Further to your letter of 3rd January sent to all interested parties, as a local resident, I have no doubt that going ahead with this application will:

have an adverse effect on the natural environment due to additional and noise pollution
have an adverse effect on local communities for the same reason
increase the carbon footprint of the airport, contradicting the government's commitment to becoming carbon neutral.

It is not needed as business people have many effective means of electronic communication across the world and people's desire to go on holiday and airlines desire to make profit should not come above the safety of the planet.

We are already enduring numerous adverse climate events costing lives, health and millions of pounds. The Government should stick to its principles and policies and turn this down.

Thankyou for the opportunity of expressing my view
