Dear Inspectorate,

re EXQ3 - 3.1.1

There should be no way the applicant could build so much as a garden shed on Green Belt land before the rail infrastructure is in place. Their entire excuse to build this ridiculous project is that it was needed as a SRFI RAIL HUB. Without any rail connection it will be purely a road fed warehousing site which does not constitute "very special circumstances" to use Green Belt land.

This application should therefore be totally refused .
