---

Sir

I wish to put on record my disagreement with the proposed change of the wording that the first stage of the development **MUST** include a rail freight interchange to **SHOULD** include a rail freight interchange.

The whole premise of Four Ashes Limited original planning application was that it was a Rail Freight Interchange Development and that the establishment of the rail link was a pre requisite to any development of the site.

The wording change should **NOT** be permitted,

Regards

David Glennon
