Dear Sir

I am writing to object to the above proposal for the following reasons.

1. The application is for a interchange to be built right in the middle of precious green belt land which could result in yet further development. Green belt land must be preserved for the wellbeing of everyone's health.
2. The development will have a negative effect on the environment by pollution, air quality, noise, traffic and wildlife.
3. The estimate from the planners is of over 3000 lorries to access the development every day in an area that already has problems with narrow country roads often inappropriately used in emergencies.
4. There is a suitable alternative site using brownfield land which would have much less negative impact on the overall environment.

Signed

Lavinia Newell

local resident
