistency in the way they are articulated in that some are missing an 'impact'. They have a cause e.g. 'increased flooding' and an 'event' e.g. flooding of electrical equipment' but no end 'impact'. This end result is what should determine the consequence rating and could have led to an underestimation of risk.</p> <p>Updated position (Deadline 1): Whilst there are different approaches to undertaking climate change risk assessments, and further detail and clarity around impact statements would be helpful, the Applicant's assessment of operational impacts does constitute a robust assessment that meets the planning requirements and the work undertaken is consistent with the relevant local council's policies regarding climate change.</p> <p>Updated Position (Deadline 5): Addressed.</p>	The anticipated impacts of climate change are provided for all risks identified within the CCRA. In Chapter 15 of the ES (Climate Change) (APP-040) this is included within Tables 15.8.5 and 15.8.6 within the 'Climate Change Impact' column and in Appendix 15.8.1 (Climate Change Resilience Assessment) (APP-187) within Table 2.1.1 in the 'Climate Change Impact' column. Risk ratings would not change following a clarification of specific impacts and therefore no material impact on the assessment will arise.	<p>Tables 15.8.5 and 15.8.6 of ES Chapter 15 Climate Change [APP-040]</p> <p>Table 2.1.1 of Appendix 15.8.1 Climate Change Resilience Assessment [APP-187]</p>	Agreed
2.4.4.1	Lack of identification of additional mitigation / adaptation measures.	<p>Whilst the Applicant may not have assessed any of the risks as 'significant', the identification of further mitigation or adaptation measures is an omission.</p> <p>Updated position (Deadline 1): Whilst, it is acknowledged that the Applicant has outlined mitigation and adaptation measures for the project in the report and appendices, in addition to referencing existing policies and plans in place at GAL, the DAS only includes indicative climate resilience design principles which are not reflected in the Control Document. Appendix 1 of the DAS.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>Further adaptation measures are not formally identified (under the heading of 'further mitigation') as no significant risks were identified within the assessment which would require mitigation that is not already embedded within the Project. However, mitigation measures are included within relevant chapters/documents. The Code of Construction Practice (Appendix 5.3.2) includes an overview of relevant mitigation measures. This document is referenced within Chapter 15 of the ES Climate Change. The Gatwick Airside Operations Adverse Weather Plan (GAL, 2021) sets out additional measures that should be followed during other extreme weather events. The Outline Climate Resilience Design Principles captured within the Design and Access Statement detail how elements of the design have been developed to account for climate change adaptation and would be implemented at the time of construction.</p> <p>An additional summary of mitigation measures/commitments made in relation to mitigation can be found in ES Appendix 5.2.3 Mitigation Route Map.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice [REP1-021]</p> <p>Table 15.8.4 and 15.9.1 of ES Chapter 15 Climate Change [APP-040]</p> <p>Design and Access Statement Volume 5 [REP2-036]</p> <p>ES Appendix 5.2.3 Mitigation Route Map [REP2-011]</p>	Agreed

			<p>Additionally, several mitigation measures are already embedded within the project. These are detailed within Table 15.8.4 and 15.9.1 in Chapter 15 of the ES (Climate Change).</p> <p>Updated position (April 2024): The overarching climate resilience guidelines presented in the Design and Access Statement – Volume 5 [REP2-036] Site Wide Design Guidelines have been used to inform the specific design principles within the Design and Access Statement – Appendix 1 – Design Principles [REP2-037] (which is secured through the dDCO). Whilst there is no standalone climate resilience table in the Control Document - Appendix 1 of the DAS, specific resilience measures were integrated into the design principles amongst the other themes and are spread throughout the suite of design principles. For example, design principles from the Landscaping topic cover tree and shrub planting, a new woodland along the highway works, vegetation retention proposals etc, all which will increase the resilience of the area to extreme heat whilst also reducing the flood risk. Design principle BF3 in the Build Form category covers the design of buildings and implementation of measures which will address the risks of extreme storm events, flood events, and heatwave related drought events; and all the design principles from the Drainage category are looking to address flooding and provide resilience against this climate risk.</p> <p>The overarching climate resilience guidelines from DAS Volume 5 [REP2-036] will be used to inform the next detailed design stage (post DCO consent) to ensure the Project’s resilience to climate change.</p>		
2.4.4.2	Mitigation measures should be proposed to reduce the impact of Urban Heat Island (UHI) effect.	<p>The UHI Assessment states that ‘mitigation of UHI is essential to ensure future resilience as the climate changes’ and that the Project could ‘exacerbate the increase in UHI effect’ but does not propose the implementation of any specific mitigation measures.</p> <p>Updated position (Deadline 1): It is acknowledged that the Applicant will monitor UHI. It’s also recommended that where feasible and appropriate additional UHI mitigation measures are incorporated.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>This statement in Paragraph 3.2.3 of Appendix 15.5.2 Urban Heat Island Assessment is not specific to the project, but refers to the UHI effect in urban centres more generally. The specific evaluation for the project is included in Section 3.3 ‘Evaluation of the Project’. It is not expected that the Project could create a new UHI effect. However, increased impervious surface cover and buildings alongside projected climate change-induced increases in temperature could exacerbate the increase in the UHI effect.</p> <p>It is noted in Paragraph 3.3.2 of ES Appendix 15.5.2: Urban Heat Island Assessment that the risks associated with the UHI effect (which were assessed as medium) should be monitored.</p> <p>Updated position (April 2024):</p>	<p>ES Appendix 15.5.2 Urban Heat Island Assessment [APP-186]</p> <p>Design and Access Statement Volume 5 [REP2-036]</p>	Agreed

			Where feasible and appropriate, additional UHI mitigation measures could be incorporated if they are required. As stated in paragraph 6.6.5 of the Design & Access Statement – Volume 5 [REP2-036] , GAL has a commitment to ensure that climate risks are not increased and climate resilience is considered throughout detailed design; this includes measures related to the UHI.		
2.4.4.3	Climate Change	<p>The lack of identification of additional mitigation/adaptation measures is a key omission from the CCRA and the Urban Heat Island Assessment (UHIA) (APP-186). Whilst the Applicant may not have assessed any of the risks as 'significant', the identification of further adaptation measures that can increase asset resilience should be noted, especially considering the potential underestimation of risk detailed above. The Applicant should identify and include in the report further adaptation measures that can be implemented in design, construction, or operation to further reduce the Project's vulnerability to climate change.</p> <p>Updated position (Deadline 1): It is acknowledged that the Applicant has outlined mitigation and adaptation measures for the Project in the report and appendices, in addition to referencing existing policies and plans in place at GAL.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>Further adaptation measures are not formally identified (under the heading of 'further mitigation') as no significant risks were identified within the assessment which would require mitigation that is not already embedded within the Project. However, mitigation measures are included within relevant chapters/documents. The Code of Construction Practice includes an overview of relevant mitigation measures. This document is referenced within Chapter 15 of the ES (Climate Change). The Gatwick Airside Operations Adverse Weather Plan (GAL, 2021) sets out additional measures that should be followed during other extreme weather events. The Outline Climate Resilience Design Principles captured within the Design and Access statement detail how elements of the design have been developed to account for climate change adaptation and would be implemented at the time of construction.</p> <p>An additional summary of mitigation measures/commitments made in relation to mitigation can be found in ES Appendix 5.2.3 Mitigation Route Map.</p> <p>Additionally, several mitigation measures are already embedded within the project. These are detailed within Table 15.8.4 and 15.9.1 in Chapter 15 of the ES (Climate Change) (APP-040).</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Chapter 15 Climate Change [APP-040]</p> <p>Design and Access Statement Volume 5 [APP-257]</p> <p>ES Appendix 5.2.3 Mitigation Route Map [APP-078]</p>	Agreed
2.4.4.4	Climate Change	<p>The Applicant has not made clear the links between the CCRA and the Mitigation Route Map (APP-078), which has not ensured they are consistent with the messaging they are providing.</p> <p>Updated position (Deadline 1): Noted, no further comment.</p> <p>Updated Position (Deadline 5): Addressed.</p>	<p>The Climate Change Chapter (Chapter 15 of the ES) makes reference to relevant chapters/documents within the DCO application that specify relevant mitigation and management approaches in relation to climate change. The measures within the Route Map (ES Appendix 5.2.3 Mitigation Route Map) are consistent with those included in Chapter 15 (Climate Change) in Table 15.8.4 and Table 15.9.1.</p>	<p>ES Chapter 15 Climate Change [APP-040]</p> <p>ES Appendix 5.2.3 Mitigation Route Map [APP-078]</p>	Agreed
Other					
There are no other matters relevant to this topic in this Statement of Common Ground.					

2.5. Construction

2.5.1 Table 2.5 sets out the position of both parties in relation to construction matters.

Table 2.5 Statement of Common Ground – Construction Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.5.1.1	Lack of construction phasing information.	<p>Further information is needed to satisfy stakeholders correct levels of mitigation have been put in place through the lengthy construction phase, including traffic management.</p> <p>Updated position (Deadline 1): See comments below relating to OCTMP in this section. Concern is also raised through the process regarding the lack of Community Engagement Plan in Row 19.122. WSCC would require an outline version of this Plan to understand how GAL intent to communicate with the communities affected during the long construction programme.</p> <p>Updated position (Deadline 5): Concerns remain regarding OCTMP, see Traffic and Transport section. WSCC will comment on the Construction Communications and Engagement Plan at Deadline 5.</p> <p><u>Updated position (12th August 2024)</u> <u>No further comments on the Construction Communications and Engagement Plan. It is acknowledged that Requirement 2A has been included in the dDCO.</u></p>	<p>ES Chapter 5: Project Description, along with its Appendices 5.3.1, Buildability Report, and 5.3.3, Indicative Construction Sequencing, provide indicative information on the proposed construction phasing.</p> <p>The detailed construction phasing will be finalised during the detailed design and pre-construction stages.</p> <p>Updated position (April 2024): ES Appendix 5.3.2: Code of Construction Practice Annex 7 – Construction Communications and Engagement Plan [REP2-015] was submitted at Deadline 2. This plan outlines the approach to stakeholder communications and engagement during the Project’s construction.</p> <p><u>Updated position (July 2024): DCO Requirement 2A now requires the Applicant to provide the host authorities and National Highways with a phasing scheme setting out the anticipated phases for construction before any works are commenced. This phasing scheme must be updated as set out in the DCO requirement.</u></p>	<p>ES Chapter 5 Project Description [REP1-016]</p> <p>ES Appendix 5.3.1 Buildability Report Part B Part 1 [APP-080]</p> <p>ES Appendix 5.3.3 Indicative Construction Sequencing [APP-088]</p> <p>Construction Communications and Engagement Plan [REP2-015]</p>	<p>Agreed Under discussion</p>
2.5.1.2	Outline Construction Traffic Management Plan (CTMP)	<p>The OCTMP identifies risks associated with construction traffic utilising routes through the J10 M23 and Hazelwick Air Quality Management Areas in Crawley. Reference is made to a monitoring system that ‘it is envisaged’ will be developed in the CTMP. However, no details on this monitoring system are provided.</p> <p>Updated position (Deadline 5): This row can be removed, as it is covered under Row 2.2.4.3</p> <p><u>Updated position (12 August 2024)</u> <u>OCTMP not yet agreed. The Highway Authority have reviewed the Applicant’s Deadline 7 submission of the Outline Construction Traffic Management Plan Version 3 (Tracked) [REP7-027]. The majority of the tracked changes to the Outline Construction Traffic Management Plan, that were included in the Joint Local Authorities Deadline 6 submission, entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099], have not been included by the Applicant. The Applicant appears to have commented on the comments made in the document but may not have reviewed and considered any of the tracked</u></p>	<p>The impact from construction traffic due to movement of construction materials will be managed in accordance with a Construction Traffic Management Plan (CTMP). The impact of construction workforce travelling to and from the Airport will be managed in accordance with a Construction Workforce Travel Plan (CWTP), both of which will be developed by GAL and its contractors during detailed design / pre-construction stage in accordance with the Outline Construction Traffic Management Plan.</p> <p>The detailed Construction Traffic Management Plan (CTMP) and Construction Workforce Travel Plan (CWTP) will be developed during detailed design and pre-construction stage in consultation with the relevant highway authority and the National Highways.</p> <p>ES Chapter 13: Air Quality has provided an assessment of air quality impacts from all related sources (road vehicles, aircraft and airport sources) following the methodology agreed with the local councils. A robust assessment presenting reasonable worst case effects has been provided in line with best practice guidance and</p>	<p>ES Appendix 5.3.2 Annex 3 Outline Construction Traffic Management Plan [APP-085]</p> <p>ES Appendix 5.3.2 Annex 2 Outline Construction Workforce Travel Plan [APP-084]</p> <p>ES Chapter 13 Air Quality [APP-038]</p> <p>ES Appendix 13.8.1 Air Quality Construction Period Mitigation [APP-161]</p>	<p>Not Agreed</p>

		<p>changes to the document. The tracked changes are in green coloured text and set out in the Joint Local Authorities Deadline 6 submission, entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099]. Further changes to the document are therefore required before this can be agreed.</p>	<p>available data. The assessment concludes that the impact of the Proposed Development would not be significant. As such, no mitigation is required as a result of the project.</p> <p>This notwithstanding, the assessment in Section 13.9 of ES Chapter 13: Air Quality sets out the proposed measures with the aim of reducing the airport contribution to local air quality regardless of significance.</p> <p>Measures that will be in place through the construction of the Project including mitigation and monitoring of dust are detailed in Section 5.8 of the ES Appendix Construction Period Mitigation and are included in the Code of Construction Practice, to be secured under the requirements of the DCO.</p> <p>Updated Position (April 2024): The Applicant has provided a draft air quality action plan (AQAP) at Appendix 5 of Draft Section 106 Agreement [REP2-004]. Section 2 of the AQAP sets out measures and monitoring commitments related to the construction phase, controlled by the Code of Construction Practice (CoCP) [REP1-021] secured by Requirement 7 of the Draft DCO. The current monitoring arrangements will allow the collection of air quality concentrations in the vicinity of the airport to support the understanding of air pollution effects in the construction period. The data will be used to compare against national standards.</p> <p>Updated position (Deadline 9): The Applicant has provided a response to the JLAS' comments on the oCWTP and oCTMP at Deadline 9 and updated the control documents where appropriate.</p>	<p>Appendix 5 of the Draft Section 106 Agreement [REP2-004]</p> <p>ES Appendix 5.3.2: Code of Construction Practice [REP1-021]</p>	
2.5.1.3	Project Description and Construction Phase Detail	<p>Given the duration of the construction programme will be up to 14 years, there is a lack of construction phasing information, which should be presented more clearly to enable local communities and WSCC to understand if the impacts have been appropriately addressed and mitigated through the outline control documents.</p> <p>Updated position (Deadline 1): See comments below relating to OCTMP in this section. Concern is also raised through the process regarding the lack of Community Engagement Plan in Row 19.122. WSCC would require an outline version of this Plan to understand how GAL intent to communicate with the communities affected during the long construction programme</p> <p>Updated position (Deadline 5):</p>	<p>ES Chapter 5: Project Description, along with its Appendices 5.3.1, Buildability Report, and 5.3.3, Indicative Construction Sequencing, provide indicative information on the proposed construction phasing.</p> <p>The detailed construction phasing will be finalised during the detailed design and pre-construction stages.</p> <p>Updated position (April 2024): ES Appendix 5.3.2: Code of Construction Practice Annex 7 – Construction Communications and Engagement Plan [REP2-015] was submitted at Deadline 2. This plan outlines the approach to stakeholder communications and engagement during the Project's construction.</p> <p>Updated position (July 2024): DCO Requirement 2A now requires the Applicant to provide the host authorities and National Highways</p>	<p>ES Chapter 5 Project Description (REP1-016)</p> <p>ES Appendix 5.3.1 Buildability Report Part B [APP-080]</p> <p>ES Appendix 5.3.3 Indicative Construction Sequencing [APP-088]</p> <p>Construction Communications and</p>	<p>AgreedUnder discussion</p>

		<p>Concerns remain regarding OCTMP, see Traffic and Transport section. WSCC will comment on the Construction Communications and Engagement Plan at Deadline 5</p> <p><u>Updated position (12 August 2024)</u> <u>No further comments on the Construction Communications and Engagement Plan. It is acknowledged that Requirement 2A has been included in the dDCO.</u></p>	<p><u>with a phasing scheme setting out the anticipated phases for construction before any works are commenced. This phasing scheme must be updated as set out in the DCO requirement.</u></p>	<p>Engagement Plan [REP2-015]</p>	
<p>2.5.1.4</p>	<p>CoCP and OCTMP</p>	<p>There is a lack of detail and clarity in the CoCP and Outline Construction Traffic Management Plan (OCTMP) (APP-085), including in relation to some of the proposed measures to reduce the construction impact, for example, the criteria for when contingency access routes may be used. The Applicant has also committed to working closely with the relevant authorities to carefully plan and manage construction traffic to ensure construction vehicles avoid areas that may increase traffic risk to vulnerable road users. However, the contingency access routes pass several schools and there is no firm commitment to ensure construction traffic, associated with the Project, avoid movements during school start and end times. These problems need to be addressed.</p> <p>Updated position (Deadline 5):</p> <p>The Authorities concerns remain that further information and clarity is required. This is to ensure that all safety matters relating to construction traffic have been fully considered and appropriately addressed and to ensure that the Outline Construction Traffic Management Plan (OCTMP) (APP-085) accords with Airports National Planning Policy Statement (ANPPS) and draws on best practice from other construction schemes. The Authorities will continue to positively engage with the Applicant to seek to address these concerns.</p> <p><u>Updated position (12 August 2024)</u> <u>OCTMP not yet agreed. The Highway Authority have reviewed the Applicant's Deadline 7 submission of the Outline Construction Traffic Management Plan Version 3 (Tracked) [REP7-027]. The majority of the tracked changes to the Outline Construction Traffic Management Plan, that were included in the Joint Local Authorities Deadline 6 submission, entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099], have not been included by the Applicant. The Applicant appears to have commented on the comments made in the document but may not have reviewed and considered any of the tracked changes to the document. The tracked changes are in green coloured text and set out in the Joint Local Authorities Deadline 6 submission,</u></p>	<p>The impact from construction traffic due to movement of construction materials will be managed in accordance with a Construction Traffic Management Plan (CTMP). The impact of construction workforce travelling to and from the Airport will be managed in accordance with a Construction Workforce Travel Plan (CWTP), both of which will be developed by GAL and its contractors during detailed design / pre-construction stage in accordance with the Outline Construction Traffic Management Plan.</p> <p>The detailed Construction Traffic Management Plan (CTMP) and Construction Workforce Travel Plan (CWTP) will be developed during detailed design and pre-construction stage in consultation with the relevant highway authority and the National Highways.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p><u>Updated position (July 2024): An updated oCTMP has been submitted to the examination at Deadline 7.</u></p> <p><u>Updated position (Deadline 9): The Applicant has provided a response to the JLAs' comments on the oCWTP and oCTMP at Deadline 9 and updated the control documents where appropriate.</u></p> <p><u>The Applicant cannot provide the location of vehicle holding areas at this point due to the delivery strategy not yet being determined.</u></p> <p><u>As it develops the delivery plan in more detail, details will be included in the CTMP(s) that will be issued for approval by the LPA.</u></p>	<p>ES Appendix 5.3.2 Annex 3 Outline Construction Traffic Management Plan [APP-085]</p> <p>ES Appendix 5.3.2 Annex 2 Outline Construction Workforce Travel Plan [APP-084]</p>	<p>Not Agreed</p>

		<p>entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099]. Further changes to the document are therefore required before this can be agreed.</p>			
2.5.1.5	Mitigation, Compensation and Enhancement	<p>The OCTMP (APP-085), whilst promoting positive measures to influence travel behaviour, lacks details and firm commitments about these and further clarification is required. For example, a commitment potentially involves increasing the frequency or capacity of buses to the construction site and another offering incentives or subsidies to contractors who chose to commute using public transport. However, no specific details are provided.</p> <p>Updated position (Deadline 5): The Authorities concerns remain that further information and clarity is required in relation to certain commitments in the OCTMP (APP-085). This is to ensure that the control documents are suitably detailed and provide sufficient clarity as to what is expected and can be delivered through the full document. It is also to ensure that the OCTMP (APP-085) occurs with Airports National Planning Policy Statement (ANPPS) and draws on best practice from other construction schemes. The Authorities will continue to positively engage with the Applicant to seek to address these concerns</p> <p>Updated position (12 August 2024) OCTMP not yet agreed. The Highway Authority have reviewed the Applicant's Deadline 7 submission of the Outline Construction Traffic Management Plan Version 3 (Tracked) [REP7-027]. The majority of the tracked changes to the Outline Construction Traffic Management Plan, that were included in the Joint Local Authorities Deadline 6 submission, entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099], have not been included by the Applicant. The Applicant appears to have commented on the comments made in the document but may not have reviewed and considered any of the tracked changes to the document. The tracked changes are in green coloured text and set out in the Joint Local Authorities Deadline 6 submission, entitled, Comments on any further information/submissions received by Deadline 5 [REP6-099]. Further changes to the document are therefore required before this can be agreed.</p>	<p>The impact from construction traffic due to movement of construction materials will be managed in accordance with a Construction Traffic Management Plan (CTMP). <i>There are no issues relating to Cumulative Effects and Interrelationships within this Statement of Common Ground.</i>					

/

2.7. Draft DCO and Explanatory Memorandum

2.7.1 **Table 2.7** sets out the position of both parties in relation to Draft DCO and Explanatory Memorandum matters.

2.7.2 As regards the draft DCO, the table below (and particularly where matters are marked 'Not Agreed') should be read in conjunction with the Applicant's **Response to the ExA's Proposed Schedule of Changes to the draft DCO** (Doc Ref. 10.72) and the Applicant's **Closing Submissions** (Doc Ref. 10.73) on the draft DCO. In those documents the Applicant has set out the further changes it has made to the draft DCO after the publication of the ExA's **Proposed Schedule of Changes to the draft DCO** [PD-028], some of which will resolve matters that were not agreed at the time the below table was most recently exchanged with the JLAs. Where the Applicant has identified points raised by the JLAs which remain outstanding as at Deadline 9, it has included and addressed these in its **Closing Submissions** (Doc Ref. 10.73) on the draft DCO. On that basis, specific additional responses have only been added to the below table by exception where new material is raised in these SoCGs that is not otherwise addressed elsewhere.

2.7.1 ~~Similarly the Legal Partnership Authorities will be submitting a consolidated response to the draft DCO including comments on the ExA further changes at Deadline 9, therefore the table below should also be read in conjunction with this document and the JLA's closing statement~~

Table 2.7 Statement of Common Ground – Draft DCO and Explanatory Memorandum Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.7.1.1	Concerns about dDCO wording.	<p>WSCC have provided initial comments on the dDCO and the Applicant has amended some elements to take account of these comments. Principal areas of disagreement remain in relation to various articles and schedules within the dDCO.</p> <p>Updated position (Deadline 1): All references in this column to the draft Development Consent Order (“dDCO”) are to Version 3.0 of the dDO [PDLA-004] dated February 2024. This column provides a summary of the Council’s position in respect of the points detailed in Table 2.7. Further detail, particularly in respect of points not addressed in Table 2.7, will be submitted at Deadline 1.</p> <p>Updated position (Deadline 5): In the Deadline 5 updates below, all references to the dDCO are to Version 6.0 [REP3-006].</p> <p><u>Updated Position (12 August 2024)</u> <u>A number of outstanding issues remain as outlines at D8.</u></p>	The Council's specific concerns are responded to below.	Draft DCO (REP3-006)	Not agreed Under discussion
2.7.1.2	Draft Development Consent Order (APP-006)	<p>The definition of “commencement” and, in particular, the implications arising from certain operations which fall outside that definition, and which do not appear to be controlled (article 2(1), interpretation);</p> <p>Updated position (Deadline 1): It is noted that each of the 15 exceptions to the definition of “commencement” is either included in at least one of the following made DCOs: Sizewell C, Manston Airport, and M25 Junction 28, or “aligns with emerging drafting submitted in the Luton Airport Expansion” dDCO.</p> <p>The SoCG and Explanatory Memorandum (“EM”) [AS-006] identify precedents; however, this is not enough. For instance, it does not follow that a provision relevant to the authorisation of a nuclear-powered generating station in Suffolk or the alteration of a motorway junction in</p>	<p>The drafting of the definition of "commence" has advanced since the version commented upon. There are now 15 exceptions at sub-paragraphs (a) to (o) of article 2(1).</p> <p>These exceptions are all preceded by at least one of the Sizewell C (article 2), Manston Airport (article 2) or M25 J28 (article 2) DCOs or align with emerging drafting submitted in the Luton Airport Expansion application (Schedule 2, Part 1). The only additional provision is sub-paragraph (n) (establishment of temporary haul roads), which has been included as a separate limb for clarity, though the stated activity falls within the scope of other more generally worded exceptions from "commencement" in precedent DCOs (e.g. 'construction of temporary structures').</p>	<p>Draft DCO (REP3-006)</p> <p>Paragraph 3.4.1 of the Explanatory Memorandum to the Draft Development Consent Order [AS-006]</p> <p>ES Chapter 5 Project Description (REP1-016)</p>	Under discussion Not Agreed

		<p>Essex is relevant to the instant project. The relevance must be explained and the inclusion of the provision justified. The same point applies to provisions based on those which are included in airport DCOs, made or otherwise.</p> <p><i>Advice Note Fifteen: Drafting Development Consent Orders</i> (republished July 2018 (version 2)) is clear on this point. It states –</p> <p style="padding-left: 40px;">“If a draft DCO includes wording derived from other made DCOs, this should be explained in the Explanatory Memorandum. <u>The Explanatory Memorandum should explain why that particular wording is relevant to the proposed draft DCO</u>, for example detailing what is factually similar for both the relevant consented NSIP and the Proposed Development. <u>It is not sufficient for an Explanatory Memorandum to simply state that a particular provision has found favour with the Secretary of State previously; the ExA and Secretary of State will need to understand why it is appropriate for the scheme applied for. Any divergence in wording from the consented DCO drafting should also be explained.</u> Note, though, that policy can change and develop”.</p> <p style="padding-left: 40px;">(Paragraph 1.5, emphasis added).</p> <p>In the light of the above, it is clear the applicant should give reasons specific to each exception being suggested, rather than seeking to rely on the generic reference to precedent made in the EM and SoCG.</p> <p>WSSC notes pre-commencement activities are subject to the COCP; however, this is not clear from Requirement 7 (code of construction practice) and it should be made explicit on the face of the dDCO. The limitations of the COCP, and the Council’s concerns about that document, are described elsewhere in this document.</p> <p>Paragraph 3.4.1 of the EM [AS-006] states the excluded operations “do not give rise to any materially new or materially different environmental effects to those assessed in the Environmental Statement (Doc Ref. 5.1), being either de minimis or having minimal potential for adverse effects, in line with the Planning Inspectorate’s Advice Note 15”. Paragraph 3.4.1 then goes on to refer to them as “low impact preparatory works”.</p> <p>Certain of the excluded operations would seem capable of giving rise to significant effects and it is not clear how the dDCO restricts these works to “low impact preparatory works”. To give one example, sub-paragraph (k) (“erection of temporary buildings and structures”) does not place any</p>	<p>As per paragraph 3.4.1 of the Explanatory Memorandum to the Draft Development Consent Order [AS-006] (“ExM”), it is reasonable and proportionate to include the specified exceptions to enable the efficient use of time in the construction timetable prior to the triggering of “commencement” under the DCO. All pre-commencement activities will be subject to the Code of Construction Practice and its associated management plans (see requirement 7) and must be carried out in accordance with the Carbon Action Plan (see requirement 21).</p> <p>The activities specified in this definition were selected to accord with precedent and as activities which can be (and, in many cases, must be) carried out early in the construction timetable. As per the ExM, the activities do not give rise to materially new or materially different environmental effects to those assessed in the ES.</p> <p>The ES assesses the environmental impacts from preparatory and construction activities for the project, and the activities captured by the exceptions to the definition of “commence” have been assessed as part of this exercise. However, given that the exceptions are categories of activities which form part of the wider preparatory and construction works timetable, there are not specific passages of the ES which can be cited in respect of each individual exception. Certain of the pre-commencement activities which can be identified with particular certainty at this stage are described from Paragraph 5.3.8 of ES Chapter 5: Project Description.</p> <p>Updated position (April 2024):</p> <p>The Applicant reiterates that the approach of excepting certain construction activities from triggering “commencement” of the DCO is well precedented in made DCOs. The Council’s comments on the relevance of precedent are noted, but the Applicant considers that it is useful to bring this to the ExA’s attention to demonstrate where drafting approaches are commonly deployed by promoters and accepted by the Secretary of State. The justification for excepting activities from “commencement” accompanies the references to precedent in paragraph 3.4.1 of the Explanatory Memorandum to the Draft Development Consent Order [REP1-007].</p> <p>In respect of the Council’s comment on the CoCP, this is already apparent on the face of the DCO. Requirement 7 specifies that “Construction of the authorised development must be carried out in accordance with the code of construction practice unless</p>		
--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

		<p>limit on the size of the “buildings and structures” or indicate what “temporary” might mean. An explanation is needed.</p> <p>Regarding temporary exempted works generally (for instance, as well as the temporary buildings and structures already referred to, sub-paragraph (n) provides for the “establishment of temporary haul roads” and sub-paragraph (o) for the “temporary display of site notices, advertisements or information”) it is not clear how these will be dealt with when they are no longer needed. Again, this needs to be made clear on the face of the dDCO. WSCC is surprised by the applicant’s conclusion that no passage from the ES can be cited in respect of any exception (noting that, to give one example, the exception could provide for a temporary building of limitless size). The Council considers this approach to pre-commencement activities to be too casual and owing to this, and the lack of certainty as to what the exceptions to “commencement” would entail, considers these works should be subject to the approval of either the local planning authority or local highway authority, depending on the type of works involved.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant states “<i>Certain of the pre-commencement activities which can be identified with particular certainty at this stage are described from paragraph 5.3.8 of ES Chapter 5: Project Description. [REP1-017]</i>”. In that document, Table 5.3.1: Indicative Sequencing of Construction Works identifies the following pre-commencement activities –</p> <ul style="list-style-type: none"> • pre-construction activities (including surveys for any Unexploded Ordnance (UXO) and any necessary pre-construction surveys). This would seem to fall within sub-paragraph (b) of the definition of “commence” in article 2(1) (interpretation); • establishment of compounds. This would seem to fall within sub-paragraph (m) of the definition of “commence”; • fencing. This would seem to fall within sub-paragraph (e) of the definition of “commence”; and • diversion works and re-provision of essential replacement services. These would seem to fall within sub-paragraph (h) of the definition of “commence”. <p>No mention of the remaining elements of the definition of “commence” is included in Table 5.3.1.</p> <p>WSCC therefore maintains its position as set out in Update 1: the applicant should give reasons specific to each exception being suggested. For instance, no justification is given for the inclusion of the “erection of temporary buildings and structures” (sub-paragraph (k) and no idea is provided regarding the size of these or what “temporary” might mean. Regarding the “establishment of temporary haul roads” (sub-paragraph (n)), and the “temporary display of site notices” it is not clear how these will be dealt with when they are no longer needed.</p> <p><u>Updated position (12 August 2024)</u></p>	<p><i>otherwise agreed with CBC”</i> (emphasis added). There is no reference to commencement. Therefore, any part of the authorised development being carried out is subject to the CoCP. Duplicative wording in a separate location of the draft DCO is unnecessary.</p> <p>All pre-commencement activities will be subject to the CoCP and its associated management plans (see requirement 7); the written schemes of investigation for Surrey and West Sussex (see requirement 14); the carbon action plan (see requirement 21) and the flood resilience statement (see requirement 24). These control measures provide sufficient assurance that impacts of pre-commencement works will be adequately managed.</p> <p><u>Updated position (July 2024)</u></p> <p><u>The Applicant maintains the position set out in its earlier updates, but refers to the additional explanation provided in response to DCO.2.1 in its Response to ExQ2 – Development Consent Order and Control Documents (Doc Ref. 10.56) which signposts how each activity specified in the definition is subject to controls elsewhere in the draft DCO (Doc Ref. 2.1) and in the Code of Construction Practice (Doc Ref. 5.3) (CoCP).</u></p> <p><u>The Applicant continues to consider that the JLAs' concern is targeted more at how the activities it references are controlled more broadly, rather than their inclusion in the definition of "commence", and hopes that this additional explanation (along with new drafting that has been added to the CoCP) satisfies any remaining concerns.</u></p>		
--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

		<p>The Authorities welcome the Applicant's further detail on these points, particularly in the updated (ie D7) COCP.</p> <p>As mentioned previously, the Authorities main concerns are with the potential impacts of the works that fall within paragraphs (k), (m), (n) and (o).</p> <p>Regarding (m), the establishment of construction compounds, the Authorities welcome paragraph 5.4.14 of the COCP which states -</p> <p>"Temporary construction compounds will be reinstated to their previous use and habitats will be restored to their existing ecological value (as a minimum)".</p> <p>The Authorities consider the COCP should include similar commitments in respect of the following paragraphs and would be grateful if the Applicant could confirm the COCP will be updated accordingly –</p> <p>(k) erection of temporary buildings and structures;</p> <p>(m) establishment of construction compounds;</p> <p>(n) establishment of temporary haul roads; and</p> <p>(o) the temporary display of site notices, advertisements or information</p>			
2.7.1.3	Draft Development Consent Order (APP-006)	<p>Clarification of other definitions relating to various airport and boundary plans listed in the order and extent of operational land.</p> <p>Updated position (Deadline 5): WSCC remains unclear as to extent of the operational land boundaries and would welcome a clear explanation of these.</p> <p>Turning to the concern with definitions (including works descriptions), WSCC agrees with the points raised in the Legal Partnership Authorities' response to ExQ1 DCO.1.39 in both the Deadline 3 response "Responses to ExQ1" [REP3-135] and the Deadline 4 response "Comments on responses to ExQ1 – DCO and Control Docs" [REP4-062].</p> <p>Updated position (12 August 2024)</p> <p>Regarding the descriptions of certain Work Nos., the Authorities included in their D8 submission "Consolidated Submissions on the draft DCO – Update at Deadline 8" (for which there was no Examination Library reference when this Update was provided), a commentary on those Work Nos. for which more detail is required. (See, for example, (i) Part A row 176 regarding Work Nos 28 and 41 (ii) Part B rows 13 to 24 regarding (respectively) the following Work Nos: 18, 22, 28, 29, 30, 31, 32, 33, 28, 41, 43, and 44.</p> <p>Regarding operational land, the Council maintains its position here. The extent of the Applicant's operational land (post development consent)</p>	<p>The precise nature of the Council's concerns is not clear from this comment – please clarify.</p> <p>Updated position (July 2024)</p> <p>The Applicant is unclear precisely what concerns from those in the left hand column remain unresolved at this time.</p> <p>In respect of concerns with work descriptions, the JLAs' comments submitted at Deadline 6 have been responded to at Deadline 7, with the Applicant undertaking a comprehensive exercise to:</p> <ol style="list-style-type: none"> 1. add further detail to some work descriptions in Schedule 1 (authorised development) to the draft DCO (Doc Ref. 2.1) where appropriate; 2. further supplement the Design Principles (Doc Ref. 7.3) in response to comments; and 3. review the Works Plans [REP6-009] and submit additional Informative Sub-Works Plans (Doc Ref. 4.11) to provide additional contextual information for the JLAs to better understand how the work descriptions map onto the Works Plans. <p>In relation to operational land, the Applicant reiterates its previous position above.</p> <p>Updated position (Deadline 9) Regarding operational land, the Applicant does not understand the nature of the concern. The "Order limits" are defined in the draft DCO as "the limits shown on the works plans within which the</p>	Draft DCO (REP3-006)	Not Agreed Under discussion

		<p>remains unclear. To give one example: the Applicant has proposed a new requirement 37 (car parking spaces) which includes a proposed car parking cap of "53,260 car parking spaces within the Order limits". It is not clear how these Order limits relate to the Applicant's operational land (post development consent) and clarification of this point by the Applicant would be welcomed</p>	<p>authorised development may be carried out" – i.e. the redline for the development. To the extent the draft DCO affects the Applicant's operational land (e.g. by virtue of article 9(1) (planning permission), this will not have any effect beyond the Order limits. The car parking space cap in requirement 37 cannot therefore be overcome by use of permitted development rights (and the Applicant is adding drafting at Deadline 9 to make this clearer still).</p>		
2.7.1.4	Draft Development Consent Order (APP-006)	<p>The drafting of article 3 (development consent etc. granted by Order).</p> <p>Updated position (Deadline 1): A drafting point regarding article 3(2): the EM says this paragraph is preceded in art.3(2) of the Manston Airport DCO 2022; however, while Gatwick refers to "Any enactment applying to land within or adjacent to the Order limits ..." Manston refers to "Any enactment applying to land within, adjoining or sharing a common boundary with the Order limits".</p> <p>WSSC would be grateful if the applicant could confirm why it departed from the cited precedent.</p> <p>Updated position (Deadline 5): WSSC notes the Applicant's position regarding the use of "adjacent"; however, it is not clear from the Applicant's answer or (say) from the Explanatory Memorandum what "adjacent to" means in practice i.e. the extent of that land adjacent to the Order limits will be affected. Can this be explained? For instance, for illustrative purposes, shown on a plan?</p> <p>Updated position (12 August 2024) The Council confirms this amendment has been resolved.</p>	<p>Several precedent DCOs contain a separate article authorising the operation and use of the authorised development – see, for example, article 7 of the Sizewell C DCO: "<i>The undertaker is authorised to operate and use the authorised development for which development consent is granted by this Order.</i>"</p> <p>In drafting article 3 of the draft DCO, it was considered that it was clearer and more succinct to subsume the separate authorisation of operation and use into a single provision in article 3.</p> <p>Updated position (April 2024):</p> <p>The Applicant considers that "adjacent" is more appropriate than the wording cited in the Manston Airport Development Consent Order 2022. It is not clear to the Applicant the distinction between land "adjoining" the Order limits and land "sharing a common boundary with the Order limits" from the Manston Order. Use of "adjacent" captures enactments which affect land adjoining the Order limits and land otherwise very near to the Order limits, both of which may still (if not taking effect subject to the provisions of the Order) hinder the carrying out of the authorised development (e.g. by preventing access to the site).</p> <p>The Applicant notes that the drafting in article 3(2) of the draft DCO (including "or adjacent") is well preceded in made DCOs, including article 3(9) of the National Grid (Yorkshire Green Energy Enablement Project) Development Consent Order 2024, article 4(2) of the A66 Northern Trans-Pennine Development Consent Order 2024 and article 3(2) of the Boston Alternative Energy Facility Order 2023.</p> <p>Updated position (July 2024): Article 3(2) was amended in version 8 of the draft DCO submitted at Deadline 6 [REP6-005] and the Applicant understands that this amendment resolved this concern.</p>	Draft DCO (REP3-006)	Under discussion Agreed

<p>2.7.1.5</p>	<p>Draft Development Consent Order (APP-006)</p>	<p>The drafting of article 6 limit of works which appears to give the Applicant the ability to exceed parameters beyond the ES.</p> <p>WSCC maintains its position that clarification is needed on how what is shown on the plans relates to the various definitions of the airfield boundaries, DCO limits and operational land for both the current and future Airport.</p> <p>Updated position (Deadline 5): WSCC maintains its position on this issue and considers (for example) the position regarding the extent of the Applicant's operational land boundary remains unclear.</p> <p>Updated position (12 August 2024)</p> <p><u>The point on operational land is dealt with at the end of the updated position on row 2.7.1.3 and for convenience is repeated below –</u></p> <p><u>Regarding operational land, the Council maintains its position here. The extent of the Applicant's operational land (post development consent) remains unclear. To give one example: the Applicant has proposed a new requirement 37 (car parking spaces) which includes a proposed car parking cap of "53,260 car parking spaces within the Order limits". It is not clear how these Order limits relate to the Applicant's operational land (post development consent) and clarification of this point by the Applicant would be welcomed.</u></p>	<p>The deviations authorised by article 6 were discussed with the EIA team as part of design coordination during the development of the proposals. The parameters assessed are set out in paragraphs 5.2.9 to 5.2.108 of ES Chapter 5: Project Description, including at paragraph 5.2.13, which records that the Work Plans and Parameter Plans show the "<u>approximate level of the finished works</u>" (emphasis added).</p> <p>In any event, it is not intended to raise or lower the full scheme of the surface access works up to the limits of deviation specified in article 6, particularly given that the scheme will be tied into existing infrastructure and accesses. It is envisaged that sections of the scheme will be raised or lowered to a lesser degree (e.g. as part of refinements of structural depths of bridge decks) and that there may be modest changes (within the specified limits) to levels such as where necessary to shift the high point of flyovers.</p> <p>Detailed design for any aspect of the works will be subject to the approval of the relevant planning authority (pursuant to requirements 4 and 5 of the draft DCO) or National Highways (pursuant to requirement 6 and Part 3 of Schedule 9 of the draft DCO).</p> <p>Updated position (April 2024): Article 6 has been amended to further clarify its intended mode of operation and the documents referred to in version 6.0 of the draft DCO submitted at Deadline 3 [REP3-006].</p> <p>By way of additional information, in the draft DCO the "Order limits" are defined by reference to the Works Plans [REP3-011], which clearly show the Project redline. The "airport" is defined by reference to the airport boundary plan, currently at Appendix 1 to the Glossary [REP3-011]. In respect of operational land, the response to Action Point 9 in The Applicant's Response to Actions from Issue Specific Hearing 2: Control Documents / DCO [REP1-063] explains what constitutes the Applicant's operational land and further commentary is offered in the responses to Action Points 9 and 10 in section 5.5 of the Applicant's Response to Deadline 2 Submissions [REP3-106].</p> <p>Updated position (July 2024):</p> <p><u>The Applicant is not aware of outstanding concerns from the JLAs regarding article 6 (limits of works) allowing the Applicant to exceed parameters assessed in the Environmental Statement. As per</u></p>	<p>Draft DCO (REP3-006)</p> <p>ES Chapter 5 Project Description (REP1-016)</p>	<p>Not Agreed Under discussion</p>
----------------	--------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------	--------------------------------------------------------------

			<p>paragraphs (6) and (7) of that article, the specified limits can only be set aside where it is demonstrated to the relevant authority's satisfaction that works in excess of the limits would not give rise to any materially new or materially different environmental effects from those in the Environmental Statement.</p> <p>In respect of operational land, the response to Action Point 9 in The Applicant's Response to Actions from Issue Specific Hearing 2: Control Documents / DCO [REP1-063] explains what constitutes the Applicant's operational land and further commentary is offered in the responses to Action Points 9 and 10 in section 5.5 of the Applicant's Response to Deadline 2 Submissions [REP3-106].</p> <p>Updated position (Deadline 9) The Applicant has responded on operational land above.</p>		
2.7.1.6	Draft Development Consent Order (APP-006)	<p>The drafting of article 9 (planning permission) and confirmation regarding which planning permission and conditions the applicant is concerned about.</p> <p>Updated position (Deadline 1): To allow WSCC to understand the full implications of article 9(3) and (4), WSCC requests the applicant provides a full list of the existing planning permissions (including deemed planning permission) which are at issue. Once that information is provided, WSCC will be better able to say whether those provisions are acceptable.</p> <p>Regarding article 9(4), who will decide what "incompatible" means and how that will be conveyed to other parties (e.g. the local planning authority)?</p> <p>Regarding article 9(5), WSCC disagrees with the applicant's analysis that retaining permitted development rights would "allow for <u>minor works</u> to be separately consented without needing to rely on an amendment to the Order, which would be disproportionate and impractical".</p> <p>First, WSCC considers the potential scope of development permitted by the provisions cited in article 9(5) cannot be dismissed as "minor works" and is unconvinced these should be retained. Second, if further development, which is not authorised by the DCO, is to take place at the airport, it should be subject to control by the local planning authority. Third, if the applicant wants the DCO to authorise yet further works, these should be included in Schedule 1 in the usual way (and their effects assessed). This approach is consistent with Advice note thirteen:</p>	<p>Please refer to paragraphs 4.24 – 4.28 of the ExM, which explains the rationale for article 9 in light of the recent Supreme Court decision in <i>Hillside Parks Ltd v Snowdonia National Park Authority</i> [2022] UKSC 30. Other recently submitted DCO applications make similar provision, including the draft Luton Airport Expansion DCO (article 45) and Lower Thames Crossing DCO (article 56).</p> <p>As regards the cited wording which disapplies incompatible conditions of previously granted planning permissions, similar wording features in article 45(2)(c) of the draft Luton Airport Expansion DCO.</p> <p>In response to the further queries:</p> <ol style="list-style-type: none"> 1) The drafting at article 9(1) of the draft DCO is a model provision (article 36) which is well-established in numerous precedent DCOs. The drafting is by reference to section 264 of the Town and Country Planning Act 1990 ("TCPA 1990") and the effect is to ensure that permitted development rights attaching to the undertaker in relation to operational land have effect as they would do if planning permission had been granted for the authorised development. "Operational land" is defined in section 263 TCPA 1990. 2) Sub-paragraphs (2) and (3) address legal risk arising from the <i>Hillside</i> decision and ensure that (i) the authorised development can continue to be carried out 	Draft DCO (REP1-016) Paragraphs 4.24 – 4.28 of the Explanatory Memorandum to the Draft Development Consent Order [AS-006]	Under discussion Not agreed

		<p>Preparation of a draft order granting development consent and explanatory memorandum (Republished February 2019 (version 3)) which states (at paragraph 2.9) the dDCO should include the following –</p> <ul style="list-style-type: none"> • “A full, precise and complete description of each element of the NSIP, preferably itemised in a Schedule to the DCO; and • A full, precise and complete description of each element of any necessary “associated development””. <p>The retention of permitted development rights could, contrary to Advice note thirteen, result in a partial and incomplete description of the proposed development being included in the dDCO.</p> <p>Updated position (Deadline 5):WSSC is mainly concerned with paragraphs (4) and (5), neither of which is included in the corresponding provisions of the Lower Thames Crossing or Luton draft DCOs. (See article 56 of the former [REP10-005] and article 45 of the latter [REP11-092]).</p> <p>Article 9(4): regarding paragraph (4), the Applicant has confirmed in its answer to ExQ1 GEN1.2 [REP3-091]- “<i>The operation of the repositioned northern runway, once implemented, would be incompatible with the restrictions on its use under the 1979 planning permission. As such, Article 9(4) would be engaged and that use restriction under the 1979 planning permission would cease to have effect</i>”. In its Deadline 4 response to this answer, WSSC states the power under paragraph (4) should be limited to the identified mischief i.e. the relevant conditions of the 1979 planning permission. WSSC considers there is no justification for this power, which is extraordinary for a private company, to be cast any wider.</p> <p>Article 9(5): WSSC maintains the position, which has been articulated in previous submissions, that the exceptions concerning permitted development rights within article 9(5) (and requirements 4 and 10) should be removed and drafting included which provides the permitted development rights do not apply. (Please see, for example, column 6 of Appendix M to the West Sussex LIR [REP1-069], action point 10 of Legal Partnership Authorities Responses to Applicants Written Summary of Oral Submissions and Responses to Actions (from Issue Specific Hearings 1-5) [REP2-081], and paragraph 4.2 of Issue Specific Hearing 2: Control Documents and the DCO Post Hearing Submission [REP2-212].</p> <p><u>Updated position (12 August 2024)</u> <u>Article 9(4)</u> <u>In both the Authorities D7 “Consolidated Submissions on the draft DCO” [REP7-108] and the updated version of that document which was submitted at D8 [see Part B], the Authorities suggested two Alternatives</u></p>	<p>notwithstanding an incompatible planning permission and (ii) planning permissions granted and initiated prior to commencement of the authorised development under the DCO can continue to be lawfully implemented thereafter. Whether activities authorised by the DCO are taking place pre- or post-commencement do not affect these principles.</p> <p>3) As above.</p> <p>4) 'Incompatibility' is as discussed in the Hillside decision. A planning permission would be 'incompatible' with the development authorised by the DCO if it were physically impossible to build out both developments (e.g. due to overlapping consented structures).</p> <p>There is no sub-paragraph (9) in article 9 of the current draft DCO and it is presumed that this point is in reference to sub-paragraphs (5) and (6) of the present drafting. These make clear that the DCO does not restrict the future exercise by the undertaker of permitted development rights. This is necessary to ensure that GAL as airport operator can continue to rely on its extant permitted development rights to facilitate the ongoing operation of the airport and allow for minor works to be separately consented without needing to rely on an amendment to the Order, which would be disproportionate and impractical.</p> <p>Updated position (April 2024): The Applicant refers to the explanation provided at paragraph 4.1.24 of its Written Summary of Oral Submissions from Issue Specific Hearing 2: Control Documents / DCO [REP1-057]. The Applicant does not consider that a prescribed mechanism is required as regards potential incompatibility dealt with by article 9(4). The question of incompatibility under article 9(4) is only likely to arise in the event that enforcement action is pursued in respect of an extant planning permission. In such circumstances, it would be for the defendant party to rely on article 9(4) and particularise how it affects the enforcement action in question.</p> <p>As regards article 9(5), all works forming part of the Project have been included in the Applicant's application. As per the Applicant's response to Action Point 10 in The Applicant's Response to Actions from Issue Specific Hearing 2: Control Documents / DCO [REP1-063], many of the works forming part of the DCO application could otherwise have been carried out by the Applicant under its permitted development rights. The Applicant has chosen to seek a DCO for the Project as a whole, holistically, and accepts</p>		
--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

– Alternative A and Alternative B – for article 9(4). The text below is taken from the D8 document –

Alternative A
The Authorities note that, in the latest version of Appendix A to the Planning Statement [REP7-057], the Applicant has identified (in paragraph 1.2.2) two conditions from “the 1979 Permission” [i.e. planning permission CR/125/1979] as “inconsistent with the Project” namely –
“Condition 3 restricts the use of the emergency runway to times when the main runway was temporarily not in operation; and Condition 4 requires the western noise mitigation bund to remain in place”.
Paragraph 1.2.3 states: “These restrictions are **the only inconsistent conditions** that the Applicant is aware of”. [Emphasis added].
The Authorities do not disagree with this analysis. Owing to the fact the Applicant and Authorities consider only two conditions are inconsistent with the DCO application, the Authorities would suggest that the Applicant’s proposed paragraph (4) (which the Authorities considered should be deleted at D7) should be amended as follows –
“(4) Conditions 3 and 4 of planning permission CR/125/1979, which are incompatible with the requirements of this Order or the authorised development, shall cease to have effect from the date the authorised development is commenced.”
If this amendment were made, the new paragraph (5), which was introduced by the Applicant at D7 [REP7-006], should be deleted as it would no longer be necessary (because paragraph (5) concerns a notification point which would fall away in the light of the Authorities’ proposed amendments to paragraph (4)).

Alternative B
The Authorities have considered the planning permissions which affect the airport. If this drafting is retained, the Authorities consider the following conditions should be excepted from article 9(4) because they are not incompatible under paragraph (4) and so, for the avoidance of doubt, should be preserved –

New Schedule
SCHEDULE [X]
CONDITIONS EXCEPTED FROM ARTICLE 9(4)

<u>Condition</u>	<u>Planning permission</u>	<u>Site address</u>
<u>3</u>	<u>CR/2020/0707/NCC</u>	<u>Hampton by Hilton, Longbridge House</u>
<u>8</u>	<u>CR/2019/0802/FUL</u>	<u>Bloc Hotel, South Terminal</u>
<u>9</u>	<u>CR/2019/0802/FUL</u>	<u>Bloc Hotel, South Terminal</u>
<u>11</u>	<u>CR/2017/0116/FUL</u>	<u>Boeing Hangar</u>
<u>25</u>	<u>CR/2017/0116/FUL</u>	<u>Boeing Hangar</u>
<u>9</u>	<u>CR/2011/0620/FUL</u>	<u>Pollution Control Lagoon</u>
<u>9</u>	<u>CR/2011/0014/FUL</u>	<u>Sofitel London Gatwick</u>
<u>10</u>	<u>CR/2011/0014/FUL</u>	<u>Sofitel London Gatwick</u>
<u>1</u>	<u>CR/2010/0396/NCC</u>	<u>Runway Shoulders</u>
<u>5</u>	<u>CR/2009/0326/FUL</u>	<u>North Terminal</u>

that the Project should be controlled as a whole through the DCO and related control documents.

However, this approach does not mean that the Applicant should be deprived of its permitted development rights over the operational airport in future if the DCO is granted, as now appears to be the Council’s suggestion. The Applicant does not consider it appropriate for a DCO, which is granted in respect of a defined project which will be built out and in due course completed, to disapply permitted development rights relating to that site for the purpose of future, distinct development. The rationale for the provision by Government (under the authority of Parliament) of permitted development rights to airport operators such as the Applicant is to allow them to carry out development in support of the effective and efficient running of an airport. This rationale remains – and is indeed amplified – if this DCO is granted and the northern runway is brought into routine use.

In any event, article 9(5) merely restates and clarifies what the Applicant considers to be the existing position at law, and the Applicant does not consider that a DCO without this wording would restrict the subsequent use of permitted development rights. However, it is considered preferable to clarify this expressly.

Updated position (July 2024):

Useful discussions continue between the parties to try and find an agreed approach to article 9(4) and the notification of any incompatible planning conditions. The Applicant has included a notification provision in article 9(5) in version 8 of the draft DCO submitted at Deadline 6 [REP6-005] and is hopeful that this wording will be agreeable to the JLAs.

In respect of what was article 9(5) (now numbered article 9(6) in version 9 of the draft DCO submitted at Deadline 7 (Doc Ref. 2.1)), the Applicant understands that agreement will not be reached with the JLAs.

The JLAs set out their position in [REP6-110] that they wish article 9(5) to prohibit (i) the exercise of any permitted development rights on Museum Field, Pentagon Field and the reed beds (i.e. Work No. 43) and (ii) the exercise of any permitted development rights to deliver car parking anywhere on the airport.

		<table border="1"> <tr> <td>4</td> <td>CR/2002/0865/FUL</td> <td>Travel Inn, Longbridge Road</td> </tr> <tr> <td>8</td> <td>CR/1999/0243/FUL</td> <td>Jetset House and Compound Adjacent to Perimeter Road South</td> </tr> <tr> <td>4 and 5</td> <td>CR/1997/0138/FUL</td> <td>Car Park Z, Southern Perimeter Area</td> </tr> <tr> <td>9</td> <td>CR/1997/311/FUL</td> <td>Computer Centre, Buckingham Gate</td> </tr> <tr> <td>11 and 12</td> <td>CR/127/1979</td> <td>Outline application for Airport Passenger Terminal and associate access</td> </tr> </table> <p>Article 9(5) The Authorities welcome the removal of permitted development rights, as suggested by the ExA, for the reasons set out in various earlier representations.</p> <p>The Authorities will of course consider any proposals by the Applicant as an alternative means of achieving the same objective but the Authorities would want to be reassured that any proposed cap put forward by the Applicant on parking numbers would be capable of enduring for the lifetime of the operation, and would indirectly exclude the provision of additional parking within the perimeter of the Airport, whether that be through the exercise of permitted development rights or through any express planning permissions. This suggestion would not address the Authorities concerns were it to simply be a cap which only regulates development as long as it's being undertaken under the DCO. The Authorities await further information as to the Applicant's proposal for a parking cap.</p>	4	CR/2002/0865/FUL	Travel Inn, Longbridge Road	8	CR/1999/0243/FUL	Jetset House and Compound Adjacent to Perimeter Road South	4 and 5	CR/1997/0138/FUL	Car Park Z, Southern Perimeter Area	9	CR/1997/311/FUL	Computer Centre, Buckingham Gate	11 and 12	CR/127/1979	Outline application for Airport Passenger Terminal and associate access	<p>For the reasons set out above, the Applicant continues to consider it disproportionate, unjustified and unnecessary to disapply broad swathes of the Applicant's permitted development rights over the whole airport. In relation to airport-wide development of car parking, the Applicant has explained its position on several previous occasions, and most recently in response to DCO.2.6 in its Response to ExQ2 – Development Consent Order and Control Documents (Doc Ref. 10.56). This notwithstanding, in cognisance of the JLAs' particular concerns, the Applicant has sought to offer a reasonable compromise position that represents a significant concession on behalf of the Applicant.</p> <p>In version 9 of the draft DCO submitted at Deadline 7 (Doc Ref. 2.1), the Applicant has specified in article 9(7) that it must not exercise any permitted development rights for any development on Museum Field or for any car parking development on Pentagon Field or the water treatment works (i.e. the reed beds, Work No. 43). The disapplication of permitted development rights more broadly than for car parking for the latter two sites is considered disproportionate because these sites are identified by the Applicant as potentially suitable for future development such as for solar panels. In any event, the Applicant would be bound to comply with any landscape and ecology management plan approved for those sites under requirement 8 of the draft DCO and would breach the DCO were it to use its permitted development rights contrary to the landscaping secured in such plans.</p>		
4	CR/2002/0865/FUL	Travel Inn, Longbridge Road

9	CR/1997/311/FUL	Computer Centre, Buckingham Gate																		
11 and 12	CR/127/1979	Outline application for Airport Passenger Terminal and associate access																		
2.7.1.7	Draft Development Consent Order (APP-006)	<p>The disapplication of several provisions of the New Roads and Street Works Act 1991 without the application of the relevant highway authority's permit scheme (article 10; application of the 1991 Act).</p> <p>Updated position (Deadline 5): WSSC notes the Applicant is considering the implications of the application of the highway authority's permit scheme to the authorised development and will discuss further with the highway authority. WSSC would welcome these discussions and emphasises that the Traffic Management (Surrey County Council) Permit Scheme Order 2015 (as varied) was incorporated into the M25 Junction 10/A3 Wisley Interchange Development Consent Order 2022 (SI 2022/549). Other local authority permit schemes have been incorporated into other DCOs.</p> <p>Updated position (12 August 2024) WSSC welcomes the incorporation of the permit scheme into the draft DCO.</p>	<p>The drafting of article 10 has advanced since the version commented on by the Councils and the cross-references are now complete. The latest draft no longer refers to "permit schemes".</p> <p>Section 74A of the 1991 Act is no longer disapplied in the latest draft of the DCO. Sections 73B, 73C and 78A of the 1991 Act are disapplied in several precedent DCOs, including the Sizewell C (article 15), Manston Airport (article 10), A303 (Amesbury to Berwick Down) (article 8) and A417 Missing Link (article 12) DCOs. Section 77 of the 1991 Act is disapplied in the Sizewell C DCO (article 15).</p> <p>GAL invites the Councils to please specify the precise nature of their concern with the disapplication of these provisions and why the approach here should depart from the precedent outlined.</p> <p>Updated position (April 2024):</p>	Draft DCO (REP3-006)	Under discussion Agreed															

			<p>Sections 73A, 73B, 73C and 78A of the 1991 Act are prospective provisions that will be applied through sections 55 and 57 of the Traffic Management Act 2004. These provisions are not yet in force, but should they become legislation then they are disapplied for the purpose of the Project. The disapplication of these provisions (which are designed primarily to regulate the carrying out of street works by utility companies in respect of their apparatus) is appropriate given the scale of highway works proposed under the DCO, the specific authorisation given for those works by the DCO and the specific provisions in the DCO which would regulate the carrying out of the works included in the DCO and ensure sufficient measures to mitigate any impacts of these works.</p> <p>The disapplication of these provisions is well precedented, including in article 8 of the A66 Northern Trans-Pennine Development Consent Order 2024 and article 11 of the Boston Alternative Energy Facility Order 2023.</p> <p>Section 77 of the 1991 Act provides that, where a highway is used as an alternative route to a highway that is restricted or prohibited due to street works, the undertaker must indemnify the highway authority of the highway used as a diversion in respect of costs of strengthening that highway or making good any damage caused by the diverted traffic.</p> <p>It is appropriate to disapply this provision in a DCO context because the impacts of the Project, including as regards traffic, have been subject to a full EIA and, where impacts have been identified, appropriate mitigation has been incorporated into the Project's design or otherwise secured. Section 77 of the 1991 Act would cut across this mitigation package.</p> <p>The disapplication of section 77 of the 1991 Act is precedented in article 15 of the Sizewell C (Nuclear Generating Station) Order 2022.</p> <p>As regards the highway authority's permit scheme, the Applicant is considering the implications of this proposal and will discuss this further with the relevant highway authorities.</p> <p>Updated position (July 2024)</p>		
--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

			<p>The Applicant is content to incorporate the Surrey and West Sussex permit schemes into the draft DCO and has done so in version 9 of the draft DCO submitted at Deadline 7 (Doc Ref. 2.1)</p>		
<p>2.7.1.8</p>	<p>Draft Development Consent Order (APP-006)</p>	<p>The way in which street works are controlled under article 11 (street works).</p> <p>Updated position (Deadline 1): Owing to the small number of streets affected within the Order limits, it would seem straightforward to cross-refer in the article to a specified list. The applicant will be aware that such an approach is not unusual. Absent such cross-reference, WSCC maintains its position that the power should be subject to street authority control</p> <p>Updated position (Deadline 5): WSCC maintain their concern that article 11 departs from most precedents by authorising interference with any streets within the Order limits, rather than those specified in a schedule.</p> <p>This is a significant departure from the Model Provisions (see Model Provision 8(1)) and established precedent; for example, article 14 (street works) of the Sizewell C (Nuclear Generating Station) Order 2022 (SI 2022/853), article 12 (street works) of the M42 Junction 6 Development Consent Order 2020 (SI 2020/528), and article 10 (street works) of the Thames Water Utilities Limited (Thames Tideway Tunnel) Order 2014 (SI 2014/2384). WSCC position is set out in the West Sussex LIR (Appendix M, column 8) [REP1-069], the SCC PADSS (column 87), and the Legal Partnership Authorities' response to ExQ1 DCO1.22 [REP3-135].</p> <p>Updated position (12 August 2024) Article 11 <u>The Authorities note the Applicant has not provided a schedule of streets and would therefore suggest that the street works powers proposed under article 11 should be subject to the street authority's consent. Absent any consent provision, there is a risk of streets being interfered with at inappropriate times which would be detrimental to the undertaker and street authority. The Authorities would therefore propose that article 11 should be amended as follows –</u> <u>11.—(1) The undertaker may, for the purposes of the authorised development and subject to the consent of the street authority, enter on so much of any of the streets as are within the Order limits and may—</u> ...</p>	<p>Article 11 is by reference to streets "within the Order limits" rather than a specified list of streets because (i) there are only a small number of streets within the Order limits and there is little benefit therefore in listing them in a schedule and (ii) GAL foresees a need for flexibility as regards the streets under which it may need to carry out works, particularly in relation to necessary utility diversions which may become apparent during construction.</p> <p>Further, such an approach is preceded in several DCOs, including the A38 Derby Junctions (article 11), A47 Wansford to Sutton (article 15), A57 Link Roads (article 10) and Thurrock Flexible Generation Plant (article 11) DCOs.</p> <p>The additional wording proposed in bold is not included in any of these precedent DCOs. Its inclusion would be a departure from well-established precedent and therefore unjustified.</p> <p>The approach in the draft DCO, that article 11 does not require the consent of the street authority while article 12 does, is preceded in the Sizewell C DCO (see articles 13 and 14). The works envisaged by article 12, which extend inter alia to permanently altering the nature and characteristics of streets, are of greater consequence to the ongoing use of the streets in question than the more limited works envisaged by article 11, which are largely in or under the streets. There is therefore good reason why the street authority's consent should be required for works under article 12 and not article 11.</p> <p>Updated position (April 2024): The Applicant does not consider it necessary for article 11 to reference a schedule setting out a list of streets. There are a small number of streets within the Order limits and, due to the nature of this Project's site, the vast majority are either airport roads or are the subject of the surface access works comprised in the authorised development. Through the examination and by reference to plans including the Land Plans [AS-015], stakeholders are able to examine the extent of the Order limits and therefore the extent of streets over which the article 11 power may be exercised. The Applicant is not aware that the Council has raised specific concerns regarding the exercise of article 11 over particular streets. In that context, preparing and referencing a</p>	<p>Draft DCO (REP3-006)</p>	<p>Not Agreed Under discussion</p>

			<p>schedule of all streets within the Order limits would mean that article 11 has the same effect as presently.</p> <p>Updated position (July 2024):</p> <p>The Applicant maintains its previous position and refers to its response to DCO.2.8 in its Response to ExQ2 – Development Consent Order and Control Documents (Doc Ref. 10.56).</p> <p>The Applicant understands that the JLAs are considering whether they have any concerns with particular streets and would welcome confirmation of such concerns as soon as possible so that any bespoke provision can be made in article 11 (street works) if warranted.</p>		
2.7.1.9	Draft Development Consent Order (APP-006)	<p>The inclusion of deeming provisions in articles 12(4) (power to alter layout, etc. of streets), article 14(8) (temporary closure of streets), 18(10) (traffic regulations), 22(5) (discharge of water), and 24(6) (authority to survey and investigate the land).</p> <p>Updated position (Deadline 5): Regarding deemed consent, WSCC agrees with the position set out in row 9 of Appendix M to the Joint West Sussex LIR [REP1-069]: the deeming provision should be deleted. WSCC notes the Applicant’s position that a “<i>failure to respond to requests for consent/approval in a timely manner can lead to significant delays in a construction timetable</i>”.</p> <p>WSCC does not disagree with this; however, owing to the fact that (per paragraph (3)), the consenting authority must not unreasonably withhold or delay consent, the scenario envisaged by the applicant is unlikely to arise. In any event, it is unreasonable to include the deeming provision and the “unreasonably withhold or delay consent” wording.</p> <p>Turning to the precedents mentioned by the Applicant, the inclusion of a “deeming provision” does not appear to have been controversial in any of those projects and so the issue was not considered in detail by the Examining Authority or Secretary of State. The position is clearly different here.</p>	<p><u>Deeming provision</u></p> <p>Several provisions of the DCO (including this article 14) contain deeming provisions where the consent of a third-party body is required. A failure to respond to requests for consent in a timely manner can lead to significant delays in a construction timetable. Use of deeming provisions in respect of some key consents is therefore considered reasonable and in alignment with the objectives of the Planning Act 2008 to ensure efficient delivery of nationally significant infrastructure projects. To reflect the Councils’ concern regarding deemed approval, the time period after which consent is deemed given has been extended to 56 days rather than the 28 days included in the version of the DCO upon which the Councils have commented.</p> <p>Updated position (April 2024): The Applicant reiterates its position that deeming provisions are justified and appropriate. A failure to respond to requests for consent/approval in a timely manner can lead to significant delays in a construction timetable. Use of deeming provisions in respect of some key consents/approvals is therefore considered reasonable and in alignment with the objectives of the Planning Act 2008 to ensure efficient delivery of nationally significant infrastructure projects.</p> <p>The time period after which consent is deemed given has been extended to 56 days in response to the Councils’ previous comments and the Applicant considers that this period is sufficient for matters subject to deemed consent to be thoroughly considered</p>	Draft DCO (REP3-006)	Under discussion Agreed

			<p>and a decision reached, even if further information is requested of the undertaker.</p> <p>It is noted that deeming provisions are well precedented in recently made DCOs, including the National Grid (Yorkshire Green Energy Enablement Project) Development Consent Order 2024, the A12 Chelmsford to A120 Widening Development Consent Order 2024 and the Boston Alternative Energy Facility Order 2023 (all of which, it is noted, use a shorter period than the draft DCO of 28 days after which consent is deemed to have been granted).</p> <p>Updated position (July 2024):</p> <p>The Applicant has amended the relevant articles in version 9 of the draft DCO submitted at Deadline 7 (Doc Ref. 2.1) to remove reference to consent being "unreasonably... delayed" where there is also a deeming provision. The Applicant understands that this resolves the JLAs' concerns with the deeming provisions.</p>		
2.7.1.10	Draft Development Consent Order (APP-006)	<p>The standard to which alternative routes must be provided under article 14(5) (temporary closure of streets).</p> <p>Updated position (Deadline 5): "Must not be of a lower standard"</p> <p>WSCC is no longer pursuing this point.</p>	<p>The drafting of article 14 has advanced since the version commented on by the Councils.</p> <p>New sub-paragraph after sub-paragraph (5)</p> <p>The additional wording proposed to be included after existing sub-paragraph (5) is not considered necessary. Sub-paragraph (4) already provides that: "The undertaker must not temporarily alter, divert, prohibit the use of or restrict the use of any street without the consent of the street authority, which may attach reasonable conditions to any consent but such consent must not be unreasonably withheld or delayed". Should the street authority wish to request an alternative route to the temporarily altered/diverted/restricted etc. street be provided, it can do so as a condition to its consent (provided that such a condition is reasonable in the circumstances).</p> <p>Materially similar formulations of article 14 (without the additional proposed wording) were included in precedent DCOs including the M25 Junction 10/A3 Wisley Interchange (article 14) and A38 Derby Junctions (article 15) DCOs. It is also noted that a similar approach has been taken in the emerging draft Luton Airport Expansion DCO (article 13).</p>	Draft DCO (REP3-006)	No longer pursuing

			<p><u>"Must not be of a lower standard"</u></p> <p>The further proposed amendment in bold to what is now sub-paragraph (5) ("and must not be of a lower standard") is not justified. Where a street is being temporarily altered, diverted or restricted (etc.), it is not reasonable to require that the temporary diversion be of the same standard as the main permanent route. Indeed, this is unlikely to be the case.</p> <p><u>Deeming provision</u></p> <p>Several provisions of the DCO (including this article 14) contain deeming provisions where the consent of a third-party body is required. A failure to respond to requests for consent in a timely manner can lead to significant delays in a construction timetable. Use of deeming provisions in respect of some key consents is therefore considered reasonable and in alignment with the objectives of the Planning Act 2008 to ensure efficient delivery of nationally significant infrastructure projects. To reflect the Councils' concern regarding deemed approval, the time period after which consent is deemed given has been extended to 56 days rather than the 28 days included in the version of the DCO upon which the Councils have commented.</p> <p>Updated position (April 2024):</p> <p>The Applicant is not aware of any precedent for the Councils' proposed new wording (detailed elsewhere) and does not consider it justified, not least because it is unclear what would constitute an alternative route being "available" and what level of effort would be required of the Applicant to make such a route "available". The Applicant notes that the street authority must consent to any temporary alteration, diversion, prohibition or restriction on use of a street under paragraph (4) and can attach reasonable conditions, which would allow it to ensure the provision of a suitable diversion.</p> <p>The Applicant considers that the present wording is well-balanced and notes that it is well precedented in materially the same form in DCOs including article 14 of the National Grid (Yorkshire Green Energy Enablement Project) Development Consent Order 2024, article 13 of the Boston Alternative Energy Facility Order 2023 and article 13 of the Southampton to London Pipeline Development Consent Order 2020.</p>		
--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

2.7.1.11	Draft Development Consent Order (APP-006)	<p>The proposal to allow the Applicant to create new means of access without the street authority's consent under article 16 (access to works).</p> <p>Updated position (Deadline 1): The Council maintains its position that consent is required for the creation of new means of access.</p> <p>Updated position (Deadline 5): WSSC welcomes the inclusion of the consent provision in article 16(2) (access to works).</p> <p>WSSC considers that, in paragraph (2), the words "(such consent not to be unreasonably withheld or delayed)" should be deleted because paragraph (4) contains a deeming provision. It is unreasonable to include the deeming provision and the "unreasonably withhold or delay consent" wording.</p>	<p>GAL is content to add this wording to article 13.</p> <p>Updated position (April 2024): Street authority consent is now required for exercise of the power in article 16(1), as per article 16(2) – see version 6.0 of the draft DCO submitted at Deadline 3 [REP3-006].</p> <p>Updated position (July 2024): See 2.7.1.10 above.</p>	Draft DCO (REP3-006)	Under discussion Agreed
2.7.1.12	Draft Development Consent Order (APP-006)	<p>How the "instrument" referred to in article 18(6)(a)(traffic regulations) will be accessed</p> <p>Updated position (Deadline 5): Regarding how the instrument will be "held" etc., the Applicant states –</p> <p><i>"As is currently the case for traffic regulation orders made by the Applicant in its role as an airport operator, any instruments would be available for inspection at the Applicant's registered office address".</i></p> <p>WSSC considers it would be helpful if this was made explicit on the face of the Order and that the undertaker must replicate the steps the highway authority must take when publicising TROs. Again, this should be made explicit on the face of the Order. WSSC would welcome the opportunity to discuss these points with the Applicant.</p> <p>Updated position (12 August 2024) The following text was included in the Authorities' D7 Consolidated Submissions on the draft DCO [REP7-108] and its purpose is to ensure that the traffic authorities are provided with copies of the "instrument" which gives effect to any traffic regulation measures made by the Applicant under art. 18 (1), (2) or (3), and that the public can see them too. The text is as follows - "7A) The instrument referred to in paragraph (7)(a) must be displayed by the applicant on its website and a copy must be sent to— (a) [email address] in the case of Surrey County Council; (b) [email address] in the case of West Sussex County Council."</p>	<p>Updated position (April 2024): As is currently the case for traffic regulation orders made by the Applicant in its role as an airport operator, any instruments would be available for inspection at the Applicant's registered office address.</p> <p>Updated position (July 2024): The Applicant understands that the JLAs are submitting proposed drafting on this point at Deadline 7 and will review this upon receipt.</p>	Draft DCO (REP3-006)	Not Agreed Under discussion
2.7.1.13	Draft Development Consent Order (APP-006)	<p>The need for highway authorities to agree template agreements before the end of the Examination with the Applicant under article 21 (agreements with highway authorities)</p> <p>Updated position (Deadline 5):</p>	<p>Noted.</p> <p>Updated position (July 2024): Template s278 highways agreements have been received from the JLAs. The Applicant and the JLAs are in positive discussions</p>	n/a	Under discussion Agreed

		<p>WSCC notes that, in the Applicant's response to ExQ1 reference EN.1.10 (Maintenance of Landscape Adopted by Highway Authorities), relating to the maintenance of landscaping to be adopted by Highway Authorities, the Applicant makes reference to the need to enter into Section 278 agreements. WSCC considers it would be sensible if the template for this document was agreed as soon as possible.</p> <p><u>Updated position (12 August 2024)</u> <u>WSCC welcome the Applicant's commitment to use the highway authorities' standard s38 and s278 agreements as the basis for any agreements agreed under article 21.</u></p>	<p><u>regarding the best way forward as regards either utilising highway agreements under article 21 or including protective provisions for the highway authorities in the draft DCO.</u></p>		
<p>2.7.1.14</p>	<p>Draft Development Consent Order (APP-006)</p>	<p>The drafting of article 23, which concerns trees and hedgerows.</p> <p>Updated position (Deadline 5): While WSCC welcome the amendments made to article 25, it considers they do not go far enough.</p> <p>The most significant omission is the need for article 25 (in accordance with the relevant guidance, Advice Note Fifteen: Drafting Development Consent Orders) to either – (i) include a schedule and a plan which identifies the hedgerows to be removed (whether in whole or in part) or (ii) make the power for general removal of hedgerows subject to local authority consent.</p> <p>Detailed justification and suggested amendments are included in row 31 of Appendix M [REP1-069], which WSCC agrees with.</p> <p><u>Updated position (12 August 2024)</u> Article 25 <u>The Authorities have consistently said (see the West Sussex Authorities LIR [REP1-069], Appendix M, for example) that the hedgerows affected by this article should be listed in a Schedule. This would provide the authority and others certainty over which hedgerows are to be affected and follows precedent in many other DCOs (including DCOs where more hedgerows are affected). The Authorities are content with an alternative solution of a reference within Article 25 to a separate document which contains a schedule and plan of all hedgerows which may be removed (partially or in full) and this is shown in Part C to the Authorities "Consolidated dDCO Submissions" submitted at Deadline 7. Apart from those hedgerows mentioned within response to EN.2.4 (in reference to those hedgerows in proximity to the A23 and Pentagon Field), the oAVMS contains appropriate plans which display hedgerow retention and removal. Suitable schedules which could be referenced are presented within Appendices D and E of the Tree Survey Report and Arboricultural Impact Assessment [REP6-038]. Without addressing the above, the Authorities do not consider that Article 25 provides appropriate controls.</u></p>	<p>While "removal of hedgerows, trees and shrubs" is excluded from the definition of "commence" in article 2 as noted, the present article (now article 25) will still govern how these activities are carried out, article 25 providing the underlying authority for these activities.</p> <p>The wording relating to "important hedgerows" has been removed from the latest draft of article 25, following confirmation that no such hedgerows are anticipated to be affected by the proposed development.</p> <p>Defining "hedgerow" by reference to the Hedgerow Regulations 1997 is well-established in many DCO precedents, including the Sizewell C (article 81), Southampton to London Pipeline (article 42) and Manston Airport (article 34) DCOs. Including a bespoke definition would be a significant departure from precedent and is not considered to be justified.</p> <p>The drafting of article 25 has advanced since the version commented upon by the Councils. For example, article 25(1)(b) now includes "<i>or property within the authorised development</i>". GAL will carefully consider the other proposed additions and will include them in the next draft of the DCO where reasonable and justified. It is not anticipated that there will be any concerns with tree and hedge works needing to be carried out in accordance with BS 3998:2010 (or more recent industry best practice).</p> <p>By way of initial comment on the remaining suggested additions, the new proposed sub-paragraph (3) does not appear necessary because:</p> <ul style="list-style-type: none"> • it is unclear what is meant by "<i>relative bodies</i>"; 	<p>Draft DCO (REP3-006)</p>	<p>Not Agreed <u>Under discussion</u></p>

			<ul style="list-style-type: none"> • (3)(a) is not needed because authority is only conferred on the undertaker to fell or lop in the circumstances specified in sub-paragraphs (1)(a) and (b); • (3)(b) is not needed because the DCO will not obviate the need for consents required for protected species or laws related thereto; • (3)(c) is not needed because the draft DCO does not contain drafting obviating the need to obtain a felling licence and such a licence would therefore be required prior to felling; and <p>(3)(d) is not needed because the existence and protection afforded by tree preservation orders is not disturbed by the DCO (in the absence of express provision).</p> <p>Updated position (April 2024): The weight of precedent in made DCOs is for articles that authorise the removal of hedgerows within the Order limits without subsequent local authority consent. For example, article 17(6) of the A66 Northern Trans-Pennine Development Consent Order 2024, article 31(4) of the Drax Power Station Bioenergy with Carbon Capture and Storage Extension Order 2024 and article 34(4) of the Manston Airport Development Consent Order 2022 all authorise the removal of any hedgerow within the Order limits. None of these precedents refer to a plan specifically identifying hedgerows to be removed.</p> <p>The Applicant's article 25 offers greater protection than these precedents in that it provides that the undertaker may only fell, lop or remove a hedgerow if it reasonably believes it to be necessary to prevent the hedgerow from obstructing or interfering with the construction, maintenance or operation of the authorised development or related apparatus, rather than the broader precedented wording that the removal is "required". The Applicant's article 25 also offers the largely unprecedented protection that works must be carried out in accordance with BS 3998:2010, as previously requested by the Councils, and includes the standard entitlement to compensation should persons be harmed by the works authorised by the article. The Applicant therefore considers that article 25 as currently drafted is proportionate and justified and rejects the alternative articles proposed.</p> <p><u>Updated position (July 2024):</u></p>		
--	--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

			<p>The Applicant maintains the position described above and refers to the explanation provided in response to DCO.2.12 in its Response to ExQ2 – Development Consent Order and Control Documents (Doc Ref. 10.56). The Applicant particularly flags the latest guidance on articles such as this and how this departs from <i>Advice Note Fifteen</i> cited by the JLAs.</p>		
2.7.1.15	Draft Development Consent Order (APP-006)	<p>The inclusion of Work Nos. 26, 27, 28 and 29 (which all concern hotels) in Schedule 1 (authorised development).</p> <p>Updated position (Deadline 1): It is not clear to WSCC how these hotel-related Works are “associated development”, per section 115 of the Planning Act 2008. There does not appear to be an explanation in the EM. A satisfactory explanation is needed. Moreover, the Council is concerned about the prospect of these works evading proper environmental controls. Owing to these facts, the Council considers these Works should be deleted from the dDCO.</p> <p>Updated position (Deadline 5): WSCC’s latest position on this issue is summarised at row 3 of the Legal Partnership Authorities’ Deadline 1 document “Issue Specific Hearing 1: Case for Proposed Development Post Hearing Submission” [REP1-211], which states –</p> <p><i>“The Authorities recognise that it is proposed that the 4 hotels should be “Associated Development” and so authorised by the development consent order. Whilst the Applicant argues that this development supports operation of airport, reduces impacts and is subordinate, the Authorities (and in particular Crawley Borough Council) have concerns regarding the need to ensure that Control Documents include adequate controls, especially on the provision of additional on-airport parking at hotels. The Authorities’ view is that any such parking should be operational parking only so as to support the Applicant’s Surface Access Commitments. This is particularly important as the hotels will, in due course, exist as commercial operations operated by other parties and so there is no reason that they should be exempt from the Local Planning Authorities wider policies in relation to car parking merely by virtue of their conception under the DCO for authorising consent. The Authorities also need to be assured that all other aspects that would be addressed were the hotels to come forward as TCPA development (such as design/materials and sustainable construction/energy use) will be adequately controlled if they are to be authorised by the DCO.”</i></p> <p>Updated position (12 August 2024)</p>	<p>It is presumed that this concern relates to hotel provision constituting “associated development” under the 2008 Act, though please clarify if this is not the case.</p> <p>Please refer to row 3.93 of Table 3 of the Issues Tracker for GAL's response on this point.</p> <p>Updated position (April 2024): Section 115 of the 2008 Act provides that development consent may be granted for “associated development” alongside “development for which development consent is required”. “Associated development” is defined as development associated with the principal development.</p> <p>As per the 'Guidance on associated development applications for major infrastructure projects' (Department for Communities and Local Government – April 2013), it is for the Secretary of State to decide on a case-by-case basis whether development constitutes “associated development”. By reference to the 'core principles' that the guidance notes the Secretary of State will take into account:</p> <ul style="list-style-type: none"> • Associated development should support the construction or operation of the principal development or help address its impacts. Hotel accommodation on-site supports the operation of the airport in providing necessary accommodation for passengers. It further helps to address the airport's impacts, as alluded to in the Councils' comment, by reducing the need for transport between accommodation and the airport. • Associated development should be subordinate to the principal development. The hotels are subordinate to the use of the airport and facilitate this use. They are not an aim in themselves. • Development should not be treated as associated development if its purpose is solely to cross-subsidise the principal development. That is not the case here. 	n/a	Under discussion Not Agreed

Generally, the Authorities consider that more detail is required in relation to the car park, hotel and office accommodation elements of the development, and including limitations on parking space numbers, guest bedroom spaces and office floor areas is a reasonable minimum expectation.

