Subject: FW: Positive management within FC land - management plan

Hi Bart,

Unfortunately I didn't include your email address in my responses to the BIO questions. A bit of a major mistake I'm afraid, and my fault entirely.

My brief responses are in the forwarded email below. I appreciate we have now passed the deadline, and you may not be able to include them.

Kind regards,

Rob Cullen

Hi Liz,

Looks like you've covered everything, and I don't have much more to add. See below.

BIO 1.8 – No further comment

BIO 1.11 – Yes, under normal conditions

BIO 1.13 – See attached map. No further comment

BIO 1.16 – No further comment

BIO 1.18 – *I'm not what relevance FE's answer to this would have here? I'm satisfied that the work is in-line with our management objectives at Leigh Woods, but it is for Natural England to comment on how this mitigation fits in with SAC qualifying woodland habitats as a whole.*

Thanks,

Rob
