Date: 04 December 2023 20:49:22

SECTION 56 OF THE PLANNING ACT 2008
ASSOCIATED BRITISH PORTS (IMMINGHAM GREEN ENERGY TERMINAL)
DEVELOPMENT CONSENT ORDER Development Consent Order under the
Planning Act 2008 (“the Application”).
The Application is Reference No. TR030008
Historic England Reference PL00793239

Historic England

The Historic Buildings and Monuments Commission for England (HBMCE) is better known as Historic England, and we are the Government’s adviser on all aspects of the historic environment in England, including historic buildings and areas, archaeology and historic landscapes. We have a duty to promote conservation, public understanding and enjoyment of the historic environment. We are an executive Non-Departmental public body and we answer to Parliament through the Secretary of State for Culture, Media and Sport (DCMS).

Proposal

IMMINGHAM GREEN ENERGY TERMINAL. Solar photovoltaic array and electrical storage and connection infrastructure, with a generation capacity of greater than 50 MW. *A multi-user liquid bulk terminal which would be located on the eastern side of the Port of Immingham (“the Port”), as well as associated development (collectively termed “the Project”). The associated development would comprise the construction and operation of a green hydrogen facility and landside works for the production of green hydrogen from imported green ammonia on site.*

Representation

We have had constructive pre-application engagement. Necessary further assessment to inform avoidance / mitigation of impacts upon potentially sensitive peat deposits and similar (which may span the current shore line) and interaction with unknown wrecks etc in the marine environment, should be secured under staged DCO requirements such that the results of investigations (carried out to approved methods including; reporting, archive and dissemination) inform subsequent phases of work whose methods and outputs are likewise subject to approval.

Yours sincerely
Tim Allen