In relation to hotels, the Authorities suggested a new requirement in [REP7-108] which would impose controls on the type of parking that could be provided.

The Authorities have therefore suggested (see [REP7-108], for example) that the following Work Nos. should be amended as follows –

Work No.22

Works associated with the North Terminal building including works to—

(a) extend the International Departure Lounge on levels 20, 30 and 40 to the north;

(b) extend the International Departure Lounge on levels 10, 20 and 30 to the south;

(c) extend the baggage hall and baggage reclaim;

(d) construct the North Terminal autonomous vehicle station;

(e) construct the autonomous vehicle maintenance building;

(f) reconfigure internal facilities;

(g) construct a multi-storey car park **with provision for no more than 890 parking spaces for cars;**

(h) demolish the CIP building and circulation building;

(i) remediate the coaching gates.

Work No. 28

Works associated with the Car Park H Site including works to—

(a) construct a hotel;

(b) construct an office **with provision for up to 5,000 square metres of office floor space;**

(c) construct a multi-storey car park **with provision for no more than 3,700 parking spaces for cars;**

(d) demolish Car Park H;

(e) external vehicle and pedestrian accesses.

Work No. 29

Works to convert Destinations Place office into a hotel **with provision for up to 250 bedrooms and refurbishment of the building exterior.**

Work No. 30

Works to construct Car Park Y including—

(a) earthworks and works to construct an attenuation storage facility with a capacity of approximately 32,000m3;

(b) construction of a multi-storey car park **with provision for no more than 3,035 parking spaces for cars.**

Work No. 31

Works associated with Car Park X including—

(a) earthworks and landscaping;

(b) construction of a flood compensation area with a capacity of approximately 55,000m3;

(c) construction of an outfall structure;

(d) access improvements;

- Associated development should be proportionate to the nature and scale of the principal development. The hotels are a proportionately small part of the overall proposed development.

In light of the above application of the 'core principles', GAL considers that it is open to the Secretary of State to conclude that the hotels are "associated development", and that such a conclusion is clearly justified.

If the Council disagrees with this analysis, please provide detailed justification by reference to this guidance and the reasoning above.

It is not clear on what basis that Council asserts that hotel works may "evad[e] proper environmental controls". These works would form part of the authorised development under the DCO and therefore be subject to the requirements, including the CoCP by virtue of requirement 7. Further detail is requested from the Council as to the precise nature of their concern.

Updated position (July 2024)

The JLAs' position regarding car parking is noted from the lefthand column, however that does not bear on the inclusion of hotels in Schedule 1 (authorised development). On the basis that the said inclusion is understood to now be agreed, the Applicant has marked this row as 'Agreed'.

The Applicant has added new requirement 34 (office occupier) in version 9 of the **draft DCO** submitted at Deadline 7 (Doc Ref. 2.1), which secures that the occupier of the new office to be constructed on the Car Park H site must be an entity related to, or whose business and/or operations are related to, the airport, air travel and/or aviation, unless otherwise agreed in writing by CBC.

		<p>(e) deck parking provision with provision for no more than 3,280 parking spaces for cars, including a re-provision of Purple Parking and surface parking amendments.</p> <p>(f) [delete sub-para (f)]</p> <p>Work No. 32</p> <p>Works to remove existing car parking at North Terminal Long Stay car park and construct a decked car parking structure with provision for no more than 1,680 parking spaces for cars if Work No. 44 (wastewater treatment works) is not implemented or 2,842 parking spaces for cars if Work No. 44 is implemented.</p> <p>Work No. 33</p> <p>Works associated with the existing Purple Parking car park including—</p> <p>(a) removal of existing decked car parking structure;</p> <p>(b) partial removal of existing surface car parking;</p> <p>(c) erection of a fenceline;</p> <p>(d) re-configuration of remaining surface level car parking with provision for no more than 700 parking spaces for cars.</p> <p>Work No. 38</p> <p>Works to construct the habitat enhancement area and flood compensation area at Museum</p> <p>Field including works to—</p> <p>(a) construct a flood compensation area with a capacity of approximately 57,600m³;52</p> <p>(b) extend Gatwick greenspace footpath;</p> <p>(c) construct a maintenance access road;</p> <p>(d) undertake earthworks, landscaping and a bund (up to 6 metres in height above datum) around the southern and eastern perimeter;</p> <p>(e) construct footbridge;</p> <p>(f) construct two farm access bridges</p>			
2.7.1.16	Draft Development Consent Order (APP-006)	<p>The drafting of several requirements (Schedule 2) including: the drafting of “start date” (R.3(2) (time limits and notifications); the 14-day notification period in R3(2); why some documents must be produced “in accordance with” the certified documents and others must be produced either “in general accordance” or “in substantial accordance” with them; paras 12 (construction traffic management plan) & 13 (Construction workforce travel plan) – “following consultation with the relevant local planning authority on matters related to its function.”; the drafting of R.14 (archaeological remains); and of those which concern noise (e.g. R.15 (air noise envelope), R.18 (noise insulation scheme)); the ambiguous drafting in R.19 (airport operations); para 21 (carbon action plan) ambiguous “general accordance” is vague.</p> <p>Updated position (Deadline 1): WSCC would like to understand why “in general accordance” has been used in Requirements 8(3), 10(2), 11(2), 21 and 22(2); and why “substantially in accordance” has been used in Requirements 7, 8(4), 12(2), 13(2) and 22(3).</p>	<p>The precise nature of the Council’s concerns in respect of the cited drafting is not clear from this comment – please clarify.</p> <p>In relation to the inclusion of wording such as “in general accordance”, please refer to row 20.29 of Table 20 of the Issues Tracker.</p> <p>Updated position (April 2024):</p> <p>The drafting of the requirements in Schedule 2 to the draft DCO has advanced significantly since these comments. References to “general accordance” have been replaced and, where appropriate to provide for a degree of flexibility, “substantially in accordance” has been used. This is subject to the new definition of this phrase in article 2 (interpretation).</p> <p>Updated position (July 2024)</p> <p>Requirement 3 – ‘start date’ and notice periods</p>	Draft DCO (REP3-006)	Not Agreed Under discussion

		<p>Updated position (Deadline 5): Requirement 3: start date</p> <p>Regarding “start date”, see the answer in row 2.7.1.13 above.</p> <p>Requirement 3: notice period</p> <p>WSCC considers – a more generous notice period for the commencement of each part of the authorised development should be provided, the other local authorities should also be notified of commencement (the administrative burden of doing so will be negligible), before Requirement 3, there should be a requirement which provided that no part of the authorised development can commence until a masterplan for each part of the development has been submitted to and approved in writing by the relevant planning authority. (Example drafting is set out in the Authorities’ answer to DCO.1.40 (R3).</p> <p>Further detail on these points is set out in the Legal Partnership Authorities’ response to ExQ1 DCO.1.40 (R3) [REP3- 135]) in respect of the amendments that should be made to this requirement.</p> <p>Requirement 15 (air noise envelope)</p> <p>WSCC notes the Applicant’s response; however, it considers the requirement should make provision for local authority control.</p> <p>At Deadline 4, the Joint Local Authorities submitted their Introduction to a proposal for an Environmentally Managed Growth Framework [REP4-050] (“the Introduction”), which explains that the DCO requirements which include controls related to environmental effects provide the Applicant with too much flexibility. The Introduction states the Joint Local Authorities consider a bespoke Environmentally Managed Growth Framework should apply to the proposed development and that a worked-up Framework will be submitted to the Examination as soon as possible. The Framework will apply to the air noise envelope (requirements 15 and 16), and to requirements 19 (airport operations), 20 (surface access), and 21 (carbon action plan).</p> <p>Requirement 19 (airport operations)</p>	<p>The Applicant and the JLAs’ solicitors continue to have positive engagement on the drafting of requirement 3 (including the use of ‘start date’) and the Applicant is hopeful that this wording can be agreed. Pending resolution, the Applicant maintains its position set out above.</p> <p>Requirement 15 – noise envelope</p> <p>The Applicant maintains its position set out above and refers to its previous submissions on the appropriate independent air noise reviewer, which it maintains should be the CAA. Please see further the Applicant’s Written Summary of Oral Submissions - ISH8 – Noise [REP6-081].</p> <p>Requirement 19 – airport operations</p> <p>The Applicant and the JLAs’ solicitors continue to have positive engagement on the drafting of requirement 19 and the Applicant is hopeful that this wording can be agreed. The Applicant understands that there is only a definitional point outstanding between the parties.</p>		
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

		<p>WSCC maintains its position regarding paragraph (2) being too broad. WSCC disagrees that its proposed wording “lacks precision” since it is similar to the wording used in condition 3 of the 1979 planning permission.</p> <p>WSCC agrees with the position set out in the Legal Partnership Authorities Response to the Applicant’s Schedule of Changes, which is included at Appendix A of [REP4-042].</p> <p>Regarding paragraph 4(a), the proposed drafting is again too broad. For instance, condition 3 (runway use) of the 1979 planning permission allows use of the emergency runway when the “main runway is temporarily non operational by reason of an accident or a structural defect or when maintenance to the main runway is being undertaken”.</p> <p>WSCC considers it would be reasonable if similar wording were incorporated into paragraph 4(a). Condition 3 also requires GAL to notify the local planning authority in advance of when maintenance is to be carried out. A similar provision should be included in Requirement 19. WSCC does not agree to the inclusion of paragraph (4)(b) because it could have the effect of overriding the prohibition under paragraph (3). WSCC does not consider this approach to be reasonable. It is noted that while the Explanatory Memorandum [REP3-008] summarises paragraph (3), it does not justify the inclusion of paragraph (4).</p> <p>In the light of the above comments, the Authorities’ proposed amendments to existing Requirement 19 are set out in row 92 of Appendix A to [REP4-042]. WSCC obviously agrees with these proposed amendments.</p> <p>The points made above under “Requirement 15 (air noise envelope)” regarding the Environmentally Managed Growth Framework also apply to this requirement.</p> <p><u>Updated position (12 August 2024)</u></p> <p><u>Requirement 3</u> <u>These amendments are intended to correct the position following submission of amendments at D6 in which references to “business” days were removed.</u> <u>(a) within the period of 7 days beginning with the date on which the authorised development begins;</u> <u>(b) at least 42 days prior to the anticipated date of commencement of the authorised development, provided that commencement may still lawfully occur if notice is not served in accordance with this sub-paragraph;</u> <u>(c) within the period of 7 days beginning with the actual date of commencement of the authorised development;</u></p>			
--	--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--

		<p>(d) at least 42 days prior to the anticipated date of commencement of dual runway operations; and</p> <p>(e) within the period of 7 days beginning with the actual commencement of dual runway operations.</p> <p>Requirement 15 The Authorities' latest comments on requirement 15 are set out in Part C of their D8 submission "Consolidated submissions on the draft DCO – Update at Deadline 8". (The Examination Library reference was not available when this document was updated).</p> <p>Requirement 19 The Authorities will consider the updated requirement 19 at Deadline 8.</p>			
2.7.1.17	Draft Development Consent Order (APP-006)	<p>The 8-week deadline in Schedule 11 (procedure for approvals, consents and appeals) for determining significant applications (e.g., the waste recycling facility).</p> <p>Updated position (Deadline 1): For certain major works which are listed in Schedule 1 (including, but not limited to Work Nos. 26 to 29) the standard 6-week/ 8-week deadline is unreasonably short. The Council notes paragraph 1(2)(a) and (b) of Part 1 of Schedule 1 is subject to the applicant agreeing to an extension. There is no guarantee that an extension would be agreed and no obligation for the applicant to act reasonably in considering any request for extension.</p> <p>The Council considers it would be more straightforward if the major works had their own deadlines. More detail on this point will follow at Deadline 1.</p> <p>WSSC disagrees that such an approach would cause unnecessary delay. Major applications under the TCPA 1990 regime can take 13 weeks (or longer) to determine. Providing a 6 or 8 week deadline runs the risk of the application having to be refused and the parties spending time and resources on an appeal which might have been avoided if the Schedule included a reasonable timeframe for determination.</p> <p>Updated position (Deadline 5): Regarding the Applicant's reluctance to include a longer deadline for determining major works, while WSSC notes the Applicant states the undertaker is "going to take a pragmatic approach to agreeing any request from the discharging authority for an extension of time". This gives cold comfort when the period for determining major works is either 6 weeks or 8 weeks, which is substantially shorter than if a local planning authority were to discharge a major works application under the Town and Country</p>	<p>The 8-week period (or 6-week where the discharging authority need not consult with any other body) is the default period within which the discharging authority must respond. If further information is requested from the undertaker by the discharging authority, the 8/6 weeks run from the day immediately following that on which said further information is supplied. If a longer period is required, the undertaker and discharging authority can agree such longer period in writing (paragraphs 1(2)(a) and (b), Part 1, Schedule 11).</p> <p>Given the above, the specified periods provide sufficient time for the discharging authority to scrutinise applications pursuant to the requirements of the draft DCO. Any longer period would unduly and unnecessarily delay progress in implementing the authorised development.</p> <p>Updated position (April 2024): The Council's comment is noted. However, it is likely that the undertaker would agree an extension with the discharging authority were this required following an application being made for "major works". The alternative would be that the application would be refused by the discharging authority or not decided in time, either of which could only be escalated through the appeal process in paragraph 4 of Schedule 11 to the draft DCO. This process would likely require significant time and expenditure and the undertaker would be mindful of that before triggering those provisions. The undertaker is therefore realistically going to take a pragmatic approach to agreeing any request from the discharging authority for an extension of time. In any event, the Applicant considers that the standard 6 or 8 week deadline is perfectly adequate for detailed consideration of details that may be subject to approval.</p> <p>Updated position (July 2024):</p>	Draft DCO (REP3-006)	Not Agreed Under discussion

		<p>Planning Act 1990. WSCC reiterates its position that major works should have their own deadline.</p> <p>Updated position (12 August 2024) <u>The Authorities consider the period for determining “major works” under Schedule 11 is too short and this should be increased to 13-weeks, which is consistent with the timeframe within which a major application must be determined under the Town and Country Planning Act regime.</u> <u>The Authorities consider (see REP7-108, row 44) that the following works should be treated as “major works” -</u> <u>“(i) Work No. 9 (Works to construct the replacement Central Area Recycling Enclosure (CARE) facility);</u> <u>(ii) Work No. 16 (new hangar);</u> <u>(iii) Work No. 22 (Works associated with the North Terminal building);</u> <u>(iv) Work No. 23 (Works associated with the South Terminal building);</u> <u>(v) Work No. 24 (Works to upgrade the North Terminal forecourt including access roads);</u> <u>(vi) Work No. 25 (Works to upgrade the South Terminal forecourt including access roads);</u> <u>(vii) Work No. 26 (Works to construct a hotel north of multi-storey car park 3);</u> <u>(viii) Work No. 27 (Works to construct a hotel on the car rental site);</u> <u>(ix) Work No. 28 (Works associated with the Car Park H Site);</u> <u>(x) Work No. 29 (Works to convert the existing Destinations Place office into a hotel);</u> <u>(xi) Work No. 30 (Works to construct Car Park Y);</u> <u>(xii) Work No. 31 (Works associated with Car Park X)</u> <u>(xiii) [Others TBC]”</u></p>	<p><u>The Applicant maintains the position set out above. It is understood that the JLAs will be proposing a 16-week decision period for detailed design approval for certain works. The Applicant considers that to be excessive given that this period, in the context of the TCPA 1990, applies only to applications requiring their own Environmental Impact Assessment. Here, an EIA has already been undertaken and will be considered through the Secretary of State’s decision on the DCO. A decision period of a length to encompass undertaking that process from scratch is not appropriate for the discharge of requirements pursuant to a made DCO for which an EIA will already have been carried out.</u></p>		
2.7.1.18	Draft Development Consent Order (APP-006)	<p>Principal areas of disagreement remain in relation to the wording in of the proposed highway works and traffic regulation orders, including speed limits.</p> <p>Updated position (Deadline 5): WSCC welcome the continued discussions mentioned by the Applicant.</p>	<p>Noted and GAL will continue discussions with the relevant stakeholders on these points.</p> <p>Updated position (July 2024) <u>The Applicant understands that these concerns have now been resolved.</u></p>	n/a	Under discussion Agreed
2.7.1.19	Draft Development Consent Order (APP-006)	<p>There is currently no mechanism to allow the Flood Resilience Statement to be secured through the dDCO.</p> <p>Updated position (Deadline 5): While the securing of the Flood Resilience Statement by Requirement 24 is welcomed; WSCC considers further work is required in respect of the Flood Resilience Statement.</p> <p>Updated position (12 August 2024) <u>WSCC considers further work is required in respect of the Flood Resilient Statement, particularly in regards to the residual risk and</u></p>	<p>GAL will consider how best to secure this document and confirm in due course.</p> <p>Updated position (April 2024): The Draft DCO [REP1-004] was updated at Deadline 1 to include Requirement 24 which secures the Flood Resilience Statement.</p> <p>Updated position (July 2024) <u>This row relates to the securing of the Flood Resilience Statement, which has now been achieved.</u></p>	n/a	Under discussion Not Agreed

		inadequate climate change allowance used for the surface water drainage strategy.			
2.7.1.20	Draft Development Consent Order (APP-006)	<p>Regarding the proposed flood risk mitigation, it is not clear how the timing of the River Mole works (Work No.39) and Car Park Y attenuation tank (Work No. 30(a)) will be secured; similarly, it is not clear where the culverts and syphons are secured.</p> <p>Updated position (Deadline 5): Officers are considering the Applicant's response and will revert on this point as soon as possible.</p> <p>Updated position (12 August 2024) WSCC reverts to CBC on matters specific to this issue.</p>	<p>The cited works are anticipated to take place early in the construction timetable – see section 5.3 of ES Chapter 5: Project Description and ES Appendix 5.3.3: Indicative Construction Sequencing. GAL will consider further whether it is appropriate to secure the timing of their delivery.</p> <p>Culverts and syphons are included in the design principles in Appendix A1 of Volume 5 of the Design and Access Statement [APP-257] and their delivery is therefore secured in the draft DCO by requirements 4 and 5, which require detailed designs to be approved by the relevant planning or highway authority prior to commencement. The detailed designs must be in accordance with the design principles.</p> <p>Updated position (April 2024): Requirement 23 (flood compensation delivery plan) secures the submission and approval of a flood compensation delivery plan which sets out the timeframe for delivering Work Nos. 30(a), 31(b), 38(a) and 39 prior to the commencement of any works located in the floodplain which could conceivably remove floodplain and therefore increase flood risk.</p> <p>Updated position (July 2024)</p> <p>At Deadline 6 the Applicant submitted a Flood Compensation Delivery Plan Technical Note [REP6-069] which explained the rationale for the works included in requirement 23 (flood compensation delivery plan), which were also updated in version 8 of the draft DCO submitted at Deadline 6 [REP6-005].</p> <p>Culverts and syphons are provided for in the Design Principles (Doc Ref. 7.3) and reference has also been made to syphons in updates to the work descriptions in Schedule 1 (authorised development) in version 9 of the draft DCO submitted at Deadline 7 (Doc Ref. 2.1).</p>	<p>Draft DCO (REP3-006)</p> <p>ES Chapter 5 Project Description (REP1-016)</p> <p>ES Appendix 5.3.3: Indicative Construction Sequencing [APP-088]</p>	<p>Under discussion</p> <p>No Longer pursuing.</p>
2.7.1.21	Draft Development Consent Order (APP-006)	The current wording in Part 4 article 25, is of significant concern due to the impacts on: secondary legislation which would subsequently be overridden, the lack of reference made to the quality of future permitted	While "removal of hedgerows, trees and shrubs" is excluded from the definition of "commence" in article 2 as noted, the present article (now article 25) will still govern how these activities are	Draft DCO (REP3-006)	Under discussion Duplicate

		<p>tree works; and the permitted removal of any hedgerow within the order limits that is required to be removed. This section should refer to relevant submitted <u>'approved plans'</u> to limit the broad permissions which would currently be permitted.</p> <p><u>Updated position (Deadline 5):</u> <u>See Row 2.7.1.14 above.</u></p>	<p>carried out, article 25 providing the underlying authority for these activities.</p> <p>The wording relating to "important hedgerows" has been removed from the latest draft of article 25, following confirmation that no such hedgerows are anticipated to be affected by the proposed development.</p> <p>Defining "hedgerow" by reference to the Hedgerow Regulations 1997 is well-established in many DCO precedents, including the Sizewell C (article 81), Southampton to London Pipeline (article 42) and Manston Airport (article 34) DCOs. Including a bespoke definition would be a significant departure from precedent and is not considered to be justified.</p> <p>The drafting of article 25 has advanced since the version commented upon by the Councils. For example, article 25(1)(b) now includes "<i>or property within the authorised development</i>". GAL will carefully consider the other proposed additions and will include them in the next draft of the DCO where reasonable and justified. It is not anticipated that there will be any concerns with tree and hedge works needing to be carried out in accordance with BS 3998:2010 (or more recent industry best practice).</p> <p>By way of initial comment on the remaining suggested additions, the new proposed sub-paragraph (3) does not appear necessary because:</p> <ul style="list-style-type: none"> • it is unclear what is meant by "<i>relative bodies</i>"; • (3)(a) is not needed because authority is only conferred on the undertaker to fell or lop in the circumstances specified in sub-paragraphs (1)(a) and (b); • (3)(b) is not needed because the DCO will not obviate the need for consents required for protected species or laws related thereto; • (3)(c) is not needed because the draft DCO does not contain drafting obviating the need to obtain a felling licence and such a licence would therefore be required prior to felling; and • (3)(d) is not needed because the existence and protection afforded by tree preservation orders is not disturbed by the DCO (in the absence of express provision).

2.8. Ecology and Nature Conservation

2.8.1 Table 2.8 sets out the position of both parties in relation to ecology and nature conservation matters.

Table 2.8 Statement of Common Ground – Ecology and Nature Conservation Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.8.1.1	Evidence for null findings of ancient or veteran trees, as well as important hedgerows	<p>No demonstration that these receptors have been appropriately surveyed, nor followed appropriate methodology.</p> <p>Updated position (Deadline 1): Unable to find section A2.1.159 of Appendix 9.6.2. Tree data within the oLEMP appears to only include the surface access works.</p> <p>Updated position (Deadline 5):</p> <p>Unable to find section A2.1.159 of Appendix 9.6.2. Section A1.1.161-182 of Appendix 9.6.2 Ecology Survey Report of the ES provides information on veteran trees and methodologies for their surveyance. It does not state where such records are found, though assumed to be within the Tree Survey Report and AIA [REP3-037]. This identifies that no veteran trees will be removed and provides tree survey data and protection plans in support of this statement. Section 2.3 of Appendix 9.6.2 Ecology Survey Report of the ES provides information on the surveyance of Important Hedgerows. Paragraph 3.3.1 states no important hedgerows were identified.</p>	<p>The methodology used to assess the presence of Veteran Trees is set out in Section A2.1.159 of Appendix 9.6.2 Ecology Survey Report of the ES. Data are presented in the tree schedules in the oLEMP.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The latest versions of the Tree Survey Report and AIA [REP3-037] and ES Appendix 5.3.2 CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022] have been submitted at Deadline 3, updated in response to LAs feedback of the previous versions.</p>	<p>ES Appendix 9.6.2 Ecology Survey Report Part 2 [APP-124]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP3-037]</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement [REP3-022]</p>	Agreed
2.8.1.2	Lack of demonstration that arboricultural features have been considered, designed for and appropriately avoided, mitigated or compensated for	<p>Potential impacts multiple to arboricultural features of unknown value.</p> <p>Updated position (Deadline 1): Initiation of discussion is welcomed. Any mitigation or compensation measures will need to be secured by DCO requirements.</p> <p>An Arboricultural Method Statement must also be submitted alongside other documents stated by the Applicant.</p> <p>Updated position (Deadline 5):</p> <p>The Applicants' own admittance within Appendix F: Response to the JLAs on Arboriculture, Landscape and Ecology [REP4-028] clearly identifies that avoidance and mitigation of arboricultural features has not taken place, rather, removal of all features within unknown construction area. This doesn't present a realistic worst-case scenario.</p> <p>Updated position (12 August 2024):</p>	<p>An Arboriculture Impact Assessment and Tree Protection Plan are being produced and will be shared with the local authorities once available.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The latest versions of the Tree Survey Report and AIA [REP3-037] and ES Appendix 5.3.2 CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022] have been submitted at Deadline 3, updated in response to LAs feedback of the previous versions.</p> <p>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP3-037]</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement [REP3-022]</p> <p>Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042,</p>	<p>Under discussion Agreed Not Agreed</p>

		<p>The stated DL6 submissions are welcomed, though the Authorities remain concerned with approach towards proposed tree loss and continue to be of the view that a realistic worst-case scenario has been applied, as stated within [REP3-117] (p.55- 56) and [REP7-103].</p>	<ul style="list-style-type: none"> • ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] • Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans). <p>The oAVMS sits within the CoCP which is DCO requirement 7 and is also referenced within DCO requirement 28.</p> <p>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</p> <p>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project.</p> <p>Updated position (Deadline 9): While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</p>	<p>REP6-044, REP6-046, REP6-048]</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028]</p> <p>Note on Project Wide Habitat Loss and Replacement [REP6-071]</p>	
2.8.1.3	Baseline Environment	<p>The Phase 1 Habitat Survey (APP-125) should have extended beyond the DCO Limits to identify wildlife corridors and potential enhancement opportunities in the surrounding landscape.</p>	<p>The scope of the surveys undertaken to inform the Project was agreed with Natural England during pre-submission consultation. This included with respect to the Phase 1 Habitat Survey.</p>	n/a	Not Agreed
2.8.1.4	Arboriculture	<p>Arboricultural features are a material planning consideration. It is therefore, disappointing that a relevant depiction of such features has not been presented using recognised survey and assessment techniques. Accordingly, the impact on such receptors is incomplete. Further, adequate protection measures for ancient woodland and other retained arboricultural features have not been demonstrated.</p>	<p>As set out in Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES '<i>Protective fencing, in accordance with BS 5837, would be erected around these features to prevent access by people, materials or machinery</i>'. Full details of the location of tree protection and associated buffer zones for ancient woodland will be set out in the CoCP and associated tree protection plans.</p>	<p>ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.10.1: Tree Survey Report</p>	<p>Under Discussion Agreed</p>

		<p>Updated position (Deadline 1): It is not clear how tree protection measures stated within Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES are appropriate nor adequate. This must be informed from an Arboricultural Impact Assessment (in accordance with BS5837:2012).</p> <p>Updated position (Deadline 5):</p> <p>AIA [REP3-037] and oAVMS [REP3-022] are welcomed, though ongoing discussion is required in response to Appendix F: Response to the JLAs on Arboriculture, Landscape and Ecology [REP4-028].</p> <p><u>Updated position (12 August 2024):</u></p> <p><u>The Tree Survey Report and Arboricultural Impact Assessment updated at Deadline 6, alongside with the Outline Arboricultural and Vegetation Method Statement updated at Deadline 7 now provides adequate protection for retained trees and has demonstrated avoidance of impacts within the buffer zone of Horleyland Woods (Ancient Woodland). This has now addressed these concerns for the principal of tree protection mitigation.</u></p>	<p>Further arboricultural surveys are on-going and will be presented when complete.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The latest versions of the Tree Survey Report and AIA [REP3-037] and ES Appendix 5.3.2 CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022] have been submitted at Deadline 3, updated in response to LAs feedback of the previous versions.. These set out the locations of tree protection measures, in line with BS5837, as required by Table 9.9.1 of Chapter 9.</p> <p>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</p> <p><u>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</u></p> <p><u>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans).</u></p> <p><u>The oAVMS sits within the CoCP which is DCO requirement 7 and is also referenced within DCO requirement 28.</u></p> <p><u>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</u></p> <p><u>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it</u></p>	<p>and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p> <p><u>Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</u></p> <p><u>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028]</u></p> <p><u>Note on Project Wide Habitat Loss and Replacement [REP6-071]</u></p>	
--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>is anticipated could take place across the Project. The document includes illustrative material for eight key views within the surface access improvements corridor to illustrate vegetation loss and replacement and the creation of landscape proposals at Year 1 and Year 10. The visualisations have been prepared to the specifications set out by RBBC following a meeting on 14th May 2024.</p>		
2.8.1.5	Baseline Environment	<p>Ancient and veteran trees were surveyed using recognised guidance with none being identified; however, the methodology for determining such status has not been made clear, nor has the survey data been evidenced by the Applicant in support of this finding.</p> <p>Updated position (Deadline 1): Unable to find section A2.1.159 of Appendix 9.6.2. Methodology within sections A1.1.161-182 has been reviewed to support stakeholder position, the documents referred provide guidance only, no methodology is provided.</p> <p>Updated position (Deadline 5): Unable to find section A2.1.159 of Appendix 9.6.2. Section A1.1.161-182 of Appendix 9.6.2 Ecology Survey Report of the ES provides information on veteran trees and methodologies for their surveyance. It does not state where such records are found, though assumed to be within the Tree Survey Report and AIA [REP3-037]. This identifies that no veteran trees will be removed and provides tree survey data and protection plans in support of this statement.</p>	<p>The methodology used to assess the presence of Veteran Trees is set out in Section A2.1.159 of Appendix 9.6.2 Ecology Survey Report of the ES.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The latest versions of the Tree Survey Report and AIA [REP3-037] and ES Appendix 5.3.2 CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022] have been submitted at Deadline 3, updated in response to LAs feedback of the previous versions.</p>	<p>ES Appendix 9.6.2 Ecology Survey Report Part 2 [APP-124]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p>	Agreed
2.8.1.6	Baseline Environment	<p>The surveyance for 'important hedgerows' followed recognised methodology and though none were identified, no survey data has been evidenced in support of this finding. WSCC wishes to see that evidence.</p> <p>Updated position (Deadline 1): Submission of findings welcomed.</p> <p>Updated position (Deadline 5): No updates required</p> <p><u>Updated position (12 August 2024): The hedgerow data submitted at Deadline 5 (Supporting Ecology Technical Notes Version 1 [REP5-069] has adequately addressed these concerns.</u></p>	<p>GAL will provide this survey data to WSCC as requested.</p> <p>Updated position (April 2024): Survey data to be provided by Deadline 5.</p> <p>Updated position (Deadline 5): The Applicant has submitted the hedgerow data at Deadline 5.</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037))</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p> <p>Appendix A – Hedgerow Survey Data (Doc Ref. 10.33)</p>	Agreed Under discussion

<p>2.8.1.7</p>	<p>Baseline Environment</p>	<p>Detailed tree survey data has only been provided for the surface access (highway) sections only. An arboricultural assessment in accordance with BS5837:2012 providing a baseline for arboricultural features, including all trees that could be impacted by the Project (including those adjacent to the DCO limits) should be provided.</p> <p>Updated position (Deadline 1): Submission of full detailed arboricultural surveys and assessment welcomed.</p> <p>Updated position (Deadline 5):</p> <p>The Tree Survey Report and Arboricultural Impact Assessment [REP3-037] is welcomed to seek to address this matter. Concerns remain as set out in REP4-042.</p> <p><u>Updated position (12 August 2024):</u></p> <p><u>The Tree Survey Report and Arboricultural Impact Assessment updated at Deadline 6 provides a baseline of most features throughout the surveyed areas within the DCO Limits, however, [REP3-117] (p.55- 56) and [REP7-103] provide examples where hedgerow and tree features are missing from the baseline survey plans. This is not expected to be of significant impact/change to the Arboricultural Impact Assessment, though they do need accounting for within the Outline Arboricultural and Vegetation Method Statement which has been based on the outline surveys. If above stated documents were updated by DL9 and reflected the missing features stated within the JLA submissions, this item would move to Agreed.</u></p>	<p>Further arboricultural surveys are on-going and will be presented when complete.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] has been carried out for the Project site and undertaken in accordance with BS5837:2012. It identifies all arboricultural features impacted by the Project based on a worse case assessment.</p> <p><u>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</u></p> <p><u>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</u></p> <p><u>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans).</u></p> <p><u>The oAVMS sits within the CoCP which is DCO requirement 7 and is also referenced within DCO requirement 28.</u></p> <p><u>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</u></p> <p><u>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project.</u></p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037))</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p> <p><u>Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</u></p> <p><u>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028]</u></p> <p>Note on Project Wide Habitat Loss and Replacement [REP6-071]</p>	<p>Under discussion <u>Agreed</u> <u>Not Agreed</u></p>
<p>Assessment Methodology</p>					

<p>2.8.2.1</p>	<p>Lack of approaching, assessing and addressing ecological impacts at a landscape scale</p>	<p>Ecological impacts will extend beyond the DCO limits with potential impacts on bat populations, riparian habitats downstream of the Airport and the spread of non-native aquatic species. Disturbance and habitat severance within the Airport will impact the functioning of wildlife corridors, notably bat commuting routes, both within the Site and the wider landscape. Maintenance of habitat connectivity across the airport and wider landscape remains a concern.</p> <p>Updated position (Deadline 5): WSSC remains concerned that habitat severance and disturbance within the Project site, including the surface access improvements, will impact the functioning of wildlife corridors, notably bat commuting routes, both within the Site and the wider landscape. The loss of mature broadleaved woodland is of major concern, particularly as replacement planting will take many years to reach maturity and fully compensate for that lost. WSSC is also concerned that the development will impact riparian habitats downstream and facilitate the spread of non-native aquatic species, such as Himalayan balsam. WSSC acknowledges the habitat creation at Brook Farm and Longbridge Roundabout but considers that further habitat creation/enhancement should be sought, both on-site and off-site, to maintain and enhance habitat connectivity across the landscape.</p> <p>There is still a considerable lack of clarity regarding the extent of habitat loss and habitat creation/compensation, including uncertainty over the locations and extent of woodland creation. WSSC is pleased to hear that further information with respect to habitat loss/gain for each habitat type will be submitted by the Applicant at Deadline 5.</p> <p>Updated position (12 August 2024): The Note on Project Wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement.</p> <p>WSSC maintains the view that a 'landscape-scale approach' should have been taken to assessing and addressing ecological impacts, including the need to provide off-site mitigation, compensation, and Biodiversity Net Gain (BNG). This is particularly so because airport safeguarding has constrained the ability to mitigate on-site. Habitat creation and enhancement, and improved habitat connectivity, should extend beyond the confines of the Site to strengthen key wildlife corridors, such as the River Mole, Gatwick Stream and Bechstein's bat commuting routes.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed, this could be turned green.</p>	<p>As set out in paragraph 9.4.9 <i>et seq.</i> of Chapter 9 Ecology and Nature Conservation of the ES, the potential for ecological impacts beyond the DCO limits was recognised through the extension of the survey work beyond the limits, where necessary (bats, GCN, riparian mammals etc.).</p> <p>As such, the impact assessment has considered impacts outwith the DCO limits, where there is the potential for such impacts to occur.</p> <p>The impacts of the Project on habitat connectivity have been considered within Section 9 of Chapter 9 Ecology and Nature Conservation of the ES. This concluded that, although there would be nowhere that connectivity would be completely removed, there were areas where it would be reduced due to the loss of woodland. This was assessed as being of moderate adverse significance until the replacement planting matured sufficiently when this was reduced below the threshold of significance.</p> <p>The long-term maintenance of habitat connectivity both across the airport and between the airport and the wider landscape as a result of the Project has been a key driver of the overall Ecology Strategy, as set out in the oLEMP.</p> <p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (Appendix 8.8.1 of the ES).</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. This includes details of where and how much of each habitat type is to be removed.</p> <p>Updated position (Deadline 9): The Applicant has agreed biodiversity and landscaping specific financial contributions as</p>	<p>Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p> <p>Note on Project Wide Habitat Loss and Replacement [REP6-071]</p>	<p>Not Agreed subject to s106</p>
-----------------------	----------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------

			part of s106 discussions and therefore this matter can move to agreed.		
Assessment					
2.8.3.1	The extent of loss of mature broadleaved woodland (net loss over 5 ha).	<p>Although some woodland will be replanted along the new highway alignment it will be years before bat foraging and roosting habitat, and habitat connectivity are fully reinstated. The assessment concludes there is a significant effect on bat behaviour until new woodland planting had established. Current mitigation and compensation measures are insufficient to maintain bat foraging habitat and commuting routes over the short and medium term.</p> <p>Updated position (Deadline 1): Greater clarity is required on habitat loss, compensatory habitat and habitat gain, including the precise locations and extent of habitat involved. The information in Appendix 9.9.2 (BNG Statement), including the figures for woodland, is unclear & difficult to match with the Sketch Landscape Concept Plans within the OLEMP.</p> <p>Further discussion would be welcome.</p> <p>Updated position (Deadline 5:) Further discussion would still be welcome. W_SCC is, however, pleased to hear that further information with respect to habitat loss/gain for each habitat type will now be submitted at Deadline 5. WSCC is also pleased to hear that an updated ES Appendix 9.9.2 Biodiversity Net Gain Statement will also be submitted at Deadline 5. Further information on advance planting and habitat creation would be welcomed.</p> <p>Updated position (August 2024) The Note on Project wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement. The information on advance planting and habitat creation within the updated oLEMP [REP6-032, REP6-034 and REP6-036] is also helpful.</p> <p>Whilst WSCC is largely satisfied with the assessment itself, WSCC still has major concerns regarding loss of deciduous woodland habitat. It is recognised that the net loss has now been reduced from over 5ha to 3.12ha. However, this is still a net loss. WSCC's concerns include:</p> <p>1. As a Priority Habitat, there should be no net loss of deciduous woodland</p>	<p>The planting proposed, once mature, will ensure that there are no residual significant effects on either woodland nor bat foraging/commuting habitat.</p> <p>The maintenance of foraging and commuting routes for bats was a key element in the design principals for the Project, in particular along the River Mole and Gatwick Stream. For example, as set out in Table 9.8.1 of Chapter 9 Ecology and Nature Conservation, this has included limiting vegetation loss along the A23 to ensure sufficient vegetation is retained to maintain a dark corridor along the bat foraging and commuting route present along the Gatwick Stream. Therefore, although the loss of woodland along the A23 in particular will result in a reduction in the area of bat foraging/commuting habitat (as set out in the ES), there will be no complete severance of commuting routes.</p> <p>A lighting strategy would be Included in the CoCP to ensure that construction lighting was directed to where it was needed and did not significantly increase levels of artificial lighting on sensitive habitats, such as retained woodland and river corridors. Lighting will be designed in accordance with Institute of Lighting Professionals /Bat Conservation Trust guidelines. Construction task lighting will be directed to where it is needed only, to avoid light spillage. Accessories such as hoods, cowls and shields will be used to direct light to the intended area only. Light levels will be as low as the guidelines permit. If construction lighting is not needed, it will be avoided.</p> <p>Updated position (April 2024): Additional information with respect to vegetation loss/gain, including figures illustrating this for all habitats, including woodland, will be submitted at Deadline 4.</p> <p>In addition, ES Appendix 9.9.2 Biodiversity Net Gain Statement was updated at Deadline 3 to include hedgerow gain [REP3-047]. This shows that the Project will deliver at least a 10% gain in hedgerow units.</p> <p>Updated position (July 2024): A Note on Project wide Habitat Loss and Replacement [REP6-071] was submitted at Deadline 6. Details of options with respect to advance planting and habitat</p>	<p>Table 9.8.1 of ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 5.3.2: Code of Construction Practice (REP3-022)</p>	<p>Under discussion Not Agreed.</p>

		<p>2. New woodland planting will take many decades to reach maturity and thus fully compensate for that lost</p> <p>3. If the Project is to meet the BNG 'trading rules' and truly deliver a 10% BNG, it must deliver 10% BNG in woodland units</p> <p>4. Short and medium term impacts on bat foraging habitat and commuting routes through loss of mature and semi-mature woodland</p> <p>As the above concerns have not been addressed, this issue remains 'not agreed'.</p>	<p>creation are set out in Annex 4 of ES Appendix 8.8.1 outline Landscape and Ecology Management Plan [REP6-032, REP6-034, REP6-036]. On this basis, it is assumed that this issue can be agreed.</p> <p>Updated position (Deadline 9): While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</p>		
<p>2.8.3.2</p>	<p>Inadequate consideration and demonstration for the protection of ancient woodland. Conflicting with the finding of 'no impact' occurring to these receptors.</p>	<p>Potential impact to ancient woodlands receptors where barriers are specified to form buffer zone protection. This is of principle concern for Horleyland Wood due to the adjacent proposed works area for the new foul water pipeline.</p> <p>Updated position (Deadline 1): Submission of full detailed arboricultural surveys and assessments are welcomed, this must include a supporting Arboricultural Method Statement.</p> <p>Updated position (Deadline 5):</p> <p>Changes within the oAVMS [REP3-022] are welcomed. However, paragraph 3.3.2 clearly identifies that the proposed foul water pipeline works currently remain within the buffer zone of Horleyland Woods (AW), with only a statement suggesting that the works will be changed during detail design to avoid it buffer zone.</p> <p>Updated position (12 August 2024):</p> <p>The OAVMS submitted at Deadline 7 provides confidence that the control document now prevents the routing of services within the buffer zone of Horleyland Wood and now avoids impacts to this receptor (noting that figure 5.2.1 e of the Project Description Figures (v4) [REP6-016] does not represent any change in the indicative location of the foul water pipeline which would be required at detailed design).</p>	<p>An Arboriculture Impact Assessment and Tree Protection Plan are being produced and will be shared with the local authorities once available.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] and CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022 to REP3-027] have been submitted at Deadline 3. Section 3 of the oAVMS details the protection measures in place for Ancient Woodland areas adjacent to the Project boundary, noting that no Ancient Woodland areas are located within the Project boundary.</p> <p>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] which states in section 6.2.5 that "No trees within Ancient Woodlands or that are Veteran Trees are proposed for removal."</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans). Section 3 of this provides details of Ancient woodland protection which is secured</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p> <p>Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028]</p> <p>Note on Project Wide Habitat Loss and</p>	<p>Under discussion Agreed</p>

			<p>under DCO requirement 7, future AVMS must be substantially in accordance with the oAVMS under DCO requirement 28.</p> <p>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</p> <p>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. The document includes illustrative material for eight key views within the surface access improvements corridor to illustrate vegetation loss and replacement and the creation of landscape proposals at Year 1 and Year 10. The visualisations have been prepared to the specifications set out by RBBC following a meeting on 14th May 2024.</p> <p>An updated Tree Survey Report and Arboricultural Impact Assessment and a updated Outline Arboricultural and Vegetation Method Statement will be provided at Deadline 7 showing the foul water pipeline works outside the buffer zone of Horleyland Woods (AW).</p>	Replacement [REP6-071]	
2.8.3.3	Extent of vegetation loss	<p>Concern is raised over the extent of vegetation that would be lost (primarily along the road corridor), which is significant and its effects on ecosystem service benefits and the loss of connectivity at a landscape scale.</p> <p>Updated position (Deadline 1): Impacts to trees adjacent surface access improvements have not been adequately demonstrated and could therefore require the loss of mature large trees unless mitigation measures are in place. This is not accounted for within the response.</p> <p>Tree loss along the surface access works are temporary but of long-term significant effect. Whilst reinstatement measures are proposed, enhancement opportunities within the vicinity are not.</p> <p>Updated position (Deadline 5):</p>	<p>The extent of vegetation loss along the A23 is fully considered within Section 9 of Chapter 9 Ecology and Nature Conservation of the ES.</p> <p>The majority of the vegetation that would be removed as part of the surface access improvements of the A23 would be scrub and small to medium sized trees. Reinstatement of scrub and tree planting (see illustrative designs for landscape mitigation in Appendix 8.8.1 Outline LEMP), would occur where possible and in accordance with guidelines in Highways England, DMRB LD117 Landscape Design, the Manual of Contract Documents for Highways Works, Major Projects and Highways England, DMRB Asset Data Management Manual Volume 13, and will mitigate visual and townscape impacts and reduce levels of effect to a level that is no longer significant.</p>	Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]	Under discussion Agreed

		<p>The Applicants position comments (April 2024) are recognised, though provides no comfort within the matter identified.</p> <p><u>Updated position (12 August 2024):</u></p> <p><u>The Applicant has considered the vegetation loss appropriately within the ES and has indicatively shown landscape proposals which will provide a reinstated corridor where possible.</u></p> <p><u>Despite agreeing with the position of this item, concerns are raised regarding mitigation relating the overall loss of broadleaved woodland and mitigation, as stated within items 2.8.3.1 and 2.8.4.9.</u></p>	<p>The details of landscape planting proposals will be agreed in consultation with the relevant authorities should the DCO be granted and will be secured as Requirement 8 of the draft DCO in Schedule 2. Publicly accessible replacement green space would be created in locations at car park B and Longbridge roundabout, connecting to existing green infrastructure, to compensate for any loss of vegetation and open space, representing a benefit to the local community, Gatwick staff and visitors and biodiversity.</p> <p>Updated position (April 2024): As set out in Table 9.7.1 of ES Chapter 9 Ecology and Nature Conservation [APP-034], the maximum scenario assessed includes the complete removal of vegetation within the construction zone. The assessment of the effect of the loss of woodland along the highway is considered in Section 9 of ES Chapter 9 Ecology and Nature Conservation. As such, the impact assessment has considered the loss of such trees.</p> <p><u>Updated position (July 2024): A Note on Project wide Habitat Loss and Replacement [REP6-071] was submitted at Deadline 6. This shows the extent of woodland loss as a result of the Project. In addition, ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] which sets out the extent of tree loss from an arboricultural perspective has been submitted at Deadline 6 as has Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] which sets out how and where retained trees and vegetation will be protected during construction. As such, the extent of woodland/tree loss, in particular along the highways works, has been clearly set out to demonstrate how the conclusions in Section 9 of ES Chapter 9 Ecology and Nature Conservation were derived.</u></p>		
2.8.3.4	Impact on ecology	<p>The River Mole crossings, road widening, new pedestrian and cycle links, temporary works compounds, temporary access and other works could all impact on ecology.</p> <p>Updated position (Deadline 1): It is now accepted that the additional river and riverbank habitat delivered with the River Mole diversion will offset losses elsewhere. Detailed design must still seek to minimise impacts.</p>	<p>The impact of the A23 Brighton Road and London Road crossings on the River Mole is considered at section 9.9.72 <i>et seq.</i> in Chapter 9 Ecology and Nature Conservation of the ES.</p>	Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]	Agreed

<p>2.8.3.5</p>	<p>Ecology and Nature Conservation</p>	<p>Ecological impacts will extend beyond the DCO limits with potential impacts on bat populations, downstream riparian habitats, and the spread of non-native aquatic species. Disturbance and habitat severance will impact the functioning of wildlife corridors. It is considered that the Applicant should have adopted a landscape-scale approach to assess and address ecological impacts. Enhancements to green corridors and improved habitat connectivity should extend beyond the confines of the Airport boundary, along key corridors.</p> <p>Updated position (Deadline 5): WSSC remains concerned that habitat severance and disturbance within the Project site, including the surface access improvements, will impact the functioning of wildlife corridors, notably bat commuting routes, both within the Site and the wider landscape. The loss of mature broadleaved woodland is of major concern, particularly as replacement planting will take many years to reach maturity and fully compensate for that lost. WSSC is also concerned that the development will impact riparian habitats downstream and facilitate the spread of non-native aquatic species, such as Himalayan balsam. WSSC acknowledges the habitat creation at Brook Farm and Longbridge Roundabout but considers that further habitat creation/enhancement should be sought, both on-site and off-site, to maintain and enhance habitat connectivity across the landscape.</p> <p>There is still a considerable lack of clarity regarding the extent of habitat loss and habitat creation/compensation, including uncertainty over the locations and extent of woodland creation. WSSC is pleased to hear that further information with respect to habitat loss/gain for each habitat type will be submitted by the Applicant at Deadline 5.</p> <p>Updated position (12 August 2024) The Note on Project Wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement.</p> <p>WSSC maintains the view that a 'landscape-scale approach' should have been taken to assessing and addressing ecological impacts, including the need to provide off-site mitigation, compensation, and Biodiversity Net Gain (BNG). Habitat creation and enhancement, and improved habitat connectivity, should extend beyond the confines of the Site to strengthen key wildlife corridors, such as the River Mole, Gatwick Stream and Bechstein's bat commuting routes.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed, this could be turned green.</p>	<p>As set out in paragraph 9.4.9 <i>et seq.</i> of Chapter 9 Ecology and Nature Conservation of the ES, the potential for ecological impacts beyond the DCO limits was recognised through the extension of the survey work beyond the limits, where necessary (bats, GCN, riparian mammals etc.).</p> <p>As such, the impact assessment has considered impacts outwith the DCO limits, where there is the potential for such impacts to occur.</p> <p>The impacts of the Project on habitat connectivity have been considered within Section 9 of Chapter 9 Ecology and Nature Conservation of the ES. This concluded that, although there would be nowhere that connectivity would be completely removed, there were areas where it would be reduced due to the loss of woodland. This was assessed as being of moderate adverse significance until the replacement planting matured sufficiently when this was reduced below the threshold of significance.</p> <p>The long-term maintenance of habitat connectivity both across the airport and between the airport and the wider landscape as a result of the Project has been a key driver of the overall Ecology Strategy, as set out in the oLEMP.</p> <p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (Appendix 8.8.1 of the ES).</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. This includes details of the extent of each habitat type to be removed and what habitat creation will take place.</p> <p>Updated position (Deadline 9): The Applicant has agreed biodiversity and landscaping specific financial contributions as</p>	<p>Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p>	<p>Not Agreed subject to s106</p>

			part of s106 discussions and therefore this matter can move to agreed.		
2.8.3.6	Assessment of Significant Effects	<p>Clarity is required to further understand the impacts of the drainage design and engineering solutions on the ecology of the River Mole, including flow rates, deposition of sediment, and flood overspill.</p> <p>Updated position (Deadline 1): Details in the ES now accepted.</p>	The impact of the construction and operation of the various drainage interventions is considered within paragraphs 9.9.72 <i>et seq.</i> , 9.9.266 <i>et seq.</i> and 9.9.339 <i>et seq.</i> of Section 9 Chapter 9 Ecology and Nature Conservation of the ES.	Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]	Agreed
2.8.3.7	Assessment of Significant Effects	<p>Ecological impacts will extend beyond the site boundary with potential impacts on bat populations, downstream riparian habitats, and the spread of non-native aquatic species.</p> <p>Updated position (Deadline 5): WSCC remains concerned that habitat severance and disturbance within the Project site, including the surface access improvements, will impact the functioning of wildlife corridors, notably bat commuting routes, both within the Site and the wider landscape. The loss of mature broadleaved woodland is of major concern, particularly as replacement planting will take many years to reach maturity and fully compensate for that lost. WSCC is also concerned that the development will impact riparian habitats downstream and facilitate the spread of non-native aquatic species, such as Himalayan balsam. WSCC acknowledges the habitat creation at Brook Farm and Longbridge Roundabout but considers that further habitat creation/enhancement should be sought, both on-site and off-site, to maintain and enhance habitat connectivity across the landscape.</p> <p>There is still a considerable lack of clarity regarding the extent of habitat loss and habitat creation/compensation, including uncertainty over the locations and extent of woodland creation. WSCC is pleased to hear that further information with respect to habitat loss/gain for each habitat type will be submitted by the Applicant at Deadline 5.</p> <p>Updated position (12 August 2024): The Note on Project Wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement.</p> <p>WSCC maintains the view that a 'landscape-scale approach' should have been taken to assessing and addressing ecological impacts, including the need to provide off-site mitigation, compensation, and Biodiversity Net Gain (BNG). Habitat creation and enhancement, and improved habitat connectivity, should extend beyond the confines of</p>	<p>As set out in paragraph 9.4.9 <i>et seq.</i> of Chapter 9 Ecology and Nature Conservation of the ES, the potential for ecological impacts beyond the DCO limits was recognised through the extension of the survey work beyond the limits, where necessary (bats, GCN, riparian mammals etc.).</p> <p>As such, the impact assessment has considered impacts outwith the DCO limits, where there is the potential for such impacts to occur.</p> <p>The impacts of the Project on habitat connectivity have been considered within Section 9 of Chapter 9 Ecology and Nature Conservation of the ES. This concluded that, although there would be nowhere that connectivity would be completely removed, there were areas where it would be reduced due to the loss of woodland. This was assessed as being of moderate adverse significance until the replacement planting matured sufficiently when this was reduced below the threshold of significance.</p> <p>The long-term maintenance of habitat connectivity both across the airport and between the airport and the wider landscape as a result of the Project has been a key driver of the overall Ecology Strategy, as set out in the oLEMP.</p> <p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (Appendix 8.8.1 of the ES).</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>	<p>Section 9 of ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p>	<p>Not agreed Agreed subject to s106</p>

		<p>the Site to strengthen key wildlife corridors, such as the River Mole, Gatwick Stream and Bechstein’s bat commuting routes.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed, this could be turned green.</p>	<p>Updated position (July 2024): The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. This includes details of the extent of each habitat type to be removed and what habitat creation will take place.</p> <p>Updated position (Deadline 9): The Applicant has agreed biodiversity and landscaping specific financial contributions as part of s106 discussions and therefore this matter can move to agreed.</p>		
<p>2.8.3.8</p>	<p>Assessment of Significant Effects</p>	<p>The ES has only assessed the effects on trees at a broader vegetation, habitat or visual landscape context, rather than considering them at a more individual value context. It is unclear how arboricultural features have informed the design of the Project.</p> <p>Updated position (Deadline 1): Whilst arboricultural surveys have been presented within the oLEMP, this is not an assessment and does not demonstrate how arboricultural features have been considered throughout design. Submission of further arboricultural documents may address this.</p> <p>Updated position (Deadline 5):</p> <p>The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] are welcomed and resolve this specific matter, noting that further concerns specific to arboricultural features stated within the documents have been identified elsewhere.</p> <p>Updated position (12 August 2024):</p> <p>The following have been submitted by the Applicant:</p> <ul style="list-style-type: none"> ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans). 	<p>Detailed arboricultural surveys have been undertaken with respect to the highways works along the A23 with the results presented within the oLEMP. These data have been used to inform the design of the highway to protect areas of high arboricultural value, where possible (near to South Terminal roundabout, for example).</p> <p>Tree loss elsewhere within the Project is largely limited to planting between carpark areas. These locations are currently being surveyed with further arboricultural impact assessments to be provided.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] has been carried out for the Project site and undertaken in accordance with BS5837:2012. It identifies all arboricultural features impacted by the Project based on a worse case assessment.</p> <p>Updated position (Deadline 9): While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of</p>	<p>Not agreed</p>

		<p>The above DL6 submissions are welcomed, though the Authorities remain concerned with approach towards proposed tree loss and continue to be of the view that a realistic worst-case scenario has been applied, as stated within [REP3-117] (p.55- 56) and [REP7-103]. Also reflected within item ref. 2.8.1.2.</p>		<p>Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p>	
<p>2.8.3.9</p>	<p>Assessment of Significant Effects</p>	<p>WSSC disagrees that no impact will occur to ancient woodland due to the reasoning provided below.</p> <p>Updated position (Deadline 5):</p> <p>Changes within the oAVMS [REP3-022] are welcomed. However, paragraph 3.3.2 clearly identifies that the proposed foul water pipeline works currently remain within the buffer zone of Horleyland Woods (AW), with only a statement suggesting that the works will be changed during detail design to avoid it buffer zone.</p> <p>Updated position (12 August 2024):</p> <p>The OAVMS submitted at Deadline 7 provides confidence that the control document now prevents the routing of services within the buffer zone of Horleyland Wood and now avoids impacts to this receptor (noting that figure 5.2.1 e of the Project Description Figures (v4) [REP6-016] does not represent any change in the indicative location of the foul water pipeline which would be required at detailed design).</p>	<p>Noted.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] and CoCP Annex 6 Outline Arboricultural and Vegetation Method Statement [REP3-022 to REP3-027] have been submitted at Deadline 3.</p> <p>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] which states in section 6.2.5 that “No trees within Ancient Woodlands or that are Veteran Trees are proposed for removal.”</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans). Section 3 of this provides details of Ancient woodland protection which is secured under DCO requirement 7, future AVMS must be substantially in accordance with the oAVMS under DCO requirement 28.</p> <p>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p> <p>Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048]</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028]</p> <p>Note on Project Wide Habitat Loss and Replacement [REP6-071]</p>	<p>Under discussion Agreed</p>

			<p>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. The document includes illustrative material for eight key views within the surface access improvements corridor to illustrate vegetation loss and replacement and the creation of landscape proposals at Year 1 and Year 10. The visualisations have been prepared to the specifications set out by RBBC following a meeting on 14th May 2024.</p> <p>An updated Tree Survey Report and Arboricultural Impact Assessment and a updated Outline Arboricultural and Vegetation Method Statement will be provided at Deadline 7 showing the foul water pipeline works outside the buffer zone of Horleyland Woods (AW).</p>		
Mitigation and Compensation					
2.8.4.1	Lack of opportunities for biodiversity enhancement.	<p>Many potential opportunities for biodiversity enhancement, both within and outside the DCO limits, were never explored.</p> <p>Updated position (Deadline 1): Further discussion would be welcome, including the landscape design for the internal road network.</p> <p>Updated position (Deadline 5): Further discussion would still be welcome.</p> <p>Updated position (12 August 2024): WSCC suggests that as biodiversity enhancement within the DCO limits is addressed in section 2.8.4.10, it is no longer covered here.</p> <p>WSCC maintains the view that if the Project is to deliver a true 10% BNG, and due to airport safeguarding constraints this is not possible for habitats such as woodland and ponds, off-site biodiversity enhancement is required.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed (which would deliver off-site biodiversity enhancement), this could be turned green.</p>	<p>Opportunities for biodiversity enhancement as part of the Project have been explored for the road network being modified along the A23, where practicable. The landscape design for the internal road network has not yet been completed. The option for the inclusion of reduced mowing management methods will be considered as part of that process.</p> <p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (Appendix 8.8.1 of the ES).</p> <p>Updated position (April 2024): Details of the planting/enhancement etc. to take place as part of the Project, including the internal road network where applicable, will be included within the relevant LEMP. Each LEMP will be submitted to and approved by the LPA before work commences on that part as set out within Requirement 8(1) of the draft DCO[REP3-006]. These LEMPs must be substantially in accordance with the oLEMP.</p> <p>Updated Position (July 2024): paragraph 1.1.4 explicitly requires each LEMP to include "advance Mitigation and Enhancement Planting Opportunities".</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p>	<p>Under discussion Agreed Not Agreed Agreed subject to s106</p>

			Updated position (Deadline 9): The Applicant has agreed biodiversity and landscaping specific financial contributions as part of s106 discussions and therefore this matter can move to agreed.		
2.8.4.2	Need for security of long-term positive management of the two biodiversity areas – the North West Zone and Land East of the Railway Line.	<p>These areas are of considerable biodiversity value and key components of the ecological network. Any loss or degradation could have significant impacts on the effectiveness and viability of the proposed mitigation areas.</p> <p>Updated position (Deadline 1): It is noted that the NWZ is included in Zone 3 (oLEMP Section 3.4.1) but details for LERL appear to be lacking. Is it within Zone 8? Further discussion would be welcome.</p> <p>Updated position (Deadline 5): WSSC welcomes the updated oLEMP [REP4-012] submitted at Deadline 4 which states in section 6.5.8 that both the NWZ and LERL Biodiversity Areas will be included within the relevant LEMPs for Zones 3 and 8 respectively. However, WSSC requests confirmation that the entirety of these two Biodiversity Areas will be incorporated within the relevant LEMPs, including the parts which lie outside the Project site boundary. We would be grateful if this could be made absolutely clear in a future revision of the oLEMP.</p> <p>Updated position (12 August 2024): WSSC welcomes the amendment to section 6.5.8 of the oLEMP Part 1 [REP7-048] submitted at Deadline 7 to reflect WSSC's previous comments and making it clear that the entirety of these two Biodiversity Areas will be incorporated within the relevant LEMPs. This issue is now considered 'agreed.'</p>	<p>The NWZ will be included within the LEMP for the River Mole works and the LERL within the LEMP for the works in that area.</p> <p>Requirement 8 of the dDCO sets out that appropriate LEMPs for these areas are to be produced, based on the oLEMP. This places a legal obligation on GAL to undertake the management proposed which will, in turn, protect these areas.</p> <p>Updated position (April 2024): An updated oLEMP clearly setting out that both the NWZ and LERL will be included within the relevant LEMP will be submitted at Deadline 4.</p> <p>Updated position (July 2024): Paragraph 6.5.8 of the oLMEP has been updated to: "Existing biodiversity areas within the Order limits and wider surroundings of the order limits will be incorporated into the management for the respective zones (NWZ into Zone 3 and LERL into Zone 8) through the relevant Landscape and Ecology and Management Plans pursuant to DCO Requirement 8."</p>	Requirement 8 of the Draft DCO [REP3-006]	Under discussion Agreed
2.8.4.3	The OLEMP and CoCP do not demonstrate appropriate outline methodology for tree protection and ancient woodland buffer zones.	<p>Potential impacts multiple to arboricultural features due to a lack of tree protection.</p> <p>Updated position (Deadline 1): It is not clear how tree protection measures stated within Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES are appropriate nor adequate. This must be informed from an Arboricultural Impact Assessment (in accordance with BS5837:2012). The current CoCp does not secure the mitigation measures or plans stated. It is not understood how these measures are secured by the DCO.</p> <p>Updated position (Deadline 5):</p>	<p>As set out in Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES sets out that '<i>Protective fencing, in accordance with BS 5837, would be erected around these features to prevent access by people, materials or machinery</i>'. Full details of the location of tree protection and associated buffer zones for ancient woodland will be set out in the CoCP and associated tree protection plans.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): The Tree Survey Report and Arboricultural Impact Assessment [REP3-037 to REP3-042] has been carried out for the Project site and undertaken in</p>	<p>ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6:</p>	Under Discussion Agreed

		<p>The Applicant's updated position (April 2024) provides further clarity, specifically with regard to the securing of the oAVMS through the DCO. As the oAVMS is an outline document, further comfort would be given if it were to be listed within Schedule 12 (Documents to be Certified) of the dDCO.</p> <p><u>Updated position (12 August July 2024):</u></p> <p><u>The OAVMS submitted at Deadline 7 provides confidence that the control document now prevents the routing of services within the buffer zone of Horleyland Wood and now avoids impacts to this receptor (noting that figure 5.2.1 e of the Project Description Figures (v4) [REP6-016] does not represent any change in the indicative location of the four water pipeline which would be required at detailed design). Outline methodology for tree protection has also been adequately demonstrated.</u></p>	<p>accordance with BS5837:2012. It identifies all arboricultural features impacted by the Project based on a worse case assessment.</p> <p>Any construction activities must be carried out in accordance with the CoCP [REP1-021] under DCO Requirement 7. The CoCP includes a number of construction management measures for the protection of trees and vegetation during construction. The Arboricultural and Vegetation Method Statement (oAVMS) (Annex 6 to the CoCP) [REP3-022] includes further protection measures and Preliminary Tree Removal and Protection Plans.</p> <p>Area-specific Detailed Arboricultural and Vegetation Method Statements including Detailed Vegetation Removal and Protection Plans and, where required, Detailed Tree Removal and Protection Plans must be submitted to and approved by CBC (following consultation with MVDC and RBBC as appropriate) prior to the removal of any trees or vegetation in that area. The AVMS and associated plans must be substantially in accordance with the oAVMS and associated plans.</p> <p><u>Updated position (July 2024): The schedule of documents to be certified has been updated in the Draft DCO. This amendment includes ES appendices, and therefore the oAVMS, in the list of documents to be certified.</u></p>	<p>Arboricultural Method Statement [REP3-022]</p>	
<p>2.8.4.4</p>	<p>The OLEMP does not provide clarity that detailed arboricultural method statements and planting plans and aftercare management will be provided within proposed LEMPs.</p>	<p>Potential impacts multiple to arboricultural features due to a lack of tree protection, and unclear proposed compensatory soft landscaping.</p> <p>Updated position (Deadline 1): Response requires further clarity and has not addressed the issue raised.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant's position (April 2024), including that within ref. 2.8.4.3, now provides clarity on this matter.</p>	<p>An Arboriculture Impact Assessment and Tree Protection Plan are being produced and will be shared with the local authorities once available.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): Prior to commencement of development of an area a LEMP must be submitted to and approved by CBC in relation to that area under DCO Requirement 8. The LEMPs must be substantially in accordance with the oLEMP which requires that LEMPs demonstrate how any retained trees and vegetation have been incorporated into the detailed landscape design. and trees into the detailed landscape designs (DCO Requirement 8). Further, under DCO Requirements 4 and 5 detailed designs of development submitted to CBC or the local highway authority for either</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p>	<p>Agreed</p>

