**Attachments:** arrivals at Gatwick Airport.pdf

Dear Sir/ Madam,

Once again, I am asking you as a resident of Tunbridge Wells to consider the impact of aircraft noise during the night on the residents of this densely populated area. I find myself woken up almost every night by low flying aircraft and have tried sleeping in different rooms, still to be disturbed every few minutes. I support the 0.5 decibel reduction every year in the noise envelope and I cannot foresee that a further extension of the airport will decrease the noise disturbance.

I attach the flight paths of aircraft when Gatwick Airport is operating in a westerly direction.

Please consider the physical and mental health of residents living in this area of Kent, some of whom now refer to the conditions as "the motorway in the sky".

Sincerely

Victoria Moll
