Subject: Proposed wording amendment
Date: 31 January 2020 14:35:49

I am writing in response to the now proposed new wording of "should" instead of "must". This would increase the amount of lorries drastically as they would all be coming and going via the already overstretched roads and motorway networks. It would also increase pollution, noise levels and the carbon footprint throughout the UK as well as locally.

In conclusion I strongly oppose the new wording.

Regards
