Dear Sir,

With reference to the 'Proposed Able Marine Energy Park' I wish to state my concerns about the loss of agricultural land at Cherry Cob Sands & Old Little Humber Farm.

I feel that the loss of any agricultural land is unacceptable, as too much has already been lost in the Holderness area through coastal erosion without it being artificially flooded.

The comments at 14.19 in the report in my opinion are not balanced as they do not take into account the whole of the Holderness area & other avenues still need to be explored which do not involve flooding agricultural land.

Yours faithfully,

Kay Burn
