Subject: The West Midlands Interchange - The Gailey Freight Hub - Written response.
Date: 11 March 2019 01:40:11

The West Midlands Interchange
The Gailey Freight Hub

I wish to OBJECT to the proposed
West Midland Interchange
Gailey Freight Hub.

This Four Ashes Limited proposal is an unnecessary, unwanted and unacceptable development of a very large area of Green Belt land in South Staffordshire. This will have the effect of converting it from a mainly Rural Landscape to Heavy Industrial.

The proposal indicates that there will be a considerable increase in the volumes of Heavy Lorries using the A449 & the A5. These two routes are already extremely congested during most of the day, but are almost gridlocked at peak times. The resultant high levels of noise and CO₂ emissions are an unacceptable price for local residents and future generations to pay for the limited benefits of this proposal.

Further investigations should take place to locate a "Brown Field" site that is more suited to this type of development.

The adverse effect on the Health and Quality of Life of the residents presently living in close proximity to the proposed site will be considerable, and totally unacceptable.

IT IS THE WRONG DEVELOPMENT IN THE WRONG
LOCATION
THEREFORE THIS PROPOSAL SHOULD BE REJECTED

Gaynor E Caffrey
Brewood Resident