			<p>approval or consultation must be in accordance with the Design Principles (Appendix A to the DAS) which include specific landscape considerations.</p>		
<p>2.8.4.5</p>	<p>Compensation strategies for tree, woodland and hedgerow loss not demonstrating adequate compensation, and that proposed compensation being recognised as a significant long-term impact.</p>	<p>The net loss of woodland, the fragmentation of habitat connectivity, and the long-term effect from the time required to establish new planting.</p> <p>Updated position (Deadline 1): Most new planting is situated outside of the airport and it is not understood how the 'safeguarding requirements' would apply in these areas and shouldn't be limited to 'where practicable' only. Concern is raised over the longevity of time required to allow planting to mature, and the significant but temporary effect between which has not been compensated for.</p> <p>Updated Position (Deadline 3): The OLEMP lacks demonstration that compensatory tree planting proposals considers local policy CH6 of the Crawley Borough Local Plan 2015 – 2030 (as detailed within para. 9.73 of the Joint West Sussex LIR).</p> <p>Updated position (Deadline 5):</p> <p>Outstanding concerns remain and are stated within section 7.2 of Deadline 4 Submission - Comments on any further information / submissions received by Deadline 3 [REP4-042].</p> <p><u>Updated position (12 August 2024):</u></p> <p><u>Outstanding concerns regarding tree, woodland and hedgerow compensation have been stated on numerous occasions and again within the JLA's Response to the Applicant's Deadline 6 Submissions [REP7-103] at sections 3, 5 & 6. Without addressing these concerns, it is considered that a long-term significant impact will occur as a result.</u></p>	<p>The loss of woodland is compensated for, as far as is practicable, within the confines of the safeguarding requirements of an operational airport, to ensure that the overall loss is considered to be of minor adverse significance, once planting has matured.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p> <p>Updated position (April 2024): Updated documents for Deadline 3.</p> <p>Tree survey plans, tree quality schedules, preliminary tree removal plans and impact assessment for the Project site are included in ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP3-037], [REP3-039], [REP3-041]. The report includes an assessment of tree removals and replanting within CBC, in accordance with Local Plan Policy CH6 and Project wide (section 7.2). ES Appendix 5.3.2 Code of Construction Practice [REP1-021] sets out general methodologies and mitigation measures and Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement (Doc Ref. 5.3) which includes Tree Removal and Protection Plans. These drawings will be revisited and refined during the detailed design process and submitted for approval as part of the detailed Arboricultural Method Statement. Detailed Arboricultural and Vegetation Method Statements including <u>Detailed Vegetation Retention and Protection Plans</u> and, where required, <u>Detailed Tree Removal and Protection Plans</u> will be prepared and submitted to CBC for approval prior to the removal of any trees or vegetation. These Method Statements and Plans will be substantially in accordance with the Outline Arboricultural and Vegetation Method Statement (Annex 6) [REP1-023, REP1-024, REP1-025].</p> <p>ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [REP2-021], [REP2-023], [REP2-025], [REP2-027]. The assessment of tree replanting numbers for the CNBC</p>	<p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP3-037]</p> <p>ES Appendix 5.3.2: Code of Construction Practice – Annex 6: Arboricultural Method Statement [REP3-022]</p>	<p>Not Agreed</p>

			<p>Local Plan Policy CH6 is based on preliminary landscape proposals in the oLEMP and Typical Planting Schedules in Annex 3 of the oLEMP. The obligations within this document are secured through a requirement in the Draft DCO (Doc Ref. 2.1) in that prior to commencement of development of an area, a Landscape and Ecology Management Plan (LEMP) must be submitted to and approved by CBC (in consultation with RBBC, MVDC and TDC as relevant) under Requirement 8. The LEMPs must be substantially in accordance with this oLEMP.</p> <p><u>Updated position (July 2024): The Applicant has provided updated documents at the Deadline 6 submission including:</u></p> <p><u>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP6-038, REP6-040, REP6-042, REP6-044, REP6-046, REP6-048] in which Appendix J specifically deals with the CH6 policy.</u></p> <p><u>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP6-018, REP6-020, REP6-022, REP6-024, REP6-026, REP6-028] (Appendix A includes M23 and A23 preliminary tree removal and protection plans and Appendix C includes M23 and A23 preliminary vegetation removal and protection plans).</u></p> <p><u>These documents provide updated details of trees and vegetation to be lost and trees and vegetation to be retained and protection methods based on preliminary designs, as a worst case scenario. Further detail would be provided during the detailed design stage to confirm tree loss. An Arboricultural and Vegetation Method Statement would be submitted to CBC for approval as secured through Requirement 28 of the dDCO.</u></p> <p><u>The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project.</u></p> <p><u>Updated position (Deadline 9): While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</u></p>		
2.8.4.6	Construction programme and habitat loss	A 14-year construction programme will prolong the impacts of habitat loss and, in some locations, mitigation will not be in place until the end of	The effect of vegetation loss and the time required to establish mitigation planting has been accounted for within the impact	Section 9 of ES Chapter 9 Ecology	Under discussion Not Aagreed

		<p>the construction period. It is not clear if the limited areas identified for environmental mitigation and enhancement will adequately compensate for the significant loss of habitat.</p> <p>Updated position (Deadline 5): WSSC remains concerned over impacts on bats and other wildlife over this long construction period, and that mitigation will not be in place in some locations until the end of the construction period. The lack of clarity regarding the extent of habitat loss and habitat creation/compensation is of major concern. WSSC is pleased to hear that further information with respect to habitat loss/gain for each habitat type will be submitted by the Applicant at Deadline 5. Further information on advance planting and habitat creation would be welcomed.</p> <p>Updated position (12 August 2024) <u>The Note on Project wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement. The information on advance planting and habitat creation within the updated oLEMP [REP6-032, REP6-034 and REP6-036] is also helpful.</u></p> <p><u>WSSC still has concerns regarding disturbance over the long construction period, that newly created woodland will take decades to replace that lost and impacts on bats over the short and medium term.</u></p> <p><u>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed (which would help mitigate these impacts), this could be turned green.</u></p>	<p>assessment set out in Section 9 of Chapter 9 Ecology and Nature Conservation of the ES via the use of a number of interim assessment years. This provides the framework to ensure that significant effects during that period that are not significant in the long term are identified.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): <u>The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</u></p> <p>Updated position (Deadline 9): <u>The Applicant has agreed biodiversity and landscaping specific financial contributions as part of s106 discussions and therefore this matter can move to agreed. While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</u></p>	<p>and Nature Conservation [APP-034]</p>	<p>Agreed subject to s106</p>
2.8.4.7	Mitigation, Compensation and Enhancement	<p>A landscape-scale approach should have been taken to addressing ecological impacts, including the need for providing off-site compensatory habitat and Biodiversity Net Gain.</p> <p>Updated position (Deadline 5): WSSC maintains this position.</p> <p>Updated position (12 August 2024): <u>The updated BNG Statement submitted at Deadline 6 [REP6-050] is most welcome.</u></p> <p><u>WSSC maintains the view that a 'landscape-scale approach' should have been taken to addressing ecological impacts, including the need to provide off-site mitigation, compensation, and Biodiversity Net Gain (BNG). This is particularly so because airport safeguarding has constrained the ability to mitigate on-site. Habitat creation and enhancement, and improved habitat connectivity, should extend beyond the confines of the Site to strengthen key wildlife corridors,</u></p>	<p>The Project includes landscape-scale studies, where appropriate, including with respect to bats (Appendix 9.6.3 Bat Trapping and Radio Tracking).</p> <p>Updated position (April 2024): a revised ES Appendix 9.9.2 Biodiversity Net Gain Statement [APP-136] will be submitted at Deadline 5. This will incorporate both strategic significance and delay/advance planting.</p> <p>Updated position (July 2024): <u>An updated ES Appendix 9.9.2 BNG Statement was submitted at Deadline 6 [REP6-050] incorporating both strategic significance and delay/advance planting.</u></p> <p>Updated position (Deadline 9): <u>The Applicant has agreed biodiversity and landscaping specific financial contributions as</u></p>	<p>ES Appendix 9.6.3 Bat Trapping and Radio Tracking Surveys Part 1 [APP-131]</p> <p>ES Appendix 9.6.3 Bat Trapping and Radio Tracking Surveys Part 2 [APP-132]</p>	<p>Not Agreed subject to s106</p>

		<p>such as the River Mole, Gatwick Stream and Bechstein’s bat commuting routes.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed (which would help mitigate these impacts), this could be turned green.</p>	<p>part of s106 discussions and therefore this matter can move to agreed.</p>		
2.8.4.8	Mitigation, Compensation and Enhancement	<p>Enhancements to green corridors and improved habitat connectivity should extend beyond the confines of the airport, along key corridors such as the River Mole and Gatwick Stream, to mitigate impacts on bats and other wildlife.</p> <p>Updated position (Deadline 5): WSCC remains concerned that habitat severance and disturbance within the Project site, including the surface access improvements, will impact the functioning of wildlife corridors, notably bat commuting routes, both within the Site and the wider landscape. WSCC acknowledges the habitat creation at Brook Farm and Longbridge Roundabout but considers that further habitat creation/enhancement should be sought, both on-site and off-site, to maintain and enhance habitat connectivity across the landscape.</p> <p>Updated position (12 August 2024) The Note on Project wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement.</p> <p>WSCC remains concerned over the short and medium term impacts of habitat severance and disturbance on bats. WSCC considers that this should be addressed off-site through enhancements to green corridors and improved habitat connectivity in the wider landscape.</p> <p>Subject to the Section 106 Landscape and Ecology Enhancement Fund being agreed (which would deliver off-site enhancements to green corridors and improved habitat connectivity in the wider landscape), this could be turned green.</p>	<p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (Appendix 8.8.1 of the ES).</p> <p>Updated position (April 2024): The Applicant would welcome an updated position wor response from WSCC against this SoCG item, or confirmation if this item can be marked as ‘agreed’ or ‘no longer pursuing’.</p> <p>Updated position (July 2024): The Applicant has also provided at Deadline 6 a Note on Project Wide Habitat Loss and Replacement [REP6-071] to form a single point of reference with respect to vegetation change that it is anticipated could take place across the Project. This includes details of the extent of each habitat type to be removed and what habitat creation will take place.</p> <p>Updated position (Deadline 9): The Applicant has agreed biodiversity and landscaping specific financial contributions as part of s106 discussions and therefore this matter can move to agreed.</p>	ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [APP-113 to APP-116]	Not Agreed subject to s106
2.8.4.9	Mitigation, Compensation and Enhancement	<p>The extent of loss of mature broadleaved woodland is of concern and additional compensation measures will be required to ensure no adverse impacts on broadleaved woodland habitat and bats. If, due to airport safeguarding, it is not possible to provide sufficient compensatory planting within the DCO limits, off site woodland creation is required.</p> <p>Updated position (Deadline 1): Greater clarity is required on woodland loss, compensatory habitat and habitat gain, including the precise</p>	<p>The extent of woodland planting within the Project has been maximised while accounting for airport safeguarding.</p> <p>Opportunities for off-site woodland creation were explored during pre-submission consultation. To date, no options have been identified.</p>	ES Appendix 9.9.2 Biodiversity Net Gain Statement [REP3-047]	Under discussion Agreed Not Agreed

		<p>locations and extent of habitat involved. The information presented in Appendix 9.9.2 (BNG Statement), including the figures for woodland, is unclear & difficult to match with the Sketch Landscape Concept Plans within the OLEMP.</p> <p>Further discussion would be welcome.</p> <p>Updated position (Deadline 5): WSCC maintains this position. Further discussion would be welcome. WSCC is, however, pleased to hear that further information with respect to habitat loss/gain for each habitat type will now be submitted at Deadline 5. WSCC is also pleased to hear that an updated ES Appendix 9.9.2 Biodiversity Net Gain Statement will also be submitted at Deadline 5. Further information on advance planting and habitat creation would be welcomed.</p> <p>Updated position (12 August 2024) The Note on Project wide Habitat Loss and Replacement [REP6-071] is helpful in providing further detail on habitat loss and replacement. The information on advance planting and habitat creation within the updated oLEMP [REP6-032, REP6-034 and REP6-036] is also helpful.</p> <p>WSCC still has major concerns regarding loss of deciduous woodland habitat, and also the impact on bats. It is recognised that the net loss has now been reduced from over 5ha to 3.12ha. However, this is still a net loss. WSCC's concerns include:</p> <ol style="list-style-type: none"> 1. As a Priority Habitat, there should be no net loss of deciduous woodland 2. New woodland planting will take many decades to reach maturity and thus fully compensate for that lost 3. If the Project is to meet the BNG 'trading rules' and truly deliver a 10% BNG, it must deliver 10% BNG in woodland units 4. Short and medium term impacts on bat foraging habitat and commuting routes through loss of mature and semi-mature woodland <p>As the above concerns have not been addressed, this issue is considered 'not agreed.'</p>	<p>Updated Position (April 2024): Further information with respect to habitat loss/gain will be submitted at Deadline 5. This will comprise figures illustrating loss/gain for each habitat type. In addition, an updated ES Appendix 9.9.2 Biodiversity Net Gain Statement [REP3-047] will also be submitted at Deadline 5. This will include details of delayed/advance planting and strategic significance.</p> <p>Updated position (July 2024): 40.45A Note on Project wide Habitat Loss and Replacement [REP6-071] was submitted at Deadline 6. Details of options with respect to advance planting and habitat creation are set out in Annex 4 of ES Appendix 8.8.1 outline Landscape and Ecology Management Plan [REP6-032, REP6-034, REP6-036]. On this basis, it is assumed that this issue can be agreed.</p> <p>Updated position (Deadline 9): While there is a net loss in area, this is mitigated through an overall enhancement to the ecological condition of the woodland being replanted.</p>		
<p>2.8.4.10</p>	<p>Mitigation, Compensation and Enhancement</p>	<p>Further opportunities for biodiversity enhancement within the DCO limits should have been explored. For example, conversion of 'amenity</p>	<p>Opportunities for biodiversity enhancement as part of the Project have been explored for the road network being modified along the A23, where practicable. The landscape design for the</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology</p>	<p>Under discussion Not Agreed</p>

		<p>grassland' on road verges and roundabouts to wildflower grassland, and the improved management of Gatwick Stream and Crawter's Brook.</p> <p>Updated position (Deadline 1): Further discussion would be welcome, including the landscape design for the internal road network.</p> <p>Updated position (Deadline 5):</p> <p>WSCC would welcome a revision to the oLEMP with specific reference to seeking further opportunities for biodiversity enhancement within the DCO limits, including the conversion of 'amenity' grassland on road verges and roundabouts to wildflower grassland.</p> <p>Updated position (12 August 2024): WSCC is disappointed that, despite the invitation, there has not been any further discussions on biodiversity enhancement within the DCO limits, notably the conversion of 'amenity grassland' along the internal road network to wildflower grassland. WSCC wishes to see a specific commitment to this within the oLEMP. The current wording in paragraph 1.1.4 of the oLEMP [REP6-032] is too vague.</p> <p>As the above concern has not been addressed, this issue is considered 'not agreed.' A commitment within the oLEMP is likely to be sufficient for WSCC to review this position.</p>	<p>internal road network has not yet been completed. The option for the inclusion of reduced mowing management methods will be considered as part of that process. Likewise, other enhancements elsewhere within the Project site will be captured within the relevant LEMPs at the detailed design stage.</p> <p>Opportunities to create enhanced corridors beyond the confines of the existing airport boundary have included those at Brook Farm and Longbridge Roundabout, as set out in the oLEMP (ES Appendix 8.8.1).</p> <p>Updated position (April 2024): Details of the planting/enhancement etc. to take place within the Project boundary, including the internal road network as relevant, will be included within the relevant LEMP. Each LEMP will be submitted to and approved by the LPA before work commences on that part as set out within Requirement 8(1) of the draft DCO (Doc Ref. 2.1). These LEMPs must be substantially in accordance with the oLEMP.</p>	<p>Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p>	
2.8.4.11	Mitigation, Compensation and Enhancement	<p>Certainty is required that the two biodiversity areas, the North West Zone and Land East of the Railway Line, will continue to be managed for wildlife. As important components of the ecological network, they are key to the viability of the proposed mitigation areas.</p> <p>Updated position (Deadline 1): It is noted that the NWZ is included in Zone 3 (oLEMP Section 3.4.1) but details for LERL appear to be lacking. Is it within Zone 8? Further discussion would be welcome.</p> <p>Updated position (Deadline 5): WSCC welcomes the updated oLEMP [REP4-012] submitted at Deadline 4 which states in section 6.5.8 that both the NWZ and LERL Biodiversity Areas will be included within the relevant LEMPs for Zones 3 and 8 respectively. However, WSCC requests confirmation that the entirety of these two Biodiversity Areas will be incorporated within the relevant LEMPs, including the parts which lie outside the Project site boundary. We would be grateful if this could be made absolutely clear in a future revision of the oLEMP.</p> <p>Updated position (12 August 2024):</p>	<p>The NWZ will be included within the LEMP for the River Mole works and the LERL within the LEMP for the works in that area.</p> <p>Requirement 8 of the dDCO sets out that appropriate LEMPs for these areas are to be produced, based on the oLEMP. This places a legal obligation on GAL to undertake the management proposed which will, in turn, protect these areas.</p> <p>Updated position (April 2024): An updated oLEMP clearly setting out that both the NWZ and LERL will be included within the relevant LEMP will be submitted at Deadline 4.</p> <p>Updated position (July 2024): Paragraph 6.5.8 of the oLMEP has been updated to: "Existing biodiversity areas within the Order limits and wider surroundings of the order limits will be incorporated into the management for the respective zones (NWZ into Zone 3 and LERL into Zone 8) through the relevant Landscape and Ecology and Management Plans pursuant to DCO Requirement 8.</p>	Draft DCO (REP3-006)	Under discussion Agreed

		<p>WSSC welcomes the amendment to section 6.5.8 of the OoLEMP Part 1 [REP7-048] submitted at Deadline 7 to reflect WSSC's previous comments and making it clear that the entirety of these two Biodiversity Areas will be incorporated within the relevant LEMPs. This issue is now considered 'agreed.'</p>			
2.8.4.12	Mitigation, Compensation and Enhancement	<p>There is a lack of clarity on the roles and responsibilities of the Ecological Clerk of Works (ECoW). These need to be clearly specified within the relevant documents and agreed with WSSC.</p> <p>Updated position (Deadline 1): An updated CoCP clearly defining the roles and responsibilities of the ECoW would be most welcome.</p> <p>Updated position (Deadline 5):</p> <p>WSSC welcomes the updated CoCP submitted at Deadline 4 [REP4-007] which outlines the role of the ECoW in Section 6.1.3.</p>	<p>The role of the Ecology Clerk of Works will be to provide on-site ecological expertise during construction, including overseeing habitat clearance to ensure compliance with wildlife legislation. GAL will update the CoCP to include additional detail on the responsibilities.</p> <p>Updated position (April 2024): An updated CoCP clearly defining the roles and responsibilities of the ECoW will be submitted at Deadline 4.</p>	ES Appendix 5.3.2: Code of Construction Practice (REP1-021)	Agreed
2.8.4.13	Mitigation, Compensation and Enhancement	<p>Although a worst-case approach has been taken to assessing the impacts upon habitats, WSSC would expect to see a reduction of this worst-case impact to these sensitive habitats applied as a key design principle during the detailed design stage. WSSC would have expected the design principles presented as part of the DAS to be clearer, more joined up, and a greater amount of detail included. Further consultation on these design principles should be undertaken.</p> <p>Updated position (Deadline 1): WSSC would welcome revised Design Principles in the DAS. Further discussion would be welcome.</p> <p>Updated position (Deadline 5):</p> <p>WSSC welcomes the updated Project-wide Design Principle L1 within the updated Design Principles submitted at Deadline 3 [REP3-056].</p>	<p>A worst-case approach has been adopted to ensure that all potential impacts are identified and mitigation is applied appropriately.</p> <p>Seeking to reduce to further reduce impacts to sensitive habitats, where practicable, will be included in the next iteration of the Design Principles for consideration at detailed design stage.</p> <p>Updated position (April 2024): The project-wide design principle L1 has been amended to require detailed design to retain habitats of ecological value where possible, in order to minimise habitat loss, contained in the Design Principles [REP3-056] submitted at Deadline 3.</p>	ES Chapter 9 Ecology and Nature Conservation [APP-034]	Agreed
2.8.4.14	Mitigation, Compensation and Enhancement	<p>The Outline Landscape and Ecology Management Plan (OLEMP) (App-113 – 116) and CoCP (APP-082) lack critical detail on outline methodology for tree protection and ancient woodland buffer zones, along with tree protection plans.</p> <p>Updated position (Deadline 1): It is not clear how tree protection measures stated within Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES are appropriate nor adequate. This must be informed from an Arboricultural Impact Assessment (in accordance with BS5837:2012).</p>	<p>As set out in Table 9.8.1 of Chapter 9 Ecology and Nature Conservation of the ES 'Protective fencing, in accordance with BS 5837, would be erected around these features to prevent access by people, materials or machinery'. Full details of the location of tree protection and associated buffer zones for ancient woodland will be set out in the CoCP and associated tree protection plans.</p> <p>Updated position (Deadline 1): A Tree Survey Report and Arboricultural Impact Assessment and an Arboricultural Method Statement is being submitted at Deadline 1.</p>	<p>ES Chapter 9 Ecology and Nature Conservation [APP-034]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment (REP3-037)</p> <p>ES Appendix 5.3.2: Code of</p>	Under discussion Agreed

		<p>The current CoCP does not secure the mitigation measures or plans stated. It is not understood how these measures are secured by the DCO.</p> <p>Updated position (Deadline 5): The applicant's updated position (April 2024) provides further clarity, specifically with regard to the securing of the oAVMS through the DCO. As the oAVMS is an outline document, further comfort would be given if it were to be listed within Schedule 12 (Documents to be Certified) of the dDCO.</p> <p>Updated position (12 August 2024):</p> <p>The OAVMS submitted at Deadline 7 provides confidence that the control document now prevents the routing of services within the buffer zone of Horleyland Wood and now avoids impacts to this receptor (noting that figure 5.2.1 e of the Project Description Figures (v4) [REP6-016] does not represent any change in the indicative location of the foul water pipeline which would be required at detailed design).</p> <p>Outline methodology for tree protection has also been adequately demonstrated. Further, Schedule 14 (Documents to be certified) of the dDCO [REP7-005] now includes the OAVMS.</p>	<p>Updated position (April 2024): Any construction activities must be carried out in accordance with the CoCP (Doc Ref. Appendix 5.3.2) under DCO Requirement 7. The CoCP includes a number of construction management measures for the protection of trees and vegetation during construction. The Outline Arboricultural and Vegetation Method Statement (oAVMS) (Annex 6 to the CoCP) includes further protection measures and Preliminary Tree Removal and Protection Plans.</p> <p>Area-specific Detailed Arboricultural and Vegetation Method Statements including Detailed Vegetation Removal and Protection Plans and, where required, Detailed Tree Removal and Protection Plans must be submitted to and approved by CBC (following consultation with MVDC and RBBC as appropriate) prior to the removal of any trees or vegetation in that area. The AVMS and associated plans must be substantially in accordance with the oAVMS and associated plans.</p>	<p>Construction Practice – Annex 6: Arboricultural Method Statement (REP3-022)</p>	
<p>2.8.4.15</p>	<p>Mitigation, Compensation and Enhancement</p>	<p>The dDCO contains a requirement for the creation and approval of LEMPs in accordance with the OLEMP. However, a description of the content expected is not provided within the OLEMP. Further details on the usual documents required to deliver essential mitigation, compensation and enhancement should be provided.</p> <p>Updated position (Deadline 1): Whilst response is understood, the applicant needs to clarify within the oLEMP as to what plans/documents will be delivered within the each LEMP to ensure those principles provided. Further discussion would be welcomed.</p> <p>Updated position (Deadline 5): The updated oLEMP [REP3-031] provides little comfort that basic requirements such as planting plans, planting schedules and planting details will be provided within LEMPs. A description of what would be provided within such elements should also be provided (some of which has been suggested already).</p> <p>Updated position (12 August 2024): The Applicants July 2024 response is promising regarding the design information expected within detailed LEMPs. This is loosely stated within section 1.1.4 of the OLEMP and whilst agreed with, could still provide</p>	<p>Each LEMP will provide details of the establishment and management of habitats to be created within each works area, including the necessary landscape design. These details will be based on the principals set out within the oLEMP and, as such, each LEMP will broadly follow the structure set out in the oLEMP, providing details of the area, the objectives for habitat creation and management within that area (from both an ecological and landscape perspective), how the habitats will be created and management prescriptions to ensure that the objectives set out can be delivered.</p> <p>Updated position (April 2024): An updated oLEMP setting out what plans/documents will be within each LEMP was submitted at Deadline 3 (Section 1.1.4).</p> <p>Updated Position (July 2024) The oLEMP sets out the environmental objectives, strategy and principles of workmanship and maintenance for all elements of the preliminary landscape and ecological proposals, set out in section 1, which would form the basis for the detailed designs within the individual LEMPs. These principles are reflected in Appendix 1 Design Principles [REP5-031] of the DAS.</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p>	<p>Under discussion Agreed</p>

		better detail to provide comfort for the detail required to be submitted at the detailed design stage. .	The LEMP's will include a description of " The landscape and ecology works for that area in compliance with the objectives and principles of the relevant zone as described in this oLEMP" (paragraph 1.1.4 of the oLEMP). This will include the design information in the form of plans, cross sections, elevations, technical details, visualisations, technical reports, schedules and specifications appropriate to the individual LEMP.	Management Plan Part 4 [APP-116]	
2.8.4.16	Mitigation, Compensation and Enhancement	<p>The reported effect on trees and woodland (of varied types) remains a long-term, significant impact. Planting proposals have not utilised enough opportunities for advanced planting to minimise establishment time, notably alongside the highway corridor.</p> <p>Updated position (Deadline 1): Advanced planting (or enhancement of existing features) has not been considered adjacent the highway corridor.</p> <p>Updated position (Deadline 5): The Applicant's position (April 2024) is welcomed and is considered to be under further discussion.</p> <p>Updated position (12 August 2024):</p> <p>Outstanding concerns regarding advanced planting have been stated within the JLA's Response to the Applicant's Deadline 6 Submissions [REP7-103] at sections 3 & 5. Further, the proposed advanced planting does not minimise the effects alongside the highway corridor (between removal and reinstatement).</p>	<p>All areas within the highway corridor where vegetation removal will take place are required for construction activities. As such, there is no scope for advanced planting in these areas.</p> <p>Options for advance planting of other habitats, within the Environmental Mitigation Area at Brook From, for example, are being explored.</p> <p>Updated position (April 2024): Annex 5 of ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [REP2-021 ,REP2-023, REP2-025, REP2-027] sets out preliminary areas of advance planting. This includes along Crawters Brook, adjacent to Perimeter Road East and Brook Farm in the west of the Project site.</p> <p>Updated position (July 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>	n/a	Under DiscussionNot aAgreed.
2.8.4.17	Mitigation, Compensation and Enhancement	<p>Tree planting maintenance and aftercare within the OLEMP does not adequately ensure their establishment.</p> <p>Updated position (Deadline 1): The oLEMP should clarify the plans/documents in which the principal requirements will be provided within each LEMP.</p> <p>Updated position (Deadline 5): The updated oLEMP [REP3-031] provides little comfort that basic requirements such as planting plans, planting schedules and planting details will be provided within LEMPs. A description of what would be provided within such elements should also be provided (some of which has been suggested already).</p> <p>Updated position (12 August 2024):</p>	<p>The oLEMP provides an overview of the principles of planting, maintenance and aftercare. Full details will be set out in each LEMP, at the detailed design phase.</p> <p>Updated position (April 2024): An updated oLEMP setting out what plans/documents will be within each LEMP was submitted at Deadline 3 (section 1.1.4).</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 1 [APP-113]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 2 [APP-114]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 3 [APP-115]</p>	Not-Agreed Agreed

		<p>Section 1.1.4 now includes further detail as to how Tree planting maintenance and aftercare will be secured by the OLEMP.</p>		<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan Part 4 [APP-116]</p>

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.10.1.1	Mineral Safeguarding	<p>The Applicant’s Mineral Resource Assessment (MRA) (APP-139) identifies that safeguarded brick clay will likely be sterilised beneath the proposed development area. The Applicant indicates that that where material will be sterilised, the overriding need for the Project will outweigh the safeguarding of brick clay given the national importance of the development and the size of the resource (clay) within the County.</p> <p>Updated position (Deadline 1): The CoCP and CRWMP fail to reference mineral safeguarding or policy related to mineral safeguarding (Airports NPS and JMLP).</p> <p>The CoCP and associated documents are lacking the detail required to demonstrate and ensure needless sterilisation will not occur.</p> <p>Updated position (Deadline 5): The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC are pleased to see that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>A commitment to ensure that any surplus material (not reused on site during construction) is exported off-site for reuse, recycling or recovery, would constitute a mitigation for sterilisation and this is to be taken forward under the Materials Management Plan as secured within ES Appendix 5.3.2: Construction Resources and Waste Management Plan.</p> <p>Updated position (April 2024): The CRWMP [APP-087] has been updated to include relevant mineral safeguarding policies and policy related to mineral safeguarding from the Airport National Policy Statement (ANPS) (2018) and the West Sussex Joint Minerals Local Plan (JMLP) (2018). The Project will seek to minimise the sterilisation of mineral safeguarded areas (as set out in the updated CRWMP). The updated CRWMP will be submitted to Examination at Deadline 4.</p>	<p>Draft DCO (REP3-006)</p> <p>ES Appendix 5.3.2 Code of Construction Practice – Annex 5 Construction Resources and Waste Management Plan [APP-087]</p>	Agreed
2.10.1.2	Mineral Safeguarding	<p>The Secretary of State, as the decision maker for the Project, will be required to consider whether there is an overriding need for the development and whether the Applicant’s proposed mechanisms are sufficient to avoid needless sterilisation.</p> <p>Updated position (Deadline 1): Mineral safeguarding seeks to ensure that needless sterilisation does not occur. The applicant refers to off-site reuse, recycling or recovery as constituting mitigation for sterilisation.</p> <p>This material would not constitute waste, but instead a safeguarded resource, and therefore, to avoid needless sterilisation, it would require use in line with the purpose for safeguarding – i.e. brick clay should be used to make bricks.</p> <p>Updated position (Deadline 5):</p>	<p>A commitment to ensure that any surplus material (not reused on site during construction) is exported off-site for reuse, recycling or recovery, would constitute a mitigation for sterilisation and this is to be taken forward under the MMP as secured within ES Appendix 5.3.2: CRWMP.</p> <p>Updated position (April 2024): The CRWMP was updated at Deadline 4 to include key policies from the West Sussex Joint Minerals Local Plan and how the CRWMP will seek avoid the sterilisation of safeguarded minerals. The updated CRWMP will be submitted to Examination at Deadline 4.</p> <p>Updated position (April 2024): As stated within ES Appendix 10.9.2 Mineral Resource Assessment [APP-139] dialogue with brickworks operators continues and this will be the primary route to be explored should sterilisation be unavoidable. Acceptance by</p>	<p>Draft DCO (REP3-006)</p> <p>ES Appendix 5.3.2 Code of Construction Practice – Annex 5 Construction Resources and Waste Management Plan [APP-087]</p>	Agreed

		<p>The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC are pleased to see that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>the brickworks operators will however be based on a sufficient volume of recovered brick clay being available and it being of suitable quality.</p>		
2.10.1.3	Code of Construction Practice and securing incidental extraction	<p>The MRA indicates that surplus material that is not used on site during construction would be sent off-site for sale or reuse elsewhere. The mechanism to achieve this is the Materials Management Plan, via the CoCP Annex 5 – Construction Resource and Waste Management Plan (APP-087).</p> <p>Updated position (Deadline 1): The CoCP and CRWMP fail to reference mineral safeguarding or policy related to mineral safeguarding (Airports NPS and JMLP).</p> <p>The CoCP and associated documents are lacking the detail required to demonstrate and ensure needless sterilisation will not occur.</p> <p>Updated position (Deadline 5): The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC are pleased to see that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>A commitment to ensure that any surplus material (not reused on site during construction) is exported off-site for reuse, recycling or recovery, would constitute a mitigation for sterilisation and this is to be taken forward under the Materials Management Plan as secured within ES Appendix 5.3.2: Construction Resources and Waste Management Plan.</p> <p>Updated position (April 2024): The CRWMP [APP-087] has been updated to include relevant mineral safeguarding policies and policy related to mineral safeguarding from the Airport National Policy Statement (2018) and the West Sussex Joint Minerals Local Plan (2018).</p> <p>Clarification has been added to the CRWMP that opportunities to reuse the surplus material from the mineral safeguarded area will be explored through the Materials Management Plan. A summary of this clarification has also been added to the CoCP. The updated CRWMP and CoCP will be submitted to Examination at Deadline 4.</p>	Draft DCO (REP3-006)	Agreed
2.10.1.4	Code of Construction Practice and securing incidental extraction	<p>The CoCP (APP-082) is secured by Requirement 7 of the dDCO (AS-004), and therefore it is important to ensure that it will be fit for purpose.</p> <p>Updated position (Deadline 1): The CoCP and CRWMP fail to reference mineral safeguarding or policy related to mineral safeguarding (Airports NPS and JMLP).</p> <p>The CoCP and associated documents are lacking the detail required to demonstrate and ensure needless sterilisation will not occur.</p> <p>Updated position (Deadline 5): The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC are pleased to see that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>A commitment to ensure that any surplus material (not reused on site during construction) is exported off-site for reuse, recycling or recovery, would constitute a mitigation for sterilisation and this is to be taken forward under the Materials Management Plan as secured within ES Appendix 5.3.2: Construction Resources and Waste Management Plan.</p> <p>Updated position (April 2024): The CoCP has been updated to include a cross reference to the CRWMP which explains that the Project will seek to minimise the sterilisation of mineral safeguarded areas in line with mineral safeguarding policy in the ANPS and JMLP. The updated CRWMP and CoCP will be submitted to Examination at Deadline 4.</p>	Draft DCO (REP3-006)	Agreed

2.10.1.5	Code of Construction Practice and securing incidental extraction	<p>Neither the CoCP nor the Construction Resources and Waste Management Plan refer to the adopted West Sussex Joint Minerals Local Plan (JMLP). Without reference to key policies in the JMLP, it is not clear how the requirement to avoid needless sterilisation of safeguarded minerals will be met.</p> <p>Updated position (Deadline 1): The CoCP and CRWMP fail to reference mineral safeguarding or policy related to mineral safeguarding (Airports NPS and JMLP).</p> <p>The CoCP and associated documents are lacking the detail required to demonstrate and ensure needless sterilisation will not occur.</p> <p>Updated position (Deadline 5): The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC are pleased to see that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>A commitment to ensure that any surplus material (not reused on site during construction) is exported off-site for reuse, recycling or recovery, would constitute a mitigation for sterilisation and this is to be taken forward under the Materials Management Plan as secured within ES Appendix 5.3.2: Construction Resources and Waste Management Plan. The position in terms of key policies is assessed within the Mineral Resource Assessment (see ES Appendix 10.9.2: Mineral Resource Assessment).</p> <p>Updated position (April 2024): The CRWMP was updated at Deadline 4 to include key policies from the West Sussex Joint Minerals Local Plan and how the CRWMP will seek avoid the sterilisation of safeguarded minerals. The updated CRWMP will be submitted to Examination at Deadline 4.</p>	Draft DCO (REP3-006) Paragraph 4.5.8 of ES Appendix 5.3.2 Code of Construction Practice – Annex 5 Construction Resources and Waste Management Plan [APP-087]	Agreed

2.11. Greenhouse Gases

2.11.1 Table 2.11 sets out the position of both parties in relation to greenhouse gases matters.

Table 2.11 Statement of Common Ground – Greenhouse Gases Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.11.1.1	Baseline Environment	<p>The Applicant has not considered all the latest up-to-date guidance with PAS2080:2023 and the Sixth Report of the United Nations Intergovernmental Panel on Climate Change(the AR6 report) is not referred to. PAS2080:2023 emphasises decisions and actions that reduce whole-life carbon more than PAS2080:2016 referred to in the GHG Assessment. The AR6 report considers many new updates concerning GHG assessment, which should be reviewed by the Applicant.</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>The Environmental Statement was submitted in July 2023, with the updated PAS2080 published in March 2023. The modelling and assessment of impact was complete prior to March 2023, and whilst GAL is considering the update, it is not expected that the update will materially affect the assessment or the conclusions drawn from the assessment.</p>	n/a	Agreed
Assessment Methodology					
2.11.2.1	GHG emissions from airport buildings and ground operations in the ES does not appear to include maintenance, repair, replacement or refurbishment emissions.	<p>The scope of the GHG emissions from airport buildings and ground operations does not appear to cover maintenance, repair, replacement or refurbishment emissions. This would under account operational GHG emissions.</p> <p>Updated position (Deadline 1): Under the IEMA GHG Assessment methodology used in the ES, the Applicant must update the assessment to evidence that exclusions are <1% of total emissions and where all such exclusions total a maximum of 5%.</p> <p>Additionally, GAL should recognise the potential impact of emissions stemming from airport operations at least qualitatively for the sake of transparency. This acknowledgment aligns with one of the key principles of GHG accounting.</p> <p>Updated Position (Deadline 5): In Deadline 4, the Applicant has submitted updated calculations estimating emissions from maintenance, repair, replacement, and refurbishment activities. These emissions account for approximately 2.12% of the total emissions. The Applicant demonstrates that these emissions fall below the IEMA threshold, and therefore, they are not required to be included in the total whole-life carbon assessment</p>	<p>The methodology for the assessment was structured to follow the ANPS classification of emissions into four categories, and the assessment of Construction impacts was limited within the ES to those impacts prior to opening. The assessment was not seeking to provide a Whole Life Carbon assessment of the Project - a point explicitly noted within the ES.</p> <p>Maintenance and repair of the newly constructed elements within the Project will be required. A full life cycle carbon assessment would seek to quantify this over a defined study period, which would likely extend beyond the 2050 assessment period (which is used based on assessing risk to UK achieving carbon targets). Within the timescales between opening year (2029) and the end of the assessment year (2050) it is considered unlikely that maintenance, repair, replacement, and refurbishment GHG emissions would be so great as to materially change the assessment of operational emissions. The mitigation set out in the Carbon Action Plan, specifically regarding to employing PAS2080 as a Carbon Management System, would necessitate GAL adopting a whole life carbon approach in the management and mitigation of emissions from Modules B2-B5 as part of their wider carbon management approach.</p> <p>Updated position (April 2024) We intend to provide further analysis to inform the scale of emissions arising from maintenance, repair, replacement or</p>	ES Appendix 5.4.2 Carbon Action Plan [APP-091]	Agreed

			refurbishment within the study period as part of a submission at Deadline 4.		
2.11.2.2	It is not clear if carbon calculations were carried out during the construction lifecycle stage in the ES for well-to-tank (WTT) emissions.	<p>Not accounting for WTT is noncompliant with the GHG Protocol Corporate Accounting standard (referenced in the GHG ES Methodology).</p> <p>Updated position (Deadline 1): Additionally, GAL should recognise the potential impact of emissions stemming from airport operations at least qualitatively for the sake of transparency. This acknowledgment aligns with one of the key principles of GHG accounting.</p> <p>Updated Position (Deadline 5): In Deadline 4, the Applicant has provided WTT estimates for construction, ABAGO, surface access, and aviation. These updates increase the total emissions from the project between 2018 and 2050 by 3,978,000 tCO₂e, representing a 19.83% increase.</p> <p>To contextualise these emissions against the carbon budget, the Applicant references DUKES 2023 Chapter 3: Oil and Oil Products, estimating that around 36% of WTT aviation emissions occur within the UK boundary. Using this justification, the Applicant compares only this portion of aviation WTT emissions to the carbon budget, along with the WTT emissions from construction, ABAGO, and surface access.</p> <p>The Applicant then presents only the net impact, stating it accounts for 0.649% of the UK's 6th carbon budget, without displaying the total future impact of the airport as done in the ES.</p> <p>The Applicant should further forecast the percentage impact on future estimated carbon budgets using the CCC projections to estimate the project's impact on future carbon budgets to understand if it is decarbonising in line with the estimated net zero trajectory.</p> <p>Updated Position (12 August 2024): The CCC's balanced net zero pathway serves as a guide for governments and institutions aiming to assess and determine strategies for achieving net zero emissions. While these guidelines are not legally binding, they illustrate the necessary carbon reductions to meet the legally binding net zero mandate set by the amended Climate Change Act.</p> <p>Furthermore, the IEMA GHG Assessment guidance, which the Applicant uses for its evaluation, recommends contextualising a project's emissions by referencing the UK carbon budgets and net zero trajectory. This approach is considered good practice</p>	<p>The assessment does not seek either to develop a Corporate Reporting Account (which is informed by the GHG Corporate Protocol Standard) nor a Whole Life Carbon Appraisal for the Project - the methodology has been developed to allow for the assessment of impact, and doing this within the context of the contextualisation exercise that forms part of the assessment. It is not debated that Well-to-tank emissions arise in the supply chain for fuels and methodologies for estimating these (as an uplift to direct emissions) are well established.</p> <p>However, the approach adopted is based on the assessment process which is contextualising emissions against a) the UK carbon budget and b) the Jet Zero Strategy. The context for Jet Fuel usage is specifically challenging due to the proportion of this fuel that is imported from outside the UK (approximately 70% in recent years [Ref 1]) and as a result WTT emissions would predominantly fall outside the scope of the UK carbon budgets and the Net Zero commitment. Additionally the aviation strategy set out in Jet Zero does not include WTT within the main emissions calculation methodology. For these reasons WTT has been excluded from the aviation impact assessment. For consistency across the assessment methodology it has also been removed from other aspects of the GHG assessment.</p> <p>Ref 1: https://www.gov.uk/government/statistics/petroleum-chapter-3-digest-of-united-kingdom-energy-statistics-dukes</p> <p>Updated position (April 2024) It is acknowledged that the inclusion of WTT for Construction, ABAGO, and Surface Access would be useful for contextualisation against the UK Carbon Budgets. The WTT emissions for these will be calculated and provided at Deadline 4.</p> <p>Updated position (July 2024) The quantification for net impact of the Project, including WTT, at a level of 0.649% has been presented as this informs the assessment of significance. Including WTT within the evaluation of emissions across the whole airport would include the contribution to carbon budgets as follows:</p> <ul style="list-style-type: none"> • Fourth carbon budget: 0.171% (vs 0.144% presented in ES) • Fifth carbon budget: 0.161% (vs 0.139% presented in ES) 	n/a	Not Agreed

			<ul style="list-style-type: none"> Sixth carbon budget: 3.383% (vs 3.136% presented in ES) This incorporates the assumption relating to the proportion of aviation fuel imported to the UK. The CCC projections do not reflect the level that future budgets will actually be set at. On this basis there is no appropriate detail which would support an assessment against carbon budgets beyond 2038. <p>Updated position (Deadline 9): Please see the Applicant's final position with respect to this issue please within the greenhouse gases section of the Applicant's Closing Submission (Doc Ref. 10.73).</p>		
2.11.2.3	Royal Institute of Chartered Surveyors (RICS) transport distances have not been applied comprehensively	<p>Concern with under accounting the construction transport emissions.</p> <p>Updated Position (Deadline 3): The Applicant needs to update the transport assessment in compliance with the RICS methodology quoted in the ES to ensure shipping transport emissions are accounted for. This can then be used to inform appropriate transport efficiency mitigation measures as part of the CAP under Appendix 5.4.2 in the ES (APP091).</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>RICS Whole Life Carbon Assessment for the Built Environment Vol 1 was used to develop an estimated transport distance for bulk materials and used the parameters for locally manufactured materials (50km by road) and nationally manufactured materials (300km) in an estimated 80:20 ratio - resulting in an average value of 100km for each unit of material transported. At this stage the likely sourcing of materials is not known but the majority of materials (by weight) are likely to be sourced within the UK due to the large costs associated with transporting these large distances - particularly as this part of the assessment process relates to construction of airfield works where the majority of materials are imported fill, asphalt, concrete, and GSB. Assessment of the buildings emissions impact, and the Highways elements, are calculated using an alternative method that does not make use of this average 100km transport distance figure. On this basis the 100km is considered a reasonable assumption within the assessment methodology.</p> <p>Updated position (April 2024) The assumption for average material haulage distance set out in Table 4.1.1 of ES Appendix 16.9.1 Assessment of Construction Greenhouse Gas Emissions [APP-191] was developed using the parameters for locally manufactured materials (50km by road) and nationally manufactured materials (300km) in an estimated 80:20 ratio - resulting in an average value of 100km for each unit of material transported. This approach aligns with the RICS methodology. It is not considered necessary to revise these.</p>	ES Appendix 16.9.1 Assessment of Construction Greenhouse Gas Emissions [APP-191]	Agreed
2.11.3.4	Carbon calculations do not include well-to-tank (WTT) emissions, which is not aligned to the GHG Protocol	<p>Not accounting for WTT is noncompliant with the GHG Protocol Corporate Accounting standard (referenced in the GHG ES Methodology).</p> <p>Updated position (Deadline 1): Additionally, GAL should recognise the potential impact of emissions stemming from airport operations at least</p>	<p>The assessment does not seek either to develop a Corporate Reporting Account (which is informed by the GHG Corporate Protocol Standard) nor a Whole Life Carbon Appraisal for the Project - the methodology has been developed to allow for the assessment of impact, and doing this within the context of the</p>	n/a	Not Agreed

	<p>Standard mentioned in the GHG ES Methodology.</p>	<p>qualitatively for the sake of transparency. This acknowledgment aligns with one of the key principles of GHG accounting.</p> <p>Updated Position (Deadline 5): In Deadline 4, the Applicant has provided WTT estimates for construction, ABAGO, surface access, and aviation. These updates increase the total emissions from the project between 2018 and 2050 by 3,978,000 tCO₂e, representing a 19.83% increase.</p> <p>To contextualise these emissions against the carbon budget, the Applicant references DUKES 2023 Chapter 3: Oil and Oil Products, estimating that around 36% of WTT aviation emissions occur within the UK boundary. Using this justification, the Applicant compares only this portion of aviation WTT emissions to the carbon budget, along with the WTT emissions from construction, ABAGO, and surface access.</p> <p>The Applicant then presents only the net impact, stating it accounts for 0.649% of the UK's 6th carbon budget, without displaying the total future impact of the airport as done in the ES.</p> <p>Updated Position (12 August 2024): The CCC's balanced net zero pathway serves as a guide for governments and institutions aiming to assess and determine strategies for achieving net zero emissions. While these guidelines are not legally binding, they illustrate the necessary carbon reductions to meet the legally binding net zero mandate set by the amended Climate Change Act.</p> <p>Furthermore, the IEMA GHG Assessment guidance, which the Applicant uses for its evaluation, recommends contextualising a project's emissions by referencing the UK carbon budgets and net zero trajectory. This approach is considered good practice.</p> <p>In addition, for aviation emissions, the Applicant uses the entirety of the Jet Zero High Ambition Scenario budget to demonstrate alignment with the net zero trajectory. However, the Applicant does not allocate the budget proportionally based on GAL's size. Therefore, it would be more appropriate for the Applicant to estimate how much of the Jet Zero High Ambition Scenario budget should be allocated to GAL and then use this allocation as a benchmark to determine if future emissions are within the allocated budget.</p>	<p>contextualisation exercise that forms part of the assessment. It is not debated that Well-to-tank emissions arise in the supply chain for fuels and methodologies for estimating these (as an uplift to direct emissions) are well established.</p> <p>However, the approach adopted is based on the assessment process which is contextualising emissions against a) the UK carbon budget and b) the Jet Zero Strategy. The context for Jet Fuel usage is specifically challenging due to the proportion of this fuel that is imported from outside the UK (approximately 70% in recent years) and as a result WTT emissions would predominantly fall outside the scope of the UK carbon budgets and the Net Zero commitment. Additionally the aviation strategy set out in Jet Zero does not include WTT within the main emissions calculation methodology. For these reasons WTT has been excluded from the aviation impact assessment. For consistency across the assessment methodology it has also been removed from other aspects of the GHG assessment.</p> <p>Ref 1: https://www.gov.uk/government/statistics/petroleum-chapter-3-digest-of-united-kingdom-energy-statistics-dukes</p> <p>Updated position (April 2024) Please refer to the response at Row 2.11.2.2.</p> <p>Updated position (July 2024) Please refer to the response at Row 2.11.2.2.</p> <p>Updated position (Deadline 9): Please see the Applicant's final position with respect to this issue please within the greenhouse gases section of the Applicant's Closing Submission (Doc Ref. 10.73).</p>		
2.11.2.5	<p>It is not clear if carbon calculations are carried out for maintenance, repair, replacement or refurbishment emissions.</p>	<p>These emissions are not indicated to be scoped into the assessment. These emission sources could potentially account for a significant portion of the ABAGO emissions.</p>	<p>The methodology for the assessment was structured to follow the ANPS classification of emissions into four categories, and the assessment of Construction impacts was limited within the ES to those impacts prior to opening. The assessment was not seeking to</p>	<p>ES Appendix 5.4.2 Carbon Action Plan [APP-091]</p>	<p>Not Agreed</p>

		<p>Updated position (Deadline 1): Under the IEMA GHG Assessment methodology used in the ES, the Applicant must update the assessment to evidence that exclusions are <1% of total emissions and where all such exclusions total a maximum of 5%.</p> <p>Additionally, GAL should recognise the potential impact of emissions stemming from airport operations at least qualitatively for the sake of transparency. This acknowledgment aligns with one of the key principles of GHG accounting.</p> <p>Updated Position (Deadline 5): In Deadline 4, the Applicant has submitted updated calculations estimating emissions from maintenance, repair, replacement, and refurbishment activities. These emissions account for approximately 2.12% of the total emissions. The Applicant demonstrates that these emissions fall below the IEMA threshold, and therefore, they are not required to be included in the total whole-life carbon assessment.</p> <p>Updated Position (12 August 2024): Agreed</p>	<p>provide a Whole Life Carbon assessment of the Project - a point explicitly noted within the ES.</p> <p>Maintenance and repair of the newly constructed elements within the Project will be required. A full life cycle carbon assessment would seek to quantify this over a defined study period, which would likely extend beyond the 2050 assessment period (which is used based on assessing risk to UK achieving carbon targets). Within the timescales between opening year (2029) and the end of the assessment year (2050) it is considered unlikely that maintenance, repair, replacement, and refurbishment GHG emissions would be so great as to materially change the assessment of operational emissions. The mitigation set out in the Carbon Action Plan, specifically regarding to employing PAS2080 as a Carbon Management System, would necessitate GAL adopting a whole life carbon approach in the management and mitigation of emissions from Modules B2-B5 as part of their wider carbon management approach.</p> <p>Updated position (April 2024) Please refer to the response at Row 2.11.2.1.</p> <p>Updated position (July 2024) It is considered this matter can be marked as 'agreed'</p>		
2.11.2.6	It is not clear how or if Applicant converted CO2 emissions from aircraft to CO2e.	<p>It is not clear if the Applicant undertook a conversion from CO2 to CO2e as this would impact the aviation emissions by around a 0.91% increase BEIS (2023)¹. Therefore, if not accounted for, this would increase aviation GHG emissions by approximately 48,441 tCO2e in 2028 in the most carbon-intensive year where 5.327 MtCO2e was estimated to be released (Table 5.2.1).</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>It is acknowledged that Appendix 16.9.4 Para 1.2.3 [APP-194] may have led to some uncertainty relating to the modelling of aviation emissions. It can be clarified that the modelling process estimated fuel consumption from aviation, and that this was then converted to estimated tCO2e using the appropriate conversion factor. All aviation emissions within the ES are reported to reflect tonnes of carbon dioxide equivalent (tCO2e).</p>	Paragraph 1.2.3 of Appendix 16.9.4 [APP-194]	Agreed
2.11.2.7	WTT emission sources are not confirmed to be accounted for which is against the GHG Protocol Standard mentioned in the GHG ES Methodology.	<p>Not accounting for WTT is noncompliant with the GHG Protocol Corporate Accounting standard. Furthermore, this also contradicts the GHG ES Methodology referenced. This would result in an underestimation of the GHG emissions associated with aviation since a 20.77% (BEIS, 20232) uplift would be required on all aviation emissions. Therefore, this would result in 1,106,530tCO2e not being accounted for in 2028 (the most carbon-intensive year), where 5.327 MtCO2e was estimated to be released (Table 5.2.1).</p> <p>Updated position (Deadline 1): Under the IEMA GHG Assessment methodology used in the ES, the Applicant must update the assessment</p>	<p>The assessment does not seek either to develop a Corporate Reporting Account (which is informed by the GHG Corporate Protocol Standard) nor a Whole Life Carbon Appraisal for the Project - the methodology has been developed to allow for the assessment of impact, and doing this within the context of the contextualisation exercise that forms part of the assessment. It is not debated that Well-to-tank emissions arise in the supply chain for fuels and methodologies for estimating these (as an uplift to direct emissions) are well established.</p>	n/a	Not Agreed

		<p>to evidence that exclusions are <1% of total emissions and where all such exclusions total a maximum of 5%.</p> <p>Additionally, GAL should recognise the potential impact of emissions stemming from airport operations at least qualitatively for the sake of transparency. This acknowledgment aligns with one of the key principles of GHG accounting.</p> <p>Updated Position (Deadline 5): In Deadline 4, the Applicant has provided WTT estimates for construction, ABAGO, surface access, and aviation. These updates increase the total emissions from the project between 2018 and 2050 by 3,978,000 tCO₂e, representing a 19.83% increase.</p> <p>To contextualise these emissions against the carbon budget, the Applicant references DUKES 2023 Chapter 3: Oil and Oil Products, estimating that around 36% of WTT aviation emissions occur within the UK boundary. This approach is considered good practice.</p> <p>In addition, for aviation emissions, the Applicant uses the entirety of the Jet Zero High Ambition Scenario budget to demonstrate alignment with the net zero trajectory. However, the Applicant does not allocate the</p>	<p>However, the approach adopted is based on the assessment process which is contextualising emissions against a) the UK carbon budget and b) the Jet Zero Strategy. The context for Jet Fuel usage is specifically challenging due to the proportion of this fuel that is imported from outside the UK (approximately 70% in recent years [Ref 1]) and as a result WTT emissions would predominantly fall outside the scope of the UK carbon budgets and the Net Zero commitment. Additionally the aviation strategy set out in Jet Zero does not include WTT within the main emissions calculation methodology. For these reasons WTT has been excluded from the aviation impact assessment. For consistency across the assessment methodology it has also been removed from other aspects of the GHG assessment.</p> <p>Ref 1: https://www.gov.uk/government/statistics/petroleum-chapter-3-digest-of-united-kingdom-energy-statistics-dukes</p> <p>Updated position (April 2024) Please refer to the response at Row 2.11.2.2.</p> <p>Updated position (July 2024) Please refer to the response at Row 2.11.2.2.</p> <p>Updated position (Deadline 9): Please see the Applicant's final position with respect to this issue please within the greenhouse gases section of the Applicant's Closing Submission (Doc Ref. 10.73).</p>		
--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

		budget proportionally based on GAL's size. Therefore, it would be more appropriate for the Applicant to estimate how much of the Jet Zero High Ambition Scenario budget should be allocated to GAL and then use this allocation as a benchmark to determine if future emissions are within the allocated budget.			
Assessment					
2.11.3.1	Concerns regarding increase in greenhouse gas emissions	<p>Concerns over the significant increase in greenhouse gas emissions and impacts on climate change and understanding how airport expansion can be justified in the light of national and international carbon reduction targets (along with concerns over fundamental flaws in the assessment undertaken).</p> <p>Updated position (Deadline 1): WSCC acknowledges the Applicant's assessment has been undertaken with consideration to the Jet Zero high ambition trajectory and that this trajectory is representative of government's current 'budget' for aviation to contribute to net zero. On this basis it could be considered to align with the approach set out by IEMA.</p> <p>Updated Position (Deadline 5): Addressed</p>	The assessment sets out (in Paragraphs 16.9.2 to 16.9.4) how the approach follows guidance (from IEMA) on the assessment of impacts, and in line with this how GHG emissions are contextualised against the framework of UK carbon budgets, and sectoral decarbonisation trajectories.	Para 16.9.2 to 16.9.4 of ES Chapter 16 Greenhouse Gases [APP-041]	Agreed
2.11.3.2	Assessment of Significant Effects	<p>The GHG Assessment does not assess the cumulative impact of the Project in the context of the eight of the biggest UK airports planning to increase to approximately 150 million more passengers a year by 2050 relative to 2019 levels. Hence, this will greatly increase the UK's cumulative aviation emissions, which may have significant consequences on the UK's net zero trajectory.</p> <p>Updated position (Deadline 1): WSCC acknowledge the Applicant's assessment has been undertaken with consideration to the Jet Zero high ambition trajectory and that this trajectory is representative of government's current 'budget' for aviation to contribute to net zero. On this basis it could be considered to align with the approach set out by IEMA.</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>It is not for the applicant or for the examination to assess risks on the basis that government policy will fail.</p> <p>It is apparent that government is committed to its net zero target and to closely monitoring aviation and other trajectories to ensure compliance.</p>	n/a	Agreed
Mitigation and Compensation					
2.11.4.1	REGO	Purchasing Renewable Energy Guarantee of Origin (REGO) certificates does not mean that GAL will receive 100% renewable electricity. In reality, on low wind and solar energy generation days, much of the electricity supplied on green energy tariffs still comes from fossil fuel production.	The Carbon Action Plan commits Gatwick to a transition through carbon neutrality and towards Net Zero, and Absolute Zero, over time. It is entirely appropriate within this framework to consider the use of a range of market mechanisms at such stages as appropriate - and this includes the use of REGOs as part of this.	ES Appendix 5.4.2 Carbon Action Plan [APP-091]	Agreed

		<p>Consequently, GAL cannot rely upon REGO certificates to justify its zero carbon commitment.</p> <p>Updated position (Deadline 1): Aligned with SECR, GAL's reporting should clearly delineate the distinction between market-based emission factor reporting and localised values for REGOs. This clarity is essential to identify the extent of potential residual emissions stemming from electrical energy use.</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>The Carbon Action Plan notes GAL's commitments to use internationally recognised offsetting schemes (CAP Para 1.1.4). Within the CAP GAL also commits to investment in carbon removal mechanisms in preference to commonly used offsetting mechanisms.</p> <p>Updated position (April 2024) The assessment incorporates a range of different emissions sources, some of which are not addressed within SECR, which is intended for use as a corporate reporting methodology. GAL already provides reporting in line with its SECR requirements within its corporate Annual Report.</p>		
2.11.4.2	Science Based Targets	<p>The Applicant has not confirmed if it is committed to best practice, e.g. by committing to the Science Based Targets initiative to achieve a net zero trajectory aligned with the 1.5°C Paris Agreement across all emission scopes.</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>The assessment considers GHG impacts beyond just the corporate reporting scope of Gatwick Airport Ltd. The assessment does not require all parties responsible for the generation of GHG emissions to adopt a specific standard for reducing GHG emissions, instead it uses those commitments by GAL as one element within the broader assessment of GHG emissions. As such the adoption of SBTi is not, in and of itself, a requirement of the assessment process.</p>	n/a	Agreed
Other					
2.11.5.1	UK Climate Change Committee (CCC) Progress in reducing emissions report, published in June 2023.	<p>The latest CCC Progress Report (2023) identified their main concerns and criticisms of the current UK Aviation climate change policy and risks to achieving net zero.</p> <p>Updated Position (Deadline 5): Addressed</p>	<p>It is for government to respond, annually, to the reports of the CCC. In its most recent report (2023), the Government Response included the following:</p> <p><i>“We will monitor progress against our emissions reduction trajectory on an annual basis from 2025, with a major review of the Strategy and delivery plan every five years. The first major review will be in 2027, five years after publication of the Strategy in 2022.</i></p> <p><i>The Jet Zero Strategy sets out details on how the aviation sector can achieve net zero without government intervening directly to limit aviation growth. DfT analysis shows that in all modelled scenarios we can achieve our net zero targets by focusing on new fuels and technology, rather than capping demand, with knock-on economic and social benefits.</i></p> <p><i>If we find that the sector is not meeting the emissions reductions trajectory, we will consider what further measures may be needed to ensure that the sector maximises in-sector reductions to meet the UK’s overall 2050 net zero target.”</i></p> <p>The NRP application accords with government policy. As set out in the Government’s Response, aviation expansion (explicitly including the NRP) will not compromise the Government’s commitment to the UK’s net zero trajectory.</p>	n/a	Agreed

2.11.5.2	The impact of EU's Emissions Trading System (ETS) / international Civil Aviation Organization's Carbon Offsetting and Reduction Scheme for International Aviation (CORISA).	<p>It is not clear if the aviation forecasts used to develop the 'need case' has considered the impact of ETS/CORISA. Evidence is required that this has been taken into account in the forecasts.</p> <p>Updated Position (Deadline 5): Addressed</p>	Both the ETS and CORSIA have been included in the modelling of future aviation forecasts as set out in the Needs Case [APP-250].	Needs Case [APP-250]	Agreed
2.11.5.3	The unsustainable growth of airport operations may result in significant adverse impacts to the climate	<p>To monitor and control GHG emissions during the project construction and operation it is suggested a control mechanism to similar to the Green Controlled Growth Framework submitted as part of the London Luton Airport Expansion Application, is provided. Implementing such a framework would make sure that the Applicant demonstrates sustainable growth while effectively managing its environmental impact. Within this document, the Applicant should define monitoring and reporting requirements for GHG emissions for the Applicant's construction activities, airport operations and surface access transportation. Similar to the London Luton Airport Green Controlled Growth Framework, emission limits and thresholds for pertinent project stages should be established. Should any exceedances of these defined limits occur, the Applicant must cease project activities.</p> <p>Where appropriate the Applicant should undertake emission offsetting in accordance with the Airport Carbon Accreditation Offset Guidance Document to comply with this mechanism. In addition, and where reasonably practical, the airport will seek to utilise local offsetting schemes that can deliver environmental benefits to the area and local community around the airport. Offsets should align with the following key offsetting principles i.e. that they should be: o additional in that would not have occurred in the absence of the project o monitored, reported and verified o permanent and irreversible o without leakage in that they don't increase emissions outside of the proposed development o Have a robust accounting system to avoid double counting and o Be without negative environmental or social externalities.</p> <p>Updated Position (Deadline 5): The Applicant should consider how it can foster sustainability into the projects governance processes to demonstrate that it will monitor and control GHG emissions during operation using a control mechanism to similar to the Luton DCO Green Controlled Growth Framework.</p> <p>The position from the JLA's on an Environmentally Managed Growth Framework is set out as an introduction within document REP4-050. The JLAs are submitting further documentation at Deadline 5.</p> <p>Updated Position (12 August 2024):</p>	<p>The Climate Change Act places a duty on the Secretary of State to prepare "such proposals and policies as the Secretary of State considers will enable the carbon budgets that have been set under this Act to be met." (Section 13).</p> <p>That duty lies with the Secretary of State and it is apparent that the Government has put in place a clear framework of policy to ensure that the Government's duty and commitment is met. The Jet Zero Strategy forms part of that policy framework and, within it, the Government makes clear that its modelling demonstrates that the commitment can be met without demand management – i.e. without constraining the growth of airports. That conclusion is reached in the light of the acknowledged importance of aviation to the UK and the critical importance of the Government supporting growth in the aviation sector, whilst meeting its binding carbon reduction targets. The JZS is also clear that the Government is monitoring the position closely and will take further measures if necessary, if it becomes apparent that the trajectory of aviation emissions is not being achieved. In these circumstances, a control of the type proposed by the local authority in this case would cut across the balance being struck by government and would not meet the relevant tests of necessity or appropriateness.</p> <p>Updated position (Deadline 5): The Applicant has responded to the JLAs' Introduction for a proposal for Environmentally Managed Growth at Appendix B of The Applicant's Response to Deadline 4 Submissions (Doc Ref 10.38) submitted at Deadline 5 <u>and The Applicant's Response to Deadline 5 Submissions - Response to JLA's EMG Framework Paper [REP6-093] submitted at Deadline 6. Together, these submissions detail why the Applicant considers an EMG framework is neither necessary nor appropriate for the Project.</u></p> <p>Updated position (Deadline 9): Please see <u>the Applicant's final position with respect to this issue please within the greenhouse gases section of the Applicant's Closing Submission</u> (Doc Ref. 10.73).</p>	<p>Appendix B – The Applicant's Response to Deadline 4 Submissions (Doc Ref 10.38)</p> <p><u>The Applicant's Response to Deadline 5 Submissions - Response to JLA's EMG Framework Paper [REP6-093]</u></p>	<p>Under discussion <u>Not Agreed</u></p>

		<p><u>The unsustainable growth of airport</u> The JLAs have detailed their full position in the D7 EMG Framework response concerning the control of greenhouse gases from surface access and ABAGO to support sustainable growth.</p> <p><u>In summary the JLAs are concerned, on the level of ongoing enforcement on greenhouse emissions, including consequences if targets are not being met, and considers an Environmentally Managed Growth (EMG) framework would act as a safety net and provide this reassurance.</u></p> <p><u>The Applicant appears to be taking a reactive approach to managing greenhouse gas emissions, failing to set thresholds or limits to support sustainable growth. This contrasts with best practices, such as the Luton Airport Green Controlled Growth Framework which supports a similar framework.</u></p> <p><u>Alternative Changes if EMGF is Not Accepted</u> <u>ABAGO</u> <u>Unlike Surface Access Journeys, there is no dedicated group to hold the Applicant accountable for ABAGO commitments. It is recommended to establish a similar group with relevant local authorities and stakeholders for regular reviews.</u></p> <p><u>If the EMGF is not accepted, the ABAGO Annual Monitoring Report should outline the carbon reduction trajectory and thresholds towards the 2030 and 2040 targets, providing early warnings if commitments are not met.</u></p> <p><u>This will enable the Applicant to take corrective action if targets are missed, reporting to the forum on measures to limit growth until targets are achieved.</u></p> <p><u>This approach ensures proactive rather than reactive measures, keeping the Applicant on track with ABAGO commitments in the CAP [APP-091].</u></p> <p><u>The Applicant should extend its emission scope to include Scope 3 emissions within its targets. The CAP [APP-091] strategy balances remaining emissions from sources under GAL's jurisdiction with removals, aiming for zero emissions for Scope 1 and 2 by 2040, but currently does not offset Scope 3 emissions.</u></p> <p><u>Scope 3 emissions should be included in the CAP [APP-091] as a net limit, including any offsetting measures, ensuring emissions stay within the CAP limit.</u></p>			
--	--	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--	--

		<p>The Applicant has committed to net zero Scope 1 and 2 emissions by 2030 and zero emissions by 2040, aligning with Jet Zero. A reduction trajectory should be presented to minimise reliance on removals by 2040, with a suggested linear reduction for net zero by 2030 and zero emissions by 2040.</p> <p>Surface Access Journeys If EMG is not accepted, the Transport Annual Monitoring Report should include GHG emissions against reduction targets. If targets are not met, the Applicant should report actions to limit growth until targets are achieved.</p> <p>Similar to the Luton Airport Green Controlled Growth Framework, JLAs suggest GAL should offset net surface access journey emissions when thresholds are exceeded.</p>			
<p>2.11.5.4</p>	<p>If the Applicant does not provide infrastructure or services to help decarbonise surface transport emissions it may have the potential to result in the underreporting of the Proposed Development's impact on the climate. The full impact of the Proposed Development on the government meeting its net zero targets cannot be identified.</p>	<p>The Applicant should provide infrastructure within the Airport to support the anticipated uptake of electric vehicles and provide electric vehicle charging infrastructure.</p> <p>The Applicant should support a Green Bus Programme such as the expansion of the network of hydrogen buses used in the Gatwick/Crawley area into Mid Sussex with accompanying infrastructure.</p> <p>Updated Position (Deadline 5): The Applicant has demonstrated in Deadline 3 that it is committed to providing charging infrastructure for electric vehicles used to access the Airport (both passenger and staff) to facilitate the use of ultra-low and zero emission vehicles for those journeys that are made by car. The Applicant is also committed to investing £1m to Metrobus in hydrogen buses for the local network.</p>	<p>The Transport Assessment [AS-079] and the Surface Access Commitments (SAC) [APP-090] set out how the Applicant's commitments to sustainable travel are binding under the DCO.</p> <p>An updated version of ES Appendix 5.4.1: Surface Access Commitments [REP3-028] has been submitted at Deadline 3 which adds further detail to Commitment 12. Under Commitment 12A GAL shall produce a strategy for providing charging infrastructure for electric vehicles used to access the Airport (both passenger and staff) to facilitate the use of ultra-low and zero emission vehicles for those journeys that are made by car.</p> <p>Achieving the modes shares set out will significantly reduce surface transport emissions. We are continuing to invest in charging infrastructure for passengers and staff within a wider strategy for Evs on the campus as part of our Decade of Change programme independent of the DCO. This includes a partnership with Gridserve to provide an electric vehicle charging forecourt on airport, completed in early 2024. Our passenger valet parking service also offers an EV charging service. For operational vehicles there is a programme underway to deliver the Applicant's and third party airfield EV charging requirements.</p> <p>The Applicant has invested or pledged over £1m to Metrobus in hydrogen buses for the local network serving the airport and continues to support the transition to ultra low or zero emission vehicles in local bus services and in the Applicant's own surface transport fleet.</p>	<p>Transport Assessment [AS-079]</p> <p>Surface Access Commitments [APP-090]</p> <p>Surface Access Commitments – Version 2 [REP3-029]</p>	<p>Agreed</p>

			Decarbonisation of all surface transport is a matter for Government policy and the Applicant cannot mandate that all surface access journeys are by zero emission vehicles ahead of meeting those policy targets		
2.11.5.5	GAL does not identify the risks associated with using carbon offset schemes.	<p>GAL should state if they comply with the Airport Carbon Accreditation Offset Guidance Document which specifies the type of offsetting Schemes that need to be used. In addition, and where reasonably practical, GAL should seek to utilise local offsetting schemes that can deliver environmental benefits to the area and local community around the airport. Offsets should align with the following key offsetting principles i.e. that they should be:</p> <ul style="list-style-type: none"> o additional in that would not have occurred in the absence of the project o monitored, reported and verified o permanent and irreversible o without leakage in that they don't increase emissions outside of the proposed development o Have a robust accounting system to avoid double counting and o Be without negative environmental or social externalities. <p>Updated position (Deadline 5): Addressed</p>	<p>At Gatwick today, through its Airport Carbon Accreditation Level 4+, the Applicant buys offsets covering residual Scope 1 and 2 GHG emissions (as well as business travel).</p> <p>In order for the Applicant to maintain its ACA certification, any offsets – removal and/or reduction – must be bought from schemes accredited by the ACA.</p> <p>ACA is the only global, airport-specific carbon standard which relies on internationally recognised methodologies. It provides airports with a common framework for active carbon management with measurable goalposts. The programme is site-specific allowing flexibility to take account of national or local legal requirements, whilst ensuring that the methodology used is always robust Details of Level 4+ available on the ACA website: https://www.airportcarbonaccreditation.org/about/7-levels-of-accreditation/</p> <p>With a view to achieving Net Zero for Scope 1 and 2 GHG emissions by 2030 (under both its existing Decade of Change commitments, and the equivalent under the Carbon Action Plan as part of the Project), the Applicant is in the process of transitioning from use of carbon reduction offsets to carbon removal offsets instead (as the use of carbon removal offsets would not meet the definition of Net Zero). For 2023, GAL purchased 25% removal offsets and 75% reduction offsets.</p> <p>Furthermore, the Applicant is investigating the development of a local removal project, independent of the Project. Any such project will need to be accredited by the ACA.</p>		Agreed

2.12. Health and Wellbeing

2.12.1 Table 2.12 sets out the position of both parties in relation to health and wellbeing matters.

Table 2.12 Statement of Common Ground – Health and Wellbeing Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
There are no issues relating to the baseline for this topic within this Statement of Common Ground.					
Assessment Methodology					
2.12.2.1	Lack of evidence of engagement and results from that engagement with the communities/ receptors.	<p>Results should be presented with a detailed description of the statistical methods used, including all variables accounted for and those not included in the analysis models. This would enable a better interpretation of the results, which seem not to be in line with what should be expected. A detailed definition of the populations in the study area and a clear description of evidence supporting each assumption made have not been demonstrated.</p> <p>Updated position (Deadline 1): The Applicant has demonstrated in the documentation that they have reached out to a range of community groups and organisations. Though no mention of vulnerable groups in the context of those with physical or psychological vulnerabilities. Documentation was offered in alternative formats and languages but only if requested no evidence of proactive engagement with non-English speaking audience in their language.</p> <p>Relevant documents searched for words, Vulnerable, Hard to reach, disabilities, disabled, hearing, ethnic, nationalities with no result.</p> <p>Updated position (Deadline 5): No Update Required</p> <p><u>Update Position (12 August 2024):</u> <u>As the applicant will not be providing a separate detailed Health impact Assessment separate to the Environmental Impact Assessment . The applicant is requested to consider how they will monitor the impacts on communities’ health through the project, ideally at a SLOA level as impacts can be diluted when looking at a Local Authority District and Borough level. As well as the operational period moving forward, to include vulnerable groups, including physical, psychological and mental health impacts within those communities, and review any mitigation with a view to altering / increasing mitigation to safeguard the public’s health.</u> <u>Include within the Communications plan for the project and for ongoing operations a clear pathway for the public to raise concerns and impacts effecting the public as individuals and</u></p>	<p>ES Chapter 18: Health and Wellbeing has taken into account the consultation responses of health stakeholders and the public. The health stakeholder engagement is discussed in ES Appendix 18.3.1 and the consultation responses from the public taken into account are provided in the separate Consultation Report.</p> <p>There have been a comprehensive series of consultation events, including with hard-to-reach groups. Consultation through the DCO process is conducted through a series of statutory defined processes. This includes Section 42 consultation with stakeholders and Section 47 consultation with the public. The Consultation Report discusses the Section 47 engagement with the community for the Autumn 2021 consultation in section 5.6 and for the Summer 2022 consultation in section 6.6. Consultation Report Annex A-D set out the issues raised and the response for each consultation. The responses from these consultations were taken into account the by Chapter 18: Health and Wellbeing.</p> <ul style="list-style-type: none"> Autumn 2021 consultation Section 47 themes and responses from the public are set out in Consultation Report - Annex A, Table A.2 section 'I. Health and well-being'. Summer 2022 consultation Section 47 themes and responses from the public are set out in Consultation Report - Annex A, Table C.2 section 'I. Health and well-being'. <p>Updated Position (April 2024): Community engagement has informed the assessment and mitigation, including that vulnerable group responses are inherently part of the consultation undertaken. This position is set out in the Deadline 2 Submission 10.9.7 The Applicant's Response to Actions - ISH2-5 [REP2-005], Section 3.5 ISH3: Action Point 7.</p>	<p>ES Chapter 18: Health and Wellbeing [APP-043] Consultation Report [APP-218]</p> <p>Consultation Report Annex B Autumn 2021 Consultation</p> <p>Consultation Report Annex A Autumn 2021 Consultation Issues Tables [APP-219]</p> <p>Consultee Response Summaries [APP-220]</p> <p>Consultation Report Annex C Summer 2022 Consultation Issues Tables [APP-221]</p> <p>Consultation Report Annex D Summer 2022 Consultation Consultee Response Summaries [APP-222]</p>	<p>Under discussion Agreed Not Agreed</p>

		<p>communities to the applicant and a robust policy or responding to issues raised. This communications plan to consider a range of publication routes that accommodate individuals with disabilities and non-English speakers and ethnic groups.</p>	<p>Updated position (July 2024): Unless there are specific residual comments, we suggest that this is marked as agreed.</p> <p>Updated position (Deadline 9): The Applicant's position on monitoring is set out in Deadline 8 Submission - 10.62.4 The Applicant's Written Summary of Oral Submissions ISH9 - Socio-Economics section 2.8, which confirmed it is not proposed that the population's health outcomes be monitored. It would not be appropriate or proportionate to monitor individual clinical health outcomes. Population level monitoring in general is already undertaken and published by the Office for Health Improvement and Disparities, relevant links to which appear in ES Chapter 18: Health and Wellbeing [APP-043]. Project specific monitoring would not be feasible in terms of attributing causation at a population level. Large epidemiological studies would be required to achieve the outcome proposed, which would not be proportionate. This is the case particularly as no significant adverse effects on population health area anticipated, a conclusion with which the national public health statutory health stakeholders agree [RR-4687].</p> <p>Gatwick Airport Limited Deadline 8 Submission - 5.3 Environmental Statement Appendix 5.3.2 Code of Construction Practice - Version 5 (Clean) [REP8-024] section 4.12 sets out community engagement commitments include around raising complaints. With regard to communications, we would signpost to the additions Deadline 8 Submission - 5.3 Environmental Statement Appendix 5.3.2 Code of Construction Practice - Annex 7 - Construction Communications and Engagement Plan - Version 2 (Tracked) paragraphs 6.1.2 and 7.1.1.</p>		
<p>2.12.2.2</p>	<p>Assessment of Significant Effects</p>	<p>WSSC expects to see data relating to the study area, specifically the feedback from the individual vulnerable groups. This would ensure that their feedback had been included in the assumptions made in relation to changes in green space locations, active travel and access, to support the wellbeing of the communities affected.</p> <p>The DCO application does not evidence engagement with the affected communities and how the outcome of those engagements have influenced the Applicant's assumptions used as a basis for the assessment findings and decisions on mitigation measures to reduce these impacts.</p>	<p>Consultation Report, Table 4.4 explains the steps taken to identify and engage with hard-to-reach-groups.</p> <p>A list of 110 hard to reach groups were identified from across the region and all were contacted to offer briefings. In addition, a consultation pack was sent out to all such groups. Five briefings were held with hard-to-reach organisations during the Autumn 2021 Consultation.</p> <p>For the Summer 2022 Consultation, seven hard-to-reach organisations were identified within the targeted consultation zone. Each group was emailed to advise them of the consultation, and subsequently sent a poster providing details of</p>	<p>Consultation Report [APP-218]</p> <p>Consultation Report Annex B Autumn 2021 Consultation</p> <p>Consultation Report Annex A Autumn 2021 Consultation Issues Tables [APP-219]</p>	<p>Under discussion</p> <p>Applicant suggests (July 2024) that it can be agreed that this issue can be marked as resolved. Agreed</p> <p>Agreed</p>

		<p>Updated position (Deadline 1): The Applicant in their documentation demonstrated a wide range of organisations contacted. It was unclear from the Consultation Report Annex D Ref Doc 6.1 if any of the response was from these vulnerable groups.</p> <p>The Applicant has shared in the Consultation Report the in Fig 6.1 the targeted consultation zone where vulnerable receptors likely to be using the Riverside Garden Park currently and the new green space to the East.</p> <p>WSCC would like to know more detail in regard to any plans for the new green spaces to encourage activities such as nature trails, exercise apparatus, child activities train, and the use of sustainable, natural and recycled materials, that will enhance the experience of using the space and encourage wellbeing.</p> <p>Updated position (Deadline 5): No update to position</p> <p>Updated position (12 August 2024): No update to position</p>	<p>the consultation. No requests for additional information or briefings were received. These groups were: Surrey Gypsy Traveller Communities Forum; Age UK Horley; Horley Youth Club; 1st & 2nd Horley Scout Group; SeeAbility, Horley Support Service; Gatwick Islamic Centre; and Oakwood School.</p> <p>Consultation Report Figure 6.1 provides a map of the targeted consultation zone.</p> <p>Consultation Report Appendix B.23 provides the list of hard-to-reach organisations; Appendix B.24 is the Hard-to-reach consultation pack; and Appendix C.7 sets out the hard-to-reach poster.</p> <p>ES Chapter 18: Health and Wellbeing has taken into account the consultation responses of health stakeholder and the public. The health stakeholder engagement is discussed in ES Appendix 18.3.1 and the consultation responses from the public taken into account are provided in the separate Consultation Report.</p> <p>There have been a comprehensive series of consultation events, including with hard-to-reach groups. [detailed design.](#) Unless there are specific residual comments, we suggest that this is marked as agreed.

