

Representation – Able Marine Energy Park

Rule 17 Request for Further Information

Thank you for your e mail/Letter 28th June asking for clarification of a location known locally as ‘The Battery’ to which I referred to in my submission.

If the technology works attached should be a Google Earth map showing the location of the Battery in relation to Stone Creek. I have also marked the ‘Cherry Cobb Sands outfall into the Humber’ referred to in the Black and Veatch report Ref. 4.5.4.

If the technology fails then The battery is 1,870m bearing 139 deg. from Stone Creek sluice, 53°38'23.68"N 0° 6'45.05"W.
