Planning Act 2008 (as amended) and The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 (the EIA Regulations) – Regulations 10 and 11

Application by Associated British Ports (the Applicant) for an Order granting Development Consent for the Immingham Green Energy Terminal (the Proposed Development)

Response to the EIA Scoping from North East Lincolnshire Council.

Dear Sirs,

Thank you for the opportunity to comment on the submitted EIA Scoping report provided by the Applicant. On the whole NELC are content with the scope of the proposed EIA, responses from internal consultees are provided at the bottom of this letter.

NELC would like to highlight the importance of fully understanding and considering the extent of any Hazardous Zones associated with the development and the land use planning implications of such zones. This should be through consultation with the Health and Safety Executive.

Many Thanks

Richard

Hi Richard,

I can confirm the proposed methodology for the assessment of both vibration and noise impact on nearest residential receptors is satisfactory.

AQ Officer has read and reviewed the proposed EIA Scoping report I can confirm they are happy with the suggested approach and methodology used to assess the potential air quality impacts and effects of the Project on human receptors.

Shaun has reviewed the submitted report entitled, Immingham Green Energy Terminal Environmental Impact Assessment Scoping Report, dated 26th August 2022 and in terms land quality (Section 20) agree with the scope and methodology presented.

Regards