Assessment

<p>2.12.3.1</p>	<p>Lack of an Equality Impact Assessment.</p>	<p>Though Equality is stated as a baseline there is no Equality Impact Assessment of the effects of the Project. This would aid in the understanding of how the project may impact on different groups and ensure that certain individuals are not put at a disadvantage or discriminated against as a result of the project activities. This would also ensure that mitigation measures can be tailored to avoid harm to equality.</p> <p>Updated position (Deadline 1): Under the Equality Act 2010, public bodies have a statutory duty to ensure race, disability and equality are considered in the exercise of their functions, to ensure that this has been considered by the Applicant in this programme of work. WSCC would request that the Applicant provides a Equality Impact Assessment EqIA for the implications on West Sussex residents to cover the protected characteristics, age, disability, gender reassignment, marriage and civil partnership, pregnancy and maternity, race and ethnicity, religion and belief, sex; and, sexual orientation.</p> <p>Acknowledging there is not a statutory duty on the applicant to undertake a specific HIA, in the case if this project, size, length of construction, proximity to communities and for reaching disruption as well as ongoing operational increase in activity on completion we would recommend a HIA be carried out for each affected LA area.</p> <p>Updated position (Deadline 5): The Environmental Statement Chapter 1: Introduction (planninginspectorate.gov.uk) provided by the Applicant refers to existing documents with the addition of table 6.1 setting out the potential for disproportionate or differential equality impacts and affected Characteristics but not the effects on health. WSCC recommend that local evidence of the impacts on the local communities of West Sussex is used as opposed to wider health data and robust engagement with the local communities and stakeholders, to include space specific demographics and population specifics in assessments of equalities and health impacts.</p> <p>Updated position (12 August 2024): No update to position</p>	<p>ES Chapter 18: Health and Wellbeing, Table 18.3.2 notes that “The ES health assessment considers inequalities. An equality impact assessment relates to the public sector equality duty under the Equality Act 2010. This is not a duty of the applicant.”</p> <p>ES Chapter 18: Health and Wellbeing includes specific mitigation targeted to relevant vulnerable population groups to reduce health inequalities and avoid inequitable health outcomes. See Table 18.7.1 and paragraph 18.11.22.</p> <p>Updated Position (April 2024): The Applicant’s position with regards to Equality Impact Assessment and Health Impact Assessment is set out in the Deadline 1 Submission - 10.9.4 The Applicant’s Response to Actions from Issue Specific Hearing 3: Socio-economics [REP1-064] Section 3 (Action Point 6). An Equality Statement was submitted at Deadline 3 [REP3-109] to assist the determining authority in discharging the Public Sector Equality Duty. The document signposts to relevant information within the Gatwick Northern Runway Project application.</p> <p>Updated position (July 2024): ES Chapter 1 Introduction [APP-026] references ES Chapter 18 Health and Wellbeing [APP-043]. The GAL Deadline 3 Submission - 10.20 Equality Statement [REP3-109] Table 6.1 sets out a summary of potential equality impacts, which also references ES Chapter 18 Health and Wellbeing [APP-043].</p> <p>The Applicant’s position on the use of local evidence and assessment of local communities in West Sussex is set out in the Deadline 5 Submission - 10.38 The Applicant’s Response to Deadline 4 Submissions [REP5-072] paragraph 3.17.4 (pdf page 405/464).</p> <p>The HIA [APP-043] has specifically used local evidence to assesses the impacts on the population close to the airport, including residents and vulnerable groups in West Sussex. This is set out in ES Chapter 18 Health and Wellbeing [APP-043], for example on Study Area (pdf pages 25 to 27) and throughout section 18.8 in relation to site-specific and local effects; ES Appendix 18.2.1 Summary of Planning Policy - Health and</p>	<p>ES Chapter 18: Health and Wellbeing [APP-043]</p> <p>Equality Statement [REP3-109]</p>	<p>Under discussion</p> <p>Applicant suggests (July 2024) that it can be agreed that this issue can be marked as resolved. Agreed Not Agreed</p>
-----------------	-----------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

			<p>Wellbeing [APP-202], for example in relation to the adopted and emerging local plan policies on health; ES Appendix 18.5.1 Health Baseline Trends, Priorities and Vulnerable Groups [APP-206], for example discussion of summary public health indicators and relevant points in relation to the West Sussex Joint Health and Wellbeing Strategy and Joint Strategic Needs Assessment; and ES Appendix 18.5.2 Health and Wellbeing Baseline Data Tables [APP-207], for example the detailed data tables of demographics and public health indicators for West Sussex and for the districts and the 9 wards close to the airport. This detailed local evidence is considered appropriate and proportionate to assessing the sensitivity of the relevant West Sussex populations and the potential for likely significant effects due to the Project.</p> <p>The consultation with communities and stakeholders is set out in the Consultation Report and its Annexes as discussed in row 2.12.2.2. Engagement with local health stakeholders is discussed in ES Chapter 18 Health and Wellbeing [APP-043] Section 18.3 and ES Appendix 18.3.2 Summary of Other Consultation Responses - Health and Wellbeing [APP-204]. These include the health topic working group meetings, which included representation from the UK Health Security Agency (UKHSA), the Department of Health and Social Care Office of Health Improvement and Disparities (OHID), West Sussex County Council, East Sussex County Council, Mid Sussex District Council, Surrey County Council, Kent County Council, Crawley Borough Council, Reigate and Banstead Borough Council, Horsham District Council, Mid Sussex District Council, Mole Valley District Council, Tandridge District Council, NHS Sussex, NHS Sussex ICB, Surrey Heartlands ICB and Applied Resilience (in the capacity of emergency management on behalf of Reigate and Banstead Borough Council).</p>		
2.12.3.2	Lack of evidence of how local services will be affected.	<p>WSSCC is concerned that the impact of the Project on local health services is currently not considered. This is particularly important, as from practical experience in West Sussex, a higher throughput at Gatwick Airport has often led to an increased demand for health services.</p> <p>Updated position (Deadline 1): The Applicant has consulted with the Sussex ICB.</p> <p>The Applicant has suggested quantifiable data of increased footfall affecting the increase in A&E attendances, but this does not take into</p>	<p>ES Chapter 18: Health and Wellbeing sets out the effects on local healthcare capacity in Section 18.8, paragraphs 18.8.512 to paragraph 18.8.618. The effects relating to construction and operational workers, as well as passengers are covered. For example, see the analysis of 'Medical Calls and Ambulance Attendances at the Airport' from paragraphs 18.8.530 to 18.8.538. This includes predictions of number of ambulance transfers from the Airport to hospitals in each assessment year. The analysis is considered robust and indicates the likely demand</p>	ES Chapter 18: Health and Wellbeing [APP-043]	Agreed

		account the effects of that increase A&E attendance on subsequent treatment and bed days in the NHS Secondary Care System.	<p>levels for A&E and secondary care from increased passenger footfall, see Chapter 18, Table 18.8.40.</p> <p>Chapter 18 Table 18.7.1 sets out mitigation measures to avoid significant adverse effects on local healthcare services, including 'healthcare for construction workers' and 'healthcare for airport passengers and visitors'.</p> <p>ES Chapter 18 assessment has been informed by a review of medical events and ambulance callout data, as well as discussion with the West Sussex Integrated Care Board on improving access to healthcare for Airport workers.</p>		
2.12.3.3	Lack of evidence of improvements to social mobility.	There is no indication that consideration has been given to the impact on small and medium sized businesses, or where this is cross referenced from other chapters. It is advised that this is included, considering the influence it could have on health and well-being. It is vital to consider the nature and quality of work and how this benefits residents and future generations when discussing the economic benefits of the Project.	<p>ES Chapter 17: Socio-Economic sets out the analysis of effects to local businesses and discusses Enterprises of different sizes (see paragraph 17.6.57). ES Appendix 17.8.1: Employment, Skills and Business Strategy (ESBS) notes that an overarching objective is to drive up growth and productivity across the business base through the expansion of capacity and enterprise acumen of Small to Medium Sized and Micro businesses. There are a range of proposals to support Small and Medium-Sized Enterprises (SMEs).</p> <p>Environmental Statement Chapter 18: Health and Wellbeing (Doc Ref. 5.1) sets out the population health implications of employment and economic impacts in Section 18.8, paragraphs 18.8.361 to paragraph 18.8.411. This assessment is based on the findings of ES Chapter 17: Socio-Economic and takes into account measures set out in the ESBS.</p>	<p>ES Chapter 17: Socio-Economic [APP-042]</p> <p>ES Chapter 18: Health and Wellbeing [APP-043]</p> <p>ES Appendix 17.8.1: Employment, Skills and Business Strategy [APP-198]</p>	Agreed
2.12.3.4	Lack of evidence to support professional views and assumptions made in the documentation.	<p>Evidence used to substantiate assumptions should incorporate feedback from communities likely to be impacted by the Project. For example, it is claimed that expected increases in walking journey times are not considered to be 'onerous' and would contribute to physical activity levels, it is also possible for longer journey times to discourage people from active travel - having a negative and perhaps rebound impact on active travel. There is insufficient information to allow an understanding of the conclusions made around this or if the diversions have disproportionate impacts on certain groups.</p> <p>Updated position (Deadline 1): Noted wrong page numbers, 18.8, paragraphs 18.8.310 (pdf page 1083/214)</p>	<p>ES Chapter 18: Health and Wellbeing sets out the effects of changes in active travel walking and cycling routes in Section 18.8, paragraphs 18.8.310 to paragraph 18.8.360. The issues of potential for disproportioned effects to vulnerable groups and of the potential to discourage people from active travel are specifically considered. For example, see Chapter 18 paragraphs 18.8.337-338 which explains the context of the assessment is of additional journey times of around 10-20 minutes on long-distance routes with constrained alternatives. That these are long-distance routes is important to the population health effect. These are not short-distance routes connecting say residential areas to a school or shops, where lengthy diversions would have the potential for adverse behavioural change in active travel. The acceptability of the routes was reviewed with a site visit and consideration has been given to community engagement</p>	<p>ES Chapter 18: Health and Wellbeing [APP-043]</p> <p>ES Chapter 19: Agricultural Land Use and Recreation [APP-044]</p> <p>Consultation Report [APP-218]</p> <p>Consultation Report Annex B Autumn 2021 Consultation</p>	Agreed

			<p>responses on this issue and the mitigations proposed through the Outline Public Rights of Way Management Strategy at ES Appendix 19.8.1.</p> <p>There have been a comprehensive series of consultation events, including with hard-to-reach groups. Consultation through the DCO process is conducted through a series of statutory defined processes. This includes Section 42 consultation with stakeholders and Section 47 consultation with the public. The Consultation Report discusses the Section 47 engagement with the community for the Autumn 2021 consultation in section 5.6 and for the Summer 2022 consultation in section 6.6. Consultation Report Annex A-D set out the issues raised and the response for each consultation. The responses from these consultations were taken into account the by Chapter 18: Health and Wellbeing.</p> <p>The themes of the community response (Section 47) for the Autumn 2021 consultation included interest in improving the operational active travel opportunities of the project. These are discussed in Chapter 12. The construction did not raise construction stage footpath and cycleway diversions as a theme of concern.</p> <p>The themes of the community response (Section 47) for the Summer 2022 consultation did raise concern about diversions of footpaths and cycleways, albeit not specifically in relation to health effects. These concerns informed the Chapter 19: Agriculture, Land Use and Recreation assessment, which in turn informed the Chapter 12 health assessment. The issues raised are responded to by the Outline Public Rights of Way Management Strategy at ES Appendix 19.8.1. The Chapter 12 health assessment confirms that diversions would be advertised in advance, clearly signposted and comparable in access related considerations.</p> <ul style="list-style-type: none"> Autumn 2021 consultation Section 42 themes and responses from statutory stakeholders are set out in Consultation Report - Annex A, Table A.1 section 'I. Health and well-being'. Autumn 2021 consultation Section 47 themes and responses from the public are set out in Consultation Report - Annex A, Table A.2 section 'I. Health and well-being'. 	<p>Consultation Report Annex A Autumn 2021 Consultation Issues Tables [APP-219]</p> <p>Consultee Response Summaries [APP-220]</p> <p>Consultation Report Annex C Summer 2022 Consultation Issues Tables [APP-221]</p> <p>Consultation Report Annex D Summer 2022 Consultation Consultee Response Summaries [APP-222]</p> <p>ES Appendix 19.8.1 Outline Public Rights of Way Management Strategy [APP-215]</p>	
--	--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<ul style="list-style-type: none"> • Summer 2022 consultation Section 42 themes and responses from statutory stakeholders are set out in Consultation Report - Annex A, Table C.1 section 'I. Health and well-being'. • Summer 2022 consultation Section 47 themes and responses from the public are set out in Consultation Report - Annex A, Table C.2 section 'I. Health and well-being'. • The Outline Public Rights of Way Management Strategy at ES Appendix 19.8.1 responds to the concerns raised in relation to diversions of footpaths and cycleways. 		
2.12.3.5	Assessment of Significant Effects	<p>Though the impact from construction staff on primary care and secondary care services is set out, the increased footfall of passengers when increased flights are operational, and the impact on emergency attendances for this group within secondary care A&E services, is not clear or evidenced satisfactorily.</p> <p>Updated position (Deadline 1): ICB Engaged.</p>	ES Chapter 18: Health and Wellbeing sets out the effects on local healthcare capacity in Section 18.8, paragraphs 18.8.512 to paragraph 18.8.618. The effects relating to passengers requiring emergency healthcare are covered. For example, see the analysis of 'Medical Calls and Ambulance Attendances at the Airport' from paragraphs 18.8.530 to 18.8.538. This includes predictions of number of ambulance transfers from the Airport to hospitals in each assessment year. The analysis relates to passengers and is based on data held by the Airport, which is the only data source available. Patients are taken to the most appropriate location for their condition. Due to patient confidentiality the NHS does not publish data that would extend this analysis. The analysis is considered robust and indicates the likely demand levels for A&E and secondary care from increased passenger footfall, see Chapter 18, Table 18.8.40.	ES Chapter 18: Health and Wellbeing [APP-043]	Agreed
Mitigation and Compensation					
2.12.4.1	Loss of public open space.	<p>It is stated that as a mitigation measure, new areas will be created to serve all users but will not be immediately contiguous with area lost. This does not provide enough reassurance that mitigation measures will be targeted at communities or groups impacted by the loss.</p> <p>Updated position (Deadline 1): The green space lost to construction at the Riverside Park though in Surrey is accessible to West Sussex residents in the North of the County and though being replaced this is an opportunity to ensure the new green space has access to those with disabilities to allow inclusion, independence, and empowerment, encourages community interaction, play and exercise.</p> <p>Updated position (Deadline 5):</p>	<p>ES Chapter 18: Health and Wellbeing sets out the effects of changes in availability of public areas of open space in Section 18.8, paragraphs 18.8.310 to paragraph 18.8.360. Changes in open space are summarised in paragraphs 18.8.333-334. Further detail is provided in ES Chapter 19: Agricultural Land Use and Recreation.</p> <p>The public open space lost from the southern fringe of Riverside Garden Park is associated with the provision of new public open space at the adjacent area of Carpark B, with access provided to ensure the link to Riverside Garden Park is contiguous (see Chapter 18, paragraph 18.8.341).</p>	<p>ES Chapter 18: Health and Wellbeing [APP-043]</p> <p>ES Chapter 19: Agricultural Land Use and Recreation [APP-044]</p> <p>Consultation Report [APP-218]</p>	<p>Under discussion</p> <p>Applicant suggests (July 2024) that it can be agreed that this issue can be marked as resolved. Agreed</p>

		<p>No change to position</p> <p>Updated position (12 August 2024): No update to position</p>	<p>The public open space lost from the southern part of Church Meadows is associated with the provision of new public open space at the adjacent area of land west of the River Mole, with a new footbridge access across the River Mole to ensure the link to Church Meadows is contiguous (see Chapter 18, paragraph 18.8.342).</p> <p>The locations of new provision and the elements that make the new public open space continuous are a direct response to ensuring that there is easily and equally accessible by current users and communities.</p> <p>Community consultation (Section 47) is set out in the Consultation Report Sections 5.6 and 6.6, as well as Annex A-D.</p> <p>Updated Position (April 2024):</p> <p>It is agreed that The Car Park B replacement open space is an opportunity to ensure the new green space has access to those with disabilities to allow inclusion, independence, and empowerment, encourages community interaction, play and exercise. The Car Park B replacement open space will be maintained by the Applicant in accordance with the LEMP.</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan - Part 1 [REP2-021] paragraph 4.7.4 states at the first bullet: <i>“The location of open space should be easily accessible by all groups of people, including those with disabilities. The design of the space should also consider the needs of different groups of people, such as families with children, older adults, and people with disabilities.”</i></p> <p>ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [REP2-021 to REP2-027] sets the overarching vision for the Project and Annex 2 of the Outline LEMP contains an outline Landscape Maintenance schedule. The LEMPs for areas of replacement open space, including the detailed design, management and maintenance arrangements will be submitted to and approved by the LPA before work commences as set out within Requirement 8(1) of the draft DCO. These LEMPs are required to be substantially in accordance with the principles in the outline LEMP.</p> <p>Updated position (July 2024):</p>	<p>Consultation Report Annex B Autumn 2021 Consultation</p> <p>Consultation Report Annex A Autumn 2021 Consultation Issues Tables [APP-219]</p> <p>Consultee Response Summaries [APP-220]</p> <p>Consultation Report Annex C Summer 2022 Consultation Issues Tables [APP-221]</p> <p>Consultation Report Annex D Summer 2022 Consultation Consultee Response Summaries [APP-222]</p>	
--	--	-----------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>Clarification is provided in the Deadline 7 document the Applicant's response to ExQ2 HW.2.4 and HW.2.6 [REP7-084].</p> <p>Agreement is sought that this issue can be marked as agreed given the Applicant's April 2024 position in row 2.12.2.2, which confirms that "The Applicant is open to discussing plans for the new green spaces to encourage activities such as nature trails, exercise apparatus, child activities trails, and the use of sustainable, natural and recycled materials, that will enhance the experience of using the space and encourage wellbeing. It is expected these would be the subject of post determination development of detailed design." Unless there are specific residual comments, we suggest that this is marked as agreed.</p>		
<p>Other</p>					
<p><i>There are no other issues relating to this topic in this Statement of Common Ground.</i></p>					

2.13. Historic Environment

2.13.1 Table 2.13 sets out the position of both parties in relation to historic environment matters.

Table 2.13 Statement of Common Ground – Historic Environment Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.13.1.1	Lack of historic background to the Airport.	<p>No clear understanding or description of the history of the airport development.</p> <p>Updated position (Deadline 1): WSCC fully support and would suggest a meeting ASAP as this document is vital to the understanding of the archaeological impact of the application.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters.</p>	<p>An additional report can be prepared to meet this concern, and would suggest it is discussed through a TWG meeting with WSCC.</p> <p>Updated position (April 2024): GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided and a meeting to discuss held with the appropriate advisors to WSCC, the final position will be consolidated in the finalised WSI.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to WSCC and their archaeological advisors. The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070] was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward.</p>	n/a The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]	Under discussion Agreed
2.13.1.2	Lack of archaeological evaluation within the Airport perimeter	<p>The scheme of archaeological investigation undertaken to date, has been focused on areas within the Project that were easily accessible and has not covered all potential areas of impact.</p> <p>Updated position (Deadline 1): No written documents have been provided of such a previous agreement and discussions with the previous advisors have indicated they were awaiting information on the historical development of the airport and its potential impact on surviving archaeological deposits. As stated at the single TWG we have attended the document as identified in row 7.18 would provide clarity on those areas previously impacted.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters.</p>	<p>The scheme of archaeological investigation undertaken prior to the submission of the DCO application was developed through discussions with WSCC’s appointed archaeological advisors and in line with the methodologies approved in writing by those advisors.</p> <p>The issues relating to undertaking archaeological investigation within the perimeter of the airport have been discussed on a number of occasions and it was agreed that such investigation was not necessary. This was due to the land within the airport perimeter having a reduced archaeological potential (as a result of previous development) and/or the lack of impacts arising from the scheme.</p> <p>Updated position (April 2024): The above remains the GAL position. GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to WSCC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward.</p>	<p>ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [APP-106REP7-046]</p> <p>The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]</p>	Under discussion Agreed

			<p>An updated WSI for post-consent archaeological investigations and historic building recording – West Sussex was submitted at Deadline 7. Section 6 Further Archaeological Investigations and Historic Building Recording has been updated following these discussions.</p>		
<p>2.13.1.3</p>	<p>Historic Environment</p>	<p>Previous archaeological work has established that the area within and around Gatwick Airport has the potential to contain archaeological remains of a multiperiod nature, ranging in date from the prehistoric to the medieval. WSCC is concerned that there are several areas within the Project where insufficient archaeological mitigation work has been proposed without sufficient justification. Therefore, WSCC recommends that there is an increase in the amount of archaeological assessment and recording undertaken.</p> <p>Updated position (Deadline 1): No written documents have been provided of such a previous agreement and discussions with the previous advisors have indicated they were awaiting information on the historical development of the airport and its potential impact on surviving archaeological deposits. As stated at the single TWG we have attended the document as identified in row 7.18 would provide clarity on those areas previously impacted. The LIR response has details of areas of concern, however, the additional report identified under 7.18 may satisfy our concerns on some areas.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters</p> <p>Updated position (12 August 2024): The applicant has failed to provide suitable evidence that the new hotel office and multi-storey at Car Park H has been suitably disturbed to the extent that there is no potential for significant archaeological survival. As discussed and raised with GAL previously we have requested a programme of work within the car park area to assess the level of disturbance. This area only has a limited amount of services and considering the car park's early construction date there is a potential of surviving archaeological deposits beneath. We continue to recommend that archaeological work is undertaken within this area; perhaps in a staged approach, with initial low level of trenching to assess survivability and then wider trenching if there is good survival. This work can be carried out after consent is granted.</p>	<p>Further clarification is requested from WSCC as to where the specific areas are in order to provide a response.</p> <p>The scheme of archaeological investigation undertaken prior to the submission of the DCO application was developed through discussions with WSCC's appointed archaeological advisors and in line with the methodologies approved in writing by those advisors. The advisors did not identify any areas where insufficient archaeological work was proposed during those discussions.</p> <p>Updated position (April 2024): The above remains the GAL position. GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to WSCC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward. An updated WSI for post-consent archaeological investigations and historic building recording – West Sussex was submitted at Deadline 7. Section 6 Further Archaeological Investigations and Historic Building Recording has been updated following these discussions.</p> <p>Updated position (14 August 2024) At deadline 6, the Applicant submitted a report titled "The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance" [REP6-070]. This concluded that while the survival of archaeological features in this location cannot be entirely ruled out, they are likely to be truncated in terms of the removal of the upper parts of the features and fragmentary in terms of disruption from deeper disturbances such as drainage. In response to requests for clarification from WSCC's consultant, Essex Place Services the Applicant provided confidential information showing that there was a grid of buried electrical services and drainage over the entire area of the car park (by letter,</p>	<p>ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]</p> <p>The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]</p>	<p>Under discussion Not Agreed</p>

		In respect of all other development areas regarding this issue, agreed.	28 June 2024). Based on the available evidence, the Applicant does not agree that it is in any way necessary or reasonable to undertake archaeological investigation in this area. This remains a matter not agreed.		
2.13.1.4	Assessment of Significant Effects	<p>No archaeological work has been proposed or evidence provided in a number of locations where groundworks are planned in potentially undisturbed areas.</p> <p>Updated position (Deadline 1): As stated at the single TWG we have attended the document as identified in row 7.18 would provide clarity on those areas previously impacted. The LIR response has details of areas of concern, however, the additional report identified under 7.18 may satisfy our concerns on some areas.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters.</p> <p>Updated position (12 August 2024): As per row 2.13.1.3, concerns remain regarding Car Park H, for which it is recommended that trial-trenching is undertaken. In respect of all other development areas regarding this issue, agreed.</p>	<p>Further clarification is required from WSCC regarding which locations are referred to in the issue raised, in order for GAL to provide a response.</p> <p>Updated position (April 2024): The above remains the GAL position. GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to WSCC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward. An updated WSI for post-consent archaeological investigations and historic building recording – West Sussex was submitted at Deadline 7.</p> <p>Updated position (14 August 2024) See response above for row 2.13.1.3 - this remains a matter not agreed.</p>	n/a ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]	Under discussion Not agreed
Assessment Methodology					
<i>There are no issues relating to the assessment methodology for this topic within this Statement of Common Ground.</i>					
Assessment					
2.13.3.1	Assessment of Significant Effects	<p>There is a lack of evidence that buildings proposed for demolition or conversion have no historic interest.</p> <p>Updated position (Deadline 1): The document proposed under 7.18 has the potential to clarify whether these structures are regarded as being of historic interest. Once the report has been completed this can be discussed at the appropriate TWG.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters</p>	<p>The Historic Environment Baseline Report identifies buildings of historic interest that could potentially be affected by the proposed development. These include listed and locally listed buildings. The only building of historic interest to be demolished is the former control tower which is not listed and is not included on the local list maintained by Crawley Borough Council. If WSCC know of any other buildings of historic interest that would be demolished or converted as part of the proposed development then the Applicant would be pleased to undertake a review of these.</p> <p>Updated position (April 2024): The above remains the GAL position. GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC. No information has been</p>	ES Appendix 7.6.1: Historic Environment Baseline Report [APP-101] The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]	Under discussion Agreed

			<p>provided by WSCC to suggest that any other buildings proposed for demolition are of historic interest.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to CBC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward. No information has been provided by WSCC to suggest that any other buildings proposed for demolition are of historic interest.</p>		
2.13.3.2	Assessment of Significant Effects	<p>Alternatively, an explanation and evidence should be provided to show why certain works are unlikely to impact significant archaeological remains, either due to modern disturbance, foundation design, or other factors.</p> <p>Updated position (Deadline 1): WSCC fully support and would suggest a meeting ASAP as this document is vital to the understanding of the archaeological impact of the application.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters</p> <p>Updated position (12 August 2024): The applicant has failed to provide suitable evidence that the new hotel office and multi-storey at Car Park H has been suitably disturbed to the extent that there is no potential for significant archaeological survival.</p>	<p>An additional report can be prepared to meet this concern, and we would suggest it is discussed through the TWGs.</p> <p>Updated position (April 2024): GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to CBC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward. An updated WSI for post-consent archaeological investigations and historic building recording – West Sussex was submitted at Deadline 7. Section 6 Further Archaeological Investigations and Historic Building Recording has been updated following these discussions.</p> <p>Updated position (14 August 2024) See response above for row 2.13.1.3 - this remains a matter not agreed.</p>	<p>n/a ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [APP-106REP7-046]</p> <p>The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]</p>	<p>Under discussion Not Agreed</p>
Mitigation and Compensation					
2.13.4.1	Management of Historic Environment effects	<p>The CoCP does not reflect the archaeological work proposed. The objective should be to protect or mitigate the setting of built heritage and the recording of affected archaeological deposits. It also does not detail a Heritage Clerk of Works.</p> <p>Updated position (Deadline 1): WSCC are happy to discuss at the TWG both the wording of the CoCP and the need for a Clerk of Works. The</p>	<p>We consider the suggested change aligns with the text already included within the CoCP and would be happy to discuss further in a TWG meeting with WSCC.</p> <p>As the proposed programme of archaeological investigation and historic building recording is very small, the works can be undertaken without a Heritage Clerk of Works.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p>	<p>Under discussion Agreed</p>

		<p>extent of the proposed archaeological programme is at present not agreed but the document proposed under 7.18 will assist these discussions.</p> <p>Updated position (Deadline 5): GAL shared the report with WSCC on 13th May 2024 which is being considered by Officers and Archaeological Advisors (Place Services). A meeting has been arranged with GAL on the 31st May to discuss this document and outstanding archaeological matters</p>	<p>Updated position (April 2024): The above remains the GAL position. GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) It is now agreed that a Heritage Clerk of Works is not required.</p>		
2.13.4.2	Proposed mitigation on areas already evaluated.	<p>The proposed mitigation identified within the WSI on areas that have been evaluated is not sufficient and will need to be expanded.</p> <p>Updated position (Deadline 1): A list of concerns regarding the proposed mitigation method and extent has been provided within the LIR and we would suggest that these can be discussed and hopefully agreed at the next TWG.</p> <p>Updated position (Deadline 5): Meeting to be held on 31st May with GAL.</p>	<p>GAL would appreciate further clarification from WSCC regarding this issue, including the specific areas being referred to and the additional work that is requested.</p> <p>Updated position (April 2024): GAL will meet to discuss the proposed locations for expansion with the appropriate advisors to WSCC to discuss whether updates to the WSI are necessary.</p> <p>Updated position (July 2024) The requested amendments have been made within the ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046] submitted at Deadline 7. Section 6 Further Archaeological Investigations and Historic Building Recording has been updated following these discussions.</p>	n/a ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046] APP-106]	Under discussion Agreed
2.13.4.3	Proposed building recording of control tower.	<p>Proposed level 2 recording not appropriate for this type of rare structure.</p> <p>Updated position (Deadline 1): WSCC support the recording of the structure to level 3.</p> <p>Updated position (Deadline 5): The Applicant has not made the changes to the West Sussex Written Scheme of Investigation. Further detail of outstanding concerns are set out in response to HE1.1 [REP4-065]</p>	<p>The level of recording proposed for the former control tower can be increased to Level 3. This can be discussed through the TWG.</p> <p>Further clarification is requested from WSCC as to what is meant by 'should be identified as a heritage asset'. The former control tower is identified within the submission documents as a building of historic interest, and therefore will be subject to the proposed programme of recording prior to demolition.</p> <p>GAL has referred to CBC's maintained list of buildings within the Borough. Whilst not statutorily listed, these are considered by the Council to be important due to their architectural, historical or archaeological significance. The former airport control tower is not on the list.</p> <p>Updated position (April 2024): The amendment to the proposed level of recording will be included within the next revision of the Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex.</p>	ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046] APP-106]	Agreed once added to the WSI

			<p>Updated position (July 2024) This amendment has been made within the updated WSI for post-consent archaeological investigations and historic building recording – West Sussex submitted at Deadline 7.</p>		
2.13.4.4	No proposals for heritage community outreach.	<p>No potential heritage community engagement identified in the CoCP.</p> <p>Updated position (Deadline 1): WSCC would agree</p> <p>Updated Position (Deadline 3): The Applicant has indicated in SoCG (V1 – March 24) that they are happy to discuss adding a section regarding community engagement into the WSI for West Sussex. WSCC are willing to engage and discuss further.</p> <p>Updated position (Deadline 5): A meeting to be held on 31st May with GAL.</p>	<p>A section regarding community engagement can be included within a revised version of the WSI for West Sussex. We would suggest that this addition is discussed and agreed through future TWGs and SoCG discussions.</p> <p>Updated position (April 2024): GAL will meet with the appropriate advisors to WSCC to discuss the proposed programme of community engagement. Additional text to cover this will be included within the next revision of the Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex.</p> <p>Updated position (July 2024) This issue is addressed in the updated WSI for post-consent archaeological investigations and historic building recording – West Sussex submitted at Deadline 7. Section 10 details the public outreach measures proposed.</p>	ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]	Under discussion Agreed
2.13.4.5	Clarity in sign off for archaeological mitigation.	<p>Failure to define a procedure for the monitoring and signing-off of the archaeological works.</p> <p>Updated position (Deadline 1): WSCC would agree.</p> <p>Updated Position (Deadline 3): The Applicant has indicated in SoCG (1 – March 24) that happy to discuss adding this to WSI (matter to be progressed via TWG and SoCG discussions</p> <p>Updated position (Deadline 5): To be discussed during the meeting to be held on 31st May.</p>	<p>A section regarding the sign-off procedure can be included within a revised version of the WSI for West Sussex. We would suggest that this addition is discussed and agreed through future TWGs and SoCG discussions.</p> <p>Updated position (April 2024): GAL will meet with the appropriate advisors to WSCC to discuss the proposed sign-off procedure. Additional text to cover this will be included within the next revision of the Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex.</p> <p>Updated position (July 2024) This amendment has been made within the updated WSI for post-consent archaeological investigations and historic building recording – West Sussex submitted at Deadline 7.</p>	ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]	Under discussion Agreed
2.13.4.6	Assessment of Significant Effects	<p>Given the widespread groundworks proposed for elements of the Project, a more extensive programme of archaeological trial trenching/test pitting is required in advance of construction. This would accurately assess the presence and survival of archaeological remains in areas to be impacted by the proposed groundworks and allow for the creation of an appropriate mitigation strategy.</p>	<p>The scheme of archaeological investigation undertaken prior to the submission of the DCO application was developed through discussions with WSCC’s appointed archaeological advisors and in line with the methodologies approved in writing by those advisors.</p>	ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and	Under discussion Not agreed

		<p>Updated position (Deadline 1): No written documents have been provided of such a previous agreement and discussions with the previous advisors have indicated they were awaiting information on the historical development of the airport and its potential impact on surviving archaeological deposits. As stated at the single TWG we have attended the document as identified in row 7.18 would provide clarity on those areas previously impacted. The LIR response has details of areas of concern, however, the additional report identified under 7.18 may satisfy our concerns on some areas.</p> <p>Updated position (Deadline 5): To be discussed at the meeting on the 31st May.</p> <p>Updated position (12 August 2024) Concerns remain around Car Park H, for which it is recommended that trial trenching is undertaken. In respect of all other development areas regarding this issue, agreed.</p>	<p>The issues relating to undertaking archaeological investigation within the perimeter of the airport have been discussed on a number of occasions and it was agreed that such investigation was not necessary. This was due to the land within the airport perimeter having a reduced archaeological potential (as a result of previous development) and/or the lack of impacts arising from the scheme.</p> <p>Updated position (April 2024): GAL have prepared a detailed history of the airport and information regarding past ground disturbance. Once that report has been provided a meeting to discuss its findings will be held with the appropriate advisors to WSCC.</p> <p>Updated position (July 2024) The report setting out the historical development of the airport has been provided to CBCWSCC and their archaeological advisors. This report was submitted at Deadline 6. A meeting has been held with GAL to discuss the implications of the report and the way forward. An updated WSI for post-consent archaeological investigations and historic building recording – West Sussex was submitted at Deadline 7.</p> <p>Updated position (14 August 2024) See response above for row 2.13.1.3 - this remains a matter not agreed.</p>	<p>Historic Building Recording - West Sussex [REP7-046APP-106]</p> <p>The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground Disturbance [REP6-070]</p>	
2.13.4.7	Mitigation, Compensation and Enhancement	<p>Concerns about proposed recording, excavation/trenching and mitigations for key archaeological sites.</p> <p>Updated position (Deadline 1): A list of concerns regarding the proposed mitigation method and extent has been provided within the LIR and we would suggest that these can be discussed and hopefully agreed at the next TWG.</p> <p>Updated position (Deadline 5): To be discussed on the 31st May.</p> <p>Updated position (12 August 2024) Concerns remain around Car Park H, for which it is recommended that trial trenching is undertaken. In respect of all other development areas regarding this issue, agreed.</p>	<p>Further clarification is required from WSCC regarding which archaeological sites are being referred to, in order for GAL to provide a response.</p> <p>Updated position (April 2024): GAL will meet to discuss the proposed locations for expansion with the appropriate advisors to WSCC to discuss whether updates to the WSI are necessary.</p> <p>Updated position (July 2024) The requested amendments have been made within the updated WSI for post-consent archaeological investigations and historic building recording – West Sussex submitted at Deadline 7.</p> <p>Updated position (14 August 2024) See response above for row 2.13.1.3 - this remains a matter not agreed.</p>	<p>n/a ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]</p> <p>The Historical Development of Gatwick Airport including a Review of the Extent of Past Ground</p>	<p>Under discussion Not agreed</p>

				Disturbance [REP6-070]	
2.13.4.8	Mitigation, Compensation and Enhancement	<p>Lack of clarity with regards the sign-off procedure for each phase of archaeological mitigation.</p> <p>Updated position (Deadline 1): WSCC would agree.</p> <p>Updated position (Deadline 5): To be discussed on the 31st May.</p> <p>Updated position (12 August 2024): The updated WSI clarifies the sign-off procedure suitably.</p>	<p>A section regarding the sign-off procedure can be included within a revised version of the WSI for West Sussex. We would suggest this is discussed and agreed through the TWGs and SoCG discussions.</p> <p>Updated position (April 2024): GAL will meet with the appropriate advisors to WSCC to discuss the proposed sign-off procedure. Additional text to cover this will be included within the next revision of the Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex.</p> <p>Updated position (July 2024) This amendment has been made within the updated WSI for post-consent archaeological investigations and historic building recording – West Sussex submitted at Deadline 7.</p>	<p>ES Appendix 7.8.2: Written Scheme of Investigation for post-consent Archaeological Investigations and Historic Building Recording - West Sussex [REP7-046APP-106]</p>	<p>Under discussion Agreed</p>

Assessment Methodology					
2.14.2.1	Lack of Zone of Theoretical Visibility (ZTV) for project elements.	<p>Although stated in the application that a separate ZTV for the CARE flue is provided, no evidence of this is included within the documentation. No ZTVs are produced for the construction compounds.</p> <p>Updated position (Deadline 1): Awaiting the new ZTV illustrating the maximum parameters of the temporary construction compounds and the new ZTV for the CARE stack.</p> <p>Updated position (Deadline 5): WSCC are no longer pursuing the ZTV for the CARE facility, due to the Project changes presented by the Applicant. WSCC are currently reviewing the submitted ZTVs for the construction compounds and will provide comments at Deadline 5.</p>	<p>ES Chapter 8 LTVIA includes Figures 8.4.1, 8.4.2 and 8.4.4 which illustrate a ZTV of the proposed development that includes the CARE facility stack. A separate ZTV of the stack will be generated and included in a figure to demonstrate the different areas of landscape intervisible with the stack compared with all other elements of the proposals. A new ZTV illustrating the maximum parameters of the temporary construction compounds will be generated to inform visibility during the construction phase.</p> <p>Updated position (Deadline 1): The stack to the replacement CARE facility has been removed through the Change Request, which has been accepted by the ExA.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>	Figures 8.4.1, 8.4.2 and 8.4.4 of ES Chapter 8 Landscape, Townscape and Visual Figures - Part 1 [APP-060]	No longer pursuing Under discussion
2.14.2.2	Methodology	<p>A concern is the visual impact of the ('up to 48m') stack associated with the CARE waste facility. Although stated in Table 8.3.1 that a separate Zone of Theoretical Visibility (ZTV) for the flue is provided, no evidence of this is included within the documentation.</p> <p>Updated position (Deadline 1): Awaiting the new ZTV illustrating the maximum parameters for the CARE stack.</p> <p>Updated position (Deadline 5): Due to the project changes put forward by the Applicant and accepted by the ExA, WSCC are no longer pursuing concerns over the CARE facility stack height.</p>	<p>ES chapter 8 LTVIA includes Figures 8.4.1, 8.4.2 and 8.4.4 which illustrate a ZTV of the proposed development that includes the CARE facility stack. A separate ZTV of the stack will be generated and included in a figure to demonstrate the different areas of landscape intervisible with the stack compared with all other elements of the proposals.</p> <p>Updated position (Deadline 1): The stack to the replacement CARE facility has been removed through the Change Request, which has been accepted by the ExA.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>	ES Chapter 8 Landscape, Townscape and Visual Figures - Part 1 [APP-060]	No longer pursuing

2.14.2.3	Methodology	<p>Due to the longevity of the construction phase, no ZTVs have been prepared for the larger construction compounds, especially those close to sensitive receptors, or for those compounds with batching plants proposed to be up to 25m in height. Further assessment is required to understand where construction phase visual effects will be felt and how they will be mitigated.</p> <p>Updated position (Deadline 1): Awaiting new ZTVs.</p> <p>Updated position (Deadline 5): WSSC are currently reviewing the submitted ZTVs for the construction compounds and will provide comments at Deadline 5.</p> <p>Updated position (12 August 2024) Agreed.</p>	<p>ES chapter 8 LTVIA includes Figures 8.4.1, 8.4.2 and 8.4.4 which illustrate a ZTV of the proposed operational development. A new ZTV illustrating the maximum parameters of the temporary construction compounds will be generated to inform visibility during the construction phase.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>	<p>ES Chapter 8 Landscape, Townscape and Visual Figures - Part 1 [APP-060]</p>	<p>Agreed Under discussion</p>
Assessment					
2.14.3.1	Extent of vegetation loss	<p>Concern is raised over the extent of vegetation that would be lost (primarily along the road corridor), which is significant and its effects on ecosystem service benefits and the loss of connectivity at a landscape scale.</p> <p>Updated position (Deadline 1): Impacts to trees adjacent surface access improvements have not been adequately demonstrated and could therefore require the loss of mature large trees unless mitigation measures are in place. This is not accounted for within the response.</p> <p>Tree loss along the surface access works are temporary but of long-term significant effect. Whilst reinstatement measures are proposed, enhancement opportunities within the vicinity are not.</p> <p>Updated position (Deadline 5):</p> <p>The oAVMS provides further detail as to how trees adjacent the surface access improvements could be retained (if appropriately reflected within detailed AVMS to be approved).</p> <p>The authorities recognise the overarching strategies presented within the oLEMP, however, concerns remain regarding the long-term effect from the temporary loss of features along the access corridor. There will be a temporary loss of vegetation along this corridor for a notable period of time, with unknown phasing of reinstatement proposed by the oLEMP. Stated enhancements, whilst welcomed for other purposes, provide little comfort to the matter raised.</p> <p>Updated position (12 August 2024):</p>	<p>The majority of the vegetation that would be removed as part of the surface access improvements of the A23 would be scrub and small to medium sized trees. Reinstatement of scrub and tree planting (see illustrative designs for landscape mitigation in Appendix 8.8.1 Outline LEMP), would occur where possible and in accordance with guidelines in Highways England, DMRB LD117 Landscape Design, the Manual of Contract Documents for Highways Works, Major Projects and Highways England, DMRB Asset Data Management Manual Volume 13, and will mitigate visual and townscape impacts and reduce levels of effect to a level that is no longer significant.</p> <p>The details of landscape planting proposals will be agreed in consultation with the relevant authorities should the DCO be granted and will be secured as Requirement 8 of the draft DCO in Schedule 2. Publicly accessible replacement green space would be created in locations at car park B and Longbridge roundabout, connecting to existing green infrastructure, to compensate for any loss of vegetation and open space, representing a benefit to the local community, Gatwick staff and visitors and biodiversity.</p> <p>Updated Position (April 2024): ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [REP2-021 ,REP2-023 ,REP2-025 ,REP2-027]. The oLEMP sets out the overarching landscape strategy describing the existing landscape features of each "zone" of the site and the objectives for the detailed design of the landscape and ecology management plans relevant to each zone. The document also includes landscape principles which are specific to</p>	<p>ES Appendix 8.8.1 Outline LEMP [APP-113]</p> <p>ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP1-026 ,REP1-027 ,REP1-028 ,REP1-029 ,REP1-030]</p> <p>ES Appendix 5.3.2 Code of Construction Practice [REP1-021]</p> <p>Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP1-023 ,REP1-024 ,REP1-025]</p>	<p>Agreed Under discussion</p>

		<p>The Applicant has considered the vegetation loss appropriately within the ES and has indicatively shown landscape proposals which will provide a reinstated corridor where possible.</p>	<p>each zone and particular development features. The oLEMP includes preliminary landscape proposals plans for replacement public open space and publicly accessible land within the Project and landscape proposals for the surface access improvements to demonstrate appropriate landscape mitigation measures. The oLEMP demonstrates that a holistic approach to the provision of green infrastructure, public access, habitat creation and townscape character has been undertaken through the surface access corridor connections to replacement open space on land to the north of Longbridge roundabout and at car park B. Considerable enhancements of these areas of urban fringe land would be delivered as part of the Project. A LEMP for individual parts of the Project will be submitted to and approved by the LPA before work commences on that part as set out within Requirement 8(1) of the draft DCO. These LEMPs must be substantially in accordance with the oLEMP.</p> <p>Tree survey plans, tree quality schedules, preliminary tree removal plans and impact assessment for the Project site are included in ES Appendix 8.10.1: Tree Survey Report and Arboricultural Impact Assessment [REP1-026, REP1-027, REP1-028, REP1-029, REP1-030].</p> <p>ES Appendix 5.3.2 Code of Construction Practice [REP1-021] sets out general methodologies and mitigation measures and Code of Construction Practice Annex 6 – Outline Arboricultural and Vegetation Method Statement [REP1-023, REP1-024, REP1-025] which includes Tree Removal and Protection Plans. These drawings will be revisited and refined during the detailed design process and submitted for approval as part of the detailed Arboricultural Method Statement.</p>		
2.14.3.2	Landscape, Townscape, and Visual Resources	WSSC is concerned about the landscape and visual impacts associated with the additional intensification of the development within the airport boundary and the highway corridor to the surrounding environment. The Environmental Statement (ES) downplays the value of the landscape surrounding the airport. There is no aspiration or commitment to improve the declining visual landscape caused by the airport activity already in existence. The indicative design, scale, and siting of the Project would further damage the landscape, with concerns about how the design principles presented would secure good design. WSSC is concerned about the lack of imagination in terms of mitigation and enhancement measures proposed.	Existing and proposed ZTVs have been undertaken for a 15 km radius to inform the extent of the study area. The ZTV indicates that the vast majority of land that may be potentially intervisible with development at Gatwick Airport lies within a 5 km radius. This has been defined as an appropriate study area to capture the relevant landscape and townscape receptors (including undesignated landscapes) that are likely to be affected by the Project and to ensure that all likely significant effects have been identified. ES chapter 8 includes a thorough assessment of landscape value, sensitivity, magnitude of impact and significance of effect based on a methodology within Appendix 8.4.1. Photomontage/photo wirelines (ES Chapter 8 Figures 8.9.1 to 8.9.128) demonstrate the intervisibility of the existing and	ES Chapter 8 Landscape, Townscape and Visual Figures - Part 3 [APP-062] ES Appendix 8.4.1 LTVA Methodology [APP-109] Appendix 8.8.1 Outline LEMP [APP-033]	Not Agreed Under discussion

		<p>Updated position (Deadline 1): Further information and more detailed design principles to secure good design are needed.</p> <p>Updated position (Deadline 5): Further discussions are on-going with the Applicant regarding process for good design and how the process for detailed design stage can be secured through the DCO.</p> <p><u>Updated position (12 August 2024)</u> <u>WSSC is still concerned about the limited level of detail provided for a number of sensitive sites due to the overall lack of design detail included within the Design Principles document [REP7-063] which is intended to be the control document with the rest of the DAS being 'illustrative'</u></p>	<p>proposed airport infrastructure with receptors within the landscape and townscapes which surrounds the application site and inform the assessment of effects in sections 8.9 and 8.11 of the ES.</p> <p>Illustrative designs for landscape mitigation are included in Appendix 8.8.1 Outline LEMP which will minimise and mitigate landscape, townscape and visual impacts. Publicly accessible replacement green space would be created in locations at car park B and Longbridge roundabout, connecting to existing green infrastructure, to compensate for any loss of vegetation and open space, representing a benefit to the local community, Gatwick staff and visitors and biodiversity. A Design and Access Statement has been prepared to provide design quality control without being too restrictive for future design stages.</p> <p>The details of landscape planting proposals will be agreed in consultation with the relevant authorities should the DCO be granted and will be secured as Requirement 8 of the draft DCO in Schedule 2.</p> <p>Updated Position (April 2024):</p> <p>ES Appendix 8.8.1 Outline LEMP [REP2-021, REP2-022, REP1-023, REP2-024, REP2-025, REP2-026, REP2-027, REP2-028] sets the overarching vision for the Project. Figures 1.2.4 to 1.2.15 show Surface Access Landscape Proposals. Trees and vegetation to be removed will be replaced with native tree and scrub species. A typical mix of native tree and shrub species planted as predominantly bare root transplants would be sufficiently mature at 10 years to achieve screening and softening of development and is included in ES Appendix 8.8.1 OLEMP Annex 3 Typical Planting Schedules. Tree species in particular would continue to grow and mature to further mitigate effects on landscape and visual resources and contribute to enhancement of green infrastructure generally and integration with the surrounding landscape and townscape.</p> <p>The obligations within the oLEMP are secured through a requirement in the Draft DCO (Doc Ref. 2.1) in that prior to commencement of development of an area, a Landscape and Ecology Management Plan (LEMP) must be submitted to and approved by CBC (in consultation with RBBC, MVDC and TDC as relevant) under Requirement 8. The LEMPs must be substantially in accordance with this oLEMP.</p>	<p>Design and Access Statement Volume 1 [APP-253]</p> <p>Design and Access Statement Volume 2 [APP-254]</p> <p>Design and Access Statement Volume 3 [APP-255]</p> <p>Design and Access Statement Volume 4 [APP-256]</p> <p>Design and Access Statement Volume 5 [APP-257]</p> <p>ES Appendix 8.8.1 Outline LEMP [REP2-021, REP1-023, REP2-025, REP2-027]</p> <p><u>Appendix A: Response on Design Matters [REP7-096]</u></p>	
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>Updated position (July 2024): The Applicant has reviewed the comments made on the design principles and the topic of Good Design by the Joint Local Authorities and other Interested Parties and has provided a response at Deadline 7 which sets out how these have been taken into account by GAL – Appendix A: Response on Design Matters [REP7-096]. The Applicant has also committed to the use of a design advisor. Further details of this process, including a CV of the proposed advisor were shared at Deadline 6.</p>		
Mitigation and Compensation					
2.14.4.1	Lack of certainty high quality design will be secured.	<p>The design principles, upon which the detailed design would be secured against, have had no input from stakeholders and are currently not detailed enough for each element of the Project.</p> <p>Updated position (Deadline 1): Although the Design and Access Statement (DAS) (APP-253-257) is a separate DCO control document, the design principles upon which the detailed design would be secured against, have had no input from stakeholders. They are currently not detailed enough and contain ambiguous wording, which does not ensure that a high-quality development can be secured.</p> <p>Updated position (Deadline 5): Further discussions are on-going with the Applicant regarding process for good design and how the process for detailed design stage can be secured through the DCO. WSCC maintains the position regarding lack of detail within the DAS.</p> <p><u>Updated position (12 August 2024)</u> <u>WSCC is still concerned about the limited level of detail provided for a number of sensitive sites due to the overall lack of design detail included within the Design Principles document [REP7-063] which is intended to be the control document with the rest of the DAS being ‘illustrative’</u></p>	<p>Appendix 8.8.1 Outline LEMP sets the overarching vision for landscape proposals and management of green infrastructure of the Project. The obligations within the outline LEMP will be secured through Requirement 8 of the draft DCO. A LEMP for individual parts of the Project will be submitted to and approved by the LPA before work commences. These LEMPs will be in general accordance with the principles in the outline LEMP. A greater level of detail for landscape mitigation proposals is provided for the surface access improvements, in accordance with DMRB.</p> <p>A Design and Access Statement has been prepared to provide design quality control without being too restrictive for future design stages. Publicly accessible replacement green space would be created in locations at car park B and Longbridge roundabout when the temporary construction compounds are removed to compensate for any loss of green infrastructure and space, representing a benefit to the local community, Gatwick staff and visitors and biodiversity.</p> <p>Updated Position (April 2024): The Design Principles [REP3-056] have been updated at Deadline 3 in response to LA feedback and ExQ1 DCO.1.57. The Applicant welcomes WSCC’s comments on the updated design principles.</p> <p>Updated position (July 2024): The Applicant has reviewed the comments made on the design principles and the topic of Good Design by the Joint Local Authorities and other Interested Parties and has provided a response at Deadline 7 which sets out how these have been taken into account by GAL – Appendix A: Response on Design Matters [REP7-096]. The Applicant has also updated the Design Principles and the DAS at Deadline 7 in response.</p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan [APP-113]</p> <p>Design and Access Statement Volume 1 [APP-253]</p> <p>Design and Access Statement Volume 2 [APP-254]</p> <p>Design and Access Statement Volume 3 [APP-255]</p> <p>Design and Access Statement Volume 4 [APP-256]</p> <p>Design and Access Statement Volume 5 [APP-257]</p> <p>Design and Access Statement (DAS) [REP2-032, REP2-033, REP2-034, REP2-035, REP2-036]</p> <p>ES Appendix 8.8.1 Outline LEMP [REP2-</p>	<p>Not Agreed Under discussion</p>

				021, REP1-023, REP2-025, REP2-027]	
2.14.4.2	Mitigation, Compensation and Enhancement	<p>There are significant elements of the Project where landscape planting proposals will be immature, not just visually, but in ecosystem service provision too. The Applicant needs to review its work and present appropriate opportunities for substantial advance planting.</p> <p>Updated position (Deadline 1): Further discussion for the consideration of advanced planting is welcomed.</p> <p>Updated position (Deadline 5):</p> <p>The authorities recognise the ‘opportunities’ for advanced mitigation and enhancement planting presented within the oLEMP [REP4-012], however, as they are only recognised as ‘opportunities’, this provides little comfort that these areas will be planted in advance.</p> <p>Annex 4 identifies Preliminary Surface Access Tree Removal and Protection Plans only, contrary to the response within the updated position.</p> <p>Annex 5 – Preliminary Locations for Advanced Planting (March 2024), part 4 of the oLEMP [REP2-027] has not been revised since Deadline 2. Landscape concept detail for two of the three areas identified on the plan remains unknown, including Crawler’s Brook and Perimeter Road East/ A23.</p> <p><u>Updated position (12 August 2024):</u></p> <p><u>Outstanding concerns regarding advanced planting have been stated within the JLA’s Response to the Applicant’s Deadline 6 Submissions [REP7-103] at sections 3 & 5. Further, the proposed advanced planting does not minimise effects (between removal and reinstatement) alongside the highway corridor which has been the principal area of concern.</u></p>	<p>Illustrative designs for landscape mitigation are included in Appendix 8.8.1 Outline LEMP. The details of landscape planting proposals will be agreed in consultation with the relevant authorities should the DCO be granted and will be secured as Requirement 8 of the draft DCO in Schedule 2.</p> <p>The potential for advanced planting will be considered. Areas will be identified which would not restrict/compromise flexibility for construction activities or access as part of the detailed design phase.</p> <p>Generally, landscape proposals will be implemented in the 12 month period after completion of the construction phase.</p> <p>Updated Position (April 2024): ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan [REP2-021, REP2-023, REP2-025, REP2-027] sets the overarching vision for the Project and tree survey and protection methods required to achieve this. The obligations within the outline LEMP will be secured through Requirement 8 (1) of the draft DCO. A LEMP for individual parts of the Project and detailed tree protection and landscape planting proposals will be submitted to and approved by the LPA before work commences. These LEMPs will be substantially in accordance with the principles in the outline LEMP.</p> <p>The revised oLEMP for Deadline 3 includes, at Annex 4, preliminary locations within the Project where opportunities exist for substantial advance mitigation and enhancement planting proposals to take place. Areas have been identified which would not restrict or compromise the flexibility for construction activities or access throughout the Project programme.</p> <p><u>Updated position (July 2024):</u> <u>As set out above, the Applicant will seek to plant in advance where practical. However without a contractor being appointed or detailed design, GAL must ensure construction activities or access are not restricted or compromised.</u></p>	<p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan [APP-113]</p> <p>ES Appendix 8.8.1 Outline LEMP [REP2-021, REP1-023, REP2-025, REP2-027]</p>	<p>Not Agreed <u>Under discussion</u></p>
<p>Other There are no other issues relating to topic in this Statement of Common Ground.</p>					

2.15. Major Accidents and Disasters

2.15.1 Table 2.15 sets out the position of both parties in relation to major accidents and disasters matters.

Table 2.15 Statement of Common Ground – Major Accidents and Disasters Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.15.1.1	Increased risk of potential terrorist activity.	<p>With the increase in the terminal forecourt areas and increased passenger number throughput, there is concern this could increase the risk of potential terrorist activities taking place in these locations.</p> <p>Updated position (Deadline 1): WSFRS acknowledges the current mitigation and contingency measures for responding to a terrorist attack at the Airport. However, WSFRS is seeking assurance from the Applicant that they understand the need for an increased and continued level of collaborative scrutiny and risk assessment during the planning and construction phases of the project, which align with the threat of a terrorist attack.</p> <p>The project will bring significant changes to the airport’s built environment and transportation networks, creating uncertainty for emergency responders, GAL’s staff and passengers. If the Applicant fails to show that they have considered and identified all risks through effective communication and consultation with WSFRS, it could lead to an ineffective and uncoordinated multi-agency emergency response to such an event. This would put lives at risk.</p> <p>Although the increased capacity does not increase the risk of a terrorist attack at the Airport, any uncertainty and deviation from normal operations could be seen as an opportunity for terrorists.</p> <p>Updated position (Deadline 5): The Applicant has noted their collaboration with NaCTSO and consultation on the Project. WSFRS participates in meetings where the threat of terrorism at the airport is discussed. Therefore, it is assumed that the project’s impact against this threat will be continuously evaluated and communicated to WSFRS during the construction and operational phases.</p>	<p>GAL’s engagement with the National Counter Terrorism Security Office (NaCTSO) is an on-going activity, and not one that occurs solely during airport development planning, although they are of course consulted on this issue. The risk of potential terrorist activities is not a function of passenger numbers or forecourt development. The increased capacity associated with the Project would not therefore be expected to have a direct effect on this aspect.</p> <p>In addition, there are extensive mitigation and contingency measures in place to manage these risks. All security measures are confidential and cannot be detailed in the public domain.</p>	ES Appendix 5.3.4: Major Accidents and Disasters [APP-089]	Agreed
2.15.1.2	Potential impact to emergency response times.	<p>Relocation of RVPs would impact emergency services and possibly the attending appliances.</p> <p>Updated position (Deadline 1): WSFRS requires the Applicant to communicate and consult regarding a geographical or procedural change to any existing RVPs as soon as possible, allowing WSFRS to evaluate potential impacts on its own procedures aligned to the different</p>	<p>RVP North is indicated on the plans submitted as Work No. 13. The precise locations of rendezvous points will be determined at the Project’s detailed design stage. The locations will be established with due consideration given to emergency response logistics.</p>	Works Plans [AS-017]	Agreed

		types of emergency response at the Airport where a RVP will be nominated.			
2.15.1.3	Potential requirements or increased humanitarian support (and subsequent demands upon services).	<p>In the event of a major incident or disaster, there will be an increased demand for humanitarian support, putting higher demands and pressures on acute hospitals/local authorities and Rest Centre requirements. Clarity on whether there is enough capacity at local A&E departments and within the broader emerging ICS (Integrated Care System) to cope with the demand of an additional passengers passing through the airport every year is needed.</p> <p>Updated position (Deadline 5): WSSC would have no further comment on this – and revert to CBC on this matter.</p>	<p>The demand for humanitarian support in response to a major incident or disaster would be dependent upon the nature of the specific event. The NRP will result in an increase in passenger numbers and total aircraft movements. However, it won't introduce fundamentally new or "bigger" hazards and thus, within the frequency with which major events occur, would not be expected to result in higher demands and pressures on acute hospitals/local authorities and rest centres.</p> <p>As demonstrated in the "Health and Wellbeing Effects from Changes to Local Healthcare Capacity" assessment sections within ES Chapter 18: Health and Wellbeing (Doc ref. 5.1), the residual impact on external healthcare providers is not solely a factor of passenger throughput, as the intervention, triage and care provided can significantly reduce the need for ambulance call outs and referral. In terms of construction impacts, the proportion of non-home-based staff would not be significant, and an occupational health service provision would be in place to address the occupational health needs of the workforce, removing impacts upon local public health care capacity.</p>	ES Appendix 5.3.4: Major Accidents and Disasters [APP-089]	No longer pursuing
2.15.1.4	Major Accidents and Disasters	<p>There is concern about any permanent or temporary change to the location of the existing Rendezvous Points (RVP) at the Airport as part of the Project. Any future changes to the RVPs or intended changes in how the Applicant will nominate these for an emergency service response as a result of the Project, must be communicated and discussed with WSFRS. WSFRS will need to understand the potential traffic management changes, both temporary and permanent, in attending emergency incidents at the Airport itself and in its proximity.</p> <p>Updated position (Deadline 1): WSFRS requires the Applicant to communicate and consult regarding a geographical or procedural change to any existing RVPs as soon as possible, allowing WSFRS to evaluate potential impacts on its own procedures aligned to the different types of emergency response at the Airport where a RVP will be nominated.</p>	<p>RVP North is indicated on the plans submitted as Work No. 13. The precise locations of rendezvous points will be determined at the Project's detailed design stage. The locations will be established with due consideration given to emergency response logistics.</p>	Works Plans [AS-017]	Agreed
2.15.1.5	Major Accidents and Disasters	<p>During the construction phase, there will likely be changes to the current infrastructure design that supports a fire service response and the safe evacuation of the public. The extent and impact of this work is difficult for WSFRS to understand and assess at this stage.</p>	<p>Fire prevention and emergency measures currently employed as part of Gatwick Airport operations would be in place and extended to the Project. During construction, specific fire prevention and emergency measures would be developed and set out in the CoCP.</p>	ES Appendix 5.3.2: Code of Construction Practice (Doc Ref. 5.3)	Agreed

		<p>Updated position (Deadline 5): As part of the Code of Construction Practice, the Applicant must establish clear reporting lines with WSFRS to ensure that any changes or disruptions to emergency response can be addressed by WSFRS internally at the earliest opportunity. This will enable WSFRS to maintain an effective operational response during all construction phases of the project.</p>			
2.15.1.6	Major Accidents and Disasters	<p>WSFRS need to understand the projection in passenger forecast and changes to the broader Airport layout in more detail as part of the Project, to assess the potential impact upon operational preparedness and resilience planning. An example of this requirement would be the plans for an incident (including risk of terrorist attack) at the Airport that will require evacuation, shelter, and welfare of a large number of people. Even though the frequency/demand of emergency incidents at the Airport is relatively low, the impact of an incident could be very high. The likelihood and impact of these events increasing due to the Project, and how this will be mitigated, need further understanding.</p> <p>Updated position (Deadline 1): There must be a process to inform and consult WSFRS on changes or disruption to fixed installations and defined areas used to support effective firefighting and emergency response operations throughout the construction phase? It is foreseeable that firefighting systems and defined areas will be temporarily taken out action or decommissioned. In most circumstances, WSFRS will need to be aware of this state for its operational response planning. In addition, equal consideration will need to be applied to the closure or diversion of vehicle routes used for emergency response and access.</p> <p>In the planning phase, the Applicant must provide a detailed outline of their process and methods for ongoing communication with WSFRS during construction regarding any infrastructure changes that support firefighting and emergency operations.</p> <p>Updated position (Deadline 5): No change in position</p>	<p>The risk of potential terrorist activities is not really a function of passenger numbers or forecourt development. The increased capacity associated with the Project would not therefore be expected to have a direct effect on this aspect.</p> <p>In addition, there are extensive mitigation and contingency measures in place to manage these risks. All security measures are confidential and cannot be detailed in the public domain.</p> <p>The following mitigation and management measures currently apply:</p> <ul style="list-style-type: none"> • CAP 1223: Framework for an Aviation Security (Civil Aviation Authority, 2018a). Security Management Systems (SeMS) provide a formalized, risk-driven framework for integrating security into the daily operations and culture of an entity. The SeMS enables an entity to identify and address security risks, threats, gaps and weaknesses in a consistent and proactive way. SeMS is not a mandated process but if an entity has SeMS which contain all the elements which are identified in CAP 1223, it will help the entity to meet the internal quality control provisions of articles 12, 13 and 14 of EC 300/20081. • <u>Guidance on policing at airports (National Policing Improvement Agency, 2011). The Project would be designed and operated in line with the Guidance on policing at airports (National Policing Improvement Agency, 2011) as is the case with the existing airport.</u> <p>Updated position (July 2024): <u>The Applicant provided a response to the position set out by WSCC on this matter at Deadline 4, in The Applicant’s Response to Deadline 4 Submissions submitted at Deadline 6 [REP6-090].</u></p>	<p>ES Appendix 5.3.4: Major Accidents and Disasters [APP-089]</p> <p><u>The Applicant’s Response to Deadline 4 Submissions submitted at Deadline 6 [REP6-090]</u></p>	<p>Under discussion <u>Agreed</u></p>
2.15.1.7	Major Accidents and Disasters	<p>WSFRS are adapting to the emergence of renewable energy systems and electric-powered vehicles and aircraft. Many risks and hazards are being identified that could endanger Firefighter safety and the public and, therefore, WSFRS requires further discussions regarding these</p>	<p>Fire prevention and emergency measures currently employed as part of Gatwick Airport operations would be in place and extended to the Project. During construction, specific fire prevention and emergency measures would be developed and set out in the CoCP.</p>	<p>ES Appendix 5.3.4: Major Accidents and Disasters [APP-089]</p>	<p><u>Agreed</u></p>

		<p>systems and provisions which is currently lacking in the DCO submission documents. This is a particularly live issue given the multi-storey car park fire at Luton Airport on 11 October 2023.</p> <p>Updated position (Deadline 1): Will the Applicant collaborate with WSFRS alongside the Local Authority in the planning phase to review the best available information and safety controls associated with renewable energy systems and technology?</p> <p>The emergence of renewable energies and the drive to net zero has created significant safety risks and uncertainties for the UK Fire Service sector to mitigate.</p> <p>Updated position (Deadline 5): Can the Applicant confirm that they will consult with WSFRS regarding this subject? This will enable WSFRS to comprehensively understand all new and upcoming energy practices being applied at the airport and part of this project's scope. Doing so will help WSFRS effectively anticipate and address any potential risks and hazards and establish appropriate strategies and procedures for managing these in the event of an emergency.</p> <p><u>Updated position (12 August 2024)</u> <u>WSFRS is asking the Applicant to collaborate with them on anything that could potentially affect its emergency response during the different phases of the project - design, construction and operation. This collaboration will give WSFRS the assurance it needs to plan for any uncertainties in responding to all foreseeable emergencies at the airport or in its vicinity during this time.</u></p>	<p>The intent is to give an indication of future Project risk management through a description of present-day (and well-established) practices.</p> <p><u>Update position (Deadline 6): GAL will engage with WSFRS at the detailed design stage regarding adapting to the emergence of renewable energy systems and electric-powered vehicles and aircraft.</u></p>

