Subject: Sv: Notification to your Government as a European Economic Area (EEA) State under the EIA Regulations - Immingham Green Energy Terminal (MST Id nr.: 7306078)

To the planninginspectorate

Denmark thanks for the notification regarding the project: Immingham Green Energy Terminal and wants to participate in the further environmental assessment process.

The notification has been sent for consultation to several Danish authorities and interest organizations and has been published on the Danish Environmental Protection Agency's website. Consultation responses have been received from the following, which are attached to this email:

Authorities

- The Environmental Protection Agency; the units: Species and Nature Conservation:
The EPA's Species and Nature Conservation unit has reviewed the submitted screening document summarizing the potential transboundary impacts identified in the Immingham Green Energy Terminal EIA Scoping Report ('the Scoping Report').

Since specific bird species have been identified in the scoping report that can migrate between the project area and Denmark, it is the Danish Environmental Protection Agency's expectation that the project's impacts, including disturbance and displacement in both the construction and operational phases, loss of habitat and foraging area, etc., on populations of these species, will be fully explained in the upcoming environmental impact report and handled in the further process.

The Danish Environmental Protection Agency has no further comments and does not wish to follow the project further in the process of environmental assessment.

and the unit: Circular economy and waste:

"It should be included, whether the imported ammonium is to be treated as waste during the transboundary shipment. If the shipment is considered waste the Regulation (EC) No 1013/2006 of 14 June 2006 on shipments of waste (the WSR) would apply. If not, other relevant legislation and the consequences thereof should be considered."

If you have any questions, feel free to contact me.

Venlig hilsen
