Hello there

I would like to point out that the squealing on the Redditch / Barnt Green railway line is at present as bad as it has ever been.

Despite much money being spent trying to sort out this problem to no avail.

I would therefore ask that the proposed three trains an hour is withdrawn - apart from them not needed - that you save your money or spend it on a more worthwhile project.

After fifteen or more years of complaining of the squealing, residents are fed up.

Before the "323" trains came into use, our lives were content, not now.

Regards

Janet Sly