2.16. Noise and Vibration

2.16.1 Table 2.16 sets out the position of both parties in relation to noise and vibration matters.

Table 2.16 Statement of Common Ground – Noise and Vibration Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.16.1.1	Road traffic noise - Noise monitoring duration.	<p>One 20-minute survey and one 10- minute survey is not sufficient to provide data suitable for validation of the road traffic noise model and indeed these data are not used as such. There is therefore no validation of the road traffic noise model in terms of measured levels.</p> <p>Updated position (Deadline 5): Additional information is accepted</p>	<p>A sensitivity test of taxiing noise modelling with the slower transition fleet will be provided.</p> <p>Ground noise impacts are generally determined by the extent to which ground noise exceeds ambient noise, usually road traffic noise, so ground noise impacts are greatest when ground noise levels are highest in 2032.</p> <p>Ground noise contours were discussed with the TWG. Because ground noise impacts are determined by the change in ground noise and the extent to which it exceeds ambient noise, contours of ground noise levels can be misleading and are not considered helpful to depict area of impact in the ES.</p> <p>Updated Position (April 2024): The Applicant has produced Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix D - Traffic Noise Important Area Assessment [REP3-071]. This Technical Note summarises the approach and methodology used in the ES to assess road traffic noise in Noise Important Areas (NIAs) and in specifying mitigation as part of the ES Project design for the Gatwick DCO submission, as requested by National Highways. In addition, in response to comments from the Local Authority and National Highways, the note also summarises the approach to using existing measured baseline noise levels to validate the road traffic noise model.</p>	<p>ES Appendix 14.9.3: Ground Noise Modelling [APP-173]</p> <p>Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix D - Traffic Noise Important Area Assessment [REP3-071]</p>	Agreed
Assessment methodology					
2.16.2.1	Local planning policies	<p>Local planning policies are set out in Table 14.2.2 but no information is provided on how these policies are addressed in the ES.</p> <p>Updated position (Deadline 1): Local planning policies should be covered in detail with information provided regarding where they have been addressed in the ES.</p> <p>Updated position (Deadline 5): Local planning policies and how they have been addressed in the noise assessment should be covered.</p> <p>Updated position (12 August 2024): the Applicant has not provided any information to address this point.</p>	<p>The relevant planning policies relating to noise and vibration have been identified in the assessment and reference to them is made where relevant in the ES, e.g. Planning Advice Document Sussex is used to assess fixed sources of ground noise, see para 7.1.2 of ES Appendix 14.9.3: Ground Noise Modelling [APP-173]. Planning polies and how they are addressed in relation to the application is principally addressed in the Planning Statement.</p>	<p>ES Appendix 14.9.3: Ground Noise Modelling [APP-173]</p> <p>Planning Statement [APP-245]</p>	Not Agreed

<p>2.16.2.2</p>	<p>Assessment periods (Construction noise)</p>	<p>Table are provided for daytime and night-time construction noise predictions. However, no identification of evening construction works has been provided.</p> <p><u>The information provided by the Applicant does not address the concerns. The most important point is that construction noise barriers have been relied upon in the construction noise assessment to avoid significant effects but are not secured anywhere in the DCO. Section 61 is NOT a reliable means of securing mitigation as it allows for significant effects to occur. The acoustic barriers MUST be secured in the DCO or the construction noise assessment cannot be relied upon.</u></p>	<p>ES Appendix 14.9.1: Construction Noise and Vibration describes the Construction Noise Model identifying assumptions on the plant used, for which construction activities and in which period (day, night or both).</p> <p>Tables 14.9.1 and 14.9.2 provide predicted levels of construction noise for 24 periods during construction at community receptors in each of 12 receptors Areas, for daytime and night-time.</p> <p>Paras 14.9.5 and 14.9.46 of ES Chapter 14: Noise Vibration explain that construction will be carried out in accordance with ES Appendix 5.3.2 Code of Construction Practice. Table 14.9.3 of Chapter 14, identifies relevant “Best Practical Means” measures which will be adopted. Where noise barriers have been identified as practicable they have been included within the assessment as discussed in paras 14.9.50 – 14.9.52.</p> <p>Updated position (Deadline 9) <u>The construction noise barriers identified in paras 14.9.50 – 14.9.51 were discussed and agreed as practicable with the GAL construction team. For example, they are located on site boundaries and will not interfere with access of other requirements. Paragraph 5.9.4 of the CoCP requires the contractor to use Best Practicable Means including the provision of noise barriers (bullet point 2). Therefore, if noise mitigation is required these noise barriers will be provided to meet this requirement. If the contractor finds other ways to reduce noise levels (for example through quieter plant) to avoid impacts they may not be. The Local Authority will be asked to vet the final choice of mitigation within the Section 61 Application before work begins to ensure the BPM requirement is met once the final methods of working are known.</u></p>	<p>ES Appendix 14.9.1: Construction Noise and Vibration [APP-171]</p> <p>Tables 14.9.1, 14.9.2, 14.9.3 and paras 14.9.5 and 14.9.46 and 14.9.50 to 14.9.52 of ES Chapter 14: Noise Vibration [APP-039]</p> <p>ES Appendix 5.3.2: Code of Construction Practice (Doc Ref. 5.3)</p>	<p><u>Not</u> Agreed</p>
<p>2.16.2.3</p>	<p>Assessment of vibration effects from road construction</p>	<p>The assessment only considers effects from sheet piling and does not consider vibration effects from vibratory compactors and rollers used in highway construction.</p> <p>Updated position (Deadline 5): potential exceedances of the SOAEL are identified in the assessment of vibration emissions from compactors and rollers. The Applicant should provide information as to how potential vibration impacts would be managed and levels monitored/controlled to ensure that the SOAEL is not exceeded in practice.</p> <p>Updated position (12 August 2024): An exceedance of the SOAEL means that the Project does not align with NPSE aims and should be avoided regardless of duration. WSCC would like the Applicant to provide information as to how potential vibration impacts would be managed and levels monitored/controlled to ensure that the SOAEL is</p>	<p>Vibratory compactors and rollers used in the highway construction are not expected to be sufficiently close to noise sensitive receptors to give rise to significant vibration effects. A note providing further details on the use of vibratory compactors and rollers will be provided to the TWG.</p> <p>Updated Position (April 2024): The Applicant has provided an assessment of vibration from compaction and rollers which explains how this will not give rise to significant effects in Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix A - Construction Vibration [REP3-071].</p> <p>Updated position (July 2024) <u>The Applicant has provided assessment of construction vibration as requested by the local authority as referenced above. In paragraph 4.1.2 this concludes:</u></p>	<p>Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix A - Construction Vibration [REP3-071]</p>	<p><u>Not</u> Agreed Under discussion</p>

		<p><u>not exceeded in practice. The Applicant has not provided this, so the matter is considered not agreed.</u></p>	<p><u>It is unlikely that vibratory compaction will result in vibration magnitudes above SOAEL for a sustained period of time within any particular shift or during a particular phase of works. Therefore applying the DMRB criterion set out in paragraph 2.1.2, vibratory compaction will not give rise to significant effects.</u></p> <p><u>4.1.3 When works are further from the receptor, the vibration is unlikely to exceed the SOAEL value at all. Therefore, the effects are expected to be generally between the LOAEL and SOAEL at times and may be perceptible, but are not expected to result in significant vibration impacts. For this reason, they have been classed as Minor Adverse based on the methodology in the ES.</u></p> <p><u>Paragraph 2.1.2 states the DMRB guidance that for a significant effect to arise the 1.0mm/s PPV value must be exceeded 10 or more days or nights in any 15 consecutive days or nights; or a total number of days exceeding 40 in any 6 consecutive months. The assessment concludes this will not arise so significant effects are not predicted, mitigation is not required so monitoring is not required.</u></p> <p><u>Updated position (Deadline 9)</u></p> <p><u>The CoCP requires vibration monitoring where a risk is identified.</u></p>		
2.16.2.4	Air noise – No assessment criteria is provided for the assessment of effects on non-residential receptors	<p>Assessment criteria based around the LOAEL and SOAEL focuses on noise effects at residential receptors. Non residential receptors should be considered on a case-by-case basis.</p> <p>Updated position (Deadline 1): Paragraph 14.4.76 [APP-039] states: <i>“For non-residential buildings specific noise assessment criteria are used where significant noise increases are expected above the threshold levels described above, with reference to their particular use, design and circumstances”.</i></p> <p>No specific noise assessment criteria for non-residential receptors are defined. Additionally, the assessment of non-residential receptors is included in secondary noise metrics, which the Applicant identifies are not for identifying significant effects and are for context only.</p> <p>Updated Position (Deadline 5): It is noted that the Applicant has provided detailed non-residential screening criteria in The Applicant's Response to ExQ1 - Noise and Vibration [REP3-101]. The criteria is not agreed as it contains an error and criteria for schools is based on measured noise data at a school near London Luton Airport, which is not relevant to Gatwick.</p>	<p>The methodology for assessing non-residential receptors is summarised in ES para 14.4.76. Non-residential noise sensitive receptors include: Educational facilities (schools, colleges, nurseries) doctors medical centres, hospitals, auditoria (concert halls, theatres, sound recording and broadcasting studios), places of worship, offices, museums, community and village halls, courts, libraries, hotels etc. Noise assessment criteria for these can be drawn from various guidelines and in all cases are $L_{eq\ 16\ hour}$ 50dB or 55dB. Noise change criteria for significant effects are in all cases 3dB or more. Hence, it is reasonable to use the residential $L_{eq\ 16\ hr}$ 51dB LOAEL as a scoping threshold for non-residential receptors. As noted in ES para 14.4.76 for non-residential buildings, sensitivity to noise tends to depend not just on the building use, but also its construction and other factors. Therefore, where noise levels above the scoping criterion are identified they are assessed in a case by case basis.</p> <p>Construction noise has been modelled at all buildings regardless of use. The residential daytime and where relevant night-time LOAEL was used to scope impacts at all receptors including non-residential. Paragraphs 14.9.17 to 14.9.43 identify various schools, churches, open spaces, hotels</p>	<p>ES Chapter 14: Noise and Vibration [APP-039]</p> <p><u>Applicant's Response to ExQ1 - Noise and Vibration [REP3-101].</u></p>	<p>Not Agreed</p>

		<p>Updated Position (12 August 2024): WSCC accept the use of Luton Airport's non-residential screening criteria, which has been tested through DCO examination.</p>	<p>and offices where these could be exceeded and Table 14.9.4 identified mitigation and on a case by case basis where impacts are likely.</p> <p>Non-residential receptors were considered in assessing the worst affected properties for baseline surveys, with measurements carried out and used to characterise the ambient noise levels at non-residential receptors in two of the 13 Noise Sensitive Receptor Areas used in the ground noise assessment. Ground noise has been modelled at all buildings regardless of use. The residential LOAELs were used to scope impacts at all receptors including non-residential. Appendix 14.9.3 provides predicted noise levels at schools, offices, a care home and an aquatic centre and assesses impacts where relevant on a case by case basis.</p> <p>The air noise assessment provides modelled noise levels at non-residential properties to scope impacts above the residential LOAELs. Figure 14.9.32 (Doc Ref. 5.2) shows 50 noise sensitive community buildings (21 schools, one hospital, 18 places of worship and 7 community buildings) for which noise levels are predicted and assessed. The seven Community Representative Locations chosen to describe impacts in more detail in para 14.9.150 to 14.9.158 are non-residential (6 schools and one care home).</p> <p>Road traffic noise has been modelled at all buildings regardless of use. The residential LOAELs were used to scope impacts at all receptors including non-residential. Noise changes in the Riverside Garden Park have been assessed in detail. Potential noise impacts at two hotels and the Gatwick Airport Police Station are assessed on a case by case basis.</p> <p>Updated Position (April 2024): The Applicant has provided a further response on this including criteria for non-residential receptors and a full description of how they have been assessed in The Applicant's Response to ExQ1 - Noise and Vibration (Doc Ref 10.16), question NV.1.7.</p> <p>Updated position (July 2024)</p> <p>The error in The Applicant's Response to ExQ1 - Noise and Vibration [REP3-101]. in relation to noise change at schools above $L_{Aeq,16hr}$ 63dB is not relevant because as noted in the Applicant's response to ExA question NV.1.7 the largest increase in air noise at any school is $L_{Aeq,16hr}$ 1.4dB in 2032 with the Project compared to the 2032 baseline, which is not significant.</p>		
--	--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

<p>2.16.2.5</p>	<p>Air noise - Only 2032 assessment year is assessed as a worst-case</p>	<p>The assessment only covers 2032 as it is identified as the worst-case; however, identification of significant effects for all assessment years should be provided.</p> <p>Updated position (Deadline 1): All assessment years (2029, 2032, 2038 and 2047) should be covered in the assessment to understand temporal effects on the local population</p> <p>Updated position (Deadline 5): WSCC maintain their position on this matter.</p> <p>Updated position (Deadline 8): WSCC maintain their position on this matter.</p>	<p>The noise modelling method is summarised in Section 2 of Appendix 14.9.2 and was explained in a CAA ERCD presentation and slide deck hand out to the TWG on 7th June 2022.</p> <p>GAL engaged with the LPAs before and after the PEIR to discuss and explain the scenarios modelled and reported in the ES. These comprise:</p> <ul style="list-style-type: none"> • 8 metrics - Leq 16 hr, Leq 8 hr night, N65 day, N60 night, Lden, LNight, Lmax and overflights; • 5 assessment years – 2019, 2029, 2032, 2038 and 2047 • 2 Fleet transition scenarios, the Central Case and Slower Transition Case. <p>These are presented in 71 figures in the ES relating to air noise impacts with the data tabulated in Appendix 14.9.2. LPAs have also been given access to an air noise web viewer to download air noise contours. This is considered a suitable set of noise modelling scenarios to allow the ES as written to describe the likely significant effects of the Project.</p> <p>Updated position (July 2024)</p> <p>ES Table 14.9.7 provides population estimates for day and night noise contours for 2019 and with the Project for 2029, 2032, 2038 and 2047 illustrating that populations affected above LOAEL are highest in 2032 and hence that noise levels are highest in this assessment year. Table 3.2 within the Environmental Statement Addendum – Updated Central Case Aircraft Fleet Report (ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]) confirms this position for the updated central case fleet. The series of tables ES Appendix 14.9.2 provide further detail for each assessment year, and the air noise figures for each assessment year also depict this. Table 14.9.8 within the Noise and Vibration ES Chapter 14 and Table 3.3 within the ES Addendum – Updated Central Case Aircraft Fleet Report [REP4-004] show the increases in the areas of the various noise contours in each assessment year, that are greatest in 2032 indicating the largest noise increases in this year. Hence 2032 will have the greatest noise impacts and the highest noise levels and is therefore used to determine the extent of noise mitigation required, including the contour areas for the noise insulation scheme zones. The impacts in 2029, 2038 and 2047 will be lower than in 2032, and the ES (which includes the Updated Central Case Aircraft Fleet Report Addendum [REP4-004] reports the likely significant impacts of the project, providing sufficient information for the impacts in each year to be understood and to confirm that the mitigation which is proposed is based on the worst-case and will be adequate to mitigate effects in all assessment years.</p>	<p>ES Noise and Vibration Figures Part 1 [APP-063]</p> <p>ES Noise and Vibration Figures Part 2 [APP-064]</p> <p>ES Noise and Vibration Figures Part 3 [APP-065]</p> <p>ES Appendix 14.9.2: Air Noise Modelling [APP-172]</p> <p>ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]</p>	<p>Not Agreed</p>
------------------------	--------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------

<p>2.16.2.6</p>	<p>Air noise - No attempt has been made to expand on the assessment of likely significant effects through the use of secondary noise metrics.</p>	<p>Context is provided to the assessment of ground noise through consideration of the secondary L_{Amax}, overflight, L_{den} and L_{night} noise metric; however no conclusions on how this metric relates to likely significant effects have been made so the use of secondary metrics in terms of the overall assessment of likely significant effects is unclear.</p> <p>Updated position (Deadline 1): Supplementary noise metrics should be used supplement the primary metric assessment to identify likely significant effects.</p> <p>Updated position (Deadline 5): Reference to the ground noise assessment is not relevant. WSCC maintain their position on this matter.</p> <p>Updated position (12 August 2024): WSCC query the inclusion of text relating to construction vibration. WSCC maintain their position on this matter. There should be clear criteria as to how the Applicant identifies significant effects using the L_{Amax} metric. These effects should NOT relate to how changes in ground noise L_{Aeq,T} levels may be perceived as different noise sources are considered for L_{Amax} and L_{Aeq,T} metric. Any significant effects from both metrics at individual locations should be considered as a cumulative significant effect.</p>	<p>Paragraph 14.4.79 of the ES explains: The assessment of significance is based primarily on the predicted levels and changes in the primary noise metrics and the factors described above, but additional noise metrics (the secondary noise metrics) are used to provide more detail on the changes that would arise.</p> <p>Updated Position (April 2024): For ground noise the change in number of L_{max} events above 65dB in the day and 60dB at night has also been used in addition to L_{eq} levels in some cases in arriving at the overall assessment of significance, for example in the Charlwood, Riverside Horley, Bonnetts Lane, and Lowfield Heath Assessment Areas as discussed in Section 8 of ES Appendix 14.9.3 Ground Noise Modelling [APP-173].</p> <p>Updated position (July 2024) The Applicant has provided assessment of construction vibration as requested by the local authority as referenced above. In paragraph 4.1.2 this concludes: <i>It is unlikely that vibratory compaction will result in vibration magnitudes above SOAEL for a sustained period of time within any particular shift or during a particular phase of works. Therefore applying the DMRB criterion set out in paragraph 2.1.2, vibratory compaction will not give rise to significant effects.</i></p> <p><i>4.1.3 When works are further from the receptor, the vibration is unlikely to exceed the SOAEL value at all. Therefore, the effects are expected to be generally between the LOAEL and SOAEL at times and may be perceptible, but are not expected to result in significant vibration impacts. For this reason, they have been classed as Minor Adverse based on the methodology in the ES.</i></p> <p>Paragraph 2.1.2 states the DMRB guidance that for a significant effect to arise the 1.0mm/s PPV value must be exceeded 10 or more days or nights in any 15 consecutive days or nights; or a total number of days exceeding 40 in any 6 consecutive months. The assessment concludes this will not arise so significant effects are not predicted, mitigation is not required so monitoring is not required.</p>	<p>Para 14.4.79 of ES Chapter 14: Noise and Vibration [APP-039]</p> <p>ES Appendix 14.9.3 Ground Noise Modelling [APP-173]</p>	<p>Not Agreed</p>
<p>2.16.2.7</p>	<p>Air noise - No details of the noise modelling or validation process are provided. No details of measured Single Event Level or L_{ASmax}</p>	<p>Provision is needed of the assumptions and limitation that have been applied in the validation of the noise model and production of noise contours.</p>	<p>CAA ERCD gave a presentation to the TWG on 7th June 2022 on the ANCON model and its validation, and it was discussed at the TWG. The slide deck provided for this meeting included SEL and L_{max} levels from the Gatwick NTK and how they are used to validate the model every year. Further information has been added to the ES Appendix 14.9.2 Section 2.1 describing the air traffic forecasts used, the distribution across routes and</p>	<p>n/a Appendix G - Response to the JLAs' Comments at Deadline 4 on the Noise and Vibration</p>	<p>Not Agreed</p>

	<p>noise data from the Noise-Track-Keeping are provided.</p>	<p>Updated position (Deadline 1): Details should be provided of the validation process and noise modelling processes with any noise model assumptions and limitations</p> <p>Updated position (Deadline 5): The information on aircraft fleets is welcomed; however, no information has been provided on the validation process and noise modelling processes with any noise model assumptions and limitations. This information underpins the air noise assessment and is essential to understanding the composition of air noise contours.</p> <p>Updated position (12 August 2024): The Applicant has provided information on the validation of the Boeing 737-800 aircraft only [REP5-079]. The issue regarding the lack of information on air noise model validation was raised at ISH9 and the Applicant responded that the data was confidential to the CAA and could not be released. The JLAs have since contacted the CAA who stated they would release the data with the consent of the Applicant. The JLAs await provision of the following information</p> <p>i) the results of statistical analysis of SEL and Lmax data for individual aircraft at each monitoring location that feed into the validation process at Gatwick along with a figure showing the monitoring locations on a map.</p> <p>And:</p> <p>ii) a comparison of the measured SEL and Lmax data against predicted levels for each aircraft. We would like to see this information for all aircraft that make up 75% of the noise energy at the airport</p>	<p>runways, flight dispersion adopted, height and speed profiles, source terms for next generation aircraft and the ANCON model and referring to <i>ECRD Report 2002: Noise Exposure Contour for Gatwick Airport 2019</i> for further details.</p> <p>ERCD has been producing noise contours for Gatwick airport using the ANCON model since 1988 including annual contours every year. Up until 2015 the contours were produced for the DfT, and since then they have been carried out for GAL. ERCD has a team who maintain the model and calibrate it for Gatwick Airport using thousands of data points every year. ANCON is used on other UK airports as well as for international studies, and is considered the most accurate tool available to model noise from Gatwick Airport. It is strongly refuted that it is difficult to have confidence in the noise model based on the information provided.</p> <p>Updated Position (April 2024): The Applicant has provided full details of the aircraft types modelled each year in Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix F - Aircraft Fleets for Noise Modelling (Doc Ref 10.13.6).</p> <p>Updated position (July 2024)</p> <p>The information on the ANCON model validation is provided in Annex a of 10.38 Appendix G - Response to the JLAs' Comments at Deadline 4 on the Noise and Vibration Technical Notes [REP5-079].</p> <p>Updated Position (Deadline 9)</p> <p>In ISH9 The Applicant explained how a mass of noise measurements are used by ERCD to calibrate the Gatwick model each year, and that a sample of that has been shared with the noise Topic Working Group last year. The Applicant did not say this noise measurement data is confidential to the CAA. This would have contacted the explanation he was providing that some of it has been shared. The Applicant actually said (See Recording of ISH9 Day 1 Part 2; 30 July 2024) time: 1:18:25) 'The databases that sit behind that are in fact confidential to the CAA'. That database is the core of the model that it uses to predict SEL and Lmax noise levels. Termed the Aircraft Noise Performance database, ERCD has confirmed this is confidential and will not be released to the JLAs.</p> <p>Since Deadline 8, ERCD has shared with the Applicant their analysis of 165,000 noise measurements carried out at 20 Noise and Track Keeping monitors around Gatwick in 2018 and 2019 used to validate the noise ANCON noise model that has been used for this Project. The Applicant understands ERCD has now supplied this dataset to the JLAs. The Applicant trusts this now puts an end to concerns that the ANCON model is</p>	<p>Technical Notes [REP5-079]</p>	
--	--------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------	--

			not properly validated for this study. The Applicant has been clear from the start that the ANCON model is fully validated and is the best model for the Project.																																																																			
2.16.2.8	Assessment Methodology	<p>For the ground noise and air noise assessments, changes in noise should be identified for receptors/population experiencing noise levels between LOAEL and SOAEL and for those experiencing noise levels exceeding SOAEL.</p> <p>Updated position (Deadline 1): Table 14.9.10 and Table 14.9.11 should be updated to show population exposed to changes in noise between LOAEL and SOAEL and above SOAEL.</p> <p>Updated position (Deadline 5): ECRD Report 2002 does not contain the information requested. The information is important to understand the aircraft noise contours and underpins the air noise assessment. The information was initially requested after the WSCC review of the PEIR and the Applicant has continually not fulfilled the request.</p> <p>Updated position (Deadline 8): Refer to their response in row 2.16.2.7 regarding this matter</p>	<p>For air noise, Tables 14.9.10 and 14.9.11 of ES Chapter 14 give the populations predicted to have various changes in noise from across 9 ranges. Only noise levels above LOAEL are reported.</p> <p>Paragraphs 14.9.102 to 14.9.104 describe where these significant changes are expected. 40 have changes above 3dB all above SOAEL. 40 have changes of 1dB above SOAEL. These are the 80 significantly affected by the Project.</p> <p>For ground noise the changes in noise and whether they are above LOAEL and/or SOAEL are described in the Section 8.1 of ES appendix 14.9.3 across each of the 12 noise sensitive receptor areas.</p> <p>Updated position (July 2024)</p> <p>The information on the ANCON model validation is provided in Annex a of 10.38 Appendix G - Response to the JLAs' Comments at Deadline 4 on the Noise and Vibration Technical Notes [REP5-079].</p>	<p>Paragraphs 14.9.102 to 14.9.104 and Tables 14.9.10 and 14.9.11 of ES Chapter 14 Noise and Vibration [APP-039]</p> <p>ES Appendix 14.9.3 Ground Noise Modelling [APP-173]</p>	Not Agreed																																																																	
2.16.2.9	Construction Noise (and Vibration)	<p>No information is provided on how the LOAEL is defined at sensitive receptor locations in accordance with Table 14.4.4 of ES Chapter 14 Noise and Vibration (APP-039).</p> <p>Updated position (Deadline 1): The process when defining LOAEL and SOAEL should be detailed including ambient noise levels at each receptor group and the corresponding ABC defined construction noise thresholds for relevant time periods</p> <p>Updated position (Deadline 5): No information on this matter has been provided by the Applicant and WSCC maintain their position.</p> <p>Updated position (12 August 2024) The Applicant has not provided this information, therefore, this matter is not agreed.</p>	<p>Paragraphs 14.9.8, 14.9.9, 14.9.13 and 14.9.14 of the ES Chapter 14 give construction noise LOAELs and SOAELs. These are derived from Table 14.4.4 using baseline noise levels that were either measured in 2016 or modelled in the road traffic noise baseline model rounded to the nearest 5dB as required in the BS5228 ABC method.</p> <p>Updated position (July 2024) C5 A table giving the timing of each noisy works modelled will be provided.</p> <p>Updated Position (Deadline 9) The full set of ABCs across all receptor areas is as follows.</p> <table border="1"> <thead> <tr> <th></th> <th>Day Level</th> <th>Night Level</th> <th>BS5228 Category Day</th> <th>BS5228 Category Night</th> </tr> </thead> <tbody> <tr><td>Balcombe Road</td><td>70</td><td>55</td><td>B</td><td>C</td></tr> <tr><td>Riverside, Horley</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Longbridge Road, Horley</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Povey Cross</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Farmfield</td><td>65</td><td>50</td><td>A</td><td>B</td></tr> <tr><td>Charlwood Road</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Outer Charlwood</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Charlwood</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Bonnets Lane</td><td>70</td><td>55</td><td>B</td><td>C</td></tr> <tr><td>Lowfield Heath</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Rowley Farm</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> <tr><td>Tinsley Green</td><td>65</td><td>55</td><td>A</td><td>C</td></tr> </tbody> </table>		Day Level	Night Level	BS5228 Category Day	BS5228 Category Night	Balcombe Road	70	55	B	C	Riverside, Horley	65	55	A	C	Longbridge Road, Horley	65	55	A	C	Povey Cross	65	55	A	C	Farmfield	65	50	A	B	Charlwood Road	65	55	A	C	Outer Charlwood	65	55	A	C	Charlwood	65	55	A	C	Bonnets Lane	70	55	B	C	Lowfield Heath	65	55	A	C	Rowley Farm	65	55	A	C	Tinsley Green	65	55	A	C	<p>Paragraphs 14.9.8, 14.9.9, 14.9.13 and 14.9.14 of ES Chapter 14 Noise and Vibration [APP-039]</p>	Not Agreed

2.16.2.10	Construction Noise (and Vibration)	<p>It is unclear what construction activities are occurring within each assessment scenario.</p> <p>Updated position (Deadline 1): There is no information on what construction activities are taking place during each modelled scenario. This information should be presented clearly in the ES.</p> <p>Updated position (Deadline 5): The Applicant has not addressed this. A more clear and concise way to present this would be by adding an additional column to Table 2.1.1 [APP-171] that identified what scenarios each activity occurred in.</p> <p><u>Updated position (12 August 2024)</u> <u>The Applicant has not provided this information, therefore, this matter is not agreed.</u></p>	<p>This issue has been responded to previously at Row 13.40 of Table 13 in Appendix 1.</p> <p>Paragraphs 14.9.1 to 14.9.3 of ES Chapter 14 explain how one or more of 17 activities has been modelled at each of 170 areas of works within one or more of 24 periods across the 15 year construction programme from 2024 to 2038. There is no more concise and clear way to present this in an ES. In the TWG on 4th January 2023 we showed the construction noise model and examples of the activities in some works areas. Further examples of the construction noise model can be shown to the TWG.</p> <p><u>Updated position (July 2024)</u> <u>A table giving the timing of each noisy works modelled will be provided.</u></p> <p><u>Updated Position (Deadline 9)</u> <u>Two tables, Construction Noise Model, Airfield Works Programme and Construction Noise Model, Highways Works Programme, were provided to the Topic Working Group following the TWG meeting on 18 July 2024, providing further details of which areas of construction work were modelling in the relevant year.</u></p>	<p>Paragraphs 14.9.1 to 14.9.3 of ES Chapter 14 Noise and Vibration [APP-039]</p>	Not Agreed
2.16.2.11	Air Noise	<p>Aircraft fleets are not provided for the 92-day summer period (APP-172). It is difficult to understand what has been modelled and how fleet transition would occur without provision of aircraft fleets. Aircraft fleets used in noise models should be provided along with how the fleet is split between the two runways.</p> <p>Updated position (Deadline 1): Details of fleets for all assessment scenarios should be submitted along with how aircraft are distributed between the runways.</p> <p>Updated position (Deadline 5): Information on fleets has been accepted; however, the Applicant should identify why the composition of the slower transition fleet is so different to the composition of the central case fleet.</p> <p><u>Updated position (12 August 2024):</u> Information has been accepted; however WSCCs position is that the original Central Case represents the most likely future fleet.</p>	<p>The fleets forecast are described in the Forecast Data Book and ES Appendix 14.9.5: Air Noise Envelope Background, however, this does not include full tables of the ANCON model types on the average summer day and night periods, which will be provided to the noise TWG.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix F - Aircraft Fleets for Noise Modelling [REP3-071].</p> <p><u>Updated position (July 2024)</u> <u>Details of the fleets have been provided and accepted. With regards to model validation, further information model validation is provided in 10.38 Appendix G - Response to the JLAs' Comments at Deadline 4 on the Noise and Vibration Technical Notes [REP5-079].</u></p> <p><u>The Applicant has provided the information requested.</u></p> <p><u>An explanation as to how the fleet transition is forecast is provided in Chapter 2 of 5.1 ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]</u></p>	<p>ES Appendix 4.3.1 Forecast Data Book [APP-075]</p> <p>ES Appendix 14.9.5: Air Noise Envelope Background [APP-175]</p> <p>Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix F - Aircraft Fleets for Noise Modelling [REP3-071]</p> <p><u>Appendix G - Response to the JLAs' Comments at</u></p>	Not Agreed

				Deadline 4 on the Noise and Vibration Technical Notes [REP5-079]. ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]	
2.16.2.12	Air Noise	<p>Two scenarios are considered (Central Case and Slow-Transition Case) except for when properties exceeding the SOAEL are identified. It is not clear what scenario is considered for identifying receptors exceeding the SOEL and how many properties are exposed for each scenario, including new receptors identified to determine compliance with the first aim of the Airports National Policy Statement.</p> <p>Updated position (Deadline 1): This information should be provided in the ES so it is clear an understandable</p> <p>Updated position (Deadline 5): One scenario, which represents the most likely scenario, should be assessed. The air noise assessment should clearly assess population experiencing noise levels between LOAEL and SOAEL and population experiencing noise levels exceeding SOAEL.</p> <p>Updated position (12 August 2024): WSCCs position is that Chapter 14 should be updated to assess one scenario only and this should be the original Central Case.</p>	<p>The population exceeding SOAEL for each fleet are provided as the upper and lower end of each range provided in each cell of Table 14.9.7.</p> <p>Where properties experiencing significant increases are discussed and identified in paragraphs 14.9.102 to 14.9.105 these are for the slower transition case, i.e. the worst case. The day and night SOAEL contours for the two fleets are within 50-100m of each other in the majority of the populated areas, that are all rural with low population densities, so the equivalent populations to be identified for the Central Case fleet would be very similar but slightly lower in number.</p> <p>Updated position (July 2024) The Applicant has provided an assessment of noise impacts for the Updated Central Case fleet in ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004] and in ISH8 and Deadline 6 submissions ES Appendix 14.9.7 The Noise Envelope - Version 3 – Tracked [REP5-030] confirmed its commitment to setting the noise envelope based on the Updated Central Case fleet. The population above LOAEL is 25,000 of which 1,100 are above SOAEL, as provided in that addendum report.</p> <p>Updated position (Deadline 9) The Applicant has provided 10.66 Consolidated Environmental Statement [REP8-120] which signposts all the documents relevant to the noise assessment that have been updated during the Examination in response to questions raised by Interested Parties.</p>	<p>ES Chapter 14 Noise and Vibration [APP-039] ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004] ES Appendix 14.9.7 The Noise Envelope - Version 3 – Tracked [REP5-030]</p>	Not Agreed
2.16.2.13	Ground Noise	<p>It is not clear if 'engine ground running', 'auxiliary power unit' and 'engine around taxi noise' is included in LAeq,T ground noise predictions. Consequently, ground noise LAeq,T levels may be understated. All ground noise sources should be included in LAeq,T predictions covering a reasonable worst-case day.</p>	<p>A technical note will be provided to the TWG providing further details of engine ground running noise levels which demonstrates their contribution to Leq levels will be insignificant.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common</p>	<p>Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix E – Ground Noise</p>	<p>Not Agreed Under discussion</p>

		<p>Updated position (Deadline 5): The Applicant has attempted to provide some indication on how engine testing would contribute to the LAeq,T metric with some rather outlandish assumptions. Paragraph 2.7.2 [REP1-050] states that peak engine testing noise levels would last for two minutes and events would occur, on average, 0.35 times per day. As such, engine testing LAeq,T noise has been calculated based on event lasting for 0.7 minutes (42 seconds); however, ground running events can last substantially longer. This is not an appropriate assessment of ground running noise. Engine ground running, auxiliary power unit, fire training ground activities and engine around taxi noise should all be included in LAeq,T ground noise predictions.</p> <p>Updated position (12 August 2024): WSCCs position remains that the LAeq,T is the most appropriate metric so assess engine ground run noise, which "...lasts in the region of 30-60 minutes". This is particularly important to understand effects of ground running activities at the western end of the Juliet runway. The JLAs would like to understand how receptors will be affected during the period when there will be no barrier/ bund in place to screen ground activities. This point could be addressed through a commitment that there would be no ground running activities at the western end of the Juliet runway during the period when the existing bund has been removed and the replacement barrier/bund fully built.</p> <p>The Applicant has used LAm_{ax} to assess significance of end around taxi, engine ground running and APU noise, as per the quote at Updated Position (Deadline 1) above. But there are no specific criteria to assess this so how can the significance of these noise sources be assessed.? How can LAm_{ax} be used to confirm significant effects from different noise sources?</p> <p>The LAm_{ax} metric is used to understand how changes in LAeq,T noise may be perceived but the Applicant's position is that the noise sources are not appropriate to be assessed using the LAeq,T metric.</p> <p>WSCCs position is that there should be clear criteria as to how the Applicant identifies significant effects using the LAm_{ax} metric. These effects should NOT relate to how changes in ground noise LAeq,T levels may be perceived as different noise sources are considered for LAm_{ax} and LAeq,T metric. Any significant effects from both metrics at individual locations should be considered as a cumulative significant effect.</p>	<p>Ground, Appendix E – Ground Noise Engine Ground Runs in Supporting Noise and Vibration [REP3-071] which provides further details and confirms the contribution of ground running noise to Leq, 16 hr noise levels is not significant.</p> <p>Updated position (July 2024) C7</p> <p>Engine Ground Running</p> <p>The Applicant has provided a full explanation of the engine ground running (EGR) noise assessment in the ES in Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix E - Ground Noise Engine Ground Runs (Doc Ref 10.13.5) [REP3-071]. Within this the information taken from the airport on the locations, duration and frequency of engine ground running that form the basis of the assessment is reported. This is also provided The Applicant's Response to ExQ1 - Noise and Vibration [REP3-101] ref NV.1.5.</p> <p>In the ES noise chapter [APP-039] it states, at paragraph 14.9.214, that in 2018 there were less than 200 EGR tests carried out across the year, which is based on a review of data supplied by the operations team. The actual recorded number of EGR tests in 2018 was 192 and for comparison, it was 195 in 2017 and 211 in 2019. The paragraph goes on to state that up to 267 EGR tests per year are forecast by 2038 with the Northern Runway Project. 267 EGRs per year is on average 0.7 EGRs per day, i.e. less than one per day. There are 4 locations where EGR tests can occur spaced around the airfield. The highest noise levels at any given noise sensitive receptor (NSR) will be from the nearest EGR, because the others are a considerable distance from it. The most used location takes about 50% of EGRs, so the worst case occurrence of EGR noise at any NSR is 50% of 0.7 per day, i.e. 0.35/day.</p> <p>As explained in REP3-071, during an engine test the engines are usually run at a thrust setting known as 'ground idle' for most of the time across a nominal test period in the region of 30 – 60 mins and only increase to higher thrust settings for brief periods within this. At ground idle noise levels are 10-15dB lower than at higher thrusts, (less than half as loud when judged subjectively) and do not contribute to Leq 16 hour noise levels significantly. From observations at Gatwick the typical period of the highest peak noise level with a sound power level of 148 dBA used in the predictions occur for up to 2 minutes during an engine test. The noise assessment uses this peak (L_{max}) noise levels to assess noise impacts. REP3-071 provides an assessment of the peak noise levels in each assessment area. Significant impacts are not identified.</p>	<p>Engine Ground Runs in Supporting Noise and Vibration [REP3-071]</p> <p>The Applicant's Response to the ExA's Written Questions (ExQ1) – Noise and Vibration [REP3-101]</p> <p>8</p>	
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

The JLAs have asked how EGRs contribute to Leq 16 hour noise levels and suggest it should be included in the assessment of Leq 16 hour noise levels. The contribution of EGR noise to Leq 16 hr noise levels is given in REP3-071 as about 0.1dB ie it is negligible (the same is the case when considering a worst case day with 1 EGR). The key parameters in calculating this are the peak noise level, the number of EGRs per day and the duration of the noise. These are all summarised above, based on observations and measurements at Gatwick. The JLAs comment suggests these assumptions are outlandish. The Applicant has shown these assumptions are realistic and demonstrated that the contribution of EGR noise to Leq 16 hr noise levels is insignificant. So not including EGR noise in the Leq assessment does not under-estimate noise impacts, and the approach of assessing occasional noise in terms of the peak noise levels, L_{max} is correct, as reported in the ES.

End Around Taxiways

ES Paragraph 14.9.219 discussed end around taxiways ('EATs') noting that: "In order to allow for a small number of Category F size aircraft under dual runway operation, EATs have been incorporated into the design". The paragraph goes on to broadly describe three locations which may be affected by the usage of EATs: "The only location which is affected by more than 1 dB L_{eq} through the inclusion of EATs (under westerly operation) is Westfield Place located adjacent to the end of the northern runway, within the Charlwood assessment area. The maximum noise levels (L_{max}) generated by the proposed EAT usage would be 2 to 4 dB higher than the currently modelled development case at two locations within the Bonnetts Lane assessment area (Amberley fields Campsite and Westfield House)". To be clear, the change of more than 1 dB L_{Aeq} at Westfield Place is actually only 1.2 dB and the change at the two locations within the Bonnetts Lane assessment area would be no more than 0.6 dB L_{Aeq} . The low numbers of Category F movements mean that the effects of EAT usage are generally better described by looking at maximum L_{max} rather than average (L_{Aeq}) noise levels. Modelled L_{max} noise levels at all assessment locations for EAT usage are given in ES Appendix 14.9.3 Table 6.2.3. Under westerly operation, anticipated EAT usage generates 16 hr L_{Aeq} levels that are 10 dB or more below L_{Aeq} levels generated by taxiing at all but three locations (as discussed above where it makes an insignificant contribution). Under Easterly operation, 16 hr L_{Aeq} levels related to EAT usage are all more than 18 dB below L_{Aeq} levels generated by taxiing.

Auxiliary Power Units

			<p>ES paragraph 14.9.217 and 14.9.218 discuss auxiliary power unit ('APU') noise. Internal (GAL) airport reports indicate that APUs are very rarely used on stand and that this occurs less than 3% of the time based on survey information. Modelled L_{max} noise levels from APU usage are given in ES Appendix 14.9.3 Table 6.2.3. Maximum levels generated by APU usage are generally comparable to or significantly lower than maximum levels generated by EAT usage and the APU usage is extremely low.</p> <p>Summary Where the worst-case maximum levels only have the potential to generate L_{Aeq} levels that are 10 dB (or more) below the L_{Aeq} generated by taxiing aircraft, this will not add significantly to predicted levels of ground noise from aircraft taxiing. The three locations where there is a potential for a small increase to L_{Aeq} relating to EAT usage have been identified at paragraph 14.9.219 of the ES. Effects at all other locations are better represented by using the secondary L_{max} metric which is reported for EGRs, EATs and APUs at tables 6.2.3 and 6.2.4 of Appendix 14.9.3 Ground Noise Modelling.</p>		
2.16.2.14	Ground Noise	<p>The ground noise assessment only accounts for the worst-case location (Rowley Cottages) and contextualises the 82 dB L_{Amax} predictions by identifying car pass-by L_{Amax} levels of 80 dB. However, there is no attempt to contextualise L_{Amax} engine ground running noise at any other receptor location. The assessment of engine ground noise should cover all assessment locations.</p> <p>Updated position (Deadline 5): The logic that aircraft taxiing noise L_{Amax} noise levels are high so ground running noise L_{Amax} noise levels are not significant is inherently flawed.</p> <p>Updated position (12 August 2024): Can the Applicant direct WSCC to the commitment secured in the DCO to minimise use of ground running locations on taxiways Juliet and Yankee which are closest to residential receptors? There is a lack of this commitment currently.</p>	<p>A technical note will be provided to the TWG providing further details of engine ground running noise levels which demonstrates their contribution to Leq levels will be insignificant.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix E - Ground Noise Engine Ground Runs in Supporting Noise and Vibration (Doc Ref. 10.13.3) which provides full contextualization at the other potentially affected properties.</p> <p>Updated position (July 2024) Engine testing, roughly once every 3 days, if relevant to a particular receptor, will be perceived in the context of the baseline that includes all existing airport noise including taxiing noise that occurs as a result of a forecast of 816 aircraft taxiing in the airfield per 16 hour day in the 2032 baseline. Furthermore, these isolated noise events will not be happening any closer to residential receptors than in the baseline scenarios and will therefore not be getting any louder. It is only the Block 38S location which is changing as part of the project and as stated at paragraph 14.9.215 of the ES, the intention is to minimise use of locations on taxiways Juliet and Yankee which are closest to residential receptors. The predicted frequency of occurrence of the highest maximum levels is set out in a table at paragraph 2.6.3 of Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix E - Ground Noise Engine Ground Runs (Doc Ref 10.13.5) where it can be seen that numbers of events are predicted to reduce for 4 out of 6 assessment areas with the</p>	n/a	<p>Not Agreed Under discussion</p>

			<p>development compared to the baseline. Whilst slight increases are predicted at 2 out of the 6 assessment areas, the effects of those increases is identified to be insignificant (paragraphs 2.6.7 and 2.6.8 of Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix E - Ground Noise Engine Ground Runs (Doc Ref 10.13.5)).</p>		
2.16.2.15	Ground Noise	<p>The Central Case has been considered for the ground noise assessment; however, higher levels of ground noise will be identified in the Slower Transition Case. Consequently, there is potential for receptors to experience significant noise effects that are identified in the Central Case assessment. Ground noise emissions during the Slower Transition Case should be assessed.</p> <p>Updated position (Deadline 5): The information provided in The Applicant's Response to ExQ1 - Noise and Vibration [REP3-101] does not fully address WSCC's position. Contour plots should be provided to allow better understanding of ground noise effects for each assessment year and scenario. It would be expected that LAeq and LAmx contour plots are provided. LAeq contours should be provided from the LOAEL upwards in 3dB increments.</p> <p>Updated position (12 August 2024): The Applicant has provided SOAEL contours for day and night periods covering easterly and westerly operations for the 2032 Slower Transition Fleet only. This does not address the request of the JLAs. The limitations to not producing the contours are NOT accepted and the JLAs position remains as per the Deadline 5 update</p>	<p>A technical note will be provided to the TWG providing further details of engine ground running noise levels at other receptor locations which demonstrates the Project will not give rise significant effects from engine ground running.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix B - Ground Noise Fleet Assessment (Doc Ref 10.13.2) which provides an updated assessment of ground noise with the slower transition fleet and further details of how provision of noise insulation will be also based on predicted levels.</p>	n/a	<p>Not Agreed Under discussion</p>
2.16.2.16	Ground Noise	<p>It is not clear if fire training activities at the new fire training ground are considered within the ground noise assessment. Noise emissions from fire training ground activities should be assessed.</p> <p>Updated position (Deadline 5): It was requested in Table 4-7 of the Scoping Opinion [APP-095] that the relocated fire training ground was covered in the ground noise assessment. This request has been consistently ignored by the Applicant. It is not agreed that activities over a reasonable worst-case day would be insignificant in terms of LAeq,T noise levels.</p> <p>Updated position (Deadline 8): WSCC accept the Applicant's approach regarding the assessment of the fire training ground area</p>	<p>A sensitivity test will be undertaken for the Slower Transition Fleet case for ground noise. The results of this test will be analysed and presented in the form of a technical note that will be shared with the local authorities.</p> <p>Updated Position (April 2024): The main noise source relating to the fire training ground, is the diesel engine of the vehicle carrying the firefighting apparatus. The assumed sound power of an APU, used in the predictions presented in Appendix 14.9.3, is 120 dBA and the same level would apply for a diesel engine associated with an HGV or similar vehicle. For a large taxiing aircraft, the assumed sound power level (Table 3.1.1 Appendix 14.9.3) is more than 20 dB higher than this which means that maximum noise levels from fire training activities could be expected to be more than 20 dB below the highest levels that could be expected at residential distances due to taxiing aircraft. The highest maximum levels have</p>	n/a	<p>Agreed Under discussion</p>

		<p>given that the location is near to the existing location and activities will be screened by the proposed barrier.</p>	<p>therefore already been assessed in the ES and, since noise from the fire training ground is expected to be so much lower, any contribution to daytime L_{Aeq} levels would be insignificant.</p> <p>Updated position (July 2024) The new fire training ground has been designed with a 10 m high perimeter noise barrier, unlike the current facility. Given this and the above noise information, the Applicant's position remains that the fire training ground can be scoped out of the noise and vibration assessment.</p>		
2.16.2.17	Ground Noise	<p>The assessment of ground noise only covers 2032 as it is identified as the worst-case; however, identification of likely significant effects for all assessment years should be provided.</p> <p>Updated position (Deadline 1): 2032 is not the worst-case year for ground noise as other assessment years show bigger increases in noise. All assessment years (2029, 2032, 2038 and 2047) should be covered in the assessment to understand temporal effects on the local population.</p> <p>Updated position (Deadline 5): WSCC maintain their position that all assessment years (including central case and slower transition case) should be covered in the ground noise assessment.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter</p>	<p>A sensitivity test of taxiing noise modelling with the slower transition fleet will be provided.</p> <p>Ground noise impacts are generally determined by the extent to which ground noise exceeds ambient noise, usually road traffic noise, so ground noise impacts are greatest when ground noise levels are highest in 2032.</p> <p>Ground noise contours were discussed with the TWG. Because ground noise impacts are determined by the change in ground noise and the extent to which it exceeds ambient noise, contours of ground noise levels can be misleading and are not considered helpful to depict area of impact in the ES.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix B - Ground Noise Fleet Assessment (Doc Ref 10.13.2) which provides an updated assessment of ground noise with the slower transition fleet. As in the ES Appendix 14.9.3 Ground Noise Modelling [APP-173] this provides predicted noise levels and changes in 2029, 2032, 2038 and 2047. In some cases the noise changes with the Project compared to the future baseline in 2038 and 2047 are 1 dB higher than in 2032, but in all cases the predicted absolute levels with the Project are lower. Because the ground noise assessment considers absolute levels and comparison with ambient noise, change is not the only consideration, and the impacts in 2038 and 2047 are not greater than impacts in 2032.</p>	n/a	Not Agreed
2.16.2.18	Ground Noise	<p>Context to the ground noise assessment is provided through consideration of the secondary metrics; however, no conclusions as to how secondary metrics relate to likely significant effects have been made. The use of secondary metrics within the overall assessment of likely significant effects is therefore unclear.</p>	<p>Paragraph 14.4.79 of the ES explains: <i>The assessment of significance is based primarily on the predicted levels and changes in the primary noise metrics and the factors described above, but additional noise metrics (the secondary noise metrics) are used to provide more detail on the changes that would arise.</i></p>	ES Chapter 14: Noise and Vibration [APP-039]	Not Agreed

		<p>Updated position (Deadline 1): Paragraph 14.4.84 [APP-039] states that: “Lmax levels have also been used to assist in determining significance of effects for particular intermittent noise sources such as Engine Ground Running and use of EATs.”</p> <p>Updated position (Deadline 5): The Applicant should clearly set out their methodology for the use of Lmax when identifying significant effects,</p> <p>Updated position (Deadline 8): refer to row 2.16.2.13 for WSCCs position on this matter</p>	<p>Updated Position (April 2024): Noted, the change in number of Lmax events above 65dB in the day and 60dB at night has also been used in addition to Leq levels in some cases in arriving at the overall assessment of significance for example in the Charlwood, Riverside Horley, Bonnetts Lane, and Lowfield Heath Assessment Areas as discussed in Section 8 of ES Appendix 14.9.3 Ground Noise Modelling [APP-173] .</p> <p>Updated position (July 2024) Since L_{max} is a secondary metric, there are no specific criteria for significance but the change in numbers of L_{max} events above the day and night thresholds are considered using professional judgment to understand how changes in L_{Aeq} may be perceived. In some cases (Charlwood Road and Lowfield Heath Assessment Areas) the increase in the numbers of L_{max} events above thresholds simply confirms that there is a significant effect which has already been identified by the change in L_{Aeq} levels. In the Bonnetts Lane assessment area, the reduction in L_{max} events helps to confirm that the effect is minor. Within the Lowfield Heath assessment area, the increase in the numbers of L_{max} events above thresholds is used to confirm that changes in L_{Aeq} of 1 dB are significant at properties where the L_{Aeq} is close to SOAEL (these properties would otherwise be considered to have a minor adverse effect according to para 14.4.93 of the ES).</p>		
Assessment					
<p>2.16.3.1</p>	<p>The assessment of ground noise should also consider the slower transition case as per the aircraft noise assessment. It is not clear why 2032 is considered worst-case for ground noise. Ground noise contours are not provided.</p>	<p>Higher levels of ground noise will be identified in the Slower Transition Case. Consequently, there is potential for receptors to experience significant noise effects that are identified in the Central Case assessment. Whilst 2032 provides the highest absolute noise levels, there appears to be larger increases in noise at some receptors during other assessment years. No noise contours are provided for ground noise.</p> <p>An assessment of Slower Transition Case ground noise effects should be provided to identify the potential for exceedances of the SOAEL at sensitive receptors. Likely significant effects for all assessment years should be identified in the ground noise assessment.</p> <p>Updated position (Deadline 5): WSCC maintain their position that all assessment years (including central case and slower transition case) should be covered in the ground noise assessment.</p> <p>-Updated position (12 August 2024): WSCC maintain their position on this matter</p>	<p>A sensitivity test of taxiing noise modelling with the slower transition fleet will be provided.</p> <p>Ground noise impacts are generally determined by the extent to which ground noise exceeds ambient noise, usually road traffic noise, so ground noise impacts are greatest when ground noise levels are highest in 2032.</p> <p>Ground noise contours were discussed with the TWG. Because ground noise impacts are determined by the change in ground noise and the extent to which it exceeds ambient noise, contours of ground noise levels can be misleading and are not considered helpful to depict area of impact in the ES.</p> <p>Updated Position (April 2024): The Applicant has provided Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix B - Ground Noise Fleet Assessment (Doc Ref 10.13.2) which provides an updated assessment of ground noise with the slower transition fleet and noise contours noting that ground noise impacts are judged on the basis of noise change and in the context of ambient noise, not only absolute levels shown in these contours. Please see 2.16.2.17 that explains ground noise has been modelled in all years and why impacts are greatest in 2032.</p>	<p>ES Appendix 14.9.3: Ground Noise Modelling [APP-173]</p>	<p>Not Agreed Under discussion</p>

2.16.3.2	Evidence base and justification for noise impacts	<p>Further presentation of the required evidence base and justification of the noise and air quality effects (and proposed mitigation) from both construction of the additional infrastructure and the operational phase (including the increase in overflights).</p> <p>Updated position (Deadline 1): The construction and ground noise assessments are both below the standard required for a DCO. Alignments and heights of noise barriers used to reduce significant noise effects should be provided and a commitment made to secure provision of noise barriers.</p> <p>Updated position (Deadline 5): Can the Applicant direct to where construction noise barriers are secured?</p> <p>Updated Position (12 August 2024) Row 2.16.2.1 relates to local planning policy and does not contain any information on how construction noise barriers are secured.</p> <p>Specific construction noise barriers have been relied upon in the construction noise assessment to avoid significant effects but are not secured anywhere in the DCO. The CoCP does not contain any information on noise barriers that were applied in construction noise modelling to avoid significant effects. The acoustic barriers MUST be secured in the DCO or the construction noise assessment cannot be relied upon.</p>	<p>The ES provides a full account of the assessment of noise impacts in accordance with all relevant policies and guidance.</p> <p>Updated Position (April 2024): The ground noise bund and barrier and road traffic noise barriers are shown on Project drawings and hence secured through the DCO. The provision of noise barriers is secured through the Design and Access Statement Appendix 1 – Design Principles [REP2-038] which the detailed design must be in accordance with, in accordance with Requirement 4 of the Draft Development Consent Order (Doc Ref. 2.1). In particular, Project-Wide Design Principles N1 to N3 relate to the provision of noise barriers and bunds to deliver noise mitigation associated to the operation of the Project, together with site-specific Design Principle DBF13 relating to the noise barriers within the airfield.</p> <p>Noise barriers are shown on Surface Access Highways Plans – General Arrangements [APP-020].</p> <p>Updated Position (July 2024): With regards construction noise barriers please see row 2.16.2.1 above which details how the provision of construction noise barriers is secured via the CoCP. Requirement 7 of the Development Consent Order [REP6-006] provides that construction of the authorised development must be carried out in accordance with the CoCP unless otherwise agreed.</p> <p>Updated position (Deadline 9) The construction noise barriers identified in ES paras 14.9.50 – 14.9.52 were discussed and agreed as practicable with the GAL construction team. For example, they are located on site boundaries and will not interfere with access of other requirements. Paragraph 9.5.4 of the CoCP requires the contractor to use Best Practicable Means including noise barriers (bullet point 2). Therefore, if noise mitigation is required these noise barriers will be used to meet this requirement. If the contractor finds other ways to reduce noise levels (for example through quieter plant) to avoid impacts they may not be. The Local Authority will be asked to approve the final choice of mitigation within the Section 61 Application before work begins to ensure the BPM requirement is met once the final methods of working are known.</p>	ES Chapter 14 Noise and Vibration [APP-039]	Not Agreed
Mitigation and Compensation					
2.16.4.1	The Noise Envelope - sharing the benefits	Paragraph 14.2.44 – sharing the benefits has been removed from the ES. This is a fundamental part of the Noise Envelope so it should be	Paragraph 14.2.44 described how the reference to Sharing the Benefits of aircraft noise emission reduction has been removed from the government's	Section 3.2 of ES Appendix 14.9.5 Air	Not Agreed

		<p>demonstrated how benefits of new aircraft technology are shared between the airport and local communities. There is no incentive to push the transition of the fleet to quieter aircraft technology. This means that the Noise Envelope allows for an increase in noise contour area on opening of the Project. The Applicant wants flexibility to increase noise contour area limits depending on airspace redesign and noise emissions from new aircraft technology. If expansion is consented, any uncertainties from airspace redesign or new aircraft technology should be covered within the constraints of the Noise Envelope.</p> <p>Updated position (Deadline 1): Sharing the benefits has not been removed from national aviation policy. GAL do not share any noise benefits from new aircraft technology up to and around 2029 in the slower transition fleet case.</p> <p>There should be no allowance for Noise Envelope limits to increase to give certainty to local communities on future noise levels.</p> <p>Updated position (Deadline 5): The Applicant’s method for sharing the benefits is flawed as it allows for a substantial increase in noise contour area in the 2032 daytime period over the 2019 baseline. It is hard to understand how it can be justified that any benefits of new aircraft technology have been shared with the local community in this case. WSCC maintain their position that there should be no allowance for Noise Envelope limits to increase.</p> <p>Updated position (12 August 2024): WSCCs position is that it is incorrect to account for future baseline growth and sharing the benefits should be based around future baseline scenarios where no growth in the 2019 fleet occurs. Provision of this information was requested by the Planning Inspectorate at scoping. WSCC would firstly like to refer to the Planning Inspectorate Scoping Report in paragraph 2.3.13 of Appendix 6.2.2 [APP-095], which states: “The ES should also give consideration to the prospect of a ‘no development’ and ‘no growth scenario’ for comparative purposes and in support of the justification for the Proposed Development in the form that is to be presented in the DCO application”. This request was ignored by the Applicant in its Scoping Response set out in 2.3.11 of Appendix 6.2.3 [APP-096]. This was raised in the Local Impact Report - Appendix C: Noise and Vibration District and Borough Profiles [REP1-100], which the Applicant again chose to ignore.</p> <p>WSCC maintain their position that there should be no allowance for Noise Envelope limits to increase.</p>	<p>Overarching Aviation policy Statement in March 2023. We consulted on sharing the benefits through our Noise Envelope Group in summer 2022.</p> <p>An illustration of sharing the benefits was discussed and is reported in pages 165 to 175 of ES Appendix 14.9.9: Report on Engagement on the Noise Envelope.</p> <p>As communicated previously, GAL does not control airline fleet procurement and the airport sits within well-defined existing regulatory frameworks governing noise management, airport charges, slots and the requirement to consult on noise related actions which could be operating restrictions. Airline feedback to the Noise Envelope Group also explained that many factors can influence fleet procurement, some of which could be outside of the airlines’ control. The York Aviation review of the PEIR for the Local Authorities noted ‘<i>We consider that the fleet mix assumed in the Central Case for assessment is somewhat optimistic, particularly in the early years given the deferral of aircraft orders that has occurred during the pandemic, but that the Slower Transition Case represents a robust worst case</i>’.</p> <p>The reasons for adopting the Slower Transition Fleet noise contours areas are given in ES Appendix 14.9.5 Air Noise Envelope Background at Section 3.2.</p> <p>It is not agreed that airspace change (which is a project in its own right and subject to its own assessment) can reasonably be assessed in the ES. Moreover, the noise impacts of more carbon emissions efficient aircraft and legislative drivers for their adoption are not able to be predicted. For further information on those matters please refer to sections ,6.5 and 6.6 of the Noise Envelope Document.</p> <p>Updated Position (April 2024): The council requests ‘<i>There should be no increase in noise limit from the 2019 baseline noise contour areas</i>’. ES Chapter 14: Noise and Vibration [APP-039] paragraphs 14.2.40 to 14.2.48 describe the government’s latest policy statement of aviation noise <i>Policy Paper, Overarching Aviation Noise Policy, DfT, March 2023</i>. This includes the following: <i>We consider that “limit, and where possible reduce” remains appropriate wording. An overall reduction in total adverse effects is desirable, but in the context of sustainable growth an increase in total adverse effects may be offset by an increase in economic and consumer benefits</i>. Thus, current government policy allows increases in noise, as is inevitable in the year the runway opens, and in terms of contours areas is forecast above the 2019 baseline for daytime noise, but not night-time noise.</p>	<p>Noise Envelope Background [APP-175]</p> <p>ES Appendix 14.9.9: Report on Engagement on the Noise Envelope [AS-023]</p> <p>ES Appendix 14.9.7: The Noise Envelope [APP-177]</p> <p>ES Appendix 14.9.9 Report on Engagement on the Noise Envelope [APP-179]</p> <p>ES Appendix 14.9.7 The Noise Envelope - Version 3 – Tracked [REP5-030]</p>	
--	--	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>The policy statement goes on: <i>In circumstances where there is an increase in total adverse effects, "limit" would mean to mitigate and minimise adverse effects, in line with the Noise Policy Statement for England.</i></p> <p>The policy recognises that growth may increase noise impacts and that this increase may be offset by an increase in economic and consumer benefits. It also places increased emphasis on mitigation in such cases. The Project proposes an appropriate range of mitigation measures, in addition to the existing controls that will continue in connection with the operation of the airport, and this includes a substantially improved Noise Insulation Scheme (NIS), as discussed in Section 14.9, in line with the Noise Policy Statement for England.</p> <p>The Applicant has also provided further explanation of the analysis of sharing the benefits in response to Examining Authority's question NV.1.9 in The Applicant's Response to ExQ1 - Noise and Vibration (Doc Ref 10.16) which concludes: <i>Following the same methodology, the GAL analysis showed that in 2038 when the Noise Envelope limits reduce, compared to the future 2038 baseline the degree of sharing the benefits would be 50% to the industry (as growth) and 50% to the community (as noise reduction) when measured in terms of the area of the day LOAEL with the Slower Transition Fleet. For night-time the degree of sharing the benefits would be 34% to the industry (as growth) and 66% to the community (as noise reduction). It was noted that in the early years after opening noise increases and there is a smaller benefit to the community.</i></p> <p><u>Updated position (July 2024)</u> <u>The Applicant's method for calculating sharing the benefit is taken from the Bristol Airport expansion Planning Inspectors Report as noted in ES Appendix 14.9.9 Report on Engagement on the Noise Envelope [APP-179] and shared with the local authorities in June 2022. An alternative method was proposed by GACC and discussed. A method proposed by the planning authorities involved ignoring baseline traffic growth which was not considered realistic. The sharing of benefits with the updated Central Case which the Applicant has committed to through the revised noise envelope submissions ES Appendix 14.9.7 The Noise Envelope - Version 3 – Tracked [REP5-030] is discussed above at row 2.16.2.12.</u></p>		
--	--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

2.16.4.2	Noise Envelope Regulation	<p>It is not clear in the DCO whether there would be any role for local authorities and key stakeholders in the Noise Envelope, if the Civil Aviation Authority (CAA) is the independent reviewer.</p> <p>Updated position (Deadline 1): The Authorities should be part of an independent group set up to regulate the Noise Envelope.</p> <p>Updated position (Deadline 5): WSCC are of the opinion that the joint local authorities should be part of a Noise Envelope scrutiny group.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter.</p>	<p>The host local authorities will be provided with the annual monitoring and forecasting reports approved by the CAA. This will confirm the position in respect of compliance with the noise envelope. In the unlikely event of any breach of the terms of the DCO the Host LPA's may petition action and seek to rely on section 161 of the Planning Act 2008. Moreover, the host LPA's will also retain their role under Regulation 598/2014 in relation to the introduction of noise related operating restrictions pursuant to the DCO requirements. There is therefore a sufficient level of scrutiny and ability to take action provided for the host LPA's.</p> <p>The CAA, who have relevant knowledge and expertise, are the most appropriate persons to review the noise envelope submissions made pursuant to the DCO for the purpose of their verification.</p>	<p>ES Appendix 14.9.7: The Noise Envelope [APP-177] ES Appendix 14.9.9 Report on Engagement on the Noise Envelope [AS-023]</p>	Not Agreed
2.16.4.3	Prevention of Noise Envelope breaches	<p>A breach would be identified for the preceding year, with an action plan in place for the following year. Consequently, it would be two years after a breach before a plan to reduce the contour area would be in place. No details are provided on what kind of actions are proposed for an action plan to achieve compliance. 24 months of breach would be required before capacity declaration restrictions for the following were adopted so it would be three years after the initial breach before capacity restrictions were in place. Capacity restrictions would not prevent new slots being allocated within the existing capacity and is not an effective means of preventing future noise contour limit breaches if a breach occurred in the previous year.</p> <p>Updated position (Deadline 1): Capacity restrictions are not sufficient to prevent potential breaches and slot restriction measures should be adopted.</p> <p>Updated position (Deadline 5): WSCC maintain their position on this matter.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter.</p>	<p>As described in ES Appendix 14.9.7: The Noise Envelope, each year an Annual Monitoring and Forecasting Report will be required to not only report monitoring of last year's performance against the Noise Envelope limits but to forecast compliance 5 years ahead, so that noise control measures can be planned and implemented in advance. The Noise Envelope, in Section 7.3, puts restrictions of further capacity declaration in the event that an exceedance of the noise envelope is forecast. The approach ensures action is taken in a timely manner to require compliance, with the sufficient threat of capacity restrictions if a breach is not remedied through the action plan measures within a reasonable time period. This strikes an appropriate fair balance, for the in the unlikely event of actual breach taking into account the purposefully forward-looking nature of the annual monitoring and forecasting approach.</p> <p>Updated Position (April 2024): The noise envelope covers the busiest three months of the year at which there is currently little available capacity and close to 100% slot utilisation over the operational day. From the point that the noise envelope is introduced, GAL will treat the noise envelope limits as a scheduling constraint such that there will be a link formed between it and the capacity declaration. The allocation of new slots in any year is predicated on the take-up of those slots not resulting in an exceedance of the noise envelope. The ATM forecast will be processed through the noise model to check it meets the noise envelope limit for the forecast capacity before the slots are allocated. This should ensure the subsequent allocation and take-up of those slots within the capacity declaration will not result in a forecasted exceedance of the noise envelope limits. It is anticipated that actual performance will track well to forecast performance, particularly as those are refined against one another over time through the production of the Annual Monitoring and Forecasting</p>	<p>ES Appendix 14.9.7: The Noise Envelope [APP-177] The Applicant's Response to Actions ISH8 – Noise [REP6-087]</p>	Not Agreed

			<p>Reports, and this proposal is therefore considered to be the most effective method to prevent breaches arising.</p> <p>Updated Position (July 2024): The Applicant has provided a full description of how the noise envelope will operate on a forward looking basis, beginning two years in advance of operations from the NRP commencing, so as to ensure the limits are not breached in 10.50.4 The Applicant's Response to Actions ISH8 – Noise [REP6-087] Appendix A: Note on how the Applicant will plan to stay in the Envelope and why this will be effective. This approach is robust and will ensure that capacity cannot be made available where there is a forecast breach and that measures will be taken to prevent a breach arising.</p>		
2.16.4.4	<p>Lack of detail regarding the Noise insulation scheme.</p>	<p>It is not clear how the noise insulation scheme would prioritise properties for provision of insulation. Residents of properties within the inner zone will be notified within six months of commencement of works; however, it is not clear what noise contours eligibility would be based upon. Lack of detail on the noise insulation measures in the Outer Zone. Schools are included in the Noise insulation Scheme, but it is unclear if other community buildings would be eligible for noise insulation. It is unclear how noise monitoring would be undertaken to determine eligibility through cumulative ground and air noise.</p> <p>Updated position (Deadline 1): Details of the noise insulation roll out should be provided including a market test the availability of contractors and insulation materials.</p> <p>The noise insulation scheme should be updated to include noise sensitive community buildings.</p> <p>Updated position (Deadline 5): The Applicant should provide evidence through a market test regarding the availability of contractors and insulation materials to meet the proposed roll out. Properties in the ground noise outer zone should qualify for insulation. Details should be provided on the process of monitoring eligibility for ground noise compensation and the triggers for noise monitoring. WSCC maintain their position that the noise insulation scheme should be extended to all noise sensitive community buildings</p> <p>Updated position (12 August 2024): WSCC welcome the information on scheme rollout. However, WSCC maintain their position that the noise insulation scheme should be extended to all noise sensitive community buildings.</p>	<p>Paragraph 4.1.10 and 4.1.11 of ES Appendix 14.9.10 outline the process to prioritise the scheme with the Inner Zone first. Further detail on implementation of the NIS is being prepared and will be shared with the TWG. Further prioritisation will use higher noise level bands to implement the scheme to those most affected first, albeit it is considered that there is sufficient time for all properties in the inner zone to receive noise insulation before operations commence.</p> <p>Paragraph 4.1.13 of ES Appendix 14.9.10 explains: We propose to base the new NIS on the worst-case end of this range, associated with the Slow Transition Fleet. As such, we propose to use the forecast 2032 Leq contour area to set the geographical boundary for our enhanced NIS.</p> <p>The noise insulation package offered in the Outer zone will be acoustic ventilators, and acoustic glazing where necessary to upgrade single glazing, to noise sensitive rooms. There will be some flexibility as to how the package is decided.</p> <p>Paragraphs 5.1.1 and 5.1.2 of ES Appendix 14.9.10 outline the noise insulation scheme for schools, and the kind of measures that will be offered, noting that details will be developed on a case by case basis. The scheme is intended only for community buildings that are sensitive to noise because they are used for teaching.</p> <p>Paragraph 4.1.11 of ES Appendix 14.9.10 explains how eligibility for the Inner Zone noise insulation scheme will if necessary be extended by measurement of cumulative ground and air noise. Two small areas are noted as possible candidates but the vast majority of eligibility will be clear from air noise contours with the option to extend this if noise disturbance is reported by residents beyond. Measurements would be carried out by installing noise monitoring equipment in the relevant area.</p>	<p>Paragraph 4.1.10 and 4.1.11 of ES Appendix 14.9.10 Noise Insulation Scheme [APP-180]</p> <p>The Applicant's Written Summary of Oral Submissions ISH 8: Agenda Item 6 – Noise [REP6-081].</p>	<p>Not Agreed</p>

			<p>Updated Position (April 2024): The Applicant has provided further details of how provision of noise insulation will be prioritised and programmed in 5.3 ES Appendix 14.9.10 Noise Insulation Scheme Update Note [REP2-032]. Further details of properties qualifying for noise insulation due to ground noise and how this will be provided before the predicted noise impacts arise is given in Supporting Noise and Vibration Technical Notes to Statements of Common Ground, Appendix B - Ground Noise Fleet Assessment (Doc Ref 10.13.2) The Noise Insulation Scheme will be updated and resubmitted to the Examining Authority incorporating these additions.</p> <p>The Applicant has considered the speed at which the scheme can be rolled out. In 2015 a single contractor delivered the current scheme to 418 homes, so the Applicant is confident the new scheme can be delivered if necessary using multiple contractors.</p> <p>Updated Position (July 2024) The Applicant has received specific comments on the NIS from the JLAs at Deadline 5 and is arranging a TWG to discuss these and may then revise the NIS. The reason for not including an outer zone for ground noise are explained in ISH8 as recorded in para 2.2.15 of 10.49.3 The Applicant's Written Summary of Oral Submissions ISH 8: Agenda Item 6 – Noise [REP6-081].</p>		
2.16.4.5	Noise Insulation Scheme	<p>Residents in the outer zone should be offered more flexibility on the type of insulation rather than being restricted to ventilation.</p> <p>Updated position (Deadline 1): The noise insulation scheme should be updated to allow flexibility for any type of insulation that may improve internal noise conditions.</p> <p>Updated position (Deadline 5): WSCC maintain their position on this matter.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter.</p>	<p>Paragraph 4.1.10 and 4.1.11 of ES Appendix 14.9.10 outline the process to prioritise the scheme with the Inner Zone first. Further detail on implementation of the NIS is being prepared and will be shared with the TWG. Further prioritisation will use higher noise level bands to implement the scheme to those most affected first, albeit it is considered that there is sufficient time for all properties in the inner zone to receive noise insulation before operations commence.</p> <p>Paragraph 4.1.13 of ES Appendix 14.9.10 explains: We propose to base the new NIS on the worst-case end of this range, associated with the Slow Transition Fleet. As such, we propose to use the forecast 2032 Leq contour area to set the geographical boundary for our enhanced NIS.</p> <p>The noise insulation package offered in the Outer zone will be acoustic ventilators, and acoustic glazing where necessary to upgrade single glazing, to noise sensitive rooms. There will be some flexibility as to how the package is decided.</p> <p>Paragraphs 5.1.1 and 5.1.2 of ES Appendix 14.9.10 outline the noise insulation scheme for schools, and the kind of measures that will be offered, noting that details will be developed on a case by case basis. The</p>	Paragraph 4.1.10 and 4.1.11 of ES Appendix 14.9.10 Noise Insulation Scheme [APP-180]	Not Agreed

			<p>scheme is intended only for community buildings that are sensitive to noise because they are used for teaching.</p> <p>Paragraph 4.1.11 of ES Appendix 14.9.10 explains how eligibility for the Inner Zone noise insulation scheme will if necessary be extended by measurement of cumulative ground and air noise. Two small areas are noted as possible candidates but the vast majority of eligibility will be clear from air noise contours with the option to extend this if noise disturbance is reported by residents beyond. Measurements would be carried out by installing noise monitoring equipment in the relevant area.</p> <p>Updated Position (April 2024):ES Appendix 14.9.10: Noise Insulation Scheme Update Note [REP2-031] provides further information regarding how the Noise Insulation Scheme will be administered including surveys to be carried out to determine and agree the appropriate mitigation measures. Further details contained in the document will be captured in updates to the Noise Insulation Scheme document.</p>		
2.16.4.6	Noise Insulation Scheme	<p>It is not clear if properties that have already received insulation would be eligible for upgraded noise insulation as part of the new scheme.</p> <p>Updated position (Deadline 5): It would be helpful if the Applicant could direct to the appropriate section of [REP4-018].</p> <p>Updated position (12 August 2024): <u>WSCC thank the Applicant for provision of information. Can the Applicant explain how it will be determined if the acoustic performance of glazing provided under the previous NIS has deteriorated?</u></p>	<p>That is the case. An appendix to the NIS will be provided giving further details on its implementation and clarifying this.</p> <p>Updated position (July 2024) <u>Section 4 of [REP4-018] makes it clear the new scheme enhances the current scheme, as follows.</u> <u>Para 4.1.4 provides: <i>The Inner Zone will be based on the predicted Leq 16 hr 63dB daytime and Leq 8 hr night 55dB summer air noise contours for 2032. The inner zone would be formed on the larger of these, the Leq 8 hr night 55dB, which fully encloses the Leq 16 hr 63dB daytime contour. These noise levels have been assessed as the levels where noise effects to health and quality of life to residents would become significant if noise insulation was not provided. We propose that people living in these areas should be able to apply for a full package of noise insulation (see the table below for details).</i></u></p> <p><u>Para 4.1.7 further provides: <i>The proposed outer zone covers a significantly larger area than the existing single-tier scheme, however, in a few areas the existing scheme extends a little further from the airport than the proposed outer zone where its boundary was drawn to match the patterns of settlement on the ground. We have taken the view that we should nevertheless include these areas within our scheme, despite the forecasts indicating they would not experience noise levels of greater than the Leq 16 hour 54dB limit. Our outer zone will provide for noise insulation and ventilation to noise sensitive rooms (see the table below) and is also open to people who have accessed the previous scheme, where additional insulation or ventilation would provide benefit.</i></u></p>	n/a ES Appendix 14.9.10: Noise Insulation Scheme [REP4-018]	Not Agreed Under discussion

			<p>Para 4.3.11 also provides: Only works to noise sensitive rooms (bedrooms, studies, living rooms and dining rooms) will be paid for. The acoustic insulation works are intended to improve acoustic insulation to noise sensitive rooms, not to otherwise improve the property. Any homeowner wishing to request additional acoustic treatments may do so at the same unit rates, paying any excess over the stated amount (as with the current NIS). The scheme will not replace acoustic insulation installed under the previous NIS unless its acoustic performance has significantly reduced below the level expected.</p> <p>It is clear from these paragraphs within the Noise Insulation Scheme document that all properties within the inner zone and outer zone would be eligible for upgraded noise insulation as part of the new scheme, including where they have previously received noise insulation.</p>		
2.16.4.7	Noise Envelope	<p>It is not appropriate to use the slow-transition case to define noise contour limits. There is no incentive to push the transition of the fleet to quieter aircraft technology. This means that the Noise Envelope would allow for an increase in noise contour area on the opening day of the NRP.</p> <p>Updated position (Deadline 1): Sharing the benefits has not been removed from national aviation policy. GAL do not share any noise benefits from new aircraft technology up to and around 2029 in the slower transition fleet case.</p> <p>There should be no allowance for Noise Envelope limits to increase to give certainty to local communities on future noise levels.</p> <p>Updated position (Deadline 5): The Applicant’s method for sharing the benefits is flawed as it allows for a substantial increase in noise contour area in the 2032 daytime period over the 2019 baseline. It is hard to understand how it can be justified that any benefits have been shared with the local community in this case.</p> <p>Updated position (12 August 2024): refer to row 2.16.4.1 for WSCCs position on this matter.</p>	<p>Paragraph 14.2.44 described how the reference to Sharing the Benefits of aircraft noise emission reduction has been removed from the government’s Overarching Aviation policy Statement in March 2023. We consulted on sharing the benefits through our Noise Envelope Group in summer 2022.</p> <p>An illustration of sharing the benefits was discussed and is reported in pages 165 to 175 of ES Appendix 14.9.9: Report on Engagement on the Noise Envelope.</p> <p>As communicated previously, GAL does not control airline fleet procurement and the airport sits within well-defined existing regulatory frameworks governing noise management, airport charges, slots and the requirement to consult on noise related actions which could be operating restrictions. Airline feedback to the Noise Envelope Group also explained that many factors can influence fleet procurement, some of which could be outside of the airlines’ control. The York Aviation review of the PEIR for the Local Authorities noted ‘<i>We consider that the fleet mix assumed in the Central Case for assessment is somewhat optimistic, particularly in the early years given the deferral of aircraft orders that has occurred during the pandemic, but that the Slower Transition Case represents a robust worst case.</i>’</p> <p>The reasons for adopting the Slower Transition Fleet noise contours areas are given in ES Appendix 14.9.5 Air Noise Envelope Background at Section 3.2.</p> <p>It is not agreed that airspace change (which is a project in its own right and subject to its own assessment) can reasonably be assessed in the ES. Moreover, the noise impacts of more carbon emissions efficient aircraft and legislative drivers for their adoption are not able to be predicted. For further</p>	<p>Section 3.2 of ES Appendix 14.9.5 Air Noise Envelope Background [APP-175]</p> <p>ES Appendix 14.9.9 Report on Engagement on the Noise Envelope [AS-023]</p> <p>ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]</p>	Not Agreed

information on those matters please refer to sections ,6.5 and 6.6 of the Noise Envelope Document.

