Subject: TR020005 – Gatwick Airport Northern Runway
Date: 03 January 2025 14:11:01

[REDACTED]

We object to this application we live in [REDACTED] and are already under the flight path with constant noise both day & night from planes entering and leaving the existing runway at Gatwick airport. This will become very much worse if permission is granted for use of a second runway. Environmentally the damage to air quality, animal & birdlife and to flora and fauna will be irreversible. This application is completely opposed to any environmental improvement that needs to be made and given that as a nation we are supposed to be reducing greenhouse gases this will be directly the opposite. It seems to be a purely money orientated application and very definitely not environmentally friendly.
Mr David Roff & Mrs June Roff
