To whom this concerns, I strongly protest to the RailHub at Four Ashes, ref No TR050005. The amount of traffic operating in the area 24hr a day will be intolerable. The access to the Rail Hub would have been more acceptable if it was built on and off the M6 instead of forcing heavy traffic onto A roads and village communities. I expect the people who are responsible for the design and construction of the Rail will not live and be affected by this massive project, and damage to the GREEN BELT.

Has anyone considered the possibility this distribution depot may become a centre for illegal immigrants coming in from Europe in shipping containers. Please consider our precious island we all live in and love.

Regards

Miles M Bickford