Updated Position (April 2024): Please see update provided in 2.16.4.1 above.

Updated position (July 2024)

The Applicant has provided an assessment of noise impacts for the Updated Central Case fleet in **ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]** which is identified to be the most likely. In oral evidence at ISH8 (summarised in **The Applicant's Written Summary of Oral Submissions ISH 8: Agenda Item 6 – Noise [REP6-080]**) and in **ES Appendix 14.9.7 The Noise Envelope - Version 3 – Tracked [REP6-056]** submitted at Deadline 6 the Applicant confirmed its commitment to setting the noise envelope limits based on the Updated Central Case fleet.

An illustration of how the benefits of noise improvements is shared is provided in **ES Appendix 14.9.9 Report on Engagement on the Noise Envelope [APP-179]** pages 165 to 175 in respect of the slower transition fleet. The methodology adopted is described fully in that appendix, and is that referred to in the Inspector's report on the Bristol Airport Planning Appeal Decision, Appeal Ref: APP/D0121/W/20/3259234, 2 February 2022. The Inspector in that decision considered sharing of the noise benefit in terms of the proportion of the full potential reduction in LOAEL and SOAEL contour areas possible due to fleet transition to quieter types, which is then taken up by ATM growth and the amount of reduction which is remaining. Page 168 of ES Appendix 14.9.9 provide a worked example of the method used for the Bristol airport case.

Applied to this case, 2019 can be taken as the baseline starting point. The full potential reduction in LOAEL contour area in a given year, eg 2038, is the difference between the contour area with the 2019 fleet and the contour area with the fleet transitioned in the future baseline without the Project. The extent of the difference in the contour area which is then taken by ATM growth is the proportion of the benefit goes to the airport/industry, with the remaining share going to the community. Page 173 of Appendix 14.9.9 gives the calculation for the slower transition fleet. The results are reproduced in the table below along with the results of the same calculation using the Updated Central Case noise contour areas reported in **ES Addendum - Updated Central Case Aircraft Fleet Report [REP4-004]** and values for 2032 added.

	<u>Daytime Benefit</u>		<u>Night Benefit</u>	
	<u>Share % to Community</u>		<u>Share % to Community</u>	
	<u>2032</u>	<u>2038</u>	<u>2032</u>	<u>2038</u>
-				
-				
<u>Slower Fleet Transition</u>	<u>-15%</u>	<u>50%</u>	<u>13%</u>	<u>66%</u>
<u>Updated Central Case Fleet</u>	<u>31%</u>	<u>58%</u>	<u>50%</u>	<u>69%</u>

The following calculations show how these percentages are calculated for the Updated Central Case fleet (UCC) using the same methodology. The calculations for 2038 Slower Transition Fleet (SFT) are in Appendix 14.9.9 on p173 day and 175 night.

2038 UCC Day:

2038 Baseline Contour Area with 2019 fleet = 144.0

2038 Baseline Contour Area with UCC fleet = 101.7

NE limit = 119.4

Full benefit available = 144.0 - 101.7 = 42.3

Community benefit = 144.0 - 119.4 = 24.6

% share to community = 24.6 / 42.3 = 58%

2038 UCC Night:

2038 Baseline Contour Area with 2019 fleet = 159.4

2038 Baseline Contour Area with UCC fleet = 123.4

NE limit = 134.6

Full benefit available = 159.4 - 123.4 = 36.2

Community benefit = 159.4 - 134.6 = 24.8

% share to community 24.8 / 36.2 = 69%

2032 UCC Day:

2032 Baseline Contour Area with 2019 fleet = 144.0

2032 Baseline Contour Area with UCC fleet = 116.5

NE Limit = 135.5

Full benefit = 144.0 - 116.5 = 27.5

Community benefit = 144.0 - 135.5 = 8.5

% share to community = 8.5 / 27.5 = 31%

2032 UCC Night:

2032 Baseline Contour Area with 2019 fleet = 159.4

2032 Baseline Contour Area with UCC fleet = 134.5

NE Limit = 146.9

Full benefit available = 159.4 - 134.5 = 24.9

Community benefit = 159.4 - 146.9 = 12.5

% share to community = 12.5 / 24.9 = 50%

2032 STF Day:

			<p><u>2032 Baseline Contour Area with 2019 fleet = 144.0</u> <u>2032 Baseline Contour Area with STF fleet = 125.6</u> <u>NE Limit = 146.7</u> <u>Full available benefit = 144.0-125.6 = 18.4</u> <u>Community benefit = 144.0-146.7 = -2.7</u> <u>% share to community = -2.7/18.4 = -15%</u></p> <p><u>2032 SFT Night:</u> <u>2032 Baseline Contour Area with 2019 fleet = 159.4</u> <u>2032 Baseline Contour Area with STF fleet = 143.9</u> <u>NE Limit = 157.4</u> <u>Full available benefit = 159.4-143.9 = 15.5</u> <u>Community benefit = 159.4-157.4 = 2.0</u> <u>% share to community = 2.0/15.5 = 13%</u></p> <p><u>The change made to the noise envelope limits to reflect the Updated Central Case, increases the share of the benefits going to the community.</u></p> <p><u>In 2019 the area of the Leq16 hr day contour was 136.0 and the area of the Leq 8 hr night contour was 159.4. With the noise envelope limits now based on the Updated Central Case Leq, 16 hour day or Leq, 8 hour night contours, for any year of operation the noise envelope ensures that air noise contours do not exceed contour areas with one runway in 2019, and that an amount of the benefit of technological improvements in noise is always required to be shared.</u></p> <p><u>As can be seen from the above, the extent to which the benefits of improvements in noise performance are shared with the community is greater in 2038 than it is in 2032, and this is because in the early years there is anticipated to be a greater increase in the number of ATM's, which would be expected of any airport expansion project.</u> <u>The above summarises a calculation of how the benefits of improvements in aircraft noise performance are shared. There are also significant wider socio-economic benefits of the airport which arise from the point the runway opens and which are relevant to the consideration of the benefits of the Project as a whole.</u></p>		
2.16.4.8	Noise Envelope	<p>Use of annual noise contour limits in addition to noise limits covering the 92-day summer period would provide confidence that noise would be controlled outside the 92-day summer period.</p> <p>Updated position (Deadline 5): It is noted that Gatwick have night noise controls as part of their status as a designated airport and these controls relate to the summer and winter night periods. However, there is no guarantee that these controls would be retained if their designated</p>	<p>Notwithstanding the explanation provided, annual Lden and Lnight contours are provided for baseline and with Project conditions in Section 14.6 and 14.9 of ES Chapter 14 to illustrate noise changes over the whole year including the winter months.</p> <ul style="list-style-type: none"> Section 4 of Appendix 14.9.2 provides tables of annual Lden and Lnight. 	<p>Section 14.6 and 14.9 of ES Chapter 14: Noise and Vibration [APP-039]</p> <p>ES Appendix 14.9.2: Air Noise</p>	<p><u>Not Agreed</u> <u>Under discussion</u></p>

		<p>status changed or DfT changed their approach to night noise controls. A commitment should be made in the DCO to retain and maintain these controls.</p> <p><u>Updated position (12 August 2024): WSCCs position is that it is essential that there is a commitment in the DCO to retain and maintain DfT night noise controls should DfT night noise controls or Gatwick's designated airport status change in future.</u></p>	<ul style="list-style-type: none"> • Figures 14.9.28 and 14.9.39 show annual Lden and Lnight contours. • Para 14.9.136 to 14.9.139 discuss the changes in annual Lden and Lnight contours compared to the changes in summer season Leq 16 hr and Leq 8 hour night contours. <p>Gatwick with the NRP will also be subject to an overall annual ATM limit of 386,000 movements.</p> <p>Updated Position (April 2024): The limits are set for the whole 24 hour period by using 16 hour day and 8 hour night limits, and for the 92 day summer season which is the noisiest time of year when noise impacts are greatest. The convention for assessing and controlling noise from UK airports over the 92 day summer season has been in place for many years, both in DfT policy and CAA guidance primarily because UK airports tend to be noisier in the summer months because of increased travel abroad in our holiday season and also because in the summer when it is warmer windows tend to be open more, increasing noise levels inside buildings.</p> <p>Noise levels at Gatwick are highest in the summer. ES paragraph 14.9.138 notes that summer season Leq 8 hr contours are about 35% larger than annual Lnight contours and summer season Leq 8 hr night noise levels are about 1.7dB higher than annual Lnight 8 hour noise levels.</p> <p>Annual Lden and Lnight contours are provided for baseline and with Project conditions in Section 14.6 and 14.9 of ES Chapter 14 to illustrate noise changes over the whole year including the winter months. Section 4 of Appendix 14.9.2 provides tables of annual Lden and Lnight. Figures 14.9.28 and 14.9.39 show annual Lden and Lnight contours. Para 14.9.136 to 14.9.139 discuss the changes in annual Lden and Lnight contours compared to the changes in summer season Leq 16 hr and Leq 8 hour night contours. Paragraph 14.9.139 concludes as follows. <i>The increase in size of the annual Lnight contours in 2032 due to the Project compared to the 2032 base is 11-12%, which is slightly larger than the increase in the summer Leq 8 hr noise contours of 9%. The increase in area of the annual day evening night Lden noise levels due to the Project in 2032 compared to the 2032 base is 17% which is the same as the increase in the summer daytime Leq 16 hr 51 dB contours in 2032. Overall, this suggests that any seasonality in the way the extra capacity delivered by the Project is used has little effect on noise levels across seasons.</i> The Applicant therefore concludes that there is no need to add annual noise contour limits to limit noise impacts, and adding annual noise contours limits to the Noise Envelope would add complexity that is not necessary to meet the purpose.</p> <p><u>Updated position (July 2024)</u></p>	<p>Modelling [APP-172]</p> <p>ES Appendix 6.2.1: Scoping Report Part 1 [APP-092]</p> <p>ES Appendix 6.2.1: Scoping Report Part 2 [APP-093]</p> <p>ES Chapter 4: Existing Site and Operation [APP-029]</p>	
--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			Paragraph 2.1.31 of 10.49.4 The Applicant's Written Summary of Oral Submissions ISH 8: Agenda Item 6 – Noise explains the Applicant position that it does not consider it necessary to replicate these controls in the DCO.		
2.16.4.9	Noise Envelope	<p>The Noise Envelope should provide certainty about the levels of noise which can be expected in the future in accordance with CAP 1129; however, the Noise Envelope allows for noise contour limits to increase as a result of airspace changes and new aircraft technology. There should be no allowance for noise contour area limits to increase.</p> <p>Updated position (Deadline 1): There should be no allowance for Noise Envelope limits to increase to give certainty to local communities on future noise levels.</p> <p>Updated position (Deadline 5): WSCC maintain their position on this matter.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter.</p>	<p>The Noise Envelope provides certainty for the periods which it is set in accordance with CAP1129. The noise envelope should reflect evidence of the improvements in average fleet noise performance over time and should not function to prevent airlines serving changing markets or introducing new carbon-efficient aircraft. There may also be extraordinary circumstances in which it could be necessary to review the noise envelope limits upwards. These points are fully as described in Sections 6.3 to 6.7 of the Noise Envelope.</p> <p>Any change to the noise envelope limits would require a formal review following the processes laid out in Section 8, including consultation and approval of the Secretary of State.</p> <p>Updated Position (April 2024): The Applicant has provided further details on the noise envelope proposed and how it has considered relevant guidance in response to question NV.1.9 in The Applicant's Response to ExQ1 - Noise and Vibration (Doc Ref 10.16).</p>	Sections 6.3 to 6.7 and Section 8 of ES Appendix 14.9.7 The Noise Envelope [APP-177]	Not Agreed
2.16.4.10	Noise Envelope	<p>Thresholds should be adopted within the Noise Envelope with the intention that action can be implemented prior to a contour limit breach occurring.</p> <p>Updated position (Deadline 1): Preventative action should be applied when noise contours areas based on actuals or forecast movements are approaching the limits.</p> <p>Updated position (Deadline 5): WSCC maintain their position. There is no evidence that forecasts can reliably predict what actually happens in reality. Noise controls should have a forward-looking component that can be applied during scheduling to provide confidence that noise limits would not be exceeded.</p> <p>Updated position (12 August 2024): WSCC support the JLAs submission for an Environmentally Managed Growth Framework [REP4-040]</p>	<p>As described in ES Appendix 14.9.7: The Noise Envelope, each year an Annual Monitoring and Forecasting Report will be required to not only report monitoring of last year's performance against the Noise Envelope limits but to forecast compliance 5 years ahead, so that noise control measures can be planned and implemented in advance. The Noise Envelope, in Section 7.3, puts restrictions of further capacity declaration in the event that an exceedance of the noise envelope is forecast. The approach ensures action is taken in a timely manner to require compliance, with the sufficient threat of capacity restrictions if a breach is not remedied through the action plan measures within a reasonable time period. This strikes an appropriate fair balance, for the in the unlikely event of actual breach taking into account the purposefully forward-looking nature of the annual monitoring and forecasting approach.</p> <p>Updated Position (April 2024): As has been explained, the Noise Envelope provides for forecasting and actual performance monitoring, and there are requirements for measures to be implemented where either show a breach and for controls on capacity to bite where a breach is not remedied. Noise levels approaching a limit but not forecast or shown to in breach would be compliant with the noise envelope. There would be no requirement for measures to be adopted to secure compliance where compliance is already shown to be achieved.</p>	ES Appendix 14.9.7: The Noise Envelope [APP-177]	Not Agreed

			<p>Updated Position (July 2024) The Applicant has provided a full description of how the noise envelope will operate on a forward looking basis, beginning two years in advance of operations from the NRP commencing, so as to ensure the limits are not breached in The Applicant's Response to Actions ISH8, Appendix A: Note on how the Applicant will plan to stay in the Envelope and why this will be effective. This approach is robust and will ensure that capacity cannot be made available where there is a forecast breach and that measures will be taken to prevent a breach arising.</p>		
2.16.4.11	Noise Envelope	<p>Capacity declaration restrictions are a weak form of noise control as new slots within that capacity can be allocated. Slot restriction measures should be adopted.</p> <p>Updated position (Deadline 1): Capacity restrictions are not sufficient to prevent potential breaches and slot restriction measures should be adopted.</p> <p>Updated position (Deadline 5): WSCC maintain their position on this matter.</p> <p>Updated position (12 August 2024): WSCC maintain their position on this matter.</p>	<p>As described in ES Appendix 14.9.7: The Noise Envelope, each year an Annual Monitoring and Forecasting Report will be required to not only report monitoring of last year's performance against the Noise Envelope limits but to forecast compliance 5 years ahead, so that noise control measures can be planned and implemented in advance. The Noise Envelope, in Section 7.3, puts restrictions of further capacity declaration in the event that an exceedance of the noise envelope is forecast. The approach ensures action is taken in a timely manner to require compliance, with the sufficient threat of capacity restrictions if a breach is not remedied through the action plan measures within a reasonable time period. This strikes an appropriate fair balance, for the in the unlikely event of actual breach taking into account the purposefully forward-looking nature of the annual monitoring and forecasting approach.</p> <p>Updated Position (April 2024): The noise envelope covers the busiest three months of the year at which there is currently little available capacity and close to 100% slot utilisation over the operational day. From the point that the noise envelope is introduced, GAL will treat the noise envelope limits as a scheduling constraint such that there will be a link formed between it and the capacity declaration. The allocation of new slots in any year is predicated on the take-up of those slots not resulting in an exceedance of the noise envelope. The ATM forecast will be processed through the noise model to check it meets the noise envelope limit for the forecast capacity before the slots are allocated. This should ensure the subsequent allocation and take-up of those slots within the capacity declaration will not result in a forecasted exceedance of the noise envelope limits. It is anticipated that actual performance will track well to forecast performance, particularly as those are refined against one another over time through the production of the Annual Monitoring and Forecasting Reports, and this proposal is therefore considered to be the most effective method to prevent breaches arising.</p> <p>Updated Position (July 2024) The Applicant has provided a full description of how the noise envelope will operate on a forward looking basis, beginning two years in advance of</p>	ES Appendix 14.9.7: The Noise Envelope [APP-177]	Not Agreed

			<p>operations from the NRP commencing, so as to ensure the limits are not breached in The Applicant's Response to Actions ISH8, Appendix A: Note on how the Applicant will plan to stay in the Envelope and why this will be effective. This approach is robust and will ensure that capacity cannot be made available where there is a forecast breach and that measures will be taken to prevent a breach arising.</p>		
<p>Other <i>There are no other issues relating to this topic in this Statement of Common Ground.</i></p>					

2.17. Planning and Policy

2.17.1 Table 2.17 sets out the position of both parties in relation to planning and policy matters.

Table 2.17 Statement of Common Ground – Planning and Policy Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.17.1.1	Planning Statement	<p>When the Applicant expects the CAA to confirm there are no obvious safety-related impediments and provide a Letter of No Impediment.</p> <p>Updated position (Deadline 5): WSSC notes the latest position regarding the LONI.</p>	<p>GAL expects CAA's letter of no impediment to be submitted early in the Examination stage. As confirmed in the Planning Statement (para 1.3.3), GAL is confident that there are no safety-related impediments why the Project should not progress and that this will be confirmed through the CAA's letter.</p> <p>Updated position (April 2024): The draft Statement of Common Ground between Gatwick Airport Limited and Civil Aviation Authority (CAA) [REP3-068] submitted at Deadline 3 contains the CAA's draft Letter of No Impediment (LoNI) at Appendix 2. The Applicant believes these are final and complete with no further substantive changes expected. GAL understands that the CAA will provide signed versions of the SoCG and LoNI towards the end of examination.</p> <p>Updated position (July 2024): On the basis of WSSC's Deadline 5 response, the Applicant has marked this SoCG item as resolved.</p>	<p>Planning Statement [APP-245]</p>	<p>Under discussion Resolved Agreed</p>
2.17.1.2	Planning Statement	<p>How the changes mentioned in paragraphs 1.3.7 and 1.3.8 will be secured and appropriately controlled.</p> <p>Updated position (Deadline 5): WSSC's concerns with Requirement 19 are set out in row 2.7.1.16 above, its proposed amendments to the provision are set out in row 92 of Appendix M to the West Sussex Authorities' LIR [REP4-042]. Furthermore, as mentioned in row 2.7.1.15 above, at Deadline 4, the Joint Local Authorities submitted their Introduction to a proposal for an Environmentally Managed Growth Framework [REP4-050] ("the Introduction"), which explains that the DCO requirements which include controls related to environmental effects provide the Applicant with too much flexibility. The Introduction states the Joint Local Authorities consider a bespoke Environmentally Managed Growth Framework should apply to the proposed development and that a worked-up Framework will be submitted to the Examination as soon as possible. The Framework will apply to, amongst other provisions, Requirement 19.</p> <p>Updated position (12 August 2024): <u>WSSC maintains its position regarding the Framework; notwithstanding that position, the Authorities updated comments on the drafting of Requirement 19 are set out in the D8 submission "Consolidated submissions on the draft DCO – Update at Deadline 8" (see Part B; row 38).</u></p>	<p>Airspace within the UK is regulated by the Civil Aviation Authority (CAA) and managed by NATS En Route, which is a subdivision within the National Air Traffic Services. An explanation of the relationship between the DCO Project and airspace regulations was set out in paragraphs 3.3.10 to 3.3.13 of the Autumn 2021 Consultation, contained in Consultation Report Appendices, Part B, Volume 2.</p> <p>Updated position (April 2024): Requirement 19 of the Draft DCO [REP3-008] secures the operation of the repositioned northern runway.</p> <p>Updated position (July 2024): Please see Row 2.7.1.16.</p>	<p>Consultation Report Appendices, Part B, Volume 2 [APP-225] Draft DCO [REP3-008]</p>	<p>Under discussion Covered by Please see Row 2.7.1.16</p>

2.17.1.3	Planning Statement	<p>Whether there is any legal precedent for the statement that it is “appropriate to use the policy framework of the [Airports National Policy Statement] as the primary framework against which the Project as a whole should be tested” (paragraph 1.5.19).</p> <p>Updated position (Deadline 5): WWSSCC’s position on this is set out in the Authorities response to ExQ1 CS.1.27 [REP2.3-132]. The Authorities continue to discuss the approach to be taken to sections 104-105 and the Applicant’s Response to Deadline 3 Submissions [REP4-031] states the Applicant intends to prepare a further submission on this issue at Deadline 5.</p> <p>Updated position (12 August 2024) The Authorities’ position on the application of s.104 and 105 is set out in the Deadline 7 submission “Response to REP6- 095 The Applicant’s position on Section 104 and Section 105 of the Planning Act 2008” [REP7-107].</p>	<p>The Airport National Policy Statement (para 1.41) itself confirms that “the Secretary of State considers that the contents of the Airports NPS will be both important and relevant considerations in the determination of such an application [not comprising an application for the Heathrow Northwest Runway], particularly where it relates to London or the South East of England.”</p> <p>Updated position (April 2024): The Applicant has responded on this matter through the Issue Specific Hearings and submissions to previous deadlines. Most notably in The Applicant’s Written Summary of Oral Submissions from ISH1 [REP1-056], The Applicant’s Response to ISH1 Actions [REP1-062] and The Applicant’s Response to Local Impact Reports [REP3-078]. The Applicant would welcome an updated position or response from WSCC against this SoCG item in response to those submissions.</p> <p>Updated position (July 2024): The Applicant provided further detail on its response within The Applicant’s Position on Sections 104 and 105 of the Planning Act 2008 [REP6-095]. The Applicant notes the Legal Partnership Authorities’ response at Deadline 7 [REP7-107] in which the LPAs state in their concluding remarks that “the disagreements do not need to be resolved in order for a lawful decision to be made”. The Applicant is of the view that this matter can be marked as ‘agreed’</p>	<p>Applicant’s Response to Local Impact Reports [REP3-078]</p> <p>The Applicant’s Written Summary of Oral Submissions from ISH1 [REP1-056]</p> <p>The Applicant’s Response to ISH1 Actions [REP1-062]</p>	<p>Under discussion Not agreed</p>
2.17.1.4	Planning Statement	<p>When further information regarding the proposed Section 106 agreement will come forward and when negotiations will begin in earnest.</p> <p>Updated position (Deadline 1): WSCC acknowledges the submission of a draft 106 to legal representatives.</p> <p>Updated position (Deadline 5): Negotiations on the draft section 106 continue and the Applicant’s latest draft document is currently awaited.</p> <p>Updated position (12 August 2024) Discussions on the s.106 agreement continue.</p>	<p>GAL will issue a draft of the Section 106 Agreement in connection with the NRP to the local authorities. GAL looks forward to receiving initial feedback on the first draft and continuing engagement with the parties to ensure a final, signed version has been submitted by the close of the examination.</p> <p>Updated position (April 2024): The Joint Local Authorities and GAL are continue to work together and engaging on the draft Section 106 Agreement. At the time of writing, the Applicant and JLAs have agreed a series of meetings on each of the schedules of the s106 agreement.</p> <p>Updated position (July 2024): The Applicant is continuing to discuss the drafting of the Section 106 Agreement with the Local Authorities.</p>	n/a	Under discussion
2.17.1.5	Planning Statement	<p>Why the Applicant considers the provision of hotels (Works 26, 27, 28 and 29) falls within the scope of the DCO regime. The same point applies to the proposed commercial space.</p> <p>Updated position (Deadline 5):</p>	<p>An explanation of hotel and office provisions as Associated Development within the Project was provided at the Planning TWG in November 2022 justified against the Planning Act 2008 and Government’s supporting guidance, and no subsequent queries were raised by the LAs. A response was also provided on this</p>	n/a	<p>Under discussion Covered by Please see Row 2.7.1.15</p>

		<p>Please see the response to row 2.7.1.15.</p> <p>Updated position (12 August 2024) WSCC's update on the hotel works are set out above in row 2.7.1.15.</p>	<p>against Item 3.93 in the October 2023 versions of the Issues Trackers.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): Please see Row 2.7.1.15.</p>		
2.17.1.6	Planning Statement	<p>Whether an updated Mitigation Route Map will be prepared (stating, for example, which parts of the dDCO are relevant).</p> <p>Updated position (Deadline 1): WSCC await the updated Mitigation Route Map.</p> <p>Updated position (Deadline 5): WSCC welcomes the submission of the updated Mitigation Route Map, WSCC provided further comments on the Mitigation Route Map in the response to the Approach to Tracking Mitigation ExAQ1 (DCO 1.42) in [REP3-135]. WSCC would like to see the development of the Route Map from its current form, into a Register of Environmental Actions and Commitments (REAC) document. This would be an effective way to track progress against commitments made, which could then be secured through the DCO, rather than just for information, as currently proposed.</p> <p>Updated position (12 August 2024) At the timing of writing, WSCC is considering the content of the REAC submitted at D8.</p>	<p>The Mitigation Route Map will be updated during the course of the DCO Examination to reflect any changes / updates made through the process. The next iteration (and any subsequent updates) will specify the relevant schedule/requirement of the draft DCO, as requested by WSCC.</p> <p>Updated position (April 2024): The updated Mitigation Route Map [REP2-011] submitted at Deadline 2 identifies which part of the Draft DCO [REP3-008] is relevant to specific mitigation / commitment.</p> <p>Updated position (July 2024): The Applicant is currently preparing a REAC to be submitted into the examination at Deadline 8.</p>	ES Appendix 5.2.3 Mitigation Route Map [APP-078]	Under discussion
2.17.1.7	Planning Statement	<p>Why the Planning Policy Compliance Tables appear to make no reference at all to local plan policies (contrasting with the Manston DCO where, in the decision letter, the Secretary of State listed the Thanet Local Plan as an important and relevant matter in the context of policy compliance). Why there is no reference to local plan policies in a number of ES chapters.</p> <p>Updated position (Deadline 5): WSCC is considering the Local Planning Policy Compliance Tables [REP3-055].</p> <p>Updated position (12 August 2024) The applicant has addressed some concerns regarding Local Planning Policy Compliance Table (Table 6.11 [REP4-042], however some concerns remain (see CBC SoCG Row 2.17.1.1)</p>	<p>Relevant local policies are set out within the DCO Application, namely within the legislation and policy sections of the topic-specific ES Chapters (namely ES Chapter 7 to 20) and Gatwick Airport-specific local plan policies in Section 6.6 of the Planning Statement.</p> <p>The purpose of the Planning Policy Compliance Table is to set out and consider relevant national policies against the Project proposals, in recognition that the Government's National Policy Statements provide the primary planning policy framework for NSIPs under the Planning Act 2008.</p> <p>We would be grateful for WSCC's clarification on which ES Chapter(s) it believes is missing this local policy section.</p>	Planning Statement [APP-245] Local Planning Policy Compliance Tables [REP3-055]	Under discussion Not agreed

			<p>Updated position (April 2024): A series of Local Planning Policy Compliance Tables [REP3-055] were submitted at Deadline 3.</p> <p>Updated position (July 2024): Updated position requested from WSCC on this SoCG item.</p>		
2.17.1.8	Planning Statement	<p>Why the dDCO does not make any provision for securing that Site Waste Management Plans following the template in the Construction Resources and Waste Management Plan.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant's response to ExQ1 DCO 1.47 (Response to Development Consent Order and Control Documents [REP3-089]) states -</p> <p>"As explained in response to DCO.1.48, the Applicant will submit an updated version of the dDCO at Deadline 4 which includes specific DCO Requirements for each of the control documents required for construction. There will be a specific DCO Requirement requiring the SWMPs (to be substantially in accordance with the Construction Resources and Waste Management Plan [APP-087]) to be submitted to and approved by CBC".</p> <p>WSCC assumes the reference to "Deadline 4" should be to "Deadline 5". In any event, the Council will comment on the updated provisions in due course.</p>	<p>The Construction Resources and Waste Management Plan (CRWMP) is an Annex to the Code of Construction Practice to be secured as a certified document and under Requirement 7 of the draft DCO. Paragraph 1.4.1 explains that the CRWMP will be implemented through the preparation of site waste management plans and which is also referenced under the Code of Construction Practice, to be secured as a certified document and under Requirement 7 of the draft DCO.</p> <p>Updated position (April 2024): The Applicant's latest response on the CRWMP and its associated Site Waste Management Plans is contained in The Applicant's Response to ExQ1 DCO.1.47 [REP3-089]. The content of the CRWMP [APP-087] makes clear that the SWMPs will follow the SWMP template contained in Annex A of the CRWMP.</p> <p>Updated position (July 2024): The Draft DCO (Doc Ref. 2.1) was updated at Deadline 5 to include specific DCO Requirements relating to the CoCP Annexes.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Appendix 5.3.2 Code of Construction Practice Annex 5 – Construction Resources and Waste Management Plan [APP-087]</p> <p>Draft DCO (REP3-006)</p> <p>The Applicant's Response to ExQ1 DCO.1.47 [REP3-089]</p>	<p>Under discussion Agreed</p>
2.17.1.9	Planning Statement	<p>It is not clear how the mitigation referred to in paragraph 8.17.11 (Artificial Light, Smoke and Steam) will be secured.</p> <p>Updated position (Deadline 5):</p> <p>WSCC is considering this point further; however, its concerns with Appendix A1 of the Design & Access Statement are well-rehearsed.</p> <p>Updated position (12 August 2024)</p> <p>The Authorities' updated position is set out in the D8 submission "Consolidated submissions on the draft DCO – Update at D8" where, in Part B, row 179 an amended form of Requirement 4 (detailed design) is included to require the Applicant to submit, amongst other things, an operational lighting scheme for any works falling within the "listed works" regime introduced by the Applicant.</p> <p>An identical suggested amendment is made to Requirement 10 (surface and foul water drainage). Please see row 181 of the D8 Consolidated submission.</p>	<p>Mitigation measures for lighting are contained within the design principles, in Appendix A1 of the Design and Access Statement (Volume 5) and secured under the draft DCO (i.e. Requirements 4, 5 and 10).</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): Updated position requested from WSCC on this SoCG item.</p> <p>Updated position (Deadline 9): This matter should be read in conjunction with the Applicant's Response to the ExA's Proposed Schedule of Changes to the draft DCO (Doc Ref. 10.72) and the Applicant's Closing Submissions (Doc Ref. 10.73) on the draft DCO. In those documents the Applicant has set out the further</p>	<p>Appendix A1 of the Design and Access Statement: Volume 5 [APP-257]</p> <p>Draft DCO (REP3-006)</p>	<p>Under discussion Not Agreed.</p>

			<p>changes it has made to the draft DCO after the publication of the ExA's Proposed Schedule of Changes to the draft DCO [PD-028], some of which will resolve matters that were not agreed at the time the below table was most recently exchanged with the JLAs. Where the Applicant has identified points raised by the JLAs which remain outstanding as at Deadline 9, it has included and addressed these in its Closing Submissions (Doc Ref. 10.73) on the draft DCO</p>

2.18. Project Elements and Approach to Mitigation

2.18.1 Table 2.18 sets out the position of both parties in relation to project elements and approach to mitigation matters.

Table 2.18 Statement of Common Ground – Project Elements and Approach to Mitigation Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.18.1.1	Lack of detailed evidence with regards environmental and social criteria for assessment of Project options.	<p>Without further evidence of environmental and social criteria influencing the options appraisal process, stakeholders cannot be satisfied that the least impactful option has been taken forward.</p> <p>Updated position (Deadline 1): As raised in the RR and PAADS, further information regarding the criteria used to select the chosen option is required.</p> <p>Updated position (Deadline 5): No positional change.</p> <p>Updated position (12 August 2024) No positional change</p>	<p>ES Chapter 3: Alternatives Considered and its supporting figures and appendices details the process that was undertaken of considering and assessing alternatives during the Project design process. The assessment criteria is set out in Table 3.4.1 of ES Chapter 3 and the results of the appraisal processes are contained in ES Appendix 3.5.1.</p> <p>Updated position (April 2024): ES Chapter 3 Alternatives Considered describes the work undertaken on alternative options by GAL and provides the key reasons for the selection of the Project elements taking into account the environmental effects in accordance with the EIA regulations. The assessment criteria are set out in Table 3.4.1 of ES Chapter 3 and the results of the appraisal processes are contained in ES Appendix 3.5.1.</p>	<p>ES Chapter 3: Alternatives Considered [APP-028]</p> <p>ES Chapter 3 Alternatives Considered Figures [APP-049]</p> <p>ES Appendix 3.5.1 Options Appraisal Tables [APP-073]</p>	<p>Under discussion Not agreed</p>
2.18.1.2	The Applicant has proposed a significant amount of development to support the increase in passenger throughput.	<p>WSSC questions whether the inclusion of new hotels and office blocks is relevant or directly related to this growth.</p> <p>Updated position (Deadline 5): See response at row 2.7.1.15</p>	<p>An explanation of hotel and office provisions as Associated Development within the Project was provided at the Planning TWG in November 2022 justified against the Planning Act 2008 and Government’s supporting guidance, and no subsequent queries were raised by the LAs. A response was also provided on this against Item 3.93 in the October 2023 versions of the Issues Trackers.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSSC against this SoCG item, or confirmation if this item can be marked as ‘agreed’ or ‘no longer pursuing’.</p> <p>Updated position (July 2024): On the basis of WSSC’s Deadline 5 response, the Applicant has marked this SoCG item as covered by Row 2.7.1.15 to avoid repeating outstanding matters in the SoCG.</p>	n/a	<p>Under discussion Covered by Row 2.7.1.15</p>
2.18.1.3	Community engagement through the construction phase	<p>Lack of clarity or outline control document with regards community engagement through the construction phase.</p> <p>Updated position (Deadline 1): As There should be an outline community engagement plan for during the construction phase</p>	<p>Section 4.12 of the Code of Construction Practice (CoCP) (contained in ES Appendix 5.3.2) sets out communication measures that will be undertaken to engage with the local community and stakeholders. Paragraph 6.1.5 of the CoCP also explains that a dedicated Community Liaison Officer will be also be in place and responsible for implementing the communication and engagement</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p>	<p>Agreed Under discussion</p>

		<p>Updated position (Deadline 5): WSCC welcomes the Construction Communications and Engagement Plan. WSCC are currently reviewing the plan and will provide comment at Deadline 5.</p> <p>Updated position (12 August 2024) No comments on the CCEP.</p>	<p>activities. The CoCP is proposed to be legally secured under the Requirement 7 of the draft DCO.</p> <p>Updated position (April 2024): ES Appendix 5.3.2: Code of Construction Practice Annex 7 – Construction Communications and Engagement Plan was submitted at Deadline 2. This plan outlines the approach to stakeholder communications and engagement during the Project’s construction.</p> <p>Updated position (July 2024): Updated position requested from WSCC on this SoCG item.</p>	Draft DCO (REP3-006)	
2.18.1.4	Proposed S106 agreement Heads of Terms.	<p>Planning Statement (Table 5.2) sets out proposed Heads of Terms for a S106 Agreement. WSCC has concerns regarding the limited scope of the proposals.</p> <p>Updated position (Deadline 1): WSCC acknowledges the draft s106 received by legal representatives.</p> <p>Updated Position (Deadline 3): WSCC has concerns regarding the limited scope of the proposals.</p> <p>Updated position (Deadline 5): WSCC continues to engage with GAL regarding the Section 106</p> <p>Updated position (12 August 2024) - subject to the Section 106 being agreed, this could be turned green.</p>	<p>GAL will issue a draft of the Section 106 Agreement in connection with the NRP to the local authorities. GAL looks forward to receiving initial feedback on the first draft and continuing engagement with the parties to ensure a final, signed version has been submitted by the close of the examination.</p> <p>Updated position (April 2024): The Joint Local Authorities and GAL are continue to work together and engaging on the draft Section 106 Agreement. At the time of writing, the Applicant and JLAs have agreed a series of meetings on each of the schedules of the s106 agreement.</p> <p>Updated position (July 2024): The Applicant is continuing to engage with the Local Authorities on the drafting of the Section 106 Agreement.</p>	n/a	Under discussion— subject to the Section 106 being agreed, this could be turned green Agreed subject to s106.
2.18.1.5	The proposals to mitigate impacts of airport growth.	<p>WSCC has concerns that the proposals to mitigate the impacts of airport growth are not environmentally focussed.</p> <p>Updated position (Deadline 1): The proposals to mitigate impacts of airport growth should be delivered following the environmentally-focused principles of ‘Green Controlled Growth’, as proposed in the recent Luton Airport DCO</p> <p>Updated position (Deadline 5): WSCC has provided further response to this issue within [REP4-050], an Introduction to a proposal for an Environmentally Managed Growth Framework.</p> <p>Updated position (12 August 2024) No positional change</p>	<p>The Applicant has included as part of the Application the mitigation identified as being necessary under the Environmental Statement to address the potential adverse impacts of the Project. Specific to those environmental topics and impacts which are considered most sensitive to airport growth (noise, carbon, surface access and air quality), the relevant mitigation is primarily contained within the Noise Envelope, Surface Access Commitments and Carbon Action Plan documents, each secured as requirements to, and to be certified as part of, the draft DCO (with additional air quality mitigation proposed to be included within the s106 Agreement). Each of those ‘control’ documents sets out bespoke independent governance, monitoring and mitigation arrangements to ensure the proper functioning and delivery of the underlying mitigation/commitments.</p> <p>Updated position (April 2024): The Applicant has responded on this matter through the Issue Specific Hearings and submissions to</p>	<p>ES Appendix 14.9.7 The Noise Envelope [APP-177]</p> <p>ES Appendix 5.4.2 Carbon Action Plan [APP-091]</p> <p>ES Appendix 5.4.1 Surface Access Commitments [APP-090]</p> <p>Draft DCO (REP3-006)</p>	Not Agreed

			<p>previous deadlines. Most notably in The Applicant's Written Summary of Oral Submissions from ISH2 [REP1-057] and The Applicant's Response to Local Impact Reports [REP3-078]. The Applicant would welcome an updated position or response from WSCC against this SoCG item in response to those submissions.</p> <p><u>Updated position (July 2024): The Applicant has responded to the JLAs' Introduction for a proposal for Environmentally Managed Growth at Appendix B of The Applicant's Response to Deadline 4 Submissions (Doc Ref 10.38) submitted at Deadline 5 and The Applicant's Response to Deadline 5 Submissions - Response to JLA's EMG Framework Paper [REP6-093] submitted at Deadline 6. Together, these submissions detail why the Applicant considers an EMG framework is neither necessary nor appropriate for the Project.</u></p>		
2.18.1.6	Justification for supporting infrastructure	<p>Justification for the required supporting infrastructure and its necessity to facilitate the required passenger throughput. WSCC is concerned that a significant amount of development to facilitate the Project is proposed, which has not been fully justified and would require a lengthy construction period.</p> <p>WSCC questions whether the inclusion of new hotels and office blocks is relevant or directly related to this growth. Justification is therefore needed for the required supporting infrastructure and its necessity to facilitate the required passenger throughput.</p> <p>Updated position (Deadline 5): See response in row 2.7.1.15</p>	<p>The need for the Project components has been set out through the pre-application consultation processes to inform stakeholders and the wider public of GAL's proposals. For instance, Section 3 of the Autumn 2021 Consultation Overview Document contained in Consultation Report Appendices, Part B, Volume 2.</p> <p>An explanation of hotel and office provisions as Associated Development within the Project was provided at the Planning TWG in November 2022 justified against the Planning Act 2008 and Government's supporting guidance, and no subsequent queries were raised by the LAs. A response was also provided on this against Item 3.93 in the October 2023 versions of the Issues Trackers.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p><u>Updated position (July 2024): On the basis of WSCC's Deadline 5 response, the Applicant has marked this SoCG item as covered by Row 2.7.1.15 to avoid repeating outstanding matters in the SoCG.</u></p>	Consultation Report Appendices, Part B, Volume 2 [APP-225]	Under discussion <u>Covered by Row 2.7.1.15</u>
2.18.1.7	Alternatives	Lack of evidence regarding the assessment of alternatives for Project infrastructure and how the current set of design principles will ensure a secured approach to good design, particularly for the Central Area Recycling Enclosure (CARE facility) and highways works.	ES Chapter 3: Alternatives Considered and its supporting figures and appendices details the process that was undertaken of considering and assessing alternatives during the Project design process. The assessment criteria is set out in Table 3.4.1 of ES Chapter 3, including the need to promote good design, and the	ES Chapter 3: Alternatives Considered [APP-028]	Not Agreed Under discussion

		<p>Updated position (Deadline 1): Although the Design and Access Statement (DAS) (APP-253-257) is a separate DCO control document, the design principles upon which the detailed design would be secured against, have had no input from stakeholders. They are currently not detailed enough and contain ambiguous wording, which does not ensure that a high-quality development can be secured.</p> <p>Updated position (Deadline 5): WSCC is in discussions with GAL regarding how good design can be achieved and detailed design phase further secured through the DCO.</p> <p><u>Updated Position (12 August 2024)</u> WSCC is still concerned about the limited level of detail provided for a number of sensitive sites due to the overall lack of design detail included within the Design Principles document [REP7-063] which is intended to be the control document with the rest of the DAS being 'illustrative'</p>	<p>results of the appraisal processes are contained in ES Appendix 3.5.1.</p> <p>Updated position (April 2024): The Design Principles [REP3-056] have been updated at Deadline 3 in response to LA feedback and ExQ1 DCO.1.57. The Applicant welcomes WSCC's comments on the updated design principles.</p> <p>Updated position (July 2024): <u>The Applicant has reviewed the comments made by the local authorities at Deadline 6 in relation to the design principles and has subsequently updated them at Deadline 7. Details of how the Applicant has taken into consideration the comments made by the local authorities is set out in Appendix A to The Applicant's Response to Deadline 6 Submissions (Doc Ref. 10.58).</u></p>	<p>ES Chapter 3 Alternatives Considered Figures [APP-049]</p> <p>ES Appendix 3.5.1 Options Appraisal Tables [APP-073]</p>	
2.18.1.8	New housing and infrastructure required	<p>The need for new homes and associated infrastructure, including WSCC services.</p> <p>Updated position (Deadline 5): In relation to housing, please refer to Deadline 3 West Sussex Joint Local Authorities response [REP3-117] Sections 2.2 and 2.3.</p>	<p>A response to this issue was provided in Item 12.39 of the October 2023 Issues Trackers.</p> <p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p> <p>Updated position (July 2024): <u>The Applicant does not agree that additional housing and associated infrastructure is required as a result of the project. This is to be discussed further at a TWG.</u></p> <p>Updated position (Deadline 9): <u>As set out in the Joint Position Statement, Through the agreement of the Homeless Prevention Fund, the parties confirm that all issues raised/ submissions made in relation to the mitigation of Housing-related impacts of the Project have been adequately addressed. Therefore this matter can be marked as agreed.</u></p>	n/a	<p><u>Agreed subject to s106</u> Under discussion</p>
2.18.1.10	Scope and scale of environmental mitigation	<p>Limited scope and scale of environmental mitigations (and the control mechanisms set out in the draft DCO (dDCO) to secure these) and community compensation in light of the likely adverse effects arising from the Project. These concerns are reflected in the significant gap in expectations that currently exist between the Applicant and WSCC.</p>	<p>Please may WSCC clarify if it has any additional queries or concerns with the Project's assessment work that is not covered by its RRs and PADS (and therefore not covered elsewhere in these Issues Tables).</p> <p>Updated position (April 2024): <u>On this basis, can WSCC confirm if this item can be marked as 'agreed' or 'no longer pursuing' as captured under each topic section of the SoCG.</u></p>	n/a	<p>Under discussion <u>Not agreed</u></p>

		<p>Updated position (Deadline 1): This was an overarching concern based upon the assessment undertaken by the Applicant and each topic section gives the specifics.</p> <p>Updated position (Deadline 5): Position remains as per Deadline 1.</p> <p>Updated position (12 August 2024) WSSC still proposes an Environmentally Managed Growth approach.</p>	<p>Updated position (July 2024): The Applicant does not agree that the scope and scale of the proposed environmental mitigation is insufficient.</p>		
2.18.1.11	Enhancement measures	<p>The need for enhancement measures (including to Public Rights of Way, recreational facilities, and ecological habitats).</p> <p>Updated position (Deadline 1): There appear to be no enhancements to the PRoW network as part of the proposals Enhancements within West Sussex, both withing and outside the DCO Limits have already been set out but no confirmation these have been taken on board</p> <p>Updated position (Deadline 5): No further updates at Deadline 5. WSSC continue to engage with The Applicant on matters related to this issue.</p> <p>Updated Position (12 August 2024)-4.3 There are no additional enhancements to the PRoW network which is disappointing.</p>	<p>Please may WSSC clarify if it has any additional queries or concerns with the Project’s assessment work that is not covered by its RRs and PADS (and therefore not covered elsewhere in these Issues Tables). The proposed mitigation measures for active travel, PRoWs, ecological habitats and recreational facilities are detailed in the DCO Application, in particular through ES Chapter 5: Project Description, ES Chapter 9: Ecology and Nature and ES Chapter 19: Agricultural Land Use and Recreation.</p> <p>Updated Position (April 2024)</p> <p>The Project includes additional Active Travel measures providing additional links and benefits to the PRoW network.</p> <p>Appendix A to the Deadline 1 Submission - The Applicant’s Response to Actions from Issue Specific Hearing 4: Surface Transport [REP1- 065] provides details of the active travel provision provided as part of the Project.</p> <p>In addition, the following benefits are provided as part of the Project:</p> <ul style="list-style-type: none"> • a new permissive link provided from the West Sussex Border path west of the River Mole into the Museum Field mitigation area as shown in ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan • new links via the active travel provision proposed that would be available to users of the Sussex Border Path to access the proposed replacement open spaces proposed to the west of the existing Church Meadows, and at Car Park B North and South. • A new active travel link via the proposed ramp into Riverside Garden Park close to Longbridge Roundabout. This measure would enable users of the Sussex Border 	<p>ES Chapter 5: Project Description [REP1-016]</p> <p>ES Chapter 9: Ecology and Nature Conservation [APP-034]</p> <p>ES Chapter 19: Agricultural Land Use and Recreation [APP-044]</p> <p>ES Appendix 8.8.1 Outline Landscape and Ecology Management Plan [APP-116] [REP3-031, REP3-033, REP3-035]</p> <p>Appendix 19.8.1 Public Rights of Way Management Strategy [APP-215 REP2-009]</p>	<p>Not Agreed Under discussion</p>

			<p>Path to follow an additional route through Riverside Garden Park and then the replacement open space at Car Park B North to rejoin the existing route to the Sussex Border Path close to the bridge over the London to Brighton railway line. This additional route would enable users of the Sussex Border Path to avoid the section of the current route east from North Terminal roundabout that forms part of the current airport infrastructure.</p> <p>Updated position (July 2024):</p> <p>The active travel proposals have been subject to additional discussion with the WSCC PRow Officer during a meeting held on the 11th June. The Applicant's position outlined above remains unchanged. No further PRow upgrades are considered to be required.</p>		
2.18.1.13	Assessment of Alternatives	<p>Although it is understood that operational and safety considerations are important aspects of design, the submission lacks detail on how environmental and social criteria have influenced the decision-making process. There is a general lack of evidence around assessment scoring associated with each option, along with no supporting constraints mapping.</p> <p>Updated position (Deadline 1): As raised in the RR and PAADS, further information regarding the criteria used to select the chosen option is required.</p> <p>Updated position (Deadline 5): This row can be deleted — covered at row 2.18.1.1</p>	Please refer to our response under Item 19.116 in the previous issues tracker for details.	n/a	Under discussion
2.18.1.14	Project Description and Construction Phase Detail	<p>Clarification is needed on what is shown on the plans and the various definitions of the airfield boundaries, DCO limits, and operational land for both the current airport and with the Project. There are inconsistencies in descriptions between numbered works and the way that they are described with some elements having parameters and others not.</p> <p>Updated position (Deadline 1): Awaiting updated documentation.</p> <p>Updated position (Deadline 5): See response at 2.7.1.3</p>	<p>The Applicant is undertaking a review of the project description's terminology against the Environmental Statement and draft Development Consent Order in response to the Planning Inspectorate's (PINS) Section 51 Advice [PD-003]. Updated documents will be submitted no later than 10 working days before the Preliminary Meeting, as per PINS request.</p> <p>Updated position (April 2024): In the Applicant's response to Procedural Deadline A, the Applicant submitted an updated Project Description Signposting Document, updated Draft DCO and updated ES Chapter 5: Project Description to address any</p>	n/a	<p>Under discussion Covered by Row 2.7.1.3</p>

			<p>inconsistencies in terminology. The Local Authorities are asked to advise if it has any outstanding queries taking account of these submissions.</p> <p>Updated position (July 2024): On the basis of WSCC's Deadline 5 response, the Applicant has marked this SoCG item as covered by Row 2.7.1.3 to avoid repeating outstanding matters in the SoCG.</p>		
2.18.1.15	Project Description and Construction Phase Detail	<p>A general lack of detail, ambition, and concerns about the way in which development can appropriately be delivered in terms of phasing, design quality, mitigation, and ensuring future safeguards (controls).</p> <p>Updated position (Deadline 1): This was an overarching concern based upon the assessment undertaken by the Applicant and each topic section gives the specifics.</p> <p>Updated position (Deadline 5): This row can be removed, as it is replicated where required through topic specific sections.</p>	<p>Further clarity is requested from WSCC on the specifics of this response.</p> <p>Updated position (April 2024): On this basis, can WSCC confirm if this item can be marked as 'agreed' or 'no longer pursuing' as captured under each topic section of the SoCG.</p>	n/a	Under discussion
2.18.1.16	Project Description and Construction Phase Detail	<p>Lack of clarity or outline control document with regard to community engagement through the construction phase, which would help mitigate some of the above concerns. The Code of Construction Practice (CoCP) (APP-082) states that the Applicant will take 'reasonable steps to engage with the community' but that only prior to construction, it will develop a Communications and Engagement Management Plan. WSCC requests that this is secured through an outline control document, which is discussed with the relevant stakeholders during the examination.</p> <p>Updated position (Deadline 1): There should be an outline community engagement plan for during the construction phase.</p> <p>Updated position (Deadline 5): WSCC welcome the Plan, and comments will be made at Deadline 5.</p> <p>Updated position (12 August 2024) No further comments on the Communications Plan.</p>	<p>Section 4.12 of the Code of Construction Practice (CoCP) (contained in ES Appendix 5.3.2) sets out communication measures that will be undertaken to engage with the local community and stakeholders. Paragraph 6.1.5 of the CoCP also explains that a dedicated Community Liaison Officer will be also be in place and responsible for implementing the communication and engagement activities. The CoCP is proposed to be legally secured under the Requirement 7 of the draft DCO.</p> <p>Updated position (April 2024): ES Appendix 5.3.2: Code of Construction Practice Annex 7 – Construction Communications and Engagement Plan was submitted at Deadline 2. This plan outlines the approach to stakeholder communications and engagement during the Project's construction.</p> <p>Updated position (July 2024): Updated position requested from WSCC on this SoCG item.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice [REP1-021]</p> <p>Draft DCO (REP3-006)</p>	<p>AgreedUnder discussion</p>
2.18.1.19	Mitigation, Compensation and Enhancement	<p>The DAS is not considered comprehensive because, for example, some development is excluded, there is a general lack of detail for character</p>	<p>The Design and Access Statement (Volume 1) describes and analyses the site context. Notwithstanding this, the Applicant now intends to undertake a review of the Design and Access Statement,</p>	<p>Design and Access Statement: Volume 1 [APP-253]</p>	<p>Not AgreedUnder discussion</p>

		<p>zone analysis, a lack of detail on design and visual impact of some works, a lack of analysis of site context, opportunities and constraints.</p> <p>Updated position (Deadline 1): Awaiting an updated DAS through the Examination.</p> <p>Updated position (Deadline 5): Discussions continue between WSCC and The Applicant.</p> <p><u>Updated Position (12 August 2024)</u> <u>WSCC is still concerned about the limited level of detail provided for a number of sensitive sites due to the overall lack of design detail included within the Design Principles document [REP7-063] which is intended to be the control document with the rest of the DAS being 'illustrative'.</u></p>	<p>in response to WSCC's comment, and will provide an update at a future TWG.</p> <p>Updated position (April 2024): The Applicant has reviewed the DAS and considers it provides a comprehensive explanation (with visual imagery) of the site, its context, analysis and how it has informed the Project design. The Applicant has also set out how the Design and Access Statement has been prepared having regard to good design through national policy guidance in response to ExQ1 GEN.1.18 [REP3-091].</p> <p>Updated position (July 2024): Updated position requested from WSCC on this SoCG item.</p> <p>Updated Position (August 2024): The Applicant has taken on board and responded to comments from the Local Authorities on the Design Principles (Doc Ref. 7.3) throughout the Examination stage, such as the Applicant's Deadline 6 Response on Design Matters [REP7-096]. Notably, the Applicant has responded to and addressed comments on specific Design Principles, where these have been provided by the Local Authorities, however the absence of comments on specific Design Principles (again evidenced by the JLAs Deadline 8 submissions and WSCC's response to this SoCG row) limits the Applicant's ability to be able to comprehensively address WSCC's concerns.</p>	<p>Design and Access Statement Volume 1 [AS-154][APP-253]</p> <p>Design and Access Statement Volume 2 [REP7-059][APP-254]</p> <p>Design and Access Statement Volume 3 [AS-155][APP-255]</p> <p>Design and Access Statement Volume 4 [REP7-061][APP-256]</p> <p>Design and Access Statement Volume- 5 [APP-257][AS-156]</p> <p>Design and Access Statement, Appendix 1: Design Principles (Doc Ref. 7.3)</p>	
2.18.1.20	Mitigation, Compensation and Enhancement	<p>There is no comprehensive commentary to explain the phasing plans and WSCC is concerned about the proposed sequencing and delivery of various elements of the Project.</p> <p>Updated position (Deadline 1): Further detail is required on the construction sequencing</p> <p>Updated position (Deadline 5): Position as per Deadline 1</p>	<p>The anticipated construction timing and sequencing is contained in Section 5.3 of ES Chapter 5: Project Description and ES Appendix 5.3.3: Indicative Construction Sequencing, and accompanied by the Buildability Reports. The indicative construction sequencing shows the project works on a yearly basis, with supporting descriptions in the Project Description.</p> <p>Updated position (April 2024): The DCO Applications' suite of control documents and the Draft DCO [REP3-006] itself contain a series of controls to manage the timing and sequencing of works where required, for instance to ensure that mitigation or protection measures are in place before relevant works commence. Please refer to the Applicant's response to ExQ1 DCO.1.49 [REP3-089] submitted at Deadline 3 which draws out a number of examples of such controls. The production and submission of detailed plans to the relevant Planning Authority, as detailed in the DCO.1.49 response, will also be dictated by the construction programme. As such, the relevant planning authority will have sight of the</p>	<p>ES Chapter 5: Project Description (REP1-016)</p> <p>ES Appendix 5.3.3: Indicative Construction Sequencing [APP-088]</p> <p>ES Appendix 5.3.1 Buildability Reports Part A [APP-079]</p> <p>ES Appendix 5.3.1 Buildability Reports Part B Part 1 [APP-080]</p>	<p><u>Not agreed</u> Under discussion. <u>This row is not needed, as is duplicated elsewhere</u></p>

			construction phasing and sequencing through the receipt of these detailed plans.	ES-Appendix 5.3.1 Buildability Reports Part B Part 2 [APP- 081]

~~2.20.~~ 2.19. Socio-Economics and Economics

~~2.20.12.19.1~~ Table 2.20 sets out the position of both parties in relation to socio-economics and economics matters.

Table 2.19 Statement of Common Ground – Socio-Economics and Economics Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.19.1.1	Clarification on use of pre-Covid data.	<p>2019 data was primarily used given concerns with the Covid pandemic potentially affecting baseline data. However, some of the data sources used are post Covid and it is not clear why the Applicant has applied this approach.</p> <p>Updated position (Deadline 1): The Applicant should obtain up-to-data for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment.</p> <p>Updated position (Deadline 5): The Applicant should obtain up-to-data for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment. Latest update by Applicant has not provided this.</p> <p>Updated Position (12 August 2024) WSSCC consider that clarifications regarding the use of different data have now largely been provided sufficient to address this matter.</p> <p>Related positions regarding use of up-to-date information sources and consideration of effects at local level are set out below</p>	<p>The analysis presented in the PEIR was primarily based on 2019 data (i.e. pre-Covid) given that the economy and wider socio-economic conditions are expected to rebound to pre-pandemic levels before the Project's commencement. For the same reasons, the same approach is carried over in the ES, however, where appropriate, relevant data sources such as labour market and employment indicators have been updated to reflect the latest available position based on data availability.</p> <p>Updated position (April 2024): The Applicant has also provided a response during Issue Specific Hearing 3 on using a mixture of pre-Covid and post-Covid data. Some data has inevitably changed since submission of the application and will continue to change but it does not materially change the assessment. There is also no requirement to update data throughout the Examination as new data becomes available. Pre-Covid data was used as it provides a benchmark against which the economy would operate at a normal level or operating in normal conditions. However, where there have been updates to data or new data was available, it was incorporated into the assessment. Therefore, a blend of pre- and post-Covid data was used as some post-Covid data was volatile due to the effects of Covid, which meant 2019 remained most suitable for some data.</p> <p>The Applicant has provided data from the 2021 Census in its response to Action 5 of Issue Specific Hearing 3.</p> <p>Updated position (July 2024): The original matter sought clarification on why data from different dates has been used. The Applicant has provided that clarification and subsequently provided updated data. If that is not sufficient for the Council then the matter is Not Agreed</p>	<p>ISH3 Action Point 5 in The Applicant's Response to Actions ISH2-5 [REP2-005]</p> <p>Deadline 1 Submission – Written Summary of Oral Submissions from Issue Specific Hearing 3: Socio-economics [REP1-058] – Section 3.1</p>	Not Agreed
2.19.1.2	Use of up-to-date information sources.	<p>Data from the 2021 Census has been used, where available, at the relevant spatial scale. The baseline assessment presented comprised the most up-to date position at the time of writing, however newer data is now available.</p> <p>Updated position (Deadline 1): The Applicant should obtain up-to-data for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment.</p>	<p>Please see the response provided at Row 3.6 of this table.</p> <p>A range of data sources have been considered in the baseline depending on the specific indicators being considered and the availability of data at different geographical scales. The latest data has been used where available, with historic data points also included to help assess trends over time. The ES and Economic Impact Assessment use consistent impact areas where appropriate.</p> <p>Updated position (April 2024):</p>	<p>ES Chapter 17 Socio-Economics [APP-042]</p>	Not Agreed

		<p>Updated position (Deadline 5): The Applicant should obtain up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment. Latest update by Applicant has not provided this.</p> <p>Updated Position (12 August 2024) WSSCC consider that clarifications regarding the use of different data have now largely been provided sufficient to address this matter.</p> <p>Related positions regarding use of up-to-date information sources and consideration of effects at local level are set out below</p>	<p>Please refer to the response at Row 2.9.1.1 of this Table.</p> <p>Updated position (July 2024): No change</p>		
2.19.1.3	Out-of-date data.	<p>Several Baseline Data Tables are out of date and don't use the most recent data sources available at the time. This includes education data on shortfall/surplus which needs to be tested with relevant local education authorities.</p> <p>Updated position (Deadline 1): The Applicant should source up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment.</p> <p>Updated position (Deadline 5): The Applicant should obtain up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment. Latest update by Applicant has not provided this.</p> <p>Updated Position (12 August 2024) WSSCC consider that clarifications regarding the use of different data have now largely been provided sufficient to address this matter.</p> <p>Related positions regarding use of up-to-date information sources and consideration of effects at local level are set out below</p>	<p>The analysis presented in the PEIR was primarily based on 2019 data (i.e. pre-Covid) given that the economy and wider socio-economic conditions are expected to rebound to pre-pandemic levels before the Project's commencement. For the same reasons, the same approach is carried over in the ES, however, where appropriate, relevant data sources such as labour market and employment indicators have been updated to reflect the latest available position based on data availability.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.2 of this Table.</p> <p>Updated position (July 2024): No change</p>	n/a	Not Agreed
2.19.1.4	Socio-Economics (Economic Development)	<p>The approach to estimating construction employment, given reliance on old data and not accounting for local variations.</p> <p>Updated position (Deadline 1): Up-to-date data should be used to inform the assessment of impacts related to construction employment and temporary accommodation</p> <p>Updated position (Deadline 5): The Applicant should obtain up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment. Latest update by Applicant has not provided this.</p>	<p>The estimate of construction employment is provided by GAL's construction team. The estimate is sound. See 3.28 for a response on the availability of accommodation</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.2 of this Table.</p> <p>Updated position (July 2024): No change</p> <p>Updated position (Deadline 9):</p>	<p>ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note [APP-199].</p> <p>Updated position (Deadline 9):</p>	Not Agreed

		<p>Updated Position (12 August 2024): WSSCC consider that clarifications regarding the use of and provision of more up-to-date information sources and data have now largely been provided sufficient to mostly address this matter under discussion.</p> <p>A notable exception remains in relation to population and housing data used to underpin the assessment of available bedspaces. See position at Row 2.19.1.5.</p> <p>Further to the discussion of this at the TWG meeting (06.08.24) WSSCC request that up-to-date information on availability of bedspaces is provided by the Applicant, and an updated assessment if appropriate to address the council's concern.</p>	<p>The Applicant agrees with the JLAs that the stock of PRS using Census 2021 is correct.</p> <p>Regarding PRS availability, the Applicant has taken a conservative approach using the best available data. The assessment uses a 4% vacancy rate which is an average across all housing tenures as reported in the 2021 Census. This is lower than the 11% estimated vacancy rate for PRS housing in the English Housing Survey. Even if all 20% NHB workers (270 workers) sought PRS housing during the identified phases of construction this would be a tiny fraction of the market and is unlikely to cause significant impacts.</p>	<p>The Applicant's Response to Actions – ISHs 2-5 [REP2-005] – Table 3.3.2</p> <p>ES Appendix 17.9.3 Assessment of Population and Housing Effects [APP-201] – Section 6</p>	
2.19.1.5	Socio-Economics (Economic Development)	<p>The assessment of housing and population relies on out-of-date data. Up-to-date data should be used because it will impact on labour supply/housing conclusions. The assessment also makes optimistic projections on housing and does not appear to fully consider existing constraints.</p> <p>Updated position (Deadline 1): The Applicant should source up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment.</p> <p>The Applicant should undertake an assessment of impacts at local authority level and take account of existing constraints.</p> <p>Updated position (Deadline 5): The Applicant should obtain up-to-date for all data sources used in the chapter to avoid adopting an inconsistent approach to the assessment. Latest update by Applicant has not provided this.</p> <p>The Applicant should undertake an assessment of impacts at local authority level and take account of existing constraints. Latest update by Applicant has not provided this.</p> <p>In relation to housing, please refer to Deadline 3 West Sussex Joint Local Authorities response [REP3-117] Sections 2.2 and 2.3.</p> <p>Updated Position (12 August 2024): WSSCC's concern is that the 2021 Census reflects temporary and unprecedented changes to the housing market arising from the Covid-19 pandemic, whereby there was a greater than normal availability of PRS, representing a deviation from long-term trends. This was addressed by WSSCC and the Authorities in their Deadline 3 Submission [REP3-117] Section 2.3, specifically paragraphs 2.3.5 to 2.3.7. With the market now returning to pre-pandemic levels, WSSCC contend that the supply of available bedspaces measured at the 2021 Census would be higher than in today's</p>	<p>The analysis presented in the PEIR was primarily based on 2019 data (i.e. pre-Covid) given that the economy and wider socio-economic conditions are expected to rebound to pre-pandemic levels before the Project's commencement. For the same reasons, the same approach is carried over in the ES, however, where appropriate, relevant data sources such as labour market and employment indicators have been updated to reflect the latest available position based on data availability.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.2 of this Table for the use of up-to-date data. Additionally, ES Appendix 17.9.3: Assessment of Population and Housing Effects contains a housing assessment at a local authority level and the Applicant's Response to Issue Specific Hearings includes a local authority-level assessment for all authorities where more than one non-home based worker is expected to be based (Crawley, Reigate and Banstead, Mole Valley, Mid Sussex, Tandridge, Horsham and Croydon).</p> <p>Construction employment at the local authority level is provided in ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical note.</p> <p>The affordable housing assessment also includes analysis at local authority level (for the local authorities adjacent to Gatwick) for recent completions, local authority evidence of need, local plans and pipeline supply.</p> <p>The assessment of significance in the ES is (correctly) done at the spatial scale of functional market areas, not individual local authorities.</p> <p>Updated position (July 2024): This appears to be introducing a new issue – an assessment at local authority level – which is already addressed elsewhere.</p> <p>Updated position (Deadline 9):</p>	<p>ISH3 Action Point 5 in the Applicant's Response to Actions ISH2-5 [REP2-005]</p> <p>Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note [APP-199]</p> <p>Updated position (Deadline 9):</p> <p>The Applicant's Response to Actions – ISHs 2-5 [REP2-005] – Table 3.3.2</p> <p>ES Appendix 17.9.3 Assessment of Population and Housing Effects</p>	Not Agreed

		<p>more normal operating market if measured again. This is reflected in the council's own experience, where there has been a significant worsening in the availability of short- and medium-term accommodation in the years since the 2021 Census was undertaken.</p> <p>See responses at Row 2.19.2.6 on local authority level data.</p>	<p>Please refer to the Applicant's response in row 2.19.2.6 below.</p>	<p>[APP-201] – Section 6</p>	
Assessment Methodology					
2.19.2.1	Incomplete consideration of local planning policies.	<p>The review of policies is considered incomplete and provide limited analysis of how the Project aligns with the policies of host and neighbouring authorities.</p> <p>Updated position (Deadline 1): All relevant socio-economic policies should be identified and included in the chapter.</p> <p>Updated position (Deadline 5): All relevant socio-economic policies should be identified and included in the chapter. Latest update by Applicant has not provided this.</p> <p>Updated Position (12 August 2024): WSCC's position is that no further discussion will resolve its concerns and as such it is content to consider this Not Agreed and for the ExA to consider in determining weight afforded to the assessment within the overall planning balance.</p>	<p>ES Appendix 17.2.1 sets out further policies.</p> <p>Updated position (April 2024): A summary of the relevant policies is provided in Section 17.2 of ES Chapter 17: Socio-economic. ES Appendix 17.2.1 lists all relevant socio-economic policies. The Applicant does not believe adding additional policies will change the outcome of the assessment.</p> <p>Updated position (July 2024): Can the Council say which policies are missing and what impact it would have on the assessment?</p> <p>Updated position (Deadline 9): WSCC has not told the Applicant which policies it considers are missing. Therefore, the Applicant maintains its position it has sufficiently covered all relevant policies.</p>	<p>5.3 Environmental Statement – Appendix 17.2.1 – Summary of Local Plan Policies – Socio-Economics [APP-195]</p> <p>ES Chapter 17 Socio-Economics [APP-042] – Section 17.2</p>	Not Agreed
2.19.2.2	Comments raised by local authorities not sufficiently captured.	<p>The chapter does not capture the significant extent or detail of comments raised by the local authorities particularly on the scope of the assessment, assessment approach and study area.</p> <p>Updated position (Deadline 1): Issues in the tracker have not been addressed. Local authorities have also raised a significant number of comments during TWG meetings which have not been referenced in the socio-economic chapter.</p> <p>Updated position (Deadline 5): Issues in the tracker have not been addressed. Local authorities have also raised a significant number of comments during TWG meetings which have not been referenced in the socio-economic chapter. Latest update by Applicant has not dealt with the issues identified in tracker nor the significant number of comments raised at several TWG meetings.</p> <p>Updated Position (12 August 2024): WSCC's general position in respect of assessment methodology reflects that set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming</p>	<p>Issues trackers have been updated and shared with the local authorities.</p> <p>Updated position (April 2024): We are not aware of any issues that have not been addressed in the Chapter that are not captured through individual issues in the Tracker and the Statement of Common Ground.</p> <p>For the reasons set out elsewhere in this table, the Applicant is not proposing changes to the Chapter. Responses to specific issues around the approach to assessment, including spatial scales are set out above and below. If there are additional issues not captured in the tracker we are happy for WSCC to raise them and the Applicant will respond.</p> <p>Updated position (July 2024): Can the Council say which issues have not been addressed?</p> <p>Updated position (Deadline 9): The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p>	<p>Deadline 1 Submission Relevant Representations Report [REP1-048]</p> <p>The Applicant's Response to Written Representations [REP3-072]</p> <p>The Applicant's Response to the Local Impact Reports [REP3-078]</p>	Not Agreed

