Dear Kath

**Able Marine Energy Park Material Change 2 application**

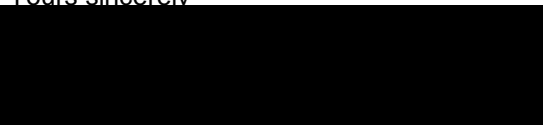

At today's Preliminary Meeting the Applicant undertook to provide:

- supplementary environmental information relating to the potential change to the construction sequence advised in our letter of 28 October 2021; and
- RIES screening matrices requested in the Regulation 28 letter.

As well as assessing the effect of constructing a northern revetment first, the supplementary environmental information also assesses the effect of construction without the cross berms that are intended to be made optional in the application to amend the Deemed Marine Licence, given that the existing assessment has assumed they would be constructed.

Please find these documents attached. To complete the suite of documents referred to in the 28 October letter, a version of the Draft Amendment Order (APP-059) showing the proposed alterations in tracked changes is also provided.

Yours sincerely

**Angus Walker**
