---

You are now being asked to adjudicate on a planning application which bears no resemblance to the original request

This was supposed to be a strategic rail hub

The purpose of which was to move freight from our overburdened motorway and roads

I fear this was never the case and only used as a method of circumventing the local planning

The local district council is in unison with its residents and would not allow this development

6 years to build a rail hub

This was the core reason for your inspection

This is now not happening

The decision needs to be returned to the local council