		<p>affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need. As such this remains Not Agreed. See Row 2.19.4.1 in respect of ESBS.</p>	<p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p> <p>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.</p>	<p>The Applicant's Response to the ExA's Written Questions (ExQ1) – Socio-Economic Effects [REP3-103]</p> <p>The Applicant's Response to ExA's Written Questions (Q1) – General and Cross-Topic [REP3-091]</p>	
2.19.2.3	Confirmation on which projects informed the methodological approach.	<p>The methodology has been based on accepted industry practice, a review of socio-economic assessments for other relevant projects including other airport or significant infrastructure schemes, and feedback received by PINS and local authorities during the consultation process, this is not evidenced.</p> <p>Updated position (Deadline 1): The Applicant hasn't provided details of other relevant projects and set out why they are relevant. Whilst the Applicant presented their method and assessment at the TWG sessions, these were not agreed with by the local authorities who provided written feedback on their concerns to the Applicant.</p> <p>Updated position (Deadline 5): Simply stating the names of project doesn't provide sufficient reassurance. We would have expected the Applicant to highlight how specific aspects of these "exemplar" projects were of relevance.</p> <p>Applicant states the methodology of the assessment was discussed and agreed through the TWG meetings, we note there is no mention of this in their updated position. It is incorrect to say there was an agreement. There was no agreement and written feedback was shared with the Applicant in relation to these concerns.</p> <p>Updated Position (12 August 2024): The Authorities requested at the TWG meeting (06.08.24) that the Applicant provide further details of why the projects listed represent relevant exemplar projects and how they have informed the assessment. WSCC is satisfied that this is not a legal deficiency in terms of the assessment itself. WSCC retains its position that the lack of a local area analysis of employment effects causes concern.</p>	<p>Detailed data is provided in ES Appendix 17.6.1: Socio-Economic Data Tables for all of the socio-economic characteristics profiled across all the study areas, as well as at the individual Local Authority level.</p> <p>The methodology and presentation of the assessment was discussed and agreed through a series of Socio-Economics TWGs, including sessions on 16th May, 7th July, 28th September, 18th November and 6th December 2022, and 31st July 2023</p> <p>Updated position (April 2024): Projects reviewed include London City, London Luton and Manston, which are relevant as a function of being other aviation projects located in London and the wider South East.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): Regarding the approach to the local level assessment was informed by the ANPS and planning guidance, not specifically / solely the other projects. ANPS para 4.5 requires a local assessment, not a local authority level assessment. The Applicant has provided data on impacts at the local level but maintains its position that conducting assessment at the local authority level is not necessary, appropriate nor possible. This matter remains as Not Agreed.</p>	<p>ES Appendix 17.6.1: Socio-Economic Data Tables [APP-197]</p>	Not Agreed

<p>2.19.2.4</p>	<p>Magnitude of impacts definition.</p>	<p>The use of numbers and percentages to quantify impact can be challenging especially given all study areas are different and can be influenced by a number of different factors. It is not clear how these the ranges were defined to inform the assessment.</p> <p>Updated position (Deadline 1): Applicant has not explained how the ranges have been defined which can lead to question marks around assessment robustness.</p> <p>The Applicant should also provide the rationale for the job ranges provided.</p> <p>Updated position (Deadline 5): Applicant has still not explained how the ranges have been defined hence there are question marks around assessment robustness.</p> <p>Updated Position (12 August 2024): <u>WSCC acknowledge the Applicant's further explanation at the TWG that the scale of magnitude and sensitivity criteria are based on professional judgement. WSCCs position is that no further discussion will resolve its concerns with this matter and as such it is content to consider this Not Agreed and for the ExA to consider in determining weight afforded to the assessment within the overall planning balance.</u></p>	<p>As shown in ES Chapter 17 Socio-Economics, the thresholds applied vary across receptors and geographies. These are ultimately based on a professional judgment, however proposed thresholds were presented during Topic Working Groups for comment</p> <p>Updated position (April 2024): The magnitude criteria in ES Chapter 17: Socio-Economic have been based upon industry best practice. The Applicant has also justified sensitivity at various socio-economic receptors in Table 17.6.6. Please also refer to the response provided at Row 2.19.2.3 of this Table regarding the socio-economic methodology.</p> <p>Updated position (July 2024): <u>This matter will be discussed further at a TWG.</u></p> <p>Updated position (Deadline 9): <u>The Applicant had requested the JLAs at the TWGs on 06.08.24 and 08.08.24 to provide detail on which socio-economic receptors are causing concern. It's not clear which socio-economic receptors are causing concern. However, the Applicant maintains it position regarding the robustness of its methodology. This matter remains as Not Agreed.</u></p>	<p>ES Chapter 17 Socio-Economics [APP-042] Table 17.4.5-6</p>	<p>Not Agreed</p>
<p>2.19.2.5</p>	<p>Consideration of worst-case scenario for employment benefit</p>	<p>The construction assessment presented focuses on the Project's potential maximum effects. Whilst it is important in terms of potential implications on local areas, it is also important to present a worst-case scenario in terms of employment benefit.</p> <p>Updated position (Deadline 1): Paragraph 17.9.81 refers to peak construction workforce. Original response still stands.</p> <p>Updated position (Deadline 5): Given the Applicant has not undertaken an assessment at the local authority level, the Authorities do not consider this assessment to be a worst-case scenario.</p> <p>Updated Position (12 August 2024): <u>WSCC notes that no worst-case assessment has been presented in terms of employment benefit. WSCC is satisfied that this is not a legal deficiency in terms of the assessment itself. WSCC retains its position that the lack of a local area analysis of employment effects causes concern.</u></p>	<p>Lower levels of construction workforce numbers are assessed within the ES eg at para 17.9.81.</p> <p>Updated position (April 2024): A further assessment of the construction workforce, not just at the peak is provided in a separate note in response to the Local Impact Reports.</p> <p>Updated position (July 2024): <u>This appears to be introducing another issue (the spatial scale of assessment) which is dealt with elsewhere. The original issue was that impacts were overstated.</u></p> <p>Updated position (Deadline 9): <u>The JLAs original concern was that employment benefits had been overestimated. During the TWGs on 06.08.2024 and 08.08.2024 it was agreed that the Applicant had provided the worst-case scenario.</u></p> <p><u>The JLAs' new position is regarding the spatial scale rather than the worst-case scenario. Regarding the approach to the local level assessment was informed by the ANPS and planning guidance, not specifically / solely the other projects. ANPS para 4.5 requires a local assessment, not a local authority level assessment. The Applicant has provided data on impacts at</u></p>	<p>ES Chapter 17 Socio-Economics [APP-042]</p> <p>The Applicant's Response to Local Impact Reports Appendix D – Construction Labour Market and Accommodation Impacts [REP3-082]</p>	<p>Not Agreed</p>

			<p>the local level but maintains its position that conducting assessment at the local authority level is not necessary, appropriate nor possible. This matter remains as Not Agreed.</p> <p>The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p>		
2.19.2.6	Workplace earnings trends and impact on affordability.	<p>Workplace earnings are shown to be growing at a higher rate than resident earnings and it is implied this may lead to less out-commuting. This trend could impact the affordability ratio, which would have implications elsewhere in the socio-economic evidence, for example, assumptions on future housing growth and demand for affordable housing.</p> <p>Updated position (Deadline 1): Assessment is required at the local authority level to inform potential implications on future housing growth and demand for affordable housing.</p> <p>Updated position (Deadline 5): The Applicant should undertake an assessment of impacts at local authority level and take account of existing constraints. Latest update by Applicant has not provided this.</p> <p>In relation to housing, please refer to Deadline 3 West Sussex Joint Local Authorities response [REP3-117] Sections 2.2 and 2.3.</p> <p>Updated Position (12 August 2024): WSSCC's position is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need.</p>	<p>In response to the Autumn 2021 consultation greater clarity was sought on the number, type, quality, and location of jobs created by the Project; GAL's response set out the further work that would be undertaken in this regard, including assessing the impact on temporary housing need during construction and housing need across different tenures during operation. In the Summer 2022 response a similar comment was made, that housing affordability should be considered and include types and tenures for new workers and concerns that the assessment did not take account of the type and quality of employment being generated and how this translates into the need for different types of housing. GAL's response reiterated that the potential need for affordable housing in the operational phase was included in the analysis.</p> <p>The Assessment of Population and Housing Effects contains specific analysis of housing need during the construction phase, including the scope within the private rented sector and another housing types/tenures to accommodate potential demand (based on peak employment). It also analysed, based on a breakdown of Project jobs by National Socio-Economic Classification, the potential need for affordable housing and compared this with existing assessments of affordable housing needs undertaken by local authorities, recent delivery affordable housing delivery rates, local plan policies for affordable housing and pipeline supply (based on large-scale strategic schemes and the proportion of affordable housing they expect to deliver). The analysis concludes that the potential tenure demands associated with the Project are unlikely to have any impact on affordable housing demands beyond what is already emerging or being planned for.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.5 of this Table.</p> <p>Updated position (July 2024): This appears to be introducing another issue (the spatial scale of assessment) which is dealt with elsewhere.</p> <p>Updated position (Deadline 9): The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p>	<p>Consultation Issues Tables Autumn 2021 [APP-219]</p> <p>Consultation Issues Tables Summer 2022 [APP-221]</p> <p>Appendix 17.9.3 Assessment of Population and Housing Effects [APP-201]</p> <p>Section 6 and 7</p>	Not Agreed

			<p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p> <p>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.</p>		
2.19.2.7	Assessment of sensitivity of receptors	<p>WSCC question the sensitivity grading for employment and supply chain impacts, labour market impacts, disruption of existing resident activities, housing supply in the HMAs relevant to LSA and FEMA, community facilities and services.</p> <p>Updated position (Deadline 1): WSCC has concerns related to sensitivity criteria for several socio-economic receptors.</p> <p>Updated position (Deadline 5): WSCC concerns remain related to sensitivity criteria for several socio-economic receptors.</p> <p>Updated Position (12 August 2024): WSCC acknowledge the Applicant's further explanation at the TWG that the scale of magnitude and sensitivity criteria are based on professional judgement. Its position is that no further discussion will resolve its concerns with this and as such it is content to consider this Not Agreed and for the ExA to consider in determining weight afforded to the assessment within the overall planning balance.</p>	<p>Section 17.4 of ES Chapter 17 Socio-Economic sets out in detail the updated approach adopted in the ES in relation to defining magnitude and sensitivity.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.2.4 of this Table.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): The Applicant had requested the JLAs at the TWGs on 06.08.24 and 08.08.24 to provide detail on which socio-economic receptors are causing concern. It's not clear which socio-economic receptors are causing concern. However, the Applicant maintains its position regarding the robustness of its methodology. This matter remains as Not Agreed.</p> <p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p>	Section 17.4 of ES Chapter 17 Socio-Economic [APP-042] .	Not Agreed
2.19.2.8	Assessment of construction effects.	<p>The magnitude of effects on construction employment for all study areas, and magnitude of labour market effects based on magnitude criteria being used needs clarification. There are also potential data limitations in relation to construction employment calculations. The Applicant has not undertaken any assessment at local authority level which is considered essential given existing constraints on labour supply for Crawley, Mid Sussex, and Horsham.</p> <p>Updated position (Deadline 1): Assessments require revisiting and an assessment at local authority level is required.</p> <p>Updated position (Deadline 5): Applicant has not responded to the last position. Assessments require revisiting and an assessment at local authority level is required.</p>	<p>Detailed analysis of the construction employment expected to be generated by the Project is provided in ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note, including an assessment of the potential construction labour supply and their spatial distribution. This data has informed the assessment of the labour market within Section 17.9 of ES Chapter 17: Socio-Economic.</p> <p>Wider effects of the construction phase have been assessed in terms of potential impacts on the construction supply chain measured relative to the scale of construction sector enterprises (as opposed to employment which is used for direct effects only) in each of the assessment areas.</p>	<p>Socio-Economics [APP-042] Table 17.4.1 and corresponding parts of Sections 6 and 7.</p> <p>ES Appendix 17.9.1: Gatwick Construction Workforce Distribution</p>	Not Agreed

		<p><u>Updated Position (12 August 2024):</u> <u>WSCC's position is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need.</u></p>	<p>GAL's response reiterated that an assessment of the potential demand for housing during the construction phase has been added to the Assessment of Population and Housing Effects.</p> <p>As set out in response to point 3.4, impacts are assessed at the appropriate functional spatial scale and with additional information also provided at local authority level.</p> <p>As shown in ES Chapter 17 Socio-Economics, the thresholds applied vary across receptors and geographies. These are ultimately based on a professional judgment, however proposed thresholds were presented during Topic Working Groups for comment.</p> <p>Updated position (April 2024): Please refer to the responses at Rows 2.19.1.5 and 2.19.2.4 of this Table.</p> <p>Updated position (July 2024): <u>The Applicant does not believe that an assessment at local authority level is required. This matter can be discussed further at a TWG.</u></p> <p><u>Regarding construction labour supply constraints, the latest CITB Labour Market Intelligence Report for the South East (https://www.citb.co.uk/media/vjlpqwg0/ctb1003_csn-rep_regional_south-east_aw2.pdf) now includes the NRP in its forecasts and is still showing a decline in activity in the infrastructure sector from 2024-2028. This remains the best consideration of cumulative demand for relevant skilled workers. GAL therefore retains its position that there will not be a shortage of workers (and even if there were, GAL would not be responsible for mitigating it).</u></p> <p>Updated position (Deadline 9): <u>The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</u></p> <p><u>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</u></p> <p><u>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.</u></p>	<p>Technical Note [APP-199]</p> <p>Section 17.9 of ES Chapter 17: Socio-Economic [APP-042]. Appendix 17.9.3 Assessment of Population and Housing Effects [APP-201] Section 6</p>	
--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

<p>2.19.2.9</p>	<p>Distance travelled to work data</p>	<p>The application of a regional estimate to capture numbers of home-based workers can be problematic given the considerable differences that exist within local geographies.</p> <p>Updated position (Deadline 1): The approach does not appear to take account of variations within local geographies.</p> <p>Updated position (Deadline 5): The Local Authorities have set out their concerns with the assumed proportion of NHB workers in their Deadline 4 response.</p> <p>Updated Position (12 August 2024): WSCC are content that the matter in respect of distance travelled to work data can be agreed. See Row 2.19.2.10 for consideration of proportion of NHB workers matter.</p>	<p>The assessment uses a more conservative assumption that 20% of workers at peak will be non-home based which is significantly higher than the regional or national averages.</p> <p>Updated position (April 2024): The level of demand from NHB workers will be very low and takes into account national and regional data. Further analysis is set out in the Applicant’s Response to Local Impact Reports – Construction Labour Market and Accommodation Impacts.</p> <p>Updated position (July 2024): The proportion of NHB workers is a different issue from distances travelled to work. What evidence does the Council have for differences within local geographies? This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): The Applicant agrees with the JLAs that the matter on distance travelled to work is resolved.</p> <p>The Applicant maintains that the 20% NHB assessment made for the NRP is conservative and draws on the best available data. This was determined by analysing CITB data and is higher than the national and South East averages of 5% and 6%, respectively (https://www.citb.co.uk/media/rv4jvzvr/2272_bmg_workforce_mobility_and_skills_south_east_v1.pdf)</p>	<p>Section 17.6 of ES Chapter 17: Socio-Economics [APP-042] ES Appendix 17.6.1: Socio-Economic Tables [APP-197]</p> <p>ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note [APP-199] Section 6.1</p> <p>The Applicant’s Response to Local Impact Reports Appendix D – Construction Labour Market and Accommodation Impacts [REP3-082]</p>	<p>Not Agreed</p>
<p>2.19.2.10</p>	<p>Labour supply constraints</p>	<p>The Gravity Model used to identify the split of construction workers as 80% home-based and 20% as non-home based does not appear to have taken account of current labour supply constraints within the local authorities located in the FEMA. Given these constraints, an assumption of 80% home-based construction workers is not realistic or a worst-case approach.</p> <p>Updated position (Deadline 1): The Applicant has not taken account of current labour supply constraints within the local area.</p> <p>Updated position (Deadline 5): The Applicant has not taken account of current labour supply constraints within the local area and The Local Authorities have set out their concerns with the assumed proportion of NHB workers in their Deadline 4 response.</p>	<p>This is explained in the Gatwick Construction Workforce Distribution Note. The average proportion of non-home based workers in England is 5% and in the South East is 7%. A NHB share of 20% therefore is conservative.</p> <p>There is no evidence of a shortage of construction workers such that the project would be unable to recruit HB workers. GAL will seek to employ contractors who have a workforce and these will include local contractors.</p> <p>Whilst the project itself is large, its demand for workers is small in the context of the size of the construction workforce</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.2.9 of this Table.</p>	<p>ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note [APP-199].</p>	<p>Agreed, subject to the s106 Agreement Not Agreed</p>

		<p>Updated Position (12 August 2024): The Authorities requested at the TWG meeting (06.08.24) that the Applicant provide further details of future skills shortages. WSCC's position overall in respect of the implications of this is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need.</p>	<p>Updated position (July 2024): The Council has not provided any evidence of any reason why the Applicant's assumptions are wrong. The matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p> <p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p> <p>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement..</p>		
2.19.2.11	Additionality assumptions	<p>It is unclear to what extent additionality assumptions have been accounted for in the estimates of GVA and employment effects including direct, indirect, induced and catalytic effects. Paragraph 6.3.5 states that estimating net direct, indirect and induced impacts requires assumptions on displacement that are difficult to determine robustly. Whilst it is acknowledged that estimating levels of displacement can be tricky, assumptions can still be applied through the application of a precautionary approach and use of benchmarks.</p> <p>Updated position (Deadline 1): Applicant hasn't explained the assumptions made with regards to additionality. Table 6.1 simply provides total job numbers, no explanation on assumptions.</p> <p>Updated position (Deadline 5): Applicant's assumptions made with regards to additionality still need to be bottomed out.</p> <p>Updated Position (12 August 2024): No positional change</p>	<p>The estimate of total net effect (direct, indirect, induced and catalytic) ie taking account of additionality is set out in Table 6.1.</p> <p>Para 6.3.5 is referring to estimating net DII only.</p> <p>Updated position (April 2024): The underlying methodology for calculating the total of DII and Catalytic is net of displacement. It is the net change in employment expected across the region from the growth of the airport, net of any displacement or crowding out. No individual assumptions are made – it is inherent in the methodology.</p> <p>Following TWGs, the Applicant is preparing a further explanatory note to go to the Council's advisers.</p> <p>Updated position (July 2024): The Council needs to provide greater clarity on what it doesn't understand. The assumptions have been set out. In addition, the Applicant has provided an explanatory note on catalytic employment in response to ExQ2 SE.1.16.</p> <p>Updated position (Deadline 9): The Applicant's choice of methodology was taken to address the additionality concerns.</p>	<p>ES Appendix 17.9.2 Local Economic Impact Assessment [APP-200].</p> <p>The Applicant's Response to the ExA's Written Questions (Q1) – Socio-Economic Effects [REP3-103] – SE.1.20.</p> <p>Updated position (July 2024): Explanatory note on Catalytic Employment [REP7-077]</p>	Not Agreed

2.19.2.12	Basis for distribution assessment of direct impacts	Paraph 5.3.9 states that the impact estimates on the basis of residency distribution of direct impacts are presented. GAL has provided pass holder address information to inform this. It is not clear when this information was obtained therefore the local authorities cannot be certain the information used is up-to-date.	2019 as this was the last full year prior to Covid.	n/a	Agreed
2.19.2.13	Socio-Economics (Economic Development)	<p>The Applicant's approach to operational employment calculations, which need further clarification.</p> <p>Updated position (Deadline 1): The Applicant needs to explain their assumptions in relation to additionality, catalytic effects have been overestimated.</p> <p>Updated position (Deadline 5): See comment from WSCC set out at paragraphs 51-60 of REP4-052</p> <p>Updated Position (12 August 2024):</p> <p><u>The position regarding calculation of operational employment and GVA (i.e. on-site employment, indirect and induced employment and the associated GVA) is agreed. Please note this is distinct from any issues regarding the local impact of employment and implications for housing, employment and training, as well as considerations of construction employment and the wider catalytic impact of the airport on other business growth and employment.</u></p>	<p>The approach to calculating operational employment is fully explained in the ES chapter and appendices.</p> <p>Updated position (April 2024): The Applicant understands that the estimate of operational employment is now agreed (email from York Aviation on 9th April 2024) and would request that the status is changed to 'agreed'. The estimate and methodology for the catalytic impacts is subject to ongoing discussions.</p> <p>Updated position (July 2024): <u>The assumptions on additionality have been explained. It is unclear whether the council thinks they are too high or too low. The Applicant has provided a further explanatory note on catalytic employment in response to EXQ2 SE.1.16.</u></p>	<p>ES Appendix 17.9.2 Local Economic Impact Assessment [APP-200].</p> <p>The Applicant's Response to the ExA's Written Questions (Q1) – Socio-Economic Effects [REP3-103] – SE.1.20.</p> <p>Updated position (July 2024): Explanatory note on Catalytic Employment [REP7-077]</p>	Not Agreed
2.19.2.14	Socio-Economics (Economic Development)	<p>The Applicant's approach to sensitivity and magnitude gradings for several assessments.</p> <p>Updated position (Deadline 1): WSCC has concerns related to sensitivity and magnitude criteria for several socio-economic receptors.</p> <p>Updated position (Deadline 5): Given response from Applicant, WSCC has remaining concerns related to sensitivity and magnitude criteria for several socio-economic receptors.</p> <p>Updated Position (12 August 2024): <u>WSCC acknowledge the Applicant's further explanation at the recent TWG that the scale of magnitude and sensitivity criteria are based on professional judgement. Its position is that no further discussion will resolve its concerns and as such it is content</u></p>	<p>Section 17.4 of ES Chapter 17 Socio-Economic sets out in detail the updated approach adopted in the ES in relation to defining magnitude and sensitivity.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.2.4 of this Table.</p> <p>Updated position (July 2024): <u>This matter will be discussed further at a TWG.</u></p> <p>Updated position (Deadline 9): <u>The Applicant had requested the JLAs at the TWGs on 06.08.24 and 08.08.24 to provide detail on which socio-economic receptors are causing concern. It's not clear which socio-economic receptors are causing concern. However, the Applicant maintains its position regarding the robustness of its methodology. This matter remains as Not Agreed.</u></p>	Section 17.4 of ES Chapter 17 Socio-Economic [APP-042].	Not Agreed

		to consider this Not Agreed and for the ExA to consider in determining weight afforded to the assessment within the overall planning balance.	The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.		
Assessment					
2.19.3.1	Overstatement of the wider, catalytic, and national level economic benefits of the NRP.	<p>The methodology used to assess the catalytic employment and GVA benefits of the development is not robust, leading to an overstatement of the likely benefits in the local area.</p> <p>The national economic impact assessment is derived from demand forecasts which are considered likely to be optimistic and fails to properly account for potential displacement effects, as well as other methodological concerns.</p> <p>Updated position (Deadline 1): Awaiting Consultant input following TWG 15 Feb.</p> <p>Updated position (Deadline 5): See comment from WSCC set out at paragraphs 51-60 of REP4-052</p> <p>Updated Position (12 August 2024): There has not been any productive progress on this outstanding area of disagreement since the submission of Statements of Common Ground at Deadline 5.</p> <p>In overall terms, there remains concern that aspects of the benefits may have been overstated, particularly in terms of the national level economic benefits and this could weigh too highly in the planning balance.</p> <p>At a more local level, there is concern that the catalytic benefits to local employment are simply not robust and appear more likely to have been overstated (see below). However, because of the uncertainties regarding how the methodology has been applied in the UK context, it is also possible that the impacts could have been understated. If so, this would give rise to further concerns regarding the implications for the local housing market. It remains uncertain whether the assessment of these effects represents a worst case in terms of the economic benefits to be realised nor broader consequences. This links to the absence of any robust sensitivity testing of the demand forecasts, again meaning that a reasonable worst case cannot be assessed in terms of either downside risks to benefits or upside potential to effects.</p>	<p>Catalytic impacts refers to the economic activity of firms that are not in the indirect or induced footprint of the airport choosing to locate near the airport because of the connectivity that it offers. The catalytic effect is derived as a residual from total net impacts and footprint impacts. Total net impacts are estimated on the basis of an elasticity relationship we have derived between air traffic and local employment. This elasticity relationship represents a net relationship as it accounts for the net increase in local employment generated by an increase in air traffic.</p> <p>The assessment of national impacts follows DfT's TAG and assesses costs and benefits from the scheme where possible given the available data and information at the time of submission. While this type of assessment is not required for private-sector schemes, we use TAG welfare analysis as it is considered a useful framework to assess and present the economic impacts (costs and benefits) of the Project that are additional at the national level. Benefits included in the Net Present Value calculations exclude impacts that would potentially double-count benefits (e.g. trade benefits are quantified but not included in the NPV).</p> <p>We are arranging a technical working group meeting to address these issues in early January 2024.</p> <p>Updated position (April 2024): Following further TWGs the Applicant is providing a further explanatory note.</p> <p>Updated position (July 2024): The Applicant has provided an explanatory note on catalytic employment in response to EXQ2 SE.1.16.</p> <p>Updated position (Deadline 9) During the TWGs with the JLAs on 06.08.24 and 08.08.24, it was agreed that the JLAs are not concerned about housing impacts during the operational phase.</p> <p>Regarding the catalytic employment methodology, the Applicant has sought to understand in which specific ways the JLAs consider the methodology to be</p>	<p>ES Appendix 17.9.2 Local Economic Impact Assessment [APP-200].</p> <p>Needs Case Appendix 1 - National Economic Impact Assessment [APP-251].</p> <p>The Applicant's Response to the ExA's Written Questions (Q1) – Socio-Economic Effects [REP3-103] – SE.1.20.</p> <p>Updated position (July 2024): Explanatory note on Catalytic Employment [REP7-077] Explanatory Note on Catalytic Employment (Dec Ref. 10.55)</p>	Not Agreed Under discussion

			<p>lacking in robustness. The Applicant is awaiting a response from the JLAs. However, it is unlikely an agreement will be reached on this matter.</p>		
2.19.3.2	<p>Assessment of construction effects during the first year of operation.</p>	<p>Assessment of construction effects during the first year of operation need to be revisited. The number of construction jobs would appear unlikely to have a significant beneficial effect in the FEMA and LMA. It should also be noted that the construction jobs calculation appears to be based on a 'maximum' scenario.</p> <p>Updated position (Deadline 1): Assessments require revisiting and an assessment at local authority level is required.</p> <p>Updated position (Deadline 5): Given the Applicant has not undertaken an assessment at the local authority level, the Authorities do not consider this assessment to be a worst-case scenario.</p> <p>Updated Position (12 August 2024): WSCC's position is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need. As such this remains Not Agreed. See 2.19.4.1 in respect of ESBS.</p>	<p>Detailed analysis of the construction employment expected to be generated by the Project is provided in ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note, including an assessment of the potential construction labour supply and their spatial distribution. This data has informed the assessment of the labour market within Section 17.9 of ES Chapter 17: Socio-Economic.</p> <p>Wider effects of the construction phase have been assessed in terms of potential impacts on the construction supply chain measured relative to the scale of construction sector enterprises (as opposed to employment which is used for direct effects only) in each of the assessment areas.</p> <p>GAL's response reiterated that an assessment of the potential demand for housing during the construction phase has been added to the Assessment of Population and Housing Effects.</p> <p>As set out in response to point 3.4, impacts are assessed at the appropriate functional spatial scale and with additional information also provided at local authority level.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.5 of this Table. Additionally, ES Chapter 17: Socio-economic assesses the construction workforce at different stages of the project, not just at the peak. A further response is provided in the Construction Labour Market and Accommodation Impacts appended to the Applicants Response to the LIR.</p> <p>Updated position (July 2024): This appears to be introducing a new issue (assessment at the local authority level) that is dealt with elsewhere. It is now unclear whether the Council thinks the assessment is too high or too low.</p> <p>Updated position (Deadline 9): The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p> <p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p>	<p>ES Chapter 17 Socio-Economics [APP-042] Table 17.4.1 and corresponding parts of Sections 6 and 7.</p> <p>ES Appendix 17.9.1: Gatwick Construction Workforce Distribution Technical Note [APP-199]. Section 17.9 of ES Chapter 17: Socio-Economic [APP-042]. Appendix 17.9.3 Assessment of Population and Housing Effects [APP-201] Section 6</p> <p>The Applicant's Response to Local Impact Reports Appendix D – Construction Labour Market and Accommodation Impacts [REP3-082]</p>	<p>Agreed, subject to the s106 Agreement Not Agreed</p>

			The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.		
2.19.3.3	Operational effects.	<p>Assessment of operational labour market effects, effects on housing, population and community facilities and services need to be revisited. We have outlined our concerns above in relation to the magnitude criteria being used for this assessment and the sensitivity grading of this receptor for the LMA and FEMA.</p> <p>Updated position (Deadline 1): Assessments require revisiting and an assessment at local authority level is required.</p> <p>Updated position (Deadline 5): Assessments require revisiting and an assessment at local authority level is required.</p> <p>Updated Position (12 August 2024): Please refers to the council's responses to Rows 2.19.2.5, 2.19.2.5, 2.19.2.6.</p>	<p>As shown in ES Chapter 17 Socio-Economics, the thresholds applied vary across receptors and geographies. These are ultimately based on a professional judgment, however proposed thresholds were presented during Topic Working Groups for comment</p> <p>Section 17.4 of ES Chapter 17 Socio-Economic (APP-042) sets out in detail the updated approach adopted in the ES in relation to defining magnitude and sensitivity.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.5 of this Table. The Project is unlikely to place pressure on housing supply across the study area as a whole during the operational phase.</p> <p>Regarding magnitude criteria and sensitivity at receptors, please see the response at Row 2.19.2.4 of this Table.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): Please refer to the Applicant's response in Rows 2.19.2.5 and 2.19.2.6.</p>	<p>ES Chapter 17 Socio-Economic [APP-042]</p> <p>The Applicant's Response to Local Impact Reports Appendix D – Construction Labour Market and Accommodation Impacts [REP3-082]</p>	Not Agreed
2.19.3.4	Cumulative effects.	<p>The conclusion that in the absence of information, it is not possible to provide a cumulative assessment for all construction effects, is simplistic and given the significant concerns raised with the main assessment, a comprehensive cumulative assessment should be undertaken to establish if there are potential issues within the study areas.</p> <p>Updated position (Deadline 1): The Applicant hasn't provided a reasonable explanation for not undertaking a cumulative assessment of construction socio-economic effects. This assessment should be undertaken. In terms of operation, the Applicant is not identifying local issues because they haven't undertaken an assessment of impacts at a local authority level.</p> <p>Updated position (Deadline 5): The Applicant has not undertaken a robust cumulative assessment of construction socio-economic effects nor have they undertaken an assessment of impacts at a local authority level to understand local implications of the Project.</p>	<p>Paragraph 17.11.7 refers only to construction socio-economic effects, not all construction effects.</p> <p>Paragraph 17.11.9 is clear that the data shows that labour supply issues are not anticipated.</p> <p>For operational effects potential effect of the cumulative schemes on the future population, jobs, labour supply and housing in combination with the Project is smaller than the demographic projections assessed in detail in the Assessment of Population and Housing Effects.</p> <p>As set out in response to point 3.4, impacts are already assessed at the appropriate functional spatial scale and with additional information also provided at local authority level.</p> <p>Updated position (April 2024): There is no West Sussex construction labour market. It is appropriate to do the assessment at functional market area level. There is also no evidence that</p>	<p>ES Chapter 17: Socio-Economics [APP-042]</p> <p>ES Appendix 17.9.3: Assessment of Population and Housing Effects [APP-201].</p> <p>Updated position (April 2024): ES Chapter 17: Socio-Economics</p>	<p>Not Agreed Agreed Agreed subject to s106</p>

		<p>The Local Authorities have set out their response to the “Construction Labor Market and Accommodation Impacts” note in their Deadline 4 response.</p> <p>Updated Position (12 August 2024): The Authorities requested at the TWG meeting (06.08.24) that the Applicant provide further details of future skills shortages. WSCC’s position overall in respect of the implications of this is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need.</p>	<p>construction skills shortages give rise to constraints either in general or for this project specifically. However, the assessment already takes account of workers travelling from outside the area, including NHB workers. The assessment assumes 20% NHB which is significantly higher than the national and regional averages of 5% and 6%.</p> <p>A bottom-up cumulative assessment of construction activity over the next 10 years would show significantly more labour available than there is demand because most construction projects over that time period are not yet planned.</p> <p>The latest data from the CITB shows a decline in demand for infrastructure construction workers in the next few years.</p> <p>A further response on the construction workforce and accommodation issues is provided in the Construction Labour Market and Accommodation Impacts note in response to Local Impact Reports.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</p> <p>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</p> <p>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.</p>	<p>[APP-042] – Table 17.6.6 and Section 17.9</p> <p>The Applicant’s Response to Local Impact Reports Appendix D – Construction Labour Market and Accommodation Impacts [REP3-082]</p>	
<p>2.19.3.5</p>	<p>The approach to analysis of housing delivery does not analyse the full range of inputs required when determining local housing</p>	<p>A more granular assessment of housing delivery in the area is needed, in particular of future supply, as well as the unmet affordable housing need to inform the assessment.</p> <p>Updated position (Deadline 1): The Applicant needs to undertake a more granular assessment of housing delivery in the local area particularly recognising the unmet affordable housing need and regarding temporary accommodation for construction workers</p> <p>Updated position (Deadline 5):</p>	<p>A similar comment was made in response to the Autumn 2021 consultation; GAL’s response stated that the Assessment of Population and Housing Effects adopts the same approach as applied in Strategic Housing Market Assessments which are typically prepared for the purposes of plan-making.</p> <p>Following other comments raised on the approach taken to assessing housing effects which were received in the Autumn 2021 and Summer 2022 consultations (and as outlined in GAL’s responses), a range of analysis has been added to the Assessment of Population and Housing Effects throughout the process, including analysis of potential affordable housing demand (based</p>	<p>Appendix 17.9.3 Assessment of Population and Housing Effects [APP- 201].</p> <p>Updated position (Deadline 9):</p>	<p>Not Agreed Under discussion Agreed, subject to the s106 Agreement</p>

	<p>needs or requirements at a housing market area or local level</p>	<p>In relation to housing, please refer to Deadline 3 West Sussex Joint Local Authorities response [REP3-117] Sections 2.2 and 2.3.</p> <p><u>Updated Position (12 August 2024):</u> <u>Using Census 2021 data to determine PRS stock: WSCC agree that stock of PRS using Census 2021 data is broadly correct, albeit stock has not improved since Census 2021 data was captured.</u></p> <p><u>PRS availability and vacancy rates: There are pressures in the private rented sector which have increased since the Census 2021 data suggesting that vacancy is more limited than the data suggests. Pressure is felt through shorter void periods and high demand per unit on the market, albeit data is limited. Demand from Government seeking to place asylum seekers in either the PRS or hotels adds to the pressures, albeit there is limited information available. NHB workers using hotels also makes it harder for the JLAs to source emergency hotel accommodation for homeless people. Local authorities have observed an increase in the per night rate of hotel accommodation locally which, it is believed, is adding to these pressures. WSCC therefore remains of the view that the 2021 census is not reflective of current pressures placed on short- and medium-term accommodation.</u></p> <p><u>Need for a housing/homelessness fund: Whilst not reflected in the 2021 census data, there is a risk that increased demand for PRS housing and hotels could make the homelessness position worse so a fund is required to prevent and address homelessness. Positive negotiations are taking place on the s106.</u></p>	<p>on a breakdown of jobs by classification), temporary housing demand during construction, additional commentary on housing trajectory points raised (including past delivery trends and potential impacts of water/nutrient neutrality) and additional detailed outputs at a local authority level.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.1.5 of this Table.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): <u>The Applicant agrees with the JLAs that the stock of PRS using Census 2021 is correct.</u></p> <p><u>It was agreed with the JLAs in the TWGs on 06.08.24 and 08.08.24 that there will be housing impacts during the operational phase but these will not require mitigation.</u></p> <p><u>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</u></p> <p><u>The Applicant acknowledges that there is some uncertainty in the data and a risk of direct costs accruing during construction to the JLAs as a result of their statutory homelessness duties. The JLAs have also been able to provide information to the Applicant recently which is not otherwise available in the public domain.</u></p> <p><u>The Applicant has therefore agreed to a Homelessness Prevention Fund to be drawn down only in the event of evidence of project-related impacts on the housing market and homelessness in particular that might otherwise lead to increase costs for the JLAs.</u></p> <p><u>Regarding PRS availability and vacancy rates, the Applicant has taken a conservative approach using the best available data. The assessment uses a 4% vacancy rate which is an average across all housing tenures as reported in the 2021 Census. This is lower than the 11% estimated vacancy rate for PRS housing in the English Housing Survey. Even if all 20% NHB workers (270 workers) sought PRS housing during the identified phases of construction this would be a tiny fraction of the market and is unlikely to cause significant impacts.</u></p>	<p><u>The Applicant's Response to Actions – ISHs 2-5 [REP2-005] – Table 3.3.2</u></p> <p><u>ES Appendix 17.9.3 Assessment of Population and Housing Effects [APP-201] – Section 6</u></p>	
--	----------------------------------------------------------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>The Applicant remains confident in its assessment and thinks impacts are unlikely, but recognises the change in circumstance with respect to homelessness that has occurred since the submission and so the proposed Fund provides a safety net that should impacts arise, the JLAs would have access to funding to avoid incurring additional costs.</p> <p>Housing is agreed subject to the s106 Agreement.</p> <p>Updated position (Deadline 9): As set out in the Joint Position Statement, Through the agreement of the Homeless Prevention Fund, the parties confirm that all issues raised/ submissions made in relation to the mitigation of Housing-related impacts of the Project have been adequately addressed. Therefore this matter can be marked as agreed.</p>		
2.19.3.6	Assessment of impacts on labour supply	<p>The Applicant states that the Project is only expected to be a determinant in whether there is labour shortfall or surplus in the HMA for one area (Croydon and East Surrey) where the Project tips surplus into supply in a single year. The basis for this conclusion does not appear robust, as based on the analysis the project is shown to exacerbate labour shortfall issues across multiple areas. Furthermore, if underlying inputs in the model are changed to reflect the fact that the labour market is already more constrained as has been modelled, it is likely shortfalls would be greater across many of the areas.</p> <p>Updated position (Deadline 1): The Applicant has not taken account of current labour supply constraints within the local areas surrounding the Project.</p> <p>Updated position (Deadline 5): The Local Authorities have set out their concerns with regards to labour supply constraints in their Deadline 4 response.</p> <p>Updated Position (12 August 2024): Please refer to the council's responses to Rows 2.19.3.4.</p>	<p>The assessment shows that across the study area as a whole there is a labour surplus even with the project as well as a surplus in individual housing market areas except Croydon and East Surrey.</p> <p>The assessment is very conservative in assuming all jobs are net additional above the forecasts and that there is no change in employment or economic activity rates or commuting.</p> <p>As set out in response to point 3.4, impacts are assessed at the appropriate functional spatial scale and with additional information also provided at local authority level.</p> <p>Updated position (April 2024): The project is situated within a very large and flexible labour market. The modelling is very conservative – for example it does not assume that economic activity will rise as a result of more jobs. The surplus of labour in the North West Sussex Housing Market Area (Crawley, Horsham and Mid Sussex, where Gatwick is located) is relatively large in comparison to the shortfalls that exist in other areas. Given the proximity of these housing areas, it is reasonable to assume that labour would be sufficiently mobile across these areas to balance any shortfalls as mentioned in ES Appendix 17.9.3: Assessment of Population and Housing Effects para 5.2.12 – 5.2.13.</p> <p>Updated position (July 2024): This matter will be discussed further at a TWG.</p> <p>Updated position (Deadline 9): Please refer to the Applicant's response in Row 2.19.3.4.</p>	ES Appendix 17.9.3: Assessment of Population and Housing Effects [APP-201].	Not Agreed
2.19.3.7	Clarity on the socioeconomic benefits	<p>Clarity on the socioeconomic benefits, including the number, type, quality, and location of jobs created, the link between current labour supply and jobs created, and local economic benefits.</p>	<p>In response to the Autumn 2021 consultation greater clarity was sought on the number, type, quality, and location of jobs created by the Project; GAL's response set out the further work that would be undertaken in this regard,</p>	ES Appendix 17.9.2 Local Economic	Not Agreed subject to s106

		<p>Updated position (Deadline 1): Applicant should undertake an assessment of impacts at the local authority level to determine implications of the Project.</p> <p>Updated position (Deadline 5): WSSC still believes that the Applicant should undertake an assessment of impacts at the local authority level to determine implications of the Project</p> <p>Updated Position (12 August 2024): <u>WSSC's position is as set out at Issue Specific Hearing 9 whereby its Counsel stated that the absence of a local authority level assessment is not a legal deficiency in the ES but is a shortcoming affecting the weight given to benefits within the planning balance related to the socio-economic assessment. The consequences of the absence of a local level assessment could in some way be alleviated through the ESBS however this will depend on the extent to which it addresses local need. As such this remains Not Agreed. See 2.19.4.1 in respect of ESBS.</u></p>	<p>including assessing the impact on temporary housing need during construction and housing need across different tenures during operation. In the Summer 2022 response a similar comment was made, that housing affordability should be considered and include types and tenures for new workers and concerns that the assessment did not take account of the type and quality of employment being generated and how this translates into the need for different types of housing. GAL's response reiterated that the potential need for affordable housing in the operational phase was included in the analysis.</p> <p>The Assessment of Population and Housing Effects contains specific analysis of housing need during the construction phase, including the scope within the private rented sector and another housing types/tenures to accommodate potential demand (based on peak employment). It also analysed, based on a breakdown of Project jobs by National Socio-Economic Classification, the potential need for affordable housing and compared this with existing assessments of affordable housing needs undertaken by local authorities, recent delivery affordable housing delivery rates, local plan policies for affordable housing and pipeline supply (based on large-scale strategic schemes and the proportion of affordable housing they expect to deliver). The analysis concludes that the potential tenure demands associated with the Project are unlikely to have any impact on affordable housing demands beyond what is already emerging or being planned for.</p> <p>The detail on the type and location of jobs is included in the Local Economic Impact Assessment.</p> <p>Updated position (April 2024): The number and type of jobs is set out in Table A1.1 of the Forecast Data Book.</p> <p>Please also refer to the response at Row 2.19.1.5 of this Table.</p> <p>Updated position (July 2024): <u>The application documents include estimates of the number of construction and operational jobs for each local authority area. It isn't clear what else the Council wants in terms of clarity on benefits.</u></p> <p><u>The Applicant agrees that the lack of a local authority level assessment is not a legal deficiency.</u></p> <p><u>The Applicant does not agree with the JLAs that there are potential negative impacts that have not been assessed and that these have to temper the weight that should be given to positive impacts. There is no evidence of an adverse impact at any scale. This matter remains as Not Agreed.</u></p>	<p>Impact Assessment [APP-200].</p> <p>Updated position (April 2024): ES Appendix 4.3.1 Forecast Data Book [APP-075]</p>	
--	--	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--

			<p>The Applicant agrees that the absence of a local authority level assessment is not a legal deficiency. Any issues arising can be dealt with the ESBS. This matter is Agreed subject to the s106 Agreement.</p>		
2.19.3.8	Wider economic benefits of the Project have been overstated	<p>The wider economic benefits of the Project have been overstated due to the failure to adequately distinguish the demand that could be met at Gatwick Airport from the demand that could only be met at Heathrow Airport, and the economic value that is specific to operations at Heathrow. The methodology by which the wider catalytic impacts in the local area has been assessed is not robust and little reliance can be placed on this assessment.</p> <p>Updated position (Deadline 5):</p> <p>See comment from WSCC set out at paragraphs 51-60 of REP4-052</p> <p>Updated Position (12 August 2024): Please see below.</p>	<p>Catalytic impacts refers to the economic activity of firms that are not in the indirect or induced footprint of the airport choosing to locate near the airport because of the connectivity that it offers. The catalytic effect is derived as a residual from total net impacts and footprint impacts. Total net impacts are estimated on the basis of an elasticity relationship we have derived between air traffic and local employment. This elasticity relationship represents a net relationship as it accounts for the net increase in local employment generated by an increase in air traffic.</p> <p>The assessment of national impacts follows DfT's TAG and assesses costs and benefits from the scheme where possible given the available data and information at the time of submission. While this type of assessment is not required for private-sector schemes, we use TAG welfare analysis as it is considered a useful framework to assess and present the economic impacts (costs and benefits) of the Project that are additional at the national level. Benefits included in the Net Present Value calculations exclude impacts that would potentially double-count benefits (e.g. trade benefits are quantified but not included in the NPV).</p> <p>We are arranging a technical working group meeting to address these issues in early January 2024.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.3.1 of this Table.</p> <p>Updated position (July 2024): The Applicant has provided an explanatory note in response to EXQ2 SE.2.16.</p>	<p>ES Appendix 17.9.2 Local Economic Impact Assessment [APP-200].</p> <p>Needs Case Appendix 1 - National Economic Impact Assessment [APP-251].</p> <p>Updated position (July 2024): Explanatory note on Catalytic Employment [REP7-077]</p>	<p>Not Agreed Under discussion</p>
2.19.3.9	Wider economic benefits of the Project have been overstated	<p>The wider economic benefits of the Project are almost certainly substantially overstated, and this is material to assessing the balance between such benefits and any environmental impacts.</p> <p>Updated position (Deadline 5): See comment from WSCC set out at paragraphs 51-60 of REP4-052</p> <p>Updated Position (12 August 2024): There has not been any productive progress on this outstanding area of disagreement since the submission of Statements of Common Ground at Deadline 5.</p>	<p>The assessment of national impacts follows DfT's TAG and assesses costs and benefits from the scheme. While this type of assessment is not required for private-sector schemes, we use TAG welfare analysis as it is considered a useful framework to assess and present the economic impacts (costs and benefits) of the Project that are additional at the national level. Benefits included in the Net Present Value calculations exclude impacts that would potentially double-count benefits (e.g. trade benefits are quantified but not included in the NPV).</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.3.1 of this Table.</p>	<p>Needs Case Appendix 1 - National Economic Impact Assessment [APP-251].</p> <p>Updated position (July 2024):</p>	<p>Not Agreed Under discussion</p>

		In overall terms, there remains concern that aspects of the benefits may have been overstated, particularly in terms of the national level economic benefits and this could weigh too highly in the planning balance.	Updated position (July 2024): The Applicant has provided an explanatory note on catalytic employment.	Explanatory note on Catalytic Employment [REP7-077]	
Mitigation and Compensation					
2.19.4.1	Lack of information on implementation plan, performance, measurable targets, funding and financial management, monitoring and reporting. Route map from ESBS to Implementation Plan is not identified.	<p>Options identified in the ESBS are not necessarily directly aligned with local specific issues and need. The document states that performance, financial management, monitoring and reporting systems will be set out in detail in the Implementation Plan. It is unclear why the Applicant is unable to provide further details on these arrangements within the ESBS in order to provide sufficient reassurance that appropriate systems will be in place. The ESBS also provides no explanation on whether it would differentiate between the provision and outputs offered through the DCO vs. provision and outputs offered in a Business as Usual (BAU) scenario.</p> <p>Updated Position (Deadline 3): The Applicant as part of ESBS should provide more detail on potential tailored initiatives that would specifically align with and support local communities. The Applicant should provide some details on performance, financial management, monitoring and reporting which can be developed further as part of an Implementation Plan. The Applicant should also clearly explain the difference of BAU and DCO scenarios in terms of provision & outputs.</p> <p>Updated position (Deadline 5): The Local Authorities have set out their concerns with regards to the ESBS in their Deadline 4 response.</p> <p>Updated Position (12 August 2024): The council welcomes the updated Draft ESBS Implementation Plan being provided by the Applicant. Example Thematic/delivery Plans have also been shared by the Applicant offline which present further details. The review of these is ongoing by WSCC and the Authorities. It is understood that an updated ESBS and ESBS Implementation Plan will be submitted at Deadline 8a and the council will respond to these at Deadline 9.</p>	<p>Please refer to ES Appendix 17.8.1 Employment, Skills and Business Strategy (APP-198) for details.</p> <p>The plan will include more specific detail on the objectives, initiatives and activities, targets, milestones, implementation processes and partners, including how objectives will be met at the local level. The approach to monitoring and evaluation of actions and impacts will be included. GAL recognises that the skills, employment and business growth and productivity fields are dynamic and fast-moving in terms of national and local policy responses, skill needs and demands and technological changes. The project will be delivered over a period of 15+ years. Thus, the strategy and implementation plan will need to incorporate capacity for the projects and associated targets and outcomes to flex and change in response effectively to changing circumstances as required.</p> <p>Updated position (April 2024): The ESBS Implementation Plan will describe how GAL will collaborate with partners to define and implement a clear regional 'identity' and promotion strategy. Initial scoping research, informed by a partner workshop, has just completed and the recommendations will inform the Implementation Plan.</p> <p>The Implementation Plan will include specific delivery plans for each of the 6 themes in the ESBS. These Delivery Plans will differentiate between BAU activity related to the relevant theme, details of any pilot activity currently being undertaken in that theme, and proposed delivery post consent.</p> <p>To support the development of the draft Implementation Plan, workshops were held on 25 March and 8 April with relevant stakeholders and representatives of the Joint Local Authorities. To assist this work GAL shared examples of draft delivery plans (covering two ESBS themes) and used the workshop to explore delivery against each ESBS theme - including clear information on current BAU activity, and ESBS pilot activity. This work will continue at a workshop with JLAs on 30 May and will be used to inform the draft Implementation Plan.</p> <p>Updated position (July 2024): The Applicant has provided an updated ESBS Implementation Plan and discussions will continue at future workshops with JLAs.</p>	<p>ES Appendix 17.8.1 Employment, Skills and Business Strategy [APP-198].</p> <p>Draft Section 106 Agreement Annex: ESBS Implementation Plan [REP3-069]</p> <p>Updated position (July 2024): Appendix 6 of Draft Section 106 Agreement Version 2 [REP6-063]</p>	<p>Not Agreed Agreed, subject to the s106 Agreement Under discussion</p>

			<p>Updated position (Deadline 9): The topic of ESBS is Agreed, subject to the s106 Agreement.</p>		
2.19.4.2	Socio-Economics (Economic Development)	<p>The Employment, Skills and Business Strategy is generic, lacking detail and clarity, and does not provide sufficient detail on elements such as, local baseline, tailored local initiatives, outputs, and approach to monitoring.</p> <p>Updated position (Deadline 1): More detailed information is required in the ESBS as set out in our response.</p> <p>Updated position (Deadline 5): The Local Authorities have set out their concerns with regards to the ESBS in their Deadline 4 response.</p> <p>Updated Position (12 August 2024): See above.</p>	<p>Please refer to ES Appendix 17.8.1 Employment, Skills and Business Strategy (APP-198) for details.</p> <p>The implementation plan will include more specific detail on the objectives, initiatives and activities, targets, milestones, implementation processes and partners, including how objectives will be met at the local level. The approach to monitoring and evaluation of actions and impacts will be included. GAL recognises that the skills, employment and business growth and productivity fields are dynamic and fast-moving in terms of national and local policy responses, skill needs and demands and technological changes. The project will be delivered over a period of 15+ years. Thus, the strategy and implementation plan will need to incorporate capacity for the projects and associated targets and outcomes to flex and change in response effectively to changing circumstances as required.</p> <p>Updated position (April 2024): Please refer to the response at Row 2.19.4.1 of this Table.</p> <p>Updated position (July 2024): The Applicant has provided an updated ESBS Implementation Plan and discussions will continue at future workshops with JLAs.</p> <p>Updated position (Deadline 9): The topic of ESBS is Agreed, subject to the s106 Agreement.</p>	<p>ES Appendix 17.8.1 Employment, Skills and Business Strategy [APP-198].</p> <p>Updated position (July 2024): Appendix 6 of Draft Section 106 Agreement Version 2 [REP6-063]</p>	<p>Agreed, subject to the s106 Agreement Not Agreed</p>

Assessment Methodology					
2.20.2.1	ES Chapter 12 assessment undertaken in accordance with historical but not replaced IEMA guidance	<p>The assessment has been undertaken in accordance with guidance contained within Guidelines for the Environmental Assessment of Road Traffic (IEMA 1993). New IEMA guidance entitled, 'Environmental Assessment of Traffic and Movement', which updates and replaces the referenced 1993 guidance, was issued in July 2023.</p> <p>Updated position (Deadline 1): Reviewing Technical Note: Impact of latest IEMA Guidance 2023 on the assessment of effects related to traffic & Transport Book 8 Application Document 8.4 PINS Ref TRO20005.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant has reviewed Chapter 12 of the Environmental Statement (REP3-016) against the updated IEMA guidance, Environmental Assessment of Traffic and Movement, July 2023. The Applicant's response to the review of the updated IEMA guidance is contained in Response to PD-006 Cover Letter Response to Procedural Decision (AS-073) and Technical Note Impact of Latest IEMA Guidance (2023) on the Assessment of Effects Related to Traffic and Transport (AS-119).</p> <p>As part of this review the Applicant has concluded that the guidance set out in the updated IEMA guidance, would not lead to any new or significantly different effects being identified as a result of the Project and therefore the new guidance would not change the conclusions drawn in Chapter 12 of the Environmental Statement (REP3-016). The Highway Authority are in agreement with this,</p>	The Examining Authority has made a Procedural Decision dated 24 October 2023 to request the Applicant to provide a detailed response to the new IEMA guidance. This work is being undertaken for submission to the ExA expected at the end of December 2023. A summary of the approach is set out in the response to PD-006.	Response to PD-006 - Cover letter in response to Procedural Decision [AS-073]	Agreed
2.20.2.2	Traffic Assessment Methodology	The Applicant is reliant on 2016 data to inform the baseline assessment and since the emerging from the pandemic more representative transport data continues to become available. The Applicant is in receipt of initial results of the 2023 Staff Travel Survey which show changes in staff travel habits since 2016 and therefore there is a question as to how robust the use of 2016 data is. The potential implications of the overestimation of demand are that the benefits of the Project are being claimed to be higher than could occur and that the scale of infrastructure required may also be too high, to cater for an artificial level of demand.	The 2023 staff travel survey is currently being analysed and results will be shared with WSCC once available. However, following the Examining Authority's Procedural Decision of 24 October 2023, we are undertaking an exercise to produce sensitivity tests of the transport modelling to reflect post-Covid conditions. These are expected to be submitted to the ExA at the end of January 2024. A summary of the approach is set out in the response to PD-006.	Accounting for Covid-19 in Transport Modelling [AS-121] and its Appendices [AS-122]	Under discussion Agreed

		<p>Updated position (Deadline 1): Reviewing Accounting for Covid 19 in Transport Modelling Book 8 Application Document Reference 8.5 PINS Reference Number TR020005.</p> <p>Updated Position (Deadline 3): Concerns remain that the level of growth assumed by the Applicant is too high, these concerns are supported by the assessment made by York Aviation (see Chapter 6 and Appendix F of the Joint West Sussex LIR). This could be resulting in an over forecast of the demand and therefore over provision of car parking and highway elements of the infrastructure. The Applicant should provide realistic forecasts for airport capacity and resultant demand generated. Further transport modelling information, to that already provided, is required to fully appraise the Projects impact upon the Local Road Network. The Joint West Sussex LIR highlights the further transport modelling information that is required but this includes:</p> <ul style="list-style-type: none"> • Additional modelling results should be obtained from Vissim including vehicle delays and plotting queue length over time • A LINSIG assessment of the Northern Terminal signalised junction. • A summary of the demand matrix changes that have been applied in the Vissim model for each future scenario. <p>Updated position (Deadline 5): A meeting took place between WSCC, as Highway Authority, and the Applicant on 10th May where some of the transport modelling matters were discussed and the Applicant agreed to provide further information. The Highway Authority will continue to engage with the Applicant to seek to address these outstanding matters.</p> <p>However, concerns remain that the level of growth assumed by the Applicant is too high, these concerns are supported by the assessment made by York Aviation (see Chapter 6 and Appendix F of the Joint West Sussex LIR). This could be resulting in an over forecast of the demand and therefore over provision of car parking and highway elements of the infrastructure. Additionally, the Highway Authority note the Applicant's response to the request for a standalone LINSIG model of the new signalised junction. However, the Highway Authority remain of the view that it would be beneficial and provide further information to enable the full assessment of the proposals.</p> <p><u>Updated position (Deadline 8)</u> <u>The results of the previously requested LINSIG model and a summary of the demand matrix changes that have been applied in the Vissim model was received by WSCC on that 19th July 2024 and a meeting was held with the Applicant on 25th July.</u> <u>WSCC have now reviewed this further information and are of the view that this aspect can now be agreed.</u></p>	<p>Updated response (Deadline 1): The response to the ExA's Procedural Decision on accounting for Covid-19 in the transport modelling has been submitted and is available on the Project Webpage.</p> <p>Updated position (April 2024): As set out in The Applicant's response to the Local Impact Reports [REP3-078] we have reviewed the West Sussex Joint Local Authorities documents (Local Impact Report [REP1-068] and 'Comments on any submissions received by Deadline 1' [REP2-042], paragraph 2.34]. The following has been requested and we have provided a response to each item below:</p> <ul style="list-style-type: none"> - VISSIM model validation report: A copy of the VISSIM model validation report was shared with West Sussex as highway authority during pre-application engagement in September 2022 and this was confirmed as acceptable by WSCC in November 2022. We can confirm that no further updates to this have been made. - Further detailed information, including narrative on queue lengths: Transport Assessment Annex C - VISSIM Forecasting Report [APP-261] contains average speed plots at a half hourly level which provides a proxy estimate of queuing extent. This is not expected to vary at a shorter time period as the demand profiling is sufficiently aggregate. The variability between the 20 analysis runs used for reporting (using different random seeds) shows a good level of consistency indicating that the models are providing stable results. Additional data related to queuing behaviour in the VISSIM model is being prepared as part of engagement with national Highways and we can share this with WSCC when it becomes available. - A LINSIG assessment of the signalised junction: The new signalised junction on the A23 at North Terminal is fully part of the VISSIM model area and therefore a standalone LINSIG model is not required. In the VISSIM Forecasting Report [APP-261], Appendix D provided a full tabulation of journey times passing through the model, routes connecting points 5, 6 and 7 (5-7, 7-5, 5-6, 6-5) help to illustrate the performance of this junction between the different model scenarios. n- Demand matrix changes that have been applied in VISSIM: In the VISSIM Forecasting Report [APP-261], Appendix B provides a worked example of the method used in deriving demand inputs for the VISSIM model scenarios. As can be seen from the Appendix, and considering the specification of the model, there are over 320 matrices input into each scenario simulated. We will work through this query with WSCC as part of the ongoing engagement supporting the SoCG process. <p><u>Updated position (July 2024): The Applicant will continue to engage with WSCC and following recent discussions, a LINSIG model will be provided to WSCC as requested.</u></p>		
--	--	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

		<p><u>The Linsig modelling does show that the North terminal signalised junction is approaching 100% capacity with not much Practical Reserve Capacity (PRC), if any, left on the A23 London Road arm. The results show that the queues could extend back around 160m which is approximately 32 cars assuming 5 metres a car.</u></p> <p><u>It is acknowledged within the technical note that the LINSIG models has been run under a fixed cycle time and fixed stage basis. However the junctions would operate under a different signal regime and probably would operate more efficiently in reality.</u></p> <p><u>In several scenarios the road between the two signalised junctions at North Terminal roundabout is shown as potentially being over capacity. The Mean Max Queue's are showing as 20 PCUs on each right turning lane in the 2047 AM 2 scenario (Scenario 6). The length of road between the two junctions is on 19 PCU's long (109.25m). In Scenario 2 (2032 AM 2) the MMQ's are showing as nearly 29PCU's per lane for the right turning movement, which will obviously cause exit blocking with the signalised roundabout.</u></p> <p><u>When it comes to detailed design, this should be taken into consideration and some form of Queue detection should be included in the detailed design, so more priority can be given to this stretch of carriageway between the two junctions, to minimise the impact to the roundabout.</u></p>	<p><u>Regarding the concerns on the level of growth and potential over-forecasting of demand, the Applicant has addressed the York Aviation alternative scenarios in Response to Rule 17 Letter - Future Baseline Sensitivity Analysis [REP5-081] which provides further assessment of the potential implications of those scenarios in relation to traffic and transport matters.</u></p>		
<p>2.20.2.3</p>	<p>Assessment Methodology</p>	<p>The use of 2016 data to inform the baseline assessment and the reasons for the use of this data, such as the impact Covid 19 had on travel, are noted. Since emerging from the pandemic, more representative transport data continues to become available and therefore this data should be used to show that the proposed approach is robust and takes accounts of changes since the 2016 base and any travel changes due to Covid 19. The Applicant should also review the latest Department for Transport (DfT) guidance TAG Unit M4- Forecasting and Uncertainty, and ensure the modelling takes account of the latest DfT advice.</p> <p>Updated position (Deadline 1): Reviewing Accounting for Covid 19 in Transport Modelling Book 8 Application Document Reference 8.5 PINS Reference Number TR020005.</p> <p>Matters relating to transport modelling are covered above and still under discussion.</p>	<p>The Examining Authority has made a Procedural Decision dated 24 October 2023 to request the Applicant to provide a detailed response to look at accounting for COVID-19 in the transport modelling. This work is being undertaken with submission to the ExA expected at the end of January 2024. A summary of the approach is set out in the response to PD-006.</p> <p>Updated response (Deadline 1): The response to the ExA's Procedural Decision on accounting for Covid-19 in the transport modelling has been submitted and is available on the Project Webpage.</p> <p>Updated position (April 2024): No update required.</p>	<p>Accounting for Covid-19 in Transport Modelling [AS-121] and its Appendices [AS-122]</p>	<p>Agreed</p>

		<p>Updated position (Deadline 5):The Applicant has submitted Accounting for Covid-19 in Transport Modelling (AS-121) which updates the assessment taking account of the impacts of Covid 19 in the transport modelling. Whilst the Highway Authority still have technical matters relating to the transport modelling that need to be addressed, as set out in reference 2.20.2.2 of the Statement of Common Ground, this matter is addressed.</p>			
Assessment					
2.20.3.1	Concerns with Surface Access improvements – highways (primary mitigation)	<p>WSCC has the following concerns in relation to the highway works to the WSCC highway network:</p> <ul style="list-style-type: none"> Speed limit reductions are proposed on London Road (A23) to 40mph are proposed and no justification has been provided or review against WSCC’s Speed Limit Policy. Stage 1 Road Safety Audit, whilst an audit has been undertaken it has not been submitted as part of the DCO and not all the auditor’s recommendations have been satisfactorily addressed in the form of a designer’s response. Concerns remain that it has not been demonstrated that safe and suitable access can be provided. Suitable justification for some of the proposed sustainable transport infrastructure, to ensure it accords with the current relevant guidance such as LTN 1/20, has not been provided. <p>No design review appraising the design of the proposed highway works has been submitted to check that it accords with the relevant design standards.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant has recently engaged with the Highway Authority to seek to address the above outstanding matters associated with the proposed highway works, The Highway Authority will continue to engage on the technical matters.</p> <p>Updated Position (Deadline 8)</p> <p>Speed limit change on A23 London Road – following the further information and justification from the Applicant as to the need for the change in posted speed limit, WSCC agree to the principle of the speed limit change on the A23 London Road and that it accords with the WSCC Speed Limit Policy.</p> <p>This matter is considered to be resolved.</p>	<p>The urban/partially built-up characteristics of this section of the A23 London Road combined with the proposals to provide new and upgraded facilities for pedestrians and cyclists alongside and crossing the A23 London Road at the proposed new signal controlled junction with North Terminal Link are considered to most closely align with West Sussex Speed Limit Policy’s Functional Hierarchy category for 40mph speed limit roads. It is expected that the proposed speed limit reduction would encourage reduced speeds on the road with safety benefits for all road users including active travel users.</p> <p>West Sussex Speed Limit Policy highlights that “lower traffic speeds may also encourage more walking and cycling”. This aligns with the scheme’s objective of increasing sustainable mode share through measures which include the scheme’s proposed active travel infrastructure improvements.</p> <p>This topic is being discussed further with WSCC. Further details have been shared with WSCC as part of ongoing technical engagement supporting the SoCG process with highways authorities.</p> <p>The design standards applied through the development of the surface access mitigations have been set out as part of technical engagement with WSCC. The Stage 1 RSA and Stage 1 RSA Designer Response in Draft has been issued to WSCC for review and comment, with WSCC returning comments on 24/05/2023. The final Stage 1 RSA Designers Response and agreement of RSA actions is the subject of ongoing engagement with the highway authorities through the SoCG process. Design review materials outlining the highways strategy and accordance with design standards have also been shared with WSCC as part of technical engagement.</p> <p>Updated position (April 2024): No further update, this is subject to ongoing technical engagement.</p> <p>Updated position (July 2024):</p>	n/a	<p>Not Agreed Partially Agreed</p>

Stage 1 RSA Response Report – WSCC have now received the Stage 1 RSA Response Report and have signed and dated this as Overseeing Organisation. However, as noted by the Applicant WSCC as Highway Authority need to be in receipt of a copy, with the Applicant's, as designer, signature included.

In addition to this there is also the need to agree and include an additional requirement securing the need to monitor the speed limit and if necessary implement additional measures to address speed limit compliance. This has specifically been put forward by the Applicant to address Problem 3.1 within the Stage 1 RSA. The Legal Partnership Authorities have highlighted the need for this additional requirement in their Deadline 7 Submission – Consolidated submissions on the draft Development Consent Order [REP7-108].

Subject to the Highway Authority receiving a signed and dated copy of the Stage 1 RSA Response Report and the additional requirement, that requires the Applicant to undertake a Speed Limit Monitoring Strategy and potential introduce additional measures to ensure compliance with the speed limit, being included in the DCO, this issue would be resolved.

Proposed Design Review – As previously stated, the Design Review does not include a detail design review of the new signalised junction against CD123 – Geometric design of at-grade priority and signal-controlled junctions, however it is noted the Applicant states they have designed to this standard and identified Departures from Standards. The Applicant states a geometric design review of the new signalised junction on the A23 against DMRB CD124 will be undertaken and included in an updated technical report. This has not been received to date.

Sustainable Transport Infrastructure – Subject to reaching an agreement through the ongoing engagement with WSCC of the approach defined in the further technical reports. The Highway Authority would suggest that this issue is resolved.

-Following the submission of further technical reports to WSCC as part of continued technical engagement, recent correspondence from WSCC confirmed their updated position following a review of further information provided:

Speed limit change on A23 London Road – WSCC Road Safety team have reviewed the Assessment of alignment between WSCC Speed Limit Policy and scheme speed limit proposals report provided to justify the proposed speed limit change and agree to this in principle, and that it is considered to accord with WSCC speed limit policy.

The Applicant would suggest that this issue is resolved.

Stage 1 RSA Response Report – WSCC have reviewed and commented on the issues raised with the report where WSCC are Overseeing Organisation, which includes problems 3.1, 3.12, 3.13, 3.14, 3.15, 3.23, 3.27 and 3.48. WSCC are in agreement with the Agreed Actions in the Stage 1 RSA Response Report and have signed and dated the document.

Subject to returning a signed and dated copy of the Stage 1 RSA Response Report once all Highway Authorities accepted the Agreed Actions, the Applicant would suggest that this issue is resolved.

Proposed Design Review – WSCC have reviewed the further technical reports which provided a useful indication as to how the highway design has evolved, a design review and cross sections of various elements of the works. However, the report does not appear to be provide a detailed design review of the new signalised junction against CD123 – Geometric design of at-grade priority and signal-controlled junctions.

As detailed in the further technical reports, the design of the highway proposals for the strategic and local road network have been designed in accordance with NH's design standards and guidance documents, including the Design Manual for Roads and Bridges (DMRB) and for more urban and residential roads the Manual for Streets (including Manual for Streets 2). Where the proposed design has not met the required level of provision as detailed in the design standards and guidance documents, these locations have been the subject to further engagement with Local Authorities and where requested their formal approval process for Departures from Standards has been followed.

A geometric design review of the new signalised junction on the A23 London Road against DMRB CD123 will be undertaken and included in an updated technical report.

			<p><u>Sustainable Transport Infrastructure</u></p> <p><u>As detailed in the further technical reports, the design of the highway, Due consideration has also been given to the guidance contained in Local Transport Note (LTN) 1/20 'Cycle Infrastructure Design' in the development of walking and cycling infrastructure design proposals.</u></p> <p><u>Where the proposed design has not met the required level of provision as detailed in the design standards and guidance documents, these locations have been the subject to further engagement with Local Authorities and where requested their formal approval process for Departures from Standards has been followed.</u></p> <p><u>Subject to reaching an agreement though ongoing engagement with WSCC of the approach defined in the further technical reports, the Applicant would suggest that this issue is resolved.</u></p>		
2.20.3.2	Concerns about elements of the PRow Strategy	<p>WSCC has concerns about:</p> <ul style="list-style-type: none"> timescales for temporary closure of PRowWs. reference to permanent diversions of PRowWs. lack of clarity about indefinite closures of PRowWs. concerns about reinstatement of PRowWs. 	<p>Appendix 19.8.1: Public Rights of Way Management Strategy to Chapter 19 of the ES (PINS Doc Ref: App - 215) describes GAL's approach to managing impacts on Public Rights of Way (PROW) because of the construction and operation of the Project to reduce disruption to users of such PROWs as far as possible. Requirement 22 of Schedule 2 to the draft DCO secures that detailed PROW implementation plans for individual PROWs would be developed prior to the commencement of construction (to be in general alignment with the PROW Management Strategy) and subject to prior approval by the relevant planning authority.</p> <p>Table 4.1.1, and PRow Temporary and Permanent Stopping up and Diversion Plans in Annex 1 of Appendix 19.8.1 PROW Management Strategy (APP-215) detail and illustrate the likely affected PRow's and the proposed management measures. These give timescales for temporary closures and diversions, permanent diversions/closures and the associated stopping up.</p> <p>Section 4.1 of Appendix 19.8.1 PROW Management Strategy (APP-215) confirms PRow directly affected through the temporary works together with diversion routes would be reinstated to a suitable condition post construction in accordance with the detailed PRow implementation plans.</p>	<p>ES - Appendix 19.8.1 Public Rights of Way Management Strategy [APP-215] No updates required</p>	Agreed
2.20.3.3	Increased journey times for emergency response vehicles	<p>The proposals would increase some journey times (including potentially for emergency response vehicles) and result in a redistribution of traffic, including from the strategic to the local highway network.</p> <p>Updated position (Deadline 5):</p>	<p>There are a range of journey time impacts between the With and Without Project forecasts that are reported at a strategic level in section 12.8 of Annex B (Strategic Transport Modelling Report) of the Transport Assessment. More detailed analysis of the local road network is reported in section 6.6 of Annex C (VISSIM Forecasting Report) of the Transport Assessment.</p>	<p>Sections 12.8 of Transport Assessment Annex B: Strategic Transport Modelling Report</p>	<p>Under discussion Agreed</p>

		<p>The Applicant and the Highway Authority met on 10th May to discuss outstanding transport modelling matters. The Applicant has provided additional journey time and traffic flow information to enable the Highway Authority to better understand the potential for redistribution of traffic. The Highway Authority will continue to engage with the Applicant to seek to address this matter.</p> <p>Updated Position (Deadline 8) The Applicant has provided LINSIG modelling on 19th July 2024 and the Highway Authority are of the view that this matter is now addressed, as per the comments to matter 2.20.2.2 Traffic Assessment Methodology.</p>	<p>Updated position (April 2024): In response to the West Sussex written rep [ref document]. The Applicant has responded to West Sussex County Council's detailed concerns in The Applicant's Response to the Local Impact Reports [REP3-078]. Comprehensive strategic modelling work has been undertaken to assess the traffic impact of the Project (see Chapters 12 of the Transport Assessment [REP3-058] which takes into account any distribution of traffic. VISSIM microsimulation modelling has been undertaken (see Chapters 13 of the Transport [REP3-058]) which includes the North Terminal junction. Based on the modelling work, the Project is not expected to result in significant adverse effects which require mitigation additional to the highway works surface access improvement works as part of the Project.</p> <p>Updated position (July 2024): The Applicant will continue to engage with WSCC.</p>	<p>[APP-260]</p> <p>Transport Assessment Annex C: VISSIM Forecasting Report [APP-261]</p>	
<p>2.20.3.4</p>	<p>Justification for speed limits</p>	<p>Insufficient justification has been provided for the proposed speed limits on the local road network and, in lieu of the submission of a Stage 1 Road Safety Audit, it has not been demonstrated that the road safety implications of the proposals have been fully considered. It is also not apparent what design standards have been applied to the highway works or whether they accord with the relevant standards, as no design review has been submitted.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5):</p> <p>The Applicant and the Highway Authority recently met and these outstanding technical matters in relation to the highway works are subject to ongoing technical engagement. The Highway Authority will positively engage with the Applicant in relation to these matters.</p> <p>Updated position (Deadline 8)</p> <p>As per Highway Authority position on reference 2.20.3.1. The principle of the speed limit change and RSA is agreed. However, as stated earlier for this matter to be fully agreed the Highway Authority require a copy of the Stage 1 RSA signed by the Applicant and an additional requirement requiring the Applicant to monitor the newly introduced speed limits and introduce additional measures, if necessary, to ensure compliance with the speed limit.</p>	<p>The urban/partially built-up characteristics of this section of the A23 London Road combined with the proposals to provide new and upgraded facilities for pedestrians and cyclists alongside and crossing the A23 London Road at the proposed new signal controlled junction with North Terminal Link are considered to most closely align with West Sussex Speed Limit Policy's Functional Hierarchy category for 40mph speed limit roads. It is expected that the proposed speed limit reduction would encourage reduced speeds on the road with safety benefits for all road users including active travel users.</p> <p>West Sussex Speed Limit Policy highlights that "lower traffic speeds may also encourage more walking and cycling". This aligns with the scheme's objective of increasing sustainable mode share through measures which include the scheme's proposed active travel infrastructure improvements.</p> <p>This topic is being discussed further with WSCC. Further details have been shared with WSCC as part of ongoing technical engagement supporting the SoCG process with highways authorities.</p> <p>The design standards applied through the development of the surface access mitigations have been set out as part of technical engagement with WSCC. The Stage 1 RSA and Stage 1 RSA Designer Response in Draft has been issued to WSCC for review and comment, with WSCC returning comments on 24/05/2023. The final Stage 1 RSA Designers Response and agreement of RSA actions is the subject of ongoing engagement with the highway authorities through the SoCG process. Design review materials outlining the highways strategy and accordance with design standards have also been shared with WSCC as part of technical engagement.</p>	<p>n/a</p>	<p>Not Agreed Partially agreed</p>

Updated position (April 2024): No further update, this is subject to ongoing technical engagement.

