

York Potash Harbour Facilities Site Visit Itinerary – 23 September 2015

Start Location Wilton Centre, Redcar, Cleveland TS10 4RF
Start Time 10:00am

Conduct of the Visit

The visit will be conducted on a minibus, which will be embarked and disembarked at the Wilton Centre. There will be no comfort facilities on the minibus or on the anticipated route of the visit.

During the course of the visit, the Examining Authority (ExA) will view the great majority of the relevant features from private land, so that only those who have registered to be on the minibus will be able to participate.

We have been advised that as a condition of entry on some of this land, all parties will be expected to provide photographic identification, comply with Health and Safety related instructions and make use of personal protective equipment (vests, hard hats & glasses). The applicant has offered to make some personal protective equipment available to parties accompanying the site visit, but they are not obliged to do so.

The ExA may ask or allow individual parties to point out features of the site during the visit, but will not hear submissions during the site visit.

Itinerary

10.00am Promptly

- | | |
