17 December 2024

Dear Transport Infrastructure Planning Unit,

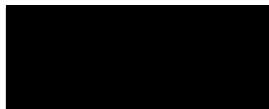

Planning Act 2008, Immingham Green Energy Terminal – MMO response to additional consultation letter

On 25 October 2023, the Marine Management Organisation (the “MMO”) received notice under section 55 of the Planning Act 2008 (the “PA 2008”) that the Planning Inspectorate (“PINS”) had accepted an application made by Associated British Ports (the “Applicant”) for determination of a development consent order for the construction, maintenance and operation of the proposed Immingham Green Energy Terminal (the “DCO Application”) (MMO ref: DCO/2022/00012; PINS ref: TR030008).

The DCO application seeks authorisation for the construction, operation, and maintenance of a multi-user liquid bulk terminal which would be located on the eastern side of the Port of Immingham (“the Port”), as well as associated development (collectively termed “the Project”). The associated development would comprise the construction and operation of a green hydrogen facility and landside works for the production of green hydrogen from imported green ammonia on site.

Following the close of Examination, the MMO received a letter from the Transport Infrastructure Planning Unit on 4 December 2024, requesting additional comments on the application with regards to the consideration of cumulative effects from the project on the integrity of designated sites within the Humber Estuary. The MMO confirms that these concerns were addressed throughout the remainder of the Examination process. Therefore, we have no further comments to make.

Yours Sincerely,

Emma Shore