Updated position (July 2024):

Following the submission of further technical reports to WSCC as part of continued technical engagement, recent correspondence from WSCC confirmed their updated position following a review of further information provided:

Speed limit change on A23 London Road – WSCC Road Safety team have reviewed the Assessment of alignment between WSCC Speed Limit Policy and scheme speed limit proposals report provided to justify the proposed speed limit change and agree to this in principle, and that it is considered to accord with WSCC speed limit policy.

The Applicant would suggest that this issue is resolved.

Stage 1 RSA Response Report – WSCC have reviewed and commented on the issues raised with the report where WSCC are Overseeing Organisation, which includes problems 3.1, 3.12, 3.13, 3.14, 3.15, 3.23, 3.27 and 3.48. WSCC are in agreement with the Agreed Actions in the Stage 1 RSA Response Report and have signed and dated the document.

Subject to returning a signed and dated copy of the Stage 1 RSA Response Report once all Highway Authorities accepted the Agreed Actions, the Applicant would suggest that this issue is resolved.

Proposed Design Review – WCCC have reviewed the further technical reports which provided a useful indication as to how the highway design has evolved, a design review and cross sections of various elements of the works. However, the report does not appear to be provide a detailed design review of the new signalised junction against CD123 – Geometric design of at-grade priority and signal-controlled junctions.

As detailed in the further technical reports, the design of the highway proposals for the strategic and local road network have been designed in accordance with NH's design standards and guidance documents, including the Design Manual for Roads and Bridges (DMRB) and for more urban and residential roads the Manual for Streets (including Manual for Streets 2). Where the proposed design has not met the required level of provision as detailed in the design standards and guidance documents, these locations have been the subject to further engagement with Local

			<p>Authorities and where requested their formal approval process for Departures from Standards has been followed.</p> <p>A geometric design review of the new signalised junction on the A23 London Road against DMRB CD123 will be undertaken and included in an updated technical report.</p>		
Mitigation and Compensation					
2.20.4.1	Concerns with Surface Access Commitments (SACs) and target mode shares.	<p>Commitments (SACs) and target mode shares. Concerns are held about the SACs that underpin the creation of a new Surface Access Strategy and the approach to meeting and monitoring these targets. Some of the concerns include:</p> <ul style="list-style-type: none"> • Commitment 1, to ensure 55% of passenger journeys is made by public transport is not considered ambitious or of sufficient challenge. Prior to the Pandemic the airport achieved 47.8% public transport modal share in the 12 months up to March 2020. • Target mode shares set out as Commitments are only set out as percentages. The percentages masks trends in absolute numbers and permit significant increases in car trips to and from the airport. • Insufficient evidence and justification are provided to demonstrate how the mitigation proposed can provide sufficient sustainable and active travel infrastructure to successfully meet the some of the target modal splits. <p>Commitments are made in relation to bus and coach service provision. Determination of mode of travel takes into a variety of factors rather than just provision of service. The Applicant has not assessed or considered the attractiveness of modes or how this could be increased.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5): The Highway Authority's concerns in relation to the SACs (REP3-028 version 2) remain. The Highway Authority remain of the view that there is not sufficient controls in place should the modal split targets not be met.</p> <p>Updated position (Deadline 8) The Highway Authority still has concerns in relation to the SACs. The Joint Local Authorities (excluding Kent) position on the SACs and all the changes that they consider are necessary are set out in the Joint Local Authorities Deadline 7 Submission – Response to the Applicant's Deadline 6 Submissions – Appendices [REP7-104] (Appendix A).</p>	<p>Our mode share commitments within the Surface Access Commitments document represent the position we are committed to achieve, based on our modelling of mode choice and transport network operation. The SAC also includes a section on our further aspirations, which includes more ambitious mode share targets which we will be working towards, but we have set the committed mode shares and the timescales within which they are to be achieved explicitly to ensure that the core surface access outcomes set out in ES Chapter 12: Traffic and Transport and in the Transport Assessment are delivered.</p> <p>The commitments are expressed as percentages as this is the convention for mode shares. Our commitments will see increases in the number of people using sustainable transport modes. We are aware that our forecasts also anticipate an increase in vehicular traffic and our proposed highway works are designed to address this in the immediate vicinity. Our transport modelling reported in the Transport Assessment identifies the potential impact of that additional traffic in the wider area.</p> <p>The interventions we propose in the SACs have been included in our modelling, which provides confidence that the mode share commitments can be achieved with those interventions in place. The bus and coach service enhancements were developed with consideration of services which would be most likely to make greatest difference to mode shares.</p> <p>The further aspirations identified in the SAC document acknowledge that there may be further opportunities to enhance public transport services and we are committed to using the Sustainable Transport Fund to support measures that will help to achieve the mode share commitments. For the specific bus and coach enhancements identified in the SAC document we are committing to funding those for a minimum of five years.</p> <p>Updated position (April 2024): The commitments being made and the way in which they are structured are appropriate in the context of the anticipated rate of growth which is forecast for dual runway operations at the airport . The updated version of the Surface Access Commitments [REP3-028] sets out a monitoring strategy which is in keeping with the existing process for monitoring ASAS targets and the development of</p>	<p>ES Appendix 5.4.1: Surface Access Commitments [APP-090]</p> <p>ES Chapter 12 Traffic and Transport [AS-076].</p> <p>Transport Assessment [AS-079] and associated annexes.</p>	Not Agreed

			<p>Action Plans in consultation with the Transport Forum Steering Group. The Sustainable Transport Fund and bus and coach contributions are secured in the draft S106 Agreement [REP2-004] to support the increased use of sustainable modes of travel services. The Applicant is also committing to provide a Transport Mitigation Fund, which is secured in the draft DCO S106 Agreement [REP2-004] and would be available to address potential future impacts over and above what was modelled and which were not anticipated.</p> <p><u>Updated position (July 2024): The Applicant's position remains unchanged. Further updates to ES Appendix 5.4.1: Surface Access Commitments [REP6-030] and the Draft Section 106 Agreement [REP6-063] have been submitted at Deadline 6.</u></p> <p><u>Updated position (Deadline 9): The Applicant has updated the SACs at Deadline 9. This matter should be read in the context of the Joint Position Statement and the Applicant's Closing Submission (Doc Ref. 10.73) in relation to surface access.</u></p>		
2.20.4.2	FP346/2sy – reference to diversion onto new shared route.	This is not an improvement for pedestrians as they go from having a route for walkers only to have to then contend with cyclists.	<p>In addition to forming part of Sussex Border Path, a section of this existing footpath is coincident with the existing footway provision through North Terminal Roundabout and on Perimeter Road North. A section of the existing footpath is proposed to be stopped up and replaced by the proposed shared-use cycle track. (Refer to label B2 on sheet 2 of the Rights of Way and Access Plans) This will remove the overlap of the footpath and highway/footway rights of way designations.</p> <p>The volume of pedestrian users between North and South Terminal on the existing footway on the northern side of Perimeter Road North / FP346/2sy is relatively low due to the Inter-Terminal Transit System being the preferred mode of transport between the two terminals (for airport users).</p> <p>The preliminary design proposals include a number of measures that will reduce the risk of conflict between pedestrians and cyclists on the section of shared-use path including:</p> <ul style="list-style-type: none"> - The design proposals provide a more direct route for pedestrians travelling between southern Horley and North Terminal via the new signal-controlled crossing on A23 London Road. This is expected to reduce the proportion of pedestrians accessing the airport via the alternative existing route along NCR 21, the existing subway under A23 London Road and the footway network on Perimeter Road North. - Cyclists accessing North Terminal from Horley are expected to predominately use the new segregated cycle track between Longbridge Roundabout and North Terminal Roundabout. Cyclists travelling to South 	Sheet 1 of Rights of Way and Access Plans [APP-018]	Agreed

			<p>Terminal from Horley are expected to predominantly travel via NCR 21.</p> <p>With these usage considerations in mind shared-use path provision is considered to be appropriate at this location with a low risk of collisions between pedestrians and cyclists. The provision of a segregated path along Perimeter Road North would lead to increased loss of trees to the north and would increase clashes with assets in the vicinity of Gatwick Police station.</p> <p>Where usage numbers and conflict risks are higher (e.g. west of North Terminal Roundabout), segregated cycle track provision is proposed and FP346/2sy has been retained on a similar alignment to existing separate from the proposed segregated cycle track connection between Longbridge Roundabout and North Terminal Roundabout</p>		
2.20.4.3	Lack of public access improvements	<p>No proposed public access improvements on the PRow network as part of the Project.</p> <p>Updated position (Deadline 1): These are improvements but this development offers an opportunity to improve the general provision locally both withing and outside the DCO Limits. These include upgrading existing footpaths to Bridleways but this has not been suggested which is a missed opportunity. More Bridleways locally will support active travel for workforce at the airport but this does not appear to have been considered.</p> <p>Updated position (Deadline 5):</p> <p>There are Highways improvements but no PRow improvements which offer an opportunity for active travel to take place away from the live carriageway. Segregated walking and cycling is welcomed but active travel links away from carriageway are even better and there are options, particularly within the red line boundary to support greater access for many different modes of transport both for a utility and recreational perspective and these are not being explored. No changes to our position at Deadline 5. Still no enhancements to PRow network which is disappointing.</p>	<p>The scheme includes proposals to improve a number of existing PRow crossings with safety and accessibility benefits for users:</p> <ul style="list-style-type: none"> • A new signal controlled crossing with dropped kerbs is to be introduced across Longbridge Way just west of North Terminal Roundabout to replace the existing informal crossing point utilised by Sussex Border Path (Footpath 346/2Sy), with expected safety benefits for users. • Existing uncontrolled pedestrian crossings of the Northway/North Terminal Approach links to North Terminal Roundabout (at similar locations to the Sussex Border Path (Footpath 346/2Sy) crossings of these arms) are to be upgraded to full toucan crossings with full dropped kerb provision, with anticipated safety benefits for users. • The existing Footpath 367 Sy which runs parallel to the southern side of Gatwick Spur and connects to Balcombe Road would be diverted locally to the south where the existing alignment clashes with the proposed Gatwick Spur Westbound Diverge and associated drainage infrastructure provision. The replacement path provision would include improved visibility to/from the crossing of Balcombe Road as a result of the increased set back of the Balcombe Road underbridge abutment, which currently limits visibility, from the edge of the carriageway. <p>Updated position (April 2024):The active travel infrastructure provided as part of the surface access works delivers improved footpath, footway and cycle track (shared-use and segregated) provisions within the site context which are considered appropriate and sufficient to support the mode share targets as set out in the SAC [REP3-028]. The scheme also includes a number of replacement public open space provisions which will be of benefit to local residents and active travel users. No further mitigations are considered to be required.</p>		<p>Not Agreed <u>Under discussion</u> <u>Not agreed</u></p>

			<p>The scheme does not preclude future changes in designation of Public Rights of Way by local highway authorities.</p> <p>Updated position (July 2024):</p> <p>The active travel proposals have been subject to additional discussion with the WSCC PRow Officer during a meeting held on the 11th June. The Applicant's position outlined above remains unchanged. No further PRow upgrades are considered to be required.</p> <p>Refer to the response to item 2.20.4.8 for additional details in relation to why PRow upgrades to bridleway status are not supported by GAL.</p>		
2.20.4.4	Mode share targets	<p>Concerns related to traffic and transport access, including the impact of other strategic development and forecasting assumptions about mode share for both passengers and staff. There is insufficient evidence and mitigation to demonstrate how the target mode share percentages for staff and passengers can be met.</p> <p>Updated position (Deadline 5): Concerns remain that there is insufficient mitigation and controls within the SACs (REP3-028) to ensure that the modal split commitments are delivered.</p> <p>Updated position (Deadline 8) As per reference 2.20.4.1. The Highway Authority still has concerns in relation to the SACs. The Joint Local Authorities (excluding Kent) position on the SACs and all the changes that they consider are necessary are set out in the Joint Local Authorities Deadline 7 Submission – Response to the Applicant's Deadline 6 Submissions – Appendices [REp7-104] (Appendix A).</p>	<p>The committed mode shares are the result of the interventions tested in the strategic model. This is set out in Chapter 7 of the Transport Assessment. The impact of cumulative schemes and the forecasting assumptions are set out in detail in Transport Assessment Annex B Strategic Transport Modelling Report.</p> <p>Updated position (April 2024): An updated version of ES Appendix 5.4.1: Surface Access Commitments [REP3-028] has been submitted at Deadline 3. This contains commitments to achieving the mode shares quoted in Commitments 1-4, together with commitments to interventions that will be used to achieve those mode shares</p> <p>Updated position (July 2024): The Applicant's position remains unchanged. Further updates to ES Appendix 5.4.1: Surface Access Commitments [REP6-030] and the Draft Section 106 Agreement [REP6-063] have been submitted at Deadline 6.</p> <p>Updated position (Deadline 9): The Applicant has updated the SACs at Deadline 9. This matter should be read in the context of the Joint Position Statement and the Applicant's Closing Submission (Doc Ref. 10.73) in relation to surface access.</p>	<p>Chapter 7 of Transport Assessment [AS-079] Transport Assessment Annex B Strategic Transport Modelling Report [APP-260]</p>	<p>Under discussion Not agreed</p>
2.20.4.5	Mitigation, Compensation and Enhancement	<p>The Mode Share Commitments, set out in the Surface Access Commitments, are not considered to be sufficiently ambitious. This is especially the case for passenger travel.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5): Concerns remain that there is insufficient mitigation and controls within the SACs (REP3-028) to ensure that the modal split commitments are delivered.</p>	<p>The range of interventions to improve sustainable travel has been tested to inform the mode share commitments reported in the Application. The SAC also includes a section on our further aspirations, which includes more ambitious mode share targets which we will be working towards, but we have set the committed mode shares explicitly to ensure that the core surface access outcomes set out in ES Chapter 12: Traffic and Transport and in the Transport Assessment are delivered. Further clarification is sought as to why the commitments are not considered ambitious.</p>	<p>Chapter 7 of Transport Assessment [AS-079] ES Appendix 5.4.1: Surface Access Commitments</p>	<p>Not Agreed</p>

		<p>Updated position (Deadline 8) As per reference 2.20.4.1 and 2.20.4.4. The Highway Authority still has concerns in relation to the SACs. The Joint Local Authorities (excluding Kent) position on the SACs and all the changes that they consider are necessary are set out in the Joint Local Authorities Deadline 7 Submission – Response to the Applicant’s Deadline 6 Submissions – Appendices [REP7-104] (Appendix A).</p>	<p>Updated position (April 2024): An updated version of ES Appendix 5.4.1: Surface Access Commitments [REP3-028] has been submitted at Deadline 3 which adds further detail to the commitments related to the interventions.</p> <p>Updated position (July 2024): The Applicant’s position remains unchanged. Further updates to ES Appendix 5.4.1: Surface Access Commitments [REP6-030] and the Draft Section 106 Agreement [REP6-063] have been submitted at Deadline 6.</p> <p>Updated position (Deadline 9): The Applicant has updated the SACs at Deadline 9. This matter should be read in the context of the Joint Position Statement and the Applicant’s Closing Submission (Doc Ref. 10.73) in relation to surface access.</p>	<p>[APP-090]</p> <p>ES Chapter 12 Traffic and Transport [AS-079]</p>	
2.20.4.6	Mitigation, Compensation and Enhancement	<p>Insufficient mitigation is proposed to encourage substantial modal shift towards active and sustainable travel.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5):</p> <p>Concerns remain that there is insufficient mitigation and controls within the SACs (REP3-028) to ensure that the modal split commitments are delivered.</p> <p>Updated position (Deadline 8) As per reference 2.20.4.1, 2.20.4.4 and 2.20.4.5. The Highway Authority still has concerns in relation to the SACs. The Joint Local Authorities (excluding Kent) position on the SACs and all the changes that they consider are necessary are set out in the Joint Local Authorities Deadline 7 Submission – Response to the Applicant’s Deadline 6 Submissions – Appendices [REP7-104] (Appendix A).</p>	<p>The SACs document sets out the range of interventions and funding that GAL is committing to deliver. The assessment shows that the Project as proposed would not generate significant adverse effects related to traffic and transport and therefore no further mitigation is required.</p> <p>Updated position (April 2024): An updated version of ES Appendix 5.4.1: Surface Access Commitments [REP3-028] has been submitted at Deadline 3 which adds further detail to the commitments related to the interventions.</p> <p>Updated position (July 2024): The Applicant’s position remains unchanged. Further updates to ES Appendix 5.4.1: Surface Access Commitments [REP6-030] and the Draft Section 106 Agreement [REP6-063] have been submitted at Deadline 6.</p> <p>Updated position (Deadline 9): The Applicant has updated the SACs at Deadline 9. This matter should be read in the context of the Joint Position Statement and the Applicant’s Closing Submission (Doc Ref. 10.73) in relation to surface access.</p>	<p>Chapter 7 of Transport Assessment [AS-079] and ES Appendix 5.4.1: Surface Access Commitments [APP-090]</p>	Not Agreed
2.20.4.7	Mitigation, Compensation and Enhancement	<p>The focus of mitigation has been on the provision of service rather than implementing measures, within the Applicant’s control, to increase the attractiveness of alternative modes of travel, i.e. bus priority measures to deliver journey time savings.</p> <p>Updated position (Deadline 1): No further information provided, so no change in WSCCs position.</p> <p>Updated position (Deadline 5):</p>	<p>The proposed surface access highway improvements for bus and coach services and their passengers include improved network performance (as shown in the results of the highway network local modelling set out in section 13 of the Transport Assessment [AS-079], increased network resilience and safety improvements (through grade separation of the existing junctions), improved network connectivity (through the introduction of right turn movements from NT) and improved active travel connections at bus stops.</p> <p>The provision of additional dedicated bus/coach infrastructure as part of</p>	<p>Transport Assessment [AS-079]</p>	Not Agreed

		<p>The Applicant's updated position of April 2024 is noted and that an updated version of the Surface Access Commitments (REP3-028) has been submitted at Deadline 3. However, this revised document does not include any further mitigation in relation to bus priority measures. Concerns remain that no measures are to be implemented that would increase the attractiveness of alternative modes of travel that would offer time savings over use off the private car such as bus priority measures to deliver journey time savings.</p> <p><u>Updated position (Deadline 8)</u> <u>The Applicant's position remains unchanged. The Highway Authority has concerns that no assessment as to the need for bus priority measures has been undertaken and that no specific infrastructure improvements, such as bus priority, has been proposed to increase the attractiveness of alternative modes of travel. The wording in the Airports NPS requires the number of journeys via sustainable modes to be maximised as much as is possible. If these measures have not been considered or implemented it is not evident if trips via bus are being maximised. Based on the mitigation currently proposed, the mechanism to secure bus priority measures would be through the Transport Mitigation Fund.</u></p>	<p>the surface access highways scope in the form of further carriageway widening to accommodate additional dedicated bus lanes or further widening of junctions to accommodate additional dedicated bus slip lanes is not considered to be required to achieve the mode share targets set out in the SACs and is considered to result in impacts to existing site features, safety challenges due to the short distances between junctions and the impact to other users, and limited further benefits for journey time improvements.</p> <p>Design details for reconfiguration of Gatwick's internal forecourt roads including the associated bus infrastructure are to be developed at the detailed design stage.</p> <p>Updated position (April 2024): An updated version of ES Appendix 5.4.1: Surface Access Commitments [REP3-028] has been submitted at Deadline 3 which adds further detail to the commitments related to the interventions.</p> <p>Updated position (July 2024): <u>The Applicant's position remains unchanged and further bus priority measures are not considered to be required to achieve the mode share targets set out in the Surface Access Commitments. Further updates to ES Appendix 5.4.1: Surface Access Commitments [REP6-030] and the Draft Section 106 Agreement [REP6-063] have been submitted at Deadline 6.</u></p> <p>Updated position (Deadline 9): <u>The Applicant has updated the SACs at Deadline 9. This matter should be read in the context of the Joint Position Statement and the Applicant's Closing Submission (Doc Ref. 10.73) in relation to surface access.</u></p>		
2.20.4.8	Mitigation, Compensation and Enhancement	<p>This Project offers an opportunity to improve a number of the footpaths to Bridleways, thereby improving the network and benefitting residents, visitors and those wishing to travel actively to and from places of employment. Disappointingly, however, there are no proposed public access improvements on the PRow network as part of Project.</p> <p>Updated position (Deadline 1): This is focussing on equestrian use which will be low locally due to them not currently having much provision locally. Having said that Bridleways also provide a safe off road option for cyclists which does not appear to have been addressed. This would benefit active travel for the employees at the Airport but would also offer an improved recreational offering for local residents. Finally, an assumption has been made that this locality is not suitable for horses but that is surely a choice for users and having the provision gives local residents and visitors a choice and better opportunities for recreational and active travel access.</p>	<p>The introduction of new bridleways as part of the scheme was not considered to be appropriate with footpath, footway and cycle track (shared-use and segregated) considered to be more appropriate active travel infrastructure provisions in the site context.</p> <p>User counts surveys across a study area of 0.5 km from the scheme were undertaken in November 2022 at 14 locations on a mixture of public rights of way, cycle routes and public highways. The surveys did not identify any horse-riders within the study area, however this was as expected as there is only one route, which is a restricted byway on the periphery near to the motorway, that could accommodate horse-riders. Therefore, the opportunity to improve footpaths within the study to Bridleways has not been taken forward based on current usage. As the proposed scheme study area extents are situated around a live airport the provision of improvements from footpath to Bridleway is not considered appropriate</p>	<p>Rights of Way and Access Plans [APP-018]</p> <p>Draft DCO [REP3-006]</p> <p>Figure 1.2.2 appended to ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan - Part 1 [APP-113]</p>	Not Agreed

		<p>Updated position (Deadline 5): The Highways improvements do not offer an active travel option away from the carriageway whereas PRow upgrades do. The comments about equestrians still stand and this is a choice that should be available. Numbers are low as the provision is currently not there.</p> <p>No change from Deadline 5 and still no PRow enhancements which is disappointing</p>	<p>due to the noise and vibration associated with the airport which could spook horses and unseat a horse-rider. Cycle tracks with a right of way on foot, as defined in the Draft Development Consent Order, were considered to be a more appropriate provision to accommodate increased pedestrian and cyclist travel.</p> <p>The proposed network of new and improved cycle track provisions and footway improvements is illustrated in the Rights of Way and Access Plans. The proposed improved connectivity between Longbridge, North Terminal and South Terminal and Riverside Garden Park to North Terminal will benefit residents, visitors and those wishing to travel actively to and from places of employment.</p> <p>The scheme also includes proposals to improve a number of existing PRow crossings with safety and accessibility benefits for users:</p> <ul style="list-style-type: none"> • A new signal controlled crossing with dropped kerbs is to be introduced across Longbridge Way just west of North Terminal Roundabout to replace the existing informal crossing point utilised by Sussex Border Path (Footpath 346/2Sy), with expected safety benefits for users. • Existing uncontrolled pedestrian crossings of the Northway/North Terminal Approach links to North Terminal Roundabout (at similar locations to the Sussex Border Path (Footpath 346/2Sy) crossings of these arms) are to be upgraded to full toucan crossings with full dropped kerb provision, with anticipated safety benefits for users. • The existing Footpath 367 Sy which runs parallel to the southern side of Gatwick Spur and connects to Balcombe Road would be diverted locally to the south where the existing alignment clashes with the proposed Gatwick Spur Westbound Diverge and associated drainage infrastructure provision. The replacement path provision would include improved visibility to/from the crossing of Balcombe Road as a result of the increased set back of the Balcombe Road underbridge abutment, which currently limits visibility, from the edge of the carriageway. <p>The scheme also includes proposals to provide replacement open recreational space in place of the existing Car Park B on the western side of the London to Brighton rail line (both north and south of Airport Way). The Car Park B sketch landscape concept is illustrated in Figure 1.2.2 appended to ES Appendix 8.8.1: Outline Landscape and Ecology Management Plan - Part 1. These proposals include new surfaced paths for pedestrians that run north/south parallel to the rail line and Footpath 355a, providing an attractive alternative route for users travelling between the Crescent Road and South Terminal.</p> <p>Updated position (April 2024): The active travel infrastructure provided as part of the surface access works delivers improved footpath, footway</p>		
--	--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

			<p>and cycle track (shared-use and segregated) provisions within the site context which are considered appropriate and sufficient to support the mode share targets as set out in the SAC [REP3-028] . The scheme also includes a number of replacement public open space provisions which will be of benefit to local residents and active travel users. No further mitigations are considered to be required.</p> <p>The scheme does not preclude future changes in designation of Public Rights of Way by local highway authorities.</p> <p>Updated position (July 2024):</p> <p>The active travel proposals have been subject to discussion with the WSCC PRoW Officer during a meeting held on the 11th June after which WSCC shared additional details on the PROW routes inside and outside the DCO boundary which are the subject of requested upgrades to bridleway status. Overall GAL's position outlined previously has not changed.</p> <p>GAL does not support upgrades of PROW to bridleway status where these routes connect to/from the GAL internal road network, to/from strategic road network and/or to/from the A23 London Road dual carriageway (within the DCO boundary extents) on the basis of the safety risks associated with horse riders travelling on/across these heavily trafficked roads and the additional impacts such upgrades would have (e.g. environmental impacts such as tree loss) as a result of the increased engineering footprint of such proposals particularly at junctions.</p> <p>The scheme does not preclude future changes in designation of Public Rights of Way by local highway authorities for PRoW located further way from the airport.</p>		
2.20.4.9	Mitigation, Compensation and Enhancement	<p>WSCC's PRoW team has suggested improvements to existing PRoW within the DCO limits, including upgrades to the existing footpath network to improve sustainable access improvements from a utility and recreational perspective. These do not appear to be addressed by the Applicant.</p> <p>Updated position (Deadline 1): As set out above there is a lot of reference to works alongside highway and how the PRoW link to the highway network which is of course welcomed but this proposal offers opportunities to enhance the general area for off road routes for active travel and recreational access as well.</p> <p>Enhancements in status from footpath to Bridleway within the DCO boundary gives options to locals and visitors that does not appear to have been considered.</p>	<p>In addition to forming part of Sussex Border Path, a section of this existing footpath is coincident with the existing footway provision through North Terminal Roundabout and on Perimeter Road North. A section of the existing footpath is proposed to be stopped up and replaced by the proposed shared-use cycle track. (Refer to label B2 on sheet 2 of the Rights of Way and Access Plans) This will remove the overlap of the footpath and highway/footway rights of way designations.</p> <p>The volume of pedestrian users between North and South Terminal on the existing footway on the northern side of Perimeter Road North / FP346/2sy is relatively low due to the Inter-Terminal Transit System being the preferred mode of transport between the two terminals (for airport users).</p>	Transport Assessment [AS-079]	Not Agreed Under discussion

		<p>Updated position (Deadline 5): It is still the view of WSCC that the improvement of local provision is insufficient to promote active travel away from the road network and also additional recreational routes for walkers, cyclists and potentially horse riders. No change to position at deadline 5. No PRow enhancements which is disappointing</p>	<p>The preliminary design proposals include a number of measures that will reduce the risk of conflict between pedestrians and cyclists on the section of shared-use path including:</p> <ul style="list-style-type: none"> - The design proposals provide a more direct route for pedestrians travelling between southern Horley and North Terminal via the new signal-controlled crossing on A23 London Road. This is expected to reduce the proportion of pedestrians accessing the airport via the alternative existing route along NCR 21, the existing subway under A23 London Road and the footway network on Perimeter Road North. - Cyclists accessing North Terminal from Horley are expected to predominately use the new segregated cycle track between Longbridge Roundabout and North Terminal Roundabout. Cyclists travelling to South Terminal from Horley are expected to predominantly travel via NCR 21. With these usage considerations in mind shared-use path provision is considered to be appropriate at this location with a low risk of collisions between pedestrians and cyclists. The provision of a segregated path along Perimeter Road North would lead to increased loss of trees to the north and would increase clashes with assets in the vicinity of Gatwick Police station. <p>Where usage numbers and conflict risks are higher (e.g. west of North Terminal Roundabout), segregated cycle track provision is proposed and FP346/2sy has been retained on a similar alignment to existing separate from the proposed segregated cycle track connection between Longbridge Roundabout and North Terminal Roundabout</p> <p>The existing Footpath 367 Sy which runs parallel to the southern side of Gatwick Spur and connects to Balcombe Road would be diverted locally to the south where the existing alignment clashes with the proposed Gatwick Spur Westbound Diverge and associated drainage infrastructure provision. The replacement path provision would include improved visibility to/from the crossing of Balcombe Road as a result of the increased set back of the Balcombe Road underbridge abutment, which currently limits visibility, from the edge of the carriageway.</p> <p>Updated position (April 2024): The active travel infrastructure provided as part of the surface access works delivers improved footpath, footway and cycle track (shared-use and segregated) provisions within the site context which are considered appropriate and sufficient to support the mode share targets as set out in the SAC [REP3-028]. The scheme also includes a number of replacement public open space provisions which will be of benefit to locals and active travel users. No further mitigations are considered to be required.</p>		
--	--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	--	--

			<p>The scheme does not preclude future changes in designation of Public Rights of Way by local highway authorities.</p> <p><u>Updated position (July 2024):</u></p> <p><u>The active travel proposals have been subject to additional discussion with the WSCC PRoW Officer during a meeting held on the 11th June. The Applicant's position outlined above remains unchanged. No further PRoW upgrades are considered to be required.</u></p>

~~2.22.2.21.~~ Waste and Materials

~~2.22.12.21.1~~ Table 2.21 sets out the position of both parties in relation to waste and materials matters.

Table 2.20 Statement of Common Ground – Waste and Materials Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
2.21.1.1	The CoCP and Construction Resources and Waste Management Plan (CRWMP) will be used to secure any prior extraction of safeguarded mineral resources.	<p>There is no reference to relevant mineral safeguarding policies within the CoCP or CRWMP. Reference is made to the Weald Clay formation and use of clays (CoCP para 5.5.12, and CRWMP Para 4.5.14). Without clarity on why Weald Clay is being identified, it is not clear how the requirement will ensure that needless sterilisation is avoided.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Updated position (Deadline 5): The CoCP [REP4-007, REP4-008] and associated CRWMP [REP4-009, REP4-010] have been updated and submitted at D4. WSCC welcome that reference has now been made to relevant mineral safeguarding policies, and that incidental extraction of safeguarded brick clay will be given due consideration.</p>	<p>GAL will review this request and respond to WSCC in due course.</p> <p>Updated position (April 2024): The CRWMP has been updated to include mineral safeguarding policies with regards to the Weald Clay formation. The updated CRWMP will be submitted to Examination at Deadline 4.</p>	n/a	Agreed
2.21.1.2	Baseline information on current waste operations.	<p>Information is lacking on the existing waste management operations at Gatwick Airport. Without this, it is not possible to determine whether the proposals are required (citing, scale, technology etc).</p> <p>Updated position (Deadline 1): No updates provided so no positional change. Provide clear baseline information about the current operations. This could be provided through an Outline Operational Waste Management Plan, as suggested in the West Sussex LIR (REP1-068 and REP1-069).</p> <p>Updated position (Deadline 5): WSCC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides baseline information about current operations.</p> <p>Comments on the Operational Waste Management Strategy were submitted at Deadline 4 [7.11 of REP4-042].</p>	<p>GAL will review this request for further information on operational waste management and provide further details of existing waste management practices at Gatwick Airport in due course.</p> <p>Updated position (April 2024): An Operational Waste Management Strategy (Doc. Ref 10.12) was submitted to Examination at Deadline 3. The Strategy sets out baseline waste data and information on how operational waste from the Airport is currently managed and is secured by DCO Requirement 25.</p>	n/a	Agreed
2.21.1.3	Waste forecasting/projections.	<p>There are no waste forecasts provided on operational waste arisings, setting out the amounts and types of waste that would be expected at various points through the Project.</p>	<p>GAL will review this request for further information on operational waste management and provide further details of the forecasts of the type and amount of waste expected to be generated during operation of the NRP.</p>	n/a	Not Agreed

		<p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Justification is required for the waste management methods and technologies that are proposed, including the consideration given to alternatives waste management methods. This could be provided through an Outline Operational Waste Management Plan, as suggested in the West Sussex LIR.</p> <p>Updated position (Deadline 5): WSSC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides waste forecast projections with and without the project, that are welcomed and allow for a better understanding of the needs for waste management.</p> <p>Updated position (12 August 2024): WSSC has submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042]. There remains an overarching concern around technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal, <u>however these are over and above the issue of waste forecasting/projections, for which information has been provided and the main area of concern overcome. The status therefore updated to Agreed.</u></p>	<p>Updated position (April 2024): The Operational Waste Management Strategy (Doc. Ref. 10.12) submitted to Examination at Deadline 3 includes forecasts of operational waste arisings for the future baseline and with the Project. The methods that will be used to manage operational waste will be in accordance with the waste hierarchy principle and will be set out in the Operational Waste Management Plan.</p>		
2.21.1.4	Limited information is provided on the proposed CARE facility.	<p>There is little information provided on proposed technologies and management methods, including whether they are consistent with the Waste Hierarchy. The assessment for the CARE facility have focused on the location only, and not the technologies that could be employed at the airport to manage waste.</p> <p>Updated position (Deadline 1): There is no clear reference to the Waste Hierarchy made – no commitment in the DCO on how operational waste is to be managed.</p> <p>Updated position (Deadline 5): WSSC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides information on the waste management proposals, including reference to the Waste Hierarchy, waste management targets, and also forms a DCO requirement, which is welcomed.</p> <p>WSSC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042]. There remains an overarching</p>	<p>The waste management methods will be implemented in line with the Waste Hierarchy and the Second Decade of Change. GAL will consider WSSC's request for further justification.</p> <p>Updated position (April 2024): The management methods that are currently employed for the Airport's operational waste are explained in the Operational Waste Management Strategy (Doc. Ref 10.12). The replacement CARE facility will provide a materials recovery facility (MRF) that will allow the sorting of operational waste into recyclable materials, and supporting infrastructure (e.g. hardstanding for bulk storage).</p> <p>The Operational Waste Management Strategy (Doc. Ref. 10.12) states that all waste management methods to manage operational waste from the Airport will be in accordance with the waste hierarchy and the principles of the Operational Waste Management Strategy. The Strategy also sets a target that a minimum of 50% of municipal waste from the Airport will be prepared for reuse and recycling, in accordance with the ANPS. An Operational Waste Management Plan will be submitted to the</p>	n/a	Not Agreed

		<p>concern around the technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal.</p> <p>Updated position (12 August 2024): WSSCC has an overarching concern around technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal.</p>	<p>relevant planning authority for approval. The Plan will identify the management methods that will be used to manage operational waste.</p>		
2.21.1.5	Limited information provided on the design of the CARE facility	<p>The DAS and design principles for the CARE facility are limited.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Updated position (Deadline 5): No updates provided so no positional change.</p> <p>Updated position (12 August 2024) Concerns regarding the approach to design (that are wider than just the CARE facility, but relevant to the CARE facility), are set out in Rows 2.14.3.2 and 2.14.4.1.</p>	<p>GAL will consider WSSCC's request for updates to the Design Principles.</p>	n/a	Not Agreed
2.21.1.6	No links to local waste planning policy in relation to the CARE facility in relation to design.	<p>The DAS sets out local government design guidance, that excludes key information on design of waste facilities, as presented in The West Sussex Waste Local Plan and associated SPD on High Quality Waste Developments.</p> <p>Updated position (Deadline 1): No references to WLP or SPD in any of the DCO documentation.</p> <p>No updates provided so no positional change.</p> <p>Updated position (Deadline 5): No updates provided so no positional change.</p> <p>Updated position (12 August 2024): No updates provided so no positional change.</p>	<p>The design of the CARE facility will be in line with the appropriate guidance set out in the West Sussex Waste Local Plan and the associated SPD on High Quality Waste Developments. GAL will consider WSSCC's request for updates to the Design Principles.</p>		Not Agreed
2.21.1.7	Construction waste management at the temporary construction compounds will give rise to noise and dust pollution.	<p>The Project Description states that the compounds will be determined post consent, and in accordance with the COCP. It is important that beyond gaining permits to manage emissions from crushing activities, proper consideration to mitigation measures is given.</p> <p>Updated position (Deadline 5):</p>	<p>Measures proposed to minimise the impacts from temporary compounds are set out in the Code of Construction Practice, with measures to manage waste and resources set out in the Outline Construction Resources and Waste Management Plan as secured by DCO Requirement.</p> <p>Measures for controlling dust during construction, including activities at the compounds, will be set out in the Dust</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (Doc Ref. 5.3)</p> <p>ES Appendix 5.3.2 Code of Construction Practice – Annex 5 -</p>	Not agreed

		<p>Without a response from GAL to the DMP review (and any updated DMP committed to by GAL for Deadline 5 [REP4-033]) further progress cannot be made on the issue of dust.</p> <p>Further concerns remain on the impacts of noise from the compounds as set out in the noise section of the SoCG.</p> <p>Updated position (12 August 2024): See row 2.2.4.2 regarding concerns on the DMP.</p>	<p>Management Plan (as secured through the Code of Construction Practice). Best Practicable Measures will implemented to control noise.</p>	<p>Outline Construction Resources and Waste Management Plan [APP-087]</p>	
2.21.1.8	Operational Waste	<p>One of the key elements of the Project is the construction of a CARE waste facility that will replace the existing waste facility. The submission documents for the proposed CARE site (Works No.9) lack detailed information. The Project Description (APP-030) sets out broad information of what is proposed (encompassing a building up to 22m in height, and a single stack of up to 48m, biomass boilers, and a Materials Recovery Facility). This could be considered EIA development in its own right and understanding the need for, and impact of, this element of the Project is imperative. WSCC has a number of concerns related to the proposals for the management of operational waste, that are described in paragraphs 5.2.50–5.2.53 of the Project Description.</p> <p>Updated position (Deadline 1): Until the ExA accept the proposed changes, the LPAs have been informed by GAL to comment on the DCO and documentation as submitted.</p> <p>The issue therefore remains.</p> <p>Updated position (Deadline 5): The change request was accepted by the ExA in its Rule 8 letter. Although the change has been accepted, there still remains an overarching concern around the technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal.</p> <p>Updated position (12 August 2024): <u>Overarching issue of concern is set out in other rows of this SoCG. The change has been accepted and therefore row amended to “no longer pursuing”</u></p>	<p>GAL has notified the Examining Authority of a proposed change that would see the removal of the stack from the CARE facility. The details of this proposed change were shared with the local authorities in November 2023.</p> <p>Updated position (Deadline 1): The Change Request has been accepted by the ExA in its Rule 8 Letter.</p>	n/a	Not Agreed <u>longer pursuing.</u>
2.21.1.9	Current Operations	<p>The waste streams and tonnages per annum of waste managed at Gatwick Airport, including how much is managed off-site for further recycling, treatment or landfill.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p>	<p>GAL will consider this request for further information on existing waste management practices and respond to WSCC in due course.</p> <p>Updated position (April 2024): An Operational Waste Management Strategy (Doc. Ref 10.12) was submitted to</p>	n/a	Agreed

		<p>Updated position (Deadline 5): WSSC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides a waste baseline and waste forecast projections with and without the project, that are welcomed. These allow for a better understanding of the needs for waste management.</p> <p>WSSC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042].</p>	<p>Examination at Deadline 3. The Strategy sets out baseline waste data and information on how operational waste from the Airport is currently managed.</p>		
2.21.1.10	Current Operations	<p>The amount of heat energy captured by the existing biomass boilers and what that is as a percentage of airport demand.</p> <p>Updated position (Deadline 1): Until the ExA accept the proposed changes, the LPAs have been informed by GAL to comment on the DCO and documentation as submitted.</p> <p>The issue therefore remains.</p> <p>Updated position (Deadline 5): WSSC note that the Change Request was accepted by the ExA in its Rule 8 latter. There still remains an overarching concern around the technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal, as set out in 7.11 of REP4-042.</p> <p>Updated position (12 August 2024) <u>Overarching issue of concern is set out in other rows of this SoCG. The change has been accepted and therefore row amended to “no longer pursuing”.</u></p>	<p>GAL has notified the Examining Authority of a proposed change that would see the removal of the stack from the CARE facility. The details of this proposed change were shared with the local authorities in November 2023.</p> <p>Updated position (Deadline 1): The Change Request has been accepted by the ExA in its Rule 8 Letter.</p>	n/a	Not No longer pursuing. Agreed
2.21.1.11	Current Operations	<p>The hours of operation of the existing facility.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Updated position (Deadline 5): Confirmation of the existing care facility operational hours is noted.</p> <p>WSSC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042].</p>	<p>GAL will consider this request for further information on the operation of the existing facility and respond to WSSC in due course.</p> <p>Updated position (April 2024): The existing CARE facility is permitted to operate 24 hours a day. This is clarified in the Operational Waste Management Strategy (Doc. Ref. 10.12) submitted to Examination at Deadline 3.</p>	n/a	Agreed

2.21.1.12	Current Operations	<p>The technologies in place at the existing facility in terms of waste treatment methods.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Updated position (Deadline 5): WSCC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides information on the existing facility in terms of waste treatment methods.</p> <p>WSCC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042].</p>	<p>GAL will consider this request for further information on existing waste treatment methods at respond to WSCC in due course.</p> <p>Updated position (April 2024): An Operational Waste Management Strategy (Doc. Ref 10.12) was submitted to Examination at Deadline 3. The Strategy provides information on how operational waste from the Airport is currently managed.</p>	n/a	Agreed
2.21.1.13	Current Operations	<p>The mitigation measures in place to control noise, dust, odour, and vermin.</p> <p>Updated position (Deadline 1): The issue is about current controls at the existing facility.</p> <p>No updates provided, no positional change.</p> <p>Updated position (Deadline 5): WSCC note that the operation of the CARE facility is in accordance with prescribed processes under the environmental permit. Details of these measures would provide a beneficial starting point for consideration of managing the impacts of the new CARE facility.</p> <p>Updated position (12 August 2024): <u>Information about existing controls were not shared. It is accepted by WSCC that it expects the environmental permitting regime to operate as intended. Albeit this information could help in understanding mitigation measures from the new CARE facility, it is expected that these matters are addressed at design stage.</u></p>	<p>Measures proposed to minimise the impacts from construction activities are set out in the Code of Construction Practice, with measures to manage waste and resources set out in the Outline Construction Resources and Waste Management Plan.</p> <p>Updated position (April 2024): The operation of the CARE facility is in accordance with prescribed processes under the environmental permit that include measures to control dust, odour, vermin and noise.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Appendix 5.3.2 Code of Construction Practice – Annex 5 - Outline Construction Resources and Waste Management Plan [APP-087]</p>	<p>Not Agreed No longer pursuing.</p>
2.21.1.14	Current Operations	<p>Without a clear understanding of the current operations at Gatwick Airport, it is not possible to determine whether the proposals are required (citing, scale, technology etc). Projections or forecasts of the waste amounts/types expected with and without the Project should be provided.</p> <p>Updated position (Deadline 1): No updates provided so no positional change.</p> <p>Updated position (Deadline 5):</p>	<p>GAL will review this request for further information on operational waste management and provide further details of the forecasts of the type and amount of waste expected to be generated during operation of the NRP.</p> <p>The Operational Waste Management Strategy (Doc. Ref. 10.12) submitted to Examination at Deadline 3 includes forecasts of operational waste arisings for the future baseline and with the Project. The methods that will be used to manage operational</p>	-n/a	Not Agreed

		<p>WSSC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides information on the current waste operations, and the waste management proposals which is welcomed.</p> <p>WSSC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042]. There remains an overarching concern around the technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal.</p>	<p>waste will be in accordance with the waste hierarchy principle and will be set out in the Operational Waste Management Plan.</p>		
2.21.1.15	Proposed CARE Facility	<p>The Project Description (APP-053) and Planning Statement (APP-245) provide limited detail of the proposed CARE facility. It is not clear what consideration has been given to the proposed technologies and management methods, including whether they are consistent with the Waste Hierarchy.</p> <p>Updated position (Deadline 1): There is no clear reference to the Waste Hierarchy made—no commitment in the DCO on how operational waste is to be manage.</p> <p>No updates provided so no positional change.</p> <p>Updated position (Deadline 5): WSSC note that an Operational Waste Management Strategy [REP3-070] has been submitted to the examination at Deadline 3. This provides information on the waste management proposals, including reference to the Waste Hierarchy, waste management targets, and also forms a DCO requirement, which is welcomed.</p> <p>WSSC submitted comments on the Operational Waste Management Strategy at Deadline 4 [7.11 of REP4-042]. There remains an overarching concern around the technologies that are being proposed for use, and the application of the Waste Hierarchy and the proximity principal.</p>	<p>The waste management methods will be implemented in line with the Waste Hierarchy. GAL will consider WSSC's request for further justification.</p> <p>The Operational Waste Management Strategy (Doc. Ref. 10.12) states that all waste management methods to manage operational waste from the Airport will be in accordance with the waste hierarchy and the principles of the Operational Waste Management Strategy. The Strategy also sets a target that a minimum of 50% of municipal waste from the Airport will be prepared for reuse and recycling, in accordance with the ANPS. An Operational Waste Management Plan will be submitted to the relevant planning authority for approval. The Plan will identify the management methods that will be used to manage operational waste.</p>	n/a	Not Agreed
2.21.1.16	Proposed CARE Facility	<p>It is not clear how the proposed biomass boiler flue height has been determined, and whether the Environment Agency, as the permitting body, has been specifically consulted on this matter.</p> <p>Updated position (Deadline 1): Until the ExA accept the proposed changes, the LPAs have been informed by GAL to comment on the DCO and documentation as submitted.</p> <p>The issue therefore remains.</p>	<p>GAL has notified the Examining Authority of a proposed change that would see the removal of the stack from the CARE facility. The details of this proposed change were shared with the local authorities in November 2023.</p> <p>Updated position (Deadline 1): The Change Request has been accepted by the ExA in its Rule 8 Letter.</p>	n/a	No longer pursuing.

		<p>Updated position (Deadline 5): Given the change request has been accepted, this is no longer relevant.</p>	<p>Updated position (April 2024): The Applicant would welcome an updated position or response from WSCC against this SoCG item, or confirmation if this item can be marked as 'agreed' or 'no longer pursuing'.</p>		
2.21.1.17	Detailed Design	<p>The detailed design of the CARE facility will be controlled by Requirement 4 of the dDCO (APP-006), which provides that the proposed development must be in accordance with the design principles of the DAS (APP-253 – 257).</p> <p>Updated position (Deadline 1): Although the Design and Access Statement (DAS) (APP-253-257) is a separate DCO control document, the design principles upon which the detailed design would be secured against, have had no input from stakeholders. They are currently not detailed enough and contain ambiguous wording, which does not ensure that a high-quality development can be secured.</p> <p>Updated position (Deadline 5): No positional change.</p> <p><u>Update position (12 August 2024):</u> <u>Concerns regarding the approach to design (that are wider than just the CARE facility, but relevant to the CARE facility), are set out in Rows 2.14.3.2 and 2.14.4.1.</u></p>	<p>Noted.</p> <p>Updated position (April 2024): The Design Principles [REP3-056] have been updated at Deadline 3 in response to LA feedback and ExQ1 DCO.1.57. The Applicant welcomes WSCC's comments on the updated design principles.</p> <p>Updated position (July 2024): The Applicant has reviewed the comments made on the design principles and the topic of Good Design by the Joint Local Authorities and other Interested Parties and has provided a response at Deadline 7 which sets out how these have been taken into account by GAL – Appendix A: Response on Design Matters [REP7-096]. The Applicant has also updated the Design Principles and the DAS at Deadline 7 in response.</p>	n/a	Under discussion
2.21.1.18	Construction Waste	<p>Construction and demolition activities related to the Project will give rise to large volumes of waste (1.5 million m3 excavation waste, and 620,000m2 of concrete and asphalt), which will require management on-site, at the proposed construction compounds, and off-site. A large proportion of the waste is expected to be inert construction and demolition waste, which is often managed through crushing, screening, and sorting activities that give rise to noise and dust pollution.</p> <p>Updated position (Deadline 1): Noted.</p> <p>Updated position (Deadline 5): Concerns around the impacts from construction and demolition activities are covered within other sections of the SoCG, including noise and air quality.</p> <p>Therefore, this issue is considered to be under discussion and comments will continue to be made in other submissions or other parts of the SoCG as required.</p>	<p>Measures proposed to minimise the impacts from construction activities are set out in the Code of Construction Practice, with measures to manage waste and resources set out in the Outline Construction Resources and Waste Management Plan.</p> <p>Measures for controlling dust during construction, including activities at the compounds, will be set out in the Dust Management Plan (as secured through the Code of Construction Practice). Best Practicable Measures will implemented to control noise.</p> <p>Updated position (Deadline 1): WSCC to confirm if 'noted' means this matter is agreed.</p> <p>Updated position (April 2024): Please can WSCC confirm if this item can be marked as 'agreed' or 'no longer pursuing' as per the request at Deadline 1.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p> <p>ES Appendix 5.3.2 Code of Construction Practice – Annex 5 – Outline Construction Resources and Waste Management Plan [APP-087]</p>	Under discussion.

<p>2.21.1.19</p>	<p>Temporary Construction Compounds managing waste</p>	<p>The Airfield Satellite Contractor Compound, Car Park Z Compound, and Car Park Y Compound are proposed to include crushing activities, which will give rise to noise and dust, the details of which will be determined post consent.</p> <p>Updated position (Deadline 1): It is understood that a final DMP cannot yet be provided, but an outline or draft DMP can be prepared. This is still requested by WSCC.</p> <p>Updated position (Deadline 5): Concerns around the impacts from temporary construction compounds managing waste are covered within other sections of the SoCG, including noise and air quality.</p> <p>Therefore, this issue is considered to be under discussion and comments will continue to be made in other submissions or other parts of the SoCG as required.</p>	<p>Measures for controlling dust during construction, including activities at the compounds, will be set out in the Dust Management Plan (as secured through the Code of Construction Practice). Best Practicable Measures will be implemented to control noise.</p> <p>Updated Position (April 2024): The Draft Construction Dust Management Plan (CDMP) has been shared with local authorities for comment on 26th March, considering the items set out by local authorities in the SoCG and Local Impact Reports. The Applicant looks forward to receiving the LAs comments in due course.</p>	<p>ES Appendix 5.3.2: Code of Construction Practice (REP1-021)</p>	<p>Under discussion</p>
-------------------------	--------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------	-------------------------

2.23.2.22. Water Environment

2.23.12.22.1 Table 2.22 sets out the position of both parties in relation to water environment matters.

Table 2.21 Statement of Common Ground – Water Environment Matters

Reference	Matter	Stakeholder Position (as per frozen issue trackers)	Gatwick Airport Limited Position	Signposting	Status
Baseline					
2.22.1.1	Confidence in surface water drainage hydraulic model	<p>It is not clear whether the surface water drainage hydraulic model has used the most up-to-date FEH2022 rainfall data.</p> <p>Updated position (Deadline 1): FEH2009 and FSR underestimate the storage volumes required for surface water drainage features, which can impact discharge rates and result in increased flood risk to the development site and elsewhere. FEH2022 should be used as the most up-to-date rainfall data prior to detailed design, to ensure that there is enough space in the layout to incorporate the required storage.</p> <p>Updated position (Deadline 5): FEH2022 data should be considered at this stage of the design, in comparison to the FSR data, to demonstrate that the over provision of attenuation storage will be sufficient to prevent flooding to the site or elsewhere.</p> <p>Updated position (12 August 2024 Deadline 8): In the Applicant's Response to Deadline 4 Submissions [REP5-072], the applicant has provided sufficient justification for not using FEH22 at this stage of the design.</p>	<p>To remain consistent with the Upper Mole Flood Alleviation Model and 2019 Surface Water Model validation, the Applicant has continued to use FEH2009, and consider this is appropriate for the modelling until such time as the Environment Agency Upper Mole model is revalidated or updated.</p> <p>The preliminary design of the drainage elements of the surface access highways works applied FSR rainfall data to undertake preliminary hydraulic calculations.</p> <p>This strategy was presented to LLFA drainage specialists on 7th September 2022 and 17th November 2022, and through subsequent technical engagement and design reviews. No objection was raised for using FSR rainfall data.</p> <p>FEH2022 data will inform the development of the detailed drainage design.</p> <p>No material change to the overall drainage strategy is envisaged through the adoption of FEH2022.</p> <p>Updated Position (April 2024): The FSR data has been used for the preliminary design of attenuation storage, however the storage includes an element of over provision as a risk mitigation, e.g. risk that FEH2022 data will require a higher volume of storage. The magnitude of storage required is not anticipated to increase significantly and there is considered to be sufficient space within the DCO boundary to increase the size of attenuation storage at the detailed design stage, if required</p> <p>Updated Position (July 2024): Table 43 in The Applicant's Response to Deadline 4 submissions [REP5-072] clarifies that the hydrology adopted for the assessment of the impact and design of the surface water drainage mitigations is considered to be conservative, effectively over-sizing the volume of storage required, which would be refined during the detailed design phase after the DCO has been granted. The detailed design</p>	<p>ES Appendix 11.9.6 Flood Risk Assessment Annex 3 [APP-149]</p> <p>ES Appendix 11.9.6: Flood Risk Assessment Version 2 [AS-078]</p>	<p>Under discussion Agreed</p>

			would adopt the appropriate hydrology at that point and which has been specified in the Design Principle DDP1 of DAS Appendix 1 [REP7-063].		
Assessment Methodology					
2.22.2.1	Consideration of drainage hierarchy	<p>The drainage hierarchy must be followed with infiltration to ground considered before other drainage options. If infiltration is considered to be feasible as part of the detailed design, the drainage strategy will require many changes.</p> <p>Updated position (Deadline 1): Potential contamination from de-icer would preclude the use of infiltration to discharge surface water.</p>	<p>The surface water drainage design for the Project has followed the drainage hierarchy. As stated in Section 6.4.5 of the FRA the clay geology at Gatwick has been assumed to preclude the infiltration of runoff to ground. Additionally, the runoff from the airfield could potentially be contaminated with de-icer and could not be directly infiltrated to ground.</p> <p>Further ground investigation will be undertaken to inform the detailed design but it is not anticipated to alter the current assumption that infiltration of runoff is not practicable.</p>	ES Appendix 11.9.6 Flood Risk Assessment [APP-147]	Agreed
2.22.2.2	Assessment Methodology	<p>The West Sussex LLFA Policy for the Management of Surface Water and the West Sussex Culvert Policy are not mentioned in the Flood Risk Assessment (FRA) (APP-147). These must be considered.</p> <p>Updated position (Deadline 1): These are included in the FRA References.</p>	<p>Relevant local planning policies applicable to flood risk from the West Sussex LLFA Policy for the Management of Surface Water and the West Sussex Culvert Policy are summarised in Table 0.1 (at the end of this document).</p>	ES Appendix 11.9.6 Flood Risk Assessment [APP-147]	Agreed
2.22.2.3	Assessment Methodology	<p>The surface water drainage hydraulic model includes an allowance for climate change within the pre-development baseline; this is incorrect. Climate change allowances should only be included in the post development scenario to determine the required storage volume and post-development discharge rate.</p> <p>Updated position (Deadline 1): A climate change allowance of 40% should be used for all calculations, in accordance with a 100-year lifetime for the development (both the surface access works and the airfield works). The increase in impermeable area should be provided for each catchment, as well as for the entire development. This is of particular concern as the proposed development may result in pumping of additional water from the River Mole catchment to the Gatwick Stream catchment, as per the Contaminated Water Pathway (Water Environment Figures, Figure 11.8.1). Where the impermeable area increases for the River Mole catchment, this may result in a higher volume of contaminated water to be pumped to Gatwick Stream catchment for treatment. This should be considered further and evidence should be provided to demonstrate that the Gatwick Stream catchment has sufficient capacity for the additional volume of water without increasing flood risk to the development site or elsewhere.</p> <p>Updated position (Deadline 5):</p>	<p>Attenuation storages required have been sized to limit runoff from the additional net paved area to greenfield runoff rates during the median annual flood (the 1 in 2 year (50% AEP) event) for events up to and including the 100 year event plus climate change (1% AEP+CC) condition. Greenfield runoff rates are estimated, from existing gauged data on the River Mole at Horley and the Gatwick Stream at the Gatwick Link, to be approximately 2.9l/s/ha. Climate change impacts are assumed to increase runoff volumes from surface water drainage systems by 20% in accordance with current climate change guidance for increases in rainfall intensity (central allowance for 2050 and 2070). Using these criteria, the attenuation storage required is estimated to be approximately 850m³ for each net additional hectare of paved area (850m³/ha).</p> <p>The total increase in impermeable area for the development is 21.86ha, requiring a total attenuation volume of 18,541m³. The development provides 41,355m³ of attenuation storage in total, a betterment of 2.2 times.</p> <p>To demonstrate the future impact on flooding from the whole site, not just the small percentage increase in impermeable area, we have used the climate change scenarios to demonstrate the</p>	<p>ES Appendix 11.9.6 Flood Risk Assessment [APP-147]</p> <p>Updated Position (April 2024): ES Appendix 11.9.6: Flood Risk Assessment Version 2 [AS-078]</p> <p>Updated Position (July 2024): ES Appendix 11.9.3: Water Quality HEWRAT Assessment Report [REP5-025].</p>	Under discussion Agreed

		<p>This issue is related to the increase in impermeable area for each catchment, the issue of climate change allowances has been discussed in 2.22.4.4.</p> <p>WSSC maintain that there has not been enough information provided in the annex of the Flood Risk Assessment [APP-147] to determine the additional impermeable area for each catchment, the volume of runoff for each catchment and the discharge locations for each catchment. This information should be provided.</p> <p>Updated position (12 August 2024): This information is now included in Deadline 6 Submission - 5.3 Environmental Statement Appendix 11.9.6 Flood Risk Assessment Version 3 (Clean) [REP6-052].</p>	<p>betterment in flood risk (to the airport) and in volume and peak rate of flow to the environment, to demonstrate the betterment to downstream communities.</p> <p>Updated Position (April 2024): It is considered that a longer design life for the airfield works would not be realistic given it is likely there will be further significant changes to the airport and its operations in that timescale. Assessment of climate change allowances over a longer design life is therefore considered disproportionate as the aviation industry has changed considerably during the past 40 years and this rate of change is anticipated to continue. As the adopted lifetime for the airfield works of 40 years (up to 2069) the airfield surface water drainage design has adopted the Central allowance of + 25% for the 2070s epoch (2061 to 2125) the 1 per cent (1 in 100) AEP event for rainfall intensity in accordance with the EA guidance, as stated in Para 3.7.15 in ES Appendix 11.9.6: Flood Risk Assessment [AS-078]. A 40% climate change allowance has also been tested as a sensitivity test for the airfield surface water drainage (equivalent to a 100-year design life), in order to test the impact of a larger potential change as a result of climate change. Para 7.3.2 in ES Appendix 11.9.6: Flood Risk Assessment [AS-078] indicates that, taking into account the Project mitigation measures, the Project would not adversely impact surface water flood risk or increase surface water flooding elsewhere under a more extreme climate change scenario.</p> <p>Updated Position (July 2024): The proposed impermeable area, volume of runoff and discharge locations for each catchment is provided within Table A1.2 in ES Appendix 11.9.3 Water Quality HEWRAT Assessment Report [REP5-025].</p>		
<p>Assessment</p>					
<p>There are no issues relevant to the assessment for this in this Statement of Common Ground.</p>					
<p>Mitigation and Compensation</p>					
<p>2.22.4.1</p>	<p>New pumping station proposed in the southwest zone, south of the existing runway in the former Pond A catchment.</p>	<p>The pumping station is proposed, however pumping stations are not preferred as they require failure and emergency procedures.</p> <p>Updated position (Deadline 1): The long-term use of a pumping station would not be carbon or cost effective. If a pump is to be used, consideration of pump failure and emergency procedures should be provided as part of the Flood Risk Assessment and Drainage Strategy. Alternatively, features such as reed beds should be considered to provide</p>	<p>The area being drained to this pump can be contaminated with de-icer during cold winter periods. It is not possible to drain this section to the pollution control system and proposed de-icer treatment system as elevation decreases from North to South. Removal of the pump would require an additional very small treatment system discharging to the River Mole south of the runway, serving a very small area. This would not be carbon or cost efficient.</p>	<p>ES Appendix 11.9.6 Flood Risk Assessment [APP-147]</p>	<p>Under discussion Agreed</p>

		<p>water treatment for the contaminated water earlier in the treatment process, to remove the need for a pumping station.</p> <p>Updated position (Deadline 5): Pump failure and emergency procedures should be provided at this stage to ensure that the residual risk of flooding is appropriately managed in accordance with NPPF and PPG. It must be demonstrated that a failure of 24 hours does not increase flood risk within the DCO Order Limits or elsewhere. The water must not leave the DCO Order Limits uncontrolled and unrestricted during the design storm and the site within the DCO Order Limits must still be safe and suitably mitigated.</p> <p>Updated position (12 August 2024): <u>In The Applicant's Response to Deadline 4 Submissions [REP5-072], the applicant has provided sufficient pump failure and emergency procedures. WSCC recommends that the pumping station has its own operation and maintenance manual that will set out emergency response procedures. This should be provided at detailed design stage.</u></p>	<p>Updated Position (April 2024): No update to position.</p> <p>Updated Position (July 2024): <u>In Table 43 of The Applicant's Response to Deadline 4 Submissions [REP5-072], the Applicant has noted the following:</u></p> <p><u>The consequences of asset failure including emergency response would be considered as part of the development of the detailed design for the pumping station following the DCO.</u></p> <p><u>The pumping station will have its own operation and maintenance manual that would set out emergency response procedures and/or direct the response to existing documents such as those referred to in the Flood Resilience Statement. This would include consideration of prolonged outage, although given the pumping station would contribute to the drainage of the western end of the runways it is considered unlikely it would be inoperable for 24 hours. GAL already operates a number of pumping stations and is very familiar with their maintenance and emergency response should they fail.</u></p> <p><u>GAL's pumping stations are continually monitored (24/7) through its SCADA system by its Engineering Operations Managers. There is also the engineering team located on site to respond to faults. Response time for this location would be within the hour subject to prevailing priorities. The pumping station has been designed for a 1% (1 in 100) AEP event plus the appropriate allowance for climate change of +25%. The pumping station (along with the surface water drainage system as a whole) has been tested with a 1% (1 in 100) +40% storm event as a sensitivity test beyond its design standard to determine the consequences of more extreme impacts due to climate change. The flood mapping that would result is reported in FRA Figures 5.3.3 and 5.3.4 [REP6-052]. These indicate that surface water flow paths would not leave the airport.</u></p>		
2.22.4.2	Drainage layout.	<p>The drainage strategy proposes to use underground attenuation features. Other source control SuDS features should be used to discharge water to the underground features.</p> <p>Updated position (Deadline 1): Alternative SuDS features should be considered prior to detailed design, to ensure that there is enough space in the layout to incorporate the required storage. As above, reed beds should be considered to provide water treatment for the contaminated water earlier in the treatment process, to remove the need for a pumping station.</p>	<p>With respect to the airside drainage, all of the additional attenuation features are required to be below ground for bird strike safety, de-lethalisation and land availability reasons. Additionally, the runoff can be contaminated with de-icer, therefore filtration to ground is not acceptable, as agreed through liaison with the Environment Agency.</p> <p>SuDS features have been proposed as a part of the highways drainage design - Drainage Plans have been provided in ES Appendix 11.9.6 - Annex 2 - Figure 10.1.6 to 10.1.11. Requirements 10 and 11 of the draft DCO state that approval will be</p>	<p>Figure 10.1.6 to 10.1.11 of ES Appendix 11.9.6 Flood Risk Assessment - Annex 2 [APP-148]</p> <p>Draft DCO (REP3-006)</p>	Agreed

		<p>Updated position (Deadline 5): WSCC consider that source control SuDS features have been considered where feasible at this stage of the design and would welcome further enhancements to be considered at detailed design.</p>	<p>required from the lead local flood authority and highways authority respectively to the drainage detailed designs before construction may commence. In addition these requirements state that the designs must be in accordance with the design principles in Appendix A1 of the Design and Access Statement.</p> <p>Further consideration to SuDS will be given at detailed design stage after DCO is granted e.g. grassed surface water channels at edge of the carriageway.</p> <p>Updated Position (April 2024): Open drainage attenuation have been proposed where practical, such as basins, ponds and swales. Due to the surrounding site constraints, oversized pipes have been proposed for some drainage systems. This approach is documented in the technical design report and has been discussed in technical engagement with LLFAs, the technical design report has be reviewed and comments received/addressed (see response for comment 2.22.4.1). The design was developed in consultation with LLFAs. Further enhancement opportunities can be considered at the detailed design stage after the DCO is granted (e.g. carriageway edge grassed surface water channels) in collaboration with the landscape and Gatwick's safeguarding team (e.g. vegetative plantation around the swales and basin/ponds and other form of measures given in DMRB and CIRIA SuDS manual). Drainage details must be approved pursuant to DCO Requirements 10 and 11.</p>		
2.22.4.3	Mitigation, Compensation and Enhancement	<p>The FRA details that surface water drainage runoff from new areas of highway would be restricted to pre-development rates and where possible, greenfield runoff rates. The Applicant has only provided the pre-development and post-development runoff rates for each catchment. The greenfield runoff rates and volumes should also be provided up to the 1% annual exceedance probability (AEP) event plus climate change to demonstrate for which catchments, the post-development runoff rates and volumes will be reduced to greenfield. Where it is not possible to reduce runoff rates and volumes to greenfield, further evidence should be provided.</p> <p>Updated position (Deadline 1): Greenfield runoff rates should be provided for all catchments for QBAR. Post-development runoff rates should be limited to QBAR greenfield rates where possible, rather than the 1% AEP greenfield runoff rate as detailed in Appendix 11.9.6 Flood Risk Assessment - Annex 2. Further justification should be provided as to why limiting to greenfield rates is not possible.</p>	<p>The design of attenuation ponds / basins has been carried out for 1% AEP with 40% climate change greenfield runoff rates where achievable. This includes Catchment 2 (Q1 greenfield runoff rate - 11.9 l/s) and Catchment 5 (Q1 greenfield runoff rate – 9.5 l/s) within WSCC boundary. Attenuation volumes for these catchments can be found on the Drainage Plans which have been provided in ES Appendix 11.9.6 - Annex 2 - Figure 10.1.6 to 10.1.11.</p> <p>Justification has also been presented where the greenfield runoff rates have not been achieved through technical engagement with LLFA drainage specialist on 7 September 2022 and 17 November 2022, and through subsequent technical engagement and design reviews.</p> <p>Updated Position (April 2024): Post-development runoff rates are proposed to be limited to the 1-year greenfield runoff rates for storm event up to 100-year + climate change where possible. This is based on WSCC preferred option</p>	Figure 10.1.6 to 10.1.1 of ES Appendix 11.9.6 Flood Risk Assessment - Annex 2 [APP-148]	Under discussion Agreed

		<p>Updated position (Deadline 5): Appendix 11.9.6 Flood Risk Assessment - Annex 2 states that post-development runoff rates will be limited to the 1% AEP greenfield rate where possible, rather than QBAR greenfield runoff rates. WSCC seek clarification of the QBAR greenfield runoff rates for each catchment and the proposed post-development runoff rates for each catchment.</p> <p>Updated position (12 August 2024): <u>The Applicant has provided the greenfield runoff rates to demonstrate for which catchments the post-development runoff rates and volumes will be reduced to greenfield in The Applicant's Response to Deadline 6 Submissions [REP7-095].</u></p>	<p>for brownfield redevelopment sites (refer to "West Sussex LLFA Policy for the Management of Surface Water" clause 5.4.4). This approach addresses the long-term storage requirement. Where this was not possible, justification have been provided during technical engagement with LLFA and technical report issued for comments (see response for comment 2.22.4.1).</p> <p>Updated Position (July 2024): <u>The paragraph A2.21 in Annex 2 of Appendix 11.9.6 [REP7-054] has been amended at Deadline 7 for clarity to state 'the runoff rates from development are proposed to be limited to the 1 in 1-year (Q1) greenfield rate (i.e. 100% AEP greenfield runoff rate) for storm events of up to 1 in 100 (1% AEP) plus 40% CC as per WSCC guidance (WSCC LLFA policy for the management of Surface Water' clause 5.4.4) for the catchments within the WSCC boundary where practicable. It is noted that the Q1 (100% AEP) greenfield runoff rate (4.52 l/s/ha) is lower than the Qbar.2.3 (43.5% AEP) greenfield runoff rates (5.32 l/s/ha).</u></p> <p><u>Where this was not practicable, justification has been provided during technical engagement with the LLFAs.</u></p>		
2.22.4.4	Mitigation, Compensation and Enhancement	<p>The surface water drainage hydraulic model has been designed for the 1% AEP event plus a 25% allowance for climate change, with a 40% allowance for exceedance. According to the Environment Agency guidance (Flood risk assessment: climate change allowances (2022), the drainage system should be designed for the 1% AEP event plus a 40% allowance for climate change if the lifetime of the development is 2100 or beyond. The Applicant should therefore design to the 1% AEP event plus a 40% allowance for climate change or provide justification for the lifetime of the development.</p> <p>Updated position (Deadline 1): A climate change allowance of 40% should be used for all calculations, in accordance with a 100-year lifetime for the development (both the surface access works and the airfield works).</p> <p>Updated position (Deadline 5): There is existing airport infrastructure, which is either 40 years or older and still in use, which demonstrates that the proposed airfield works may also be in place for longer than 40 years. As such, WSCC considers that a lifetime of at least 75 years should be used and an increased climate change allowance of 40%. During ISH 7, the Applicant acknowledged that some individual elements within the airfield works may have a lifetime longer than 40 years, therefore WSCC consider that a more extensive lifetime is used in the assessment. Additionally, the fluvial mitigation strategy has been designed for both the airfield works and surface access</p>	<p>The incorporation of the predicted impact of climate change is addressed in Section 3.7 of the FRA. The adopted lifetime of the surface access works is 100 years (up to 2132), The highways drainage design has been based on the Upper End allowance: a 1 per cent (1 in 100) AEP event, +40% climate change allowance for rainfall intensity, as per Flood risk assessments: climate change allowances guidance (Environment Agency, 2022a) as stated in Para 3.7.14 in the FRA.</p> <p>The adopted lifetime for the airfield works of 40 years (up to 2069), therefore the airfield surface water drainage design has adopted the Central allowance of + 25% for the 2070s epoch (2061 to 2125) the 1 per cent (1 in 100) AEP event for rainfall intensity in accordance with the same EA guidance, as stated in Para 3.7.15 in the FRA.</p> <p>Section 3.7.6 of the FRA explains why a variable design lifetime has been adopted by the Project.</p> <p>Updated Position (April 2024): It is considered that a longer design life for the airfield works would not be realistic given it is likely there will be further significant changes to the airport and its operations in that timescale. Assessment of climate change allowances over a longer design life is therefore considered disproportionate as the aviation industry has changed considerably during the past 40 years and this rate of</p>	<p>ES Appendix 11.9.6: Flood Risk Assessment [APP-147]</p> <p>Updated Position (April 2024): ES Appendix 11.9.6: Flood Risk Assessment Version 2 [AS-078]</p>	<p>Under discussion Not Agreed</p>

		<p>works, with a lifetime of 100 years. Therefore, WSCC consider that a similar approach should be used for surface water mitigation.</p> <p>Although the Applicant has provided a sensitivity test, including using an allowance of 40%, this does not address our concerns because the exact locations of flooding cannot be verified as the finished ground levels are due to be resolved at detailed design, as per the Flood Risk Assessment paragraph 7.3.14 [APP-147]. Until the ground levels are provided, WSCC cannot be satisfied that flood risk will not increase elsewhere and that using a climate change allowance of 25% will not underestimate flood risk.</p> <p><u>Updated position (12 August 2024):</u> As per WSCC's previous comments at Deadline 5.</p>	<p>change is anticipated to continue. As the adopted lifetime for the airfield works of 40 years (up to 2069) the airfield surface water drainage design has adopted the Central allowance of + 25% for the 2070s epoch (2061 to 2125) the 1 per cent (1 in 100) AEP event for rainfall intensity in accordance with the EA guidance, as stated in Para 3.7.15 in ES Appendix 11.9.6: Flood Risk Assessment [AS-078]. A 40% climate change allowance has also been tested as a sensitivity test for the airfield surface water drainage (equivalent to a 100-year design life), in order to test the impact of a larger potential change as a result of climate change. Para 7.3.2 in ES Appendix 11.9.6: Flood Risk Assessment [AS-078] indicates that, taking into account the Project mitigation measures, the Project would not adversely impact surface water flood risk or increase surface water flooding elsewhere under a more extreme climate change scenario.</p> <p><u>Updated Position (July 2024):</u> The Applicant submitted an updated FRA at Deadline 6 [REP6-052], the executive summary of which clarifies Gatwick's position on adopted design life and consideration of climate change for the airfield and surface access elements.</p>
